THE MACKEREL FISHERIES.—*United States Commission, Fish and Fisheries, Sagadahock House, Bath, Me., August 28th.*—It may interest you to know the present condition of the Portland mackerel fisheries, as I learn it from conversation with several of the more prominent dealers of the place.

They say that mackerel have not been so plenty off the Maine coast for a number of years. A large fleet of vessels are fishing between Portland and Mt. Desert Island, taking mostly large number two's and all very fat. The vessels "fill-up" is from ten days to two weeks, sometimes bringing in a deck-load beside. A good many vessels from different parts of the State, and some from Cape Ann, are packing in Portland at $1.25 per bbl. All the packing houses are kept busy, and it is estimated by Mr. E. G. Willard that they have packed over 7,000 barrels in the three weeks ending August 23d. Of these he has bought and shipped over 6,000 barrels to parties in New York.

The price for two's three weeks ago was $5, but under the heavy receipts prices have gradually fallen, until Saturdy they were selling at $4.12½, and Mr. Willard thought that Monday they would reach $4.

Vessels fishing in the bay have done very poorly, and have mostly returned with "broken trips," or filled up on their way home, off this coast. Mr. Chas. A. Dyer gives me the following:—Schooner *M. E. Torrey* arrived home about August 1st, from a mackerel trip in English waters. She has gone five weeks at an expense for outfit of $470; she brought home 200 barrels of fish that sold at $3 per barrel net, of which the crew took one half. This left a loss to the vessel of $170 in money, beside loss of time and general wear. This represents a fair average, he thinks, of vessels in English waters in 1879.

During the same time of schooner *M. E. Torrey's* trip the schooner *Alice* landed from American waters 700 barrels of better fish, and stocked $2,500.

I know of but one Portland vessel in the bay at the present time, and she has not been heard from since June 25th, when she had 20 barrels. R. E. EARLL,

MR. G. BROWN GOODE, U. S. Fish Commission, Provincetown, Mass.

A BIG BASS.—Messrs. Chas. Mowry, of New York City, and John Mann, of Syracuse, were fishing in the Seneca River, at Jack's Rift, last Thursday, when Mr. Mowry captured what is said to be the largest Oswego bass ever caught with a fly in that stream. The fish weighed 5 lbs. 8 oz., and measured 21 in. in length, 15 in. girth, and 6½ in width. The day's fishing footed up a total of 64.

MASSACHUSETTS—*Plymouth Co., Sept. 3d.*—A large school of big blue fish struck in at lower Scituate Beach last week, and all present caught all the fish they could carry off. They drove in some of the largest mackerel ever seen here, some of which weighed four pounds. Smelt fishing has not been very good yet—too much heat for them. S. K. Jr.

NEW JERSEY—*Forked River, Sept. 13th.*—The fishing at this place still continues good. Messrs. L. W. Warner, W. H. Hall and son, and J. D. Anderson and son in three days' fishing caught over 200 weakfish and about 50 kingfish; some of the latter would weigh 2 lbs. each. Mr. W. C. Rogers and wife and Mrs. Edwin Adams of Long Branch, in the yacht *Haze*, have made an average of 70 fish daily during the past week. Bluefish are beginning to run, but no large catches have yet been made. A.

MINNESOTA—*Hastings, Sept. 8th.—Editor Forest and Stream*:—Our friend George Hicks came down from St. Paul for a little sport, and we hitch up and take a seasonable start for Trout Brook, the only trout stream in this part of the State. On our way out we take in the fields along the side of the road, and by the time we reach the brook we have fourteen chickens. Trout Brook is a small stream three miles long, and could easily flow through an ordinary length of six-inch stove-pipe. It is thirteen miles out of our city, a town of 4,000 inhabitants; three miles north of Cannon Falls, a town of 1,200; eight miles east of Northfield, a town of 2,500; twelve miles west of Red Wing, a town of 5,000, and as I said before is the only trout stream in this part of the State. So you can judge what the chances for a good basket are. The banks resemble a street in New York—they are worn so smooth by fishers. We are all very unsportsmanlike up here, and never fish with a fly, the worm having the preference; but please don't censure us. But back to my story. George is from Lake Superior, and avers that the stream is not big enough to hold a two-years-old trout, and lies down for a snooze. We know better; we have been there before, and start off alone. At the end of two hours we return with a basket of thirty, and our pocket scales are at once brought into play. Two of them weigh seven ounces, one eight, one nine, and one sixteen and a half ounces. The other twenty-five range from three to six inches in length. This would not be much of a catch for a New York sportsman, but we were justly proud. A large platter was procured when we got home, and it was a beautiful sight to see three nicely dressed young pinnated grouse surrounded by a "wealth of trout," lettuce, and sliced boiled eggs, laid out on it. TYRO.

—L. H. Abbey, of Abbey & Imbri, killed a fine lot of striped bass in Coney Island Creek Tuesday night. The largest one weighed 12 lbs. It was on exhibition at John Sutherland's in Liberty street Wednesday.

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We cannot attempt to give specific directions where to go for game or fish. Correspondents must keep themselves posted by consulting our news columns.*

☞ *We make no charge for answering inquiries in this column.*

W. T., Brooklyn.—The killing of robins is prohibited in New York State at all seasons.

W. H. B., Fisherville, N. H.—There is nothing you can do to cure your dog. He will probably cease having the fits as he gets older.

A. B. De L., New York.—There are no archery clubs in New York city. The Brooklyn Archery Club meets in Prospect Park Brooklyn.

F. H., Elizabethtown.—Please let me know the price of the cheapest gun made by Parker Bros., West Meriden, Conn. Ans. Fifty dollars.

J. M. M., Columbus, Texas.—The symptoms you describe are those of worms, and if you treat your dog for these parasites you will probably put an end to the fits.

T. W. A., Boston.—Would you be kind enough to inform me in your next issue the best place and season for brant? Ans. At Great South Bay, Long Island, in the Spring.

A. M. A., New York.—Does the recent State law prohibit the shooting of the bird commonly called highholder, and when is such law up in Richmond County? Ans. Prohibited always.

E. T. P., Washington, D. C.—We could not judge under what circumstances the accident occurred to your gun. It would be advisable for you to correspond with the makers who are very honorable gentlemen.

WEBB, Waterbury, Conn.—Excellent grouse-shooting may be had anywhere along the line of the Keokuk and Des Moines Railroad, from Grand Junction to Fort Dodge: also at any point west of Iowa Falls on Iowa division of Illinois Central Railroad. Conductors will give all needed information.

AXION, New York.—If the man is right-handed in wielding the axe he raises it over his right shoulder; if he is left-handed, over his left shoulder. But in chopping wood the axe is wielded over both shoulders. Charles Reade's ambidexterous coming man will probably strike the golden mean and bring the blow straight down.

C. F. W., Baltimore.—A friend of mine has a fine Irish setter gyp red in color; he had her lined by Rowdy, an Irish setter of the Baltimore kennel; she had seven pups, three are as black as black can be; would you call them full blooded Irish pups or not? Ans. There is something wrong: she should not have thrown the black puppies.

R. W. A., New Haven.—1. I notice in your issue of the 3d of July, under the heading of New York Game Law, Sec. 7, that ducks can be shot from vessels propelled by steam or sails, in Long Island Sound. Where is the dividing line for the State of Connecticut? 2. What about Sec. 8—does it read right? Ans. 1. At the State line, of course. 2. Was inadvertently misprinted, and should have read exactly opposite.

H. H., Philadelphia.—I have a black and tan terrier who has been troubled for sometime past with fleas; have tried to rid her of them, but up to the present have been unsuccessful. Will you please inform me through your paper what is the best thing to use in such a case? Ans. Steadman's pea powder advertised in another column will rid your dog of fleas. If one application is not sufficient, try another.

CONSTANT READER, Newark, N. J.—At Mt. Desert, Me., you will find excellent trout fishing in Eagle Lake, which is two miles from Bar Harbor. Jordan's Pond, reached by wagon road from the harbor, is also a good trout water. You will find plenty of desirable camping grounds in the vicinity. The main fish in season in July are black bass, land-locked salmon, salmon and shad after the 15th. Great South Bay, L. I., is an excellent place for duck shooting.

R. A. G., Hartford.—May I trouble you for the name and address of some one at Lake St. Francis or St. Peter on the St. Lawrence who can give me information about the shooting there? Is the name Henry Merrian, who writes from Harwood P. O., the persons real name? Ans. For guides on Lake St. Peter, &c., write to F. S. Wotherspoon or Manasseh Smith, Three Rivers, P. Q., Canada, who will inform you. Henry Merriam keeps a small hotelery at Harwood, Rice Lake, Ontario.

H. J. M. C., Brookline, Mass.—I have seven setter pups, five of which have dew claws. The [illegible] would it do any harm to cut these claws off? If to be removed please state with what instrument? Ans. If the dew claws are merely attached to the leg by integument they can be removed with a sharp knife, taking back sufficient skin to cover the wound which removal will occasion. If they are regularly formed and attached to the bone we should not touch them.

PERRIX, Staten Island.—My setter has been going more or less lame for the last two months, especially after jumping; and the other day I discovered that the cause of it was evidently owing to the sinew of the near foreleg being greatly enlarged, its size being nearly equal to one's little finger, while the corresponding sinew in the other leg is only the size of whip-cord. I have been rubbing the leg with strong liniment for several days, and the fever and swelling around part affected has considerably gone down, but the sinew is still very large. Would you advise continuance of treatment? Ans. Your dog has evidently sprained his leg. You should first allow him perfect rest, particularly as far as jumping is concerned. You might bathe the leg with Pond's Extract, and if the swelling of the sinew is not reduced in a few days, paint it with iodine. It will never get well, however, if you continue to exercise the dog.

FISHING STATISTICS.—The following statistics have been published by Secretary Evarts as a *mem.* for the United States and England:

The comparative chances of professional men catching anything when they go fishing are:

Doctors	7 in 50	Merchants	18 in 50
Lawyers	3 in 50	Professors	1 in 50
Editors	10 in 50	Unknown small boy, with straw hat and broken suspender	49 in 50
Artists	2 in 50		
Architects	12 in 50		
Bookkeepers	8 in 50		

FOREST AND STREAM
ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY.

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement of a business notice of an immoral character will be received on any terms.

*** Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, SEPTEMBER 18, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remited to us is lost.

THE END OF SUMMER.—The current week closes the summer season, equinoxially and otherwise. Fashion is arbitrary, and all the endeavors of landlords to make their departing guests believe that the Indian summer is the most delightful season of the year to dwellers in the country; that the gorgeous autumn tints are more engaging than the vivid midsummer verdure, and the air of October more health-giving than the zephyrs of July; do not suffice to prevent their flight when the stated hour arrives. This week the theatres and operas make their fall announcements, straw hats go out of date, swimmers leave the brine, yachts are laid up in ordinary and fishing rods give place to guns. The blare of the horn and the voice of the hounds awake the dells; the programmes of the rifle ranges are announced; newspapers teem with advertisements of fall meetings of famous flyers, aquatic contests of famous boatmen, and pedestrian matches between noted walkers. Meanwhile lawn games are on the wane, and the cricketers and base ball men gird themselves for the final contests of the October fields. Conspicuous among the events of the current month are the Brighton races, the cricket matches with the Irish team, the Hanlon-Courtney boat race, and the great pedestrian match at the Madison Square Garden.

THE RAILROAD CONVENTION JUST HELD.—When the semi-annual Conventions of the general passenger and ticket agents are held in this city, we feel as if a host of our friends had arrived in town, for we are kept in constant communication with these gentlemen, to whose courtesy sportsmen owe so much, and, we may add, who in turn owe much to the travelling sportsmen. The chief business before the Convention was the agreement upon a uniform tariff rate from New York to all points; and we are glad to be assured of the satisfaction expressed by the delegates at the revival of business throughout the country. The Convention adjourned to meet in Cincinnati next March.

SIR ROWLAND HILL.—Every reader of this paper, who receives his FOREST AND STREAM regularly each week free of postage, owes a debt of gratitude to the memory of the late Sir Rowland Hill, who died in Hampstead, England, August 27th, aged eighty-four. It is to the efforts of Mr. Hill, that in 1839 the reduction in postage rates, the abolition of the grossly unjust franking privileges, and other postal reforms were inaugurated. The results of his efforts are enjoyed by the civilized world to-day. Perhaps we cannot better realize just what our postal facilities are than by attempting to picture to ourselves the year 1879 without them.

—The Piedmont Agricultural Society Fair will be held at Culpeper, Va., Oct. 14th to 17th.

A WESTERN FISH CULTURAL ASSOCIATION.

A NUMBER of gentlemen who are prominently identified with game protection and fish culture, including some past and present State Fish Commissioners, have signed a circular letter, in which they solicit co-operation in organizing a distinctively Western Fish Cultural Association. The effort is praiseworthy, and while we are by no means sanguine as to the great results which seem to be anticipated therefrom in keeping up the native fish supply of the West, the enterprise will receive our countenance and cordial support. As journalists we have had much to do for years past with the organization of combinations for scientific labor, and must confess that the results have not been such as to encourage a hope for the success of effort applied in that way—whether we refer for example to the International Association, which seems to have quietly breathed its last, or to the National Sportsman's Association, whose deliberations at its last annual convention were confined to a single delegate! It seems impossible to secure complete unity of purpose or harmony of action between interests which are purely local or dissimilar, or to bring about individual compromises or concessions. Indeed, after so many years of experiment and endeavor, we are not positive that better results cannot be obtained from a *division* of labor.

The American Fish Cultural Association composed of naturalists, fishermen, fish mongers, fish breeders, and others interested in the subject, is an institution which has existed for many years. Its scientific discussions have been learned and useful, but its economic results have not been sensibly apparent. Transplanted fish we find cannot be made to thrive in localities where they are not indigenous; nor can foreign animals be permanently engrafted upon the fauna of another country. The Creator has managed the distribution of species, and man's efforts to change their habitat can never be more than partially successful. The cisco, the whitefish and the lake trout will always be most at home in the great lakes; the basses, the perches, and the esocidae in the vast middle tier of States; the shad, the salmon and the striped bass in the East; and the carps and the suckers in the warmer waters of the South and the great plains. On the Pacific coast is a system of fauna almost wholly distinct—barred out by an impassable mountain range. Nay more; all the combined science of fish culture seems unable to rehabilitate fresh waters which have passed within the precincts of civilization, or to produce by artificial propagation more than a flabby and insipid counterfeit of their natural denizens.

We do not mean to assert that fish culture is a failure; for as long as fish food can be produced, no matter how inferior in quality, or one single variety of our ichthyc fauna can be made to swim and thrive where nothing swam before, the efforts of persistent planters have their signal reward. Certainly the shad seem to have been measurably restored to our waters, and some other varieties of fish appreciably.

It may be that a Western fish cultural association with Eastern representatives, may accomplish more than our Eastern association with Western representatives has hitherto done. It may prove, indeed, that merely annual discussions and the reading of the written experiences of a miscellaneous body of men more or less interested in fish, will lead to results of a more practical value than the daily business operations of individual breeders like Garlick, of Ohio, Douseman, of Illinois, Palmer, of Wisconsin, and Gerome, of Michigan. But on these points we have misgivings. We are beginning to learn from the success of the States of Delaware and New Jersey, and of the Provinces of New Brunswick and Nova Scotia, that residents are more competent and better interested to look after their local affairs than non-residents are, and that their laws and contrivances for protecting game and propagating fish are attended with more satisfactory results than elsewhere; and taking our cue therefrom we may be excused for supposing that the fish culturists of Ohio, for example, are better able to look after their own productions than are the combined and associated fish culturists of the Western States.

It is true that the great basin of the Mississippi embraces many States of homogeneous interests, which its inhabitants might wish to mutually watch over and foster; nevertheless, we doubt if the deliberations of any Western fish cultural association, however constituted, will be able to add one jot of information or usefulness to the labors and investigations of the United States Fishery Commission, or promote in any more efficient manner the universal work which is in progress and being undertaken throughout the country. Besides, after the *eclat* and enthusiasm of the first convention, and the pleasure of the social intercourse of delegates, and the interchange of views, the interest will rapidly languish. Gentlemen who enlist in a public service cannot be induced to travel long distances from all parts of the country, year after year, to attend representative meetings; most of them cannot afford either the time or the money. They will want mileage and good pay, just as State legislators do. The question naturally presents itself whether their labors could not be more profitably employed as local forces. Our advice would be to let each State take care of its own.

DUTIES OF SUMMER RURALIZING.—The *Christian Union* has very pertinently said:—

It is a shame to us that when we go into the country we are not mindful of its people; that we concern ourselves so little about their life, and fail to give them that contact with the outside world which it is in our power to give, and which might stimulate and refresh them for the better performance of their toilsome work. It is impossible to say how large an influence might be exerted by the Christian culture of our cities upon the rural population, broadening their scope and lightening their burdens, if every guest at our summer resorts did his or her part to this end.

Because, however, a man is a tiller of the soil, and Nature is in a sense his taskmistress, he need not on that account have any the less keen appreciation of her charms. If hitherto he has only valued clouds as storehouses for the spring and autumn rain or the summer showers; if the mountains have been nothing more than reservoirs for the rivers that turn his mills or bear his produce down to market; if the valleys are only convenient outlets to the world beyond; if the bird's voice in spring has no meaning beyond its prediction of an approaching season of work; if the early violet has only the same significance; if

> "A primrose by a river's brim
> A yellow primrose [is] to him,
> And nothing more,"

then let him awake to the fact that a wonderful world exists all around him into which he has never as yet gazed. If he will but look, the clouds will take on new and beautiful shapes; the mountains will clothe themselves in ever-changing hues; the rivers will dash and sparkle with new life at his feet; the valleys will fill themselves if not with fauns and dryads, as to the imaginative Greek, at least with the myriad tones that harmonize into nature's symphony; and the birds and the flowers will speak to him, if he will but listen, of the munificence of nature and the countless uses to which her gifts may be applied.

The true milk of human kindness flows out with the utterance of every word above spoken. It is to some such noble mission that a portion of the work of FOREST AND STREAM is devoted each week. We constantly endeavor to infuse into the mind of every farmer and farmer's child, that interest and love for natural objects which a habit of study and investigation inspires; and we find reciprocal pleasure in receiving from attentive and constantly studious readers the weekly contributions of items and observations which help to fill our Natural History Department, and add so much to its value. City people who spend the summer in the country can see more readily the charms and beauties which there surround them, because their sense of enjoyment is keener through the novelty that meets them everywhere; and they are apt to appreciate their surroundings more than residents do who are accustomed to see them every day. What we all need to learn, however, is to make the most of the good gifts which the Great Giver has so bounteously bestowed, by elevating our tastes and stimulating our capacities for enjoyment.

COURTESIES FROM CONTEMPORARIES.—When we came out a month ago with a clarion crow from the top rail of our front fence proclaiming that we had donned a new set of type and inviting our friends to examine us, we had no idea that the notes would resound throughout all the land and that our newspaper contemporaries would take up the call and re-echo it from North to South and from East to West, as we find they have done. The congratulations and praises which we have received are so spontaneous and evidently sincere that we have been quite taken aback, as seamen say. Throughout a long period of journalism covering twenty-seven years we have never noticed such positive tokens of esteem and good-will. Evidently our friends have our welfare at heart. One of them, the *Catoctin Clarion*, a Maryland paper, has become so interested in us that the editor has actually taken time to count the articles we have printed in a single six-months' volume. His enumeration has gratified a natural curiosity of our own, and as it may also interest others we give it as we find it in his paper, to wit:—

Answers to correspondents, 1,009; editorials, 195; fish culture, 88; game protection, 100; game bag and gun, 170; kennel, 198; miscellany, 69; natural history, 179; new publications, 20; poetry, 19; rational pastimes, 98; the rifle, 157; sea and river fishing, 122; brief notes, 100; woodland, farm and garden, 38; yachting and boating, 340. [Chess not enumerated.]

Our own estimate would be still larger, but the above is acknowledgment enough. The subjoined fifty notices, so promptly given, afford a fair measure of popular opinion. They are only about half of all we have received, and doubtless very many others have escaped our attention. It is gratifying to find that our friends are so numerous and so earnest, and that they are found in the remotest villages of all sections as well as in the prominent cities. For a paper to acquire so wide a celebrity in the country as ours has done in the short space of six years is something unusual. It is this wide circulation which gives a paper its influence and insures its permanent support. We feel positive that no other journal of any character whatever, of the same circulation, is so widely scattered at home and abroad. FOREST AND STREAM circulates not only in every State, Territory and Province of America, but in thirty different foreign countries. It is now in its seventh year.

May success and continued prosperity attend all of those contemporaries whose courtesies have been so cheerfully

extended to us. Our thanks are herewith cordially proffered.

CLEOPATRA'S NEEDLE.

Among the noteworthy undertakings of to-day is the expedition to Alexandria to take down the world-famous Cleopata's needle from its present position and to transport the same to New York City, where it is to be erected as a memorial to the young Republic of the glory of ancient Egypt. This is a work which must prove of the deepest interest to all students of mankind. The wonderful changes of time will be emphasized in a most stupendous manner when the hurrying living throngs of to-day gaze upon this silent yet eloquent monument of an extinct civilization.

Prompted by the success of England in setting up in London, the Alexandrian obelisk, a public-spirited citizen of New York has assumed the financial responsibilty of removing the Cleopatra's Needle to America. Concerning the present progress of the undertaking the *World* of a recent date says :—

The readers of the *World* will learn with pleasure, we are sure, that Lieutenant-Commander Gorringe, of the United States Navy, will sail from this city to-day in company with his assistant, Lieutenant Seaton Schroeder, for Liverpool on his way to Egypt, there to superintend the taking down, shipment and transportation to this country the world-famous Cleopatra's Needle, a monument conspicuous in the history of mankind for twenty centuries past, and now through the liberality of the Egyptian Government to become a permanent and most interesting feature of this metropolis. For some time past Lieutenant-Commander Gorringe had been superintending the construction, at the iron works of the sons of the late Mr. Roebling, at Tranton, of the machinery devised by himself to be used for the removal and shipment of this great monolith. This machinery will aggregate about eighty tons in weight. It consists of two towers each twenty-six feet in height, which are to be shipped in sections and put together after their arrival in Alexandria, of two steel castings each weighing over six tons, and of a cradle sixty feet in length. The towers correspond to the sides of a gun carriage and the castings to the trunnions of a gun. Like the machinery for handling the monster gun of the colossal Italian ironclad Duillo, this machinary for moving the Alexandrian obelisk will command the critical attention of machinists and engineers, and it is most satisfactory to know that the work of transferring to the New World the first great Egyptian monument which has ever crossed the Atlantic will be carried out entirely under American auspices, though it ought not to be forgotten that we are indebted for the first hint of the feasibility of such an acquisition to a distinguished English engineer, Mr. Dixon, of London, who laid the subject two years ago before the Editor of the *World*.

Lieutenant-Commander Gorringe, to whom the work has been confided, returned to this country recently from a cruise of eighteen months on the Mediterranean, during which, in command of the United States ship *Gettysburg*, he thoroughly surveyed the shores of the Levant and made himself entirely familiar with the harbor of Alexandria and with the conditions under which the monolith is to be handled. He will enjoy also the advantage of a full and friendly understanding with Mr. Dixon, who conveyed the sister obelisk from Alexandria to London, and who has in the handsomest manner put all his experience and all his information thus acquired at the service of Lieutenant-Commander Gorringe.

The method of embarking the obelisk which is to be adopted by Lieutenant-Commander Gorringe will interest and be appreciated by all seamen. A steam collier having a water-ballast compartment will be secured alongside of the pier and the necessary preparations made for heaving her down to careening lighters placed alongside on the side opposite the pier. The water-ballast compartment will be filled. A port having been opened to admit the obelisk into the fore hold it will be launched in. The listing of the steamer from taking its weight will be overcome by heaving down on the careening lighters, and the sinking due to both operations will be counteracted by pumping out the water-ballast compartment, thus removing a weight of water corresponding to that of the obelisk. Tidal and windrift differences of level will be overcome by means of a float secured at the shore end after the fashion of a ferry-ship. The progress of Lieutenant-Commander Gorringe in this enterprise will be watched with deep interest by all intelligent people in this country, and the American public will be kept fully and accurately informed of it from time to time in the columns of the *World*.

A TRIP TO NORTH PARK.

(THIRD PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

THE Laramie Plains, over which the first few miles of our journey led us, comprise nearly 3,000,000 acres of comparatively level or rolling prairie land. The section is essentially a grazing country, although there are not wanting, along the streams, considerable tracts of agricultural land. The elevation is so great, however—over 7,000 feet—that stock raising will always be the most important industry here. Nothing, it would seem, can check the progress and increase of this source of wealth except a winter of exceptional severity. The Laramie Plains are well watered and the feed, which consists of native grasses cured standing on the ground, is most nutritious. Through cattle, that is, cattle which have been driven from a distant point during the summer, and which reach their range worn out and thin in flesh in the fall, come out in spring fat and round, in fact, fit for beef.

In 1860 General Reynolds wintered with a small force in the mountains on the northern edge of these plains, in what are now known as the Freeze Out Mountains, and turned out his horses to find their own living until spring; the animals being all broken down and unfit for use. When they were gathered in the spring the horses were found to be fat and in good order, only one of them having been lost. In his report General Reynolds says :—"This fact, that seventy exhausted animals, turned out to winter on the plains the 1st of November, came out in the spring in the best condition and with the loss of but one of their number, is the most forcible commentary I can make on the quality of the grass and the character of the winter." There are many thousand head of cattle already on these plains, and in the little valleys through which flow the numberless small streams which empty into the Big Laramie, the Medicine Bow River and the North Platte, several individuals have large herds of horses, both mustangs, half-breeds and American horses. Here, too, sheep raising has been undertaken on a larger scale and more successfully, I believe, than on the plains east of the mountains. The breeder purchases Mexican ewes, and by means of Merino rams soon grades his flock up to a higher standard. Some Cashmere goats are occasionally to be seen with the sheep and it is to be hoped that the experiments in this line may prove successful. The annual increase in a flock of sheep is usually eighty per cent., and as the expenses of the business are light, the profits to a man whose luck is good are heavy. There are instances on record where capital has been doubled in two years, but this requires unusually careful management. The sheep are herded during the day and are always folded at night. Sheep for mutton sell at Laramie for from $2.50 to $3 each, and wool brings from 18 to 20 cents per pound. The yield from the Mexican sheep is only about two pounds, but each cross with the Merino increases the weight of the fleece about a pound, and the quality of the wool is improved with each cross.

It is in cattle, however, that the largest sums of money have been made. The vast herds which are driven each year from Texas, fattened on the nutritious bunch grass which covers the prairies, have proved better investments to their owners than the richest mines. This industry, which has sprung up on the plains and in the mountains within the last ten years, is constantly increasing in importance, and bids fair before long to rival in extent and the amount of capital invested in it, the wheat growing operations in the trans-Missouri States and Territories. We may expect before long to hear the beef crop spoken of in the same breath with the corn and wheat crops.

Texas cattle have in the past been the stock in which most of the cattle men have dealt. Driven from Texas in the early spring, they reach the line of the Union Pacific Railroad in midsummer, and are then somewhat thin in flesh, but it takes them only a month or two to become fat enough to withstand the winter's cold, and by the middle of the succeeding summer they are fat enough to sell for beef. Men who intend to start a herd usually purchase a number of yearlings, two and three year old steers, and also some cows and heifers with which they turn out a number of well-bred bulls, so that the standard of the beef raised is being constantly improved. Steers are usually sold at four years old and bring $25 to $35. The prices paid for through cattle of course vary from time to time, but yearling steers or heifers can usually be bought for $8; two-year-old steers for $14; cows for about the same price, and three-year-olds for $18 to $20.

What are called native cattle, *i. e.*, cattle which have been driven from Utah, Montana, Oregon, or Washington, are now held in more esteem than Texans or their descendants, and I believe command a higher price in the Eastern and other markets. They are said to fatten more easily, to make better beef, and to be much more easily handled than their wilder brethren from the South. Still it must be remembered that the Texas cattle of to-day are by no means the same or similar to the beasts that were driven from that State ten or fifteen years ago. Cattle have been improved in Texas as elsewhere, as the statistics of the numerous importations of thoroughbred bulls in recent years would show, had we them at hand. So much is this the case that at present it is very unusual to see in the great annual drives a single old-fashioned Texas steer, all horns and legs: this form of animal has almost entirely disappeared.

The cattle having been purchased and turned out on a good range, the subsequent expense is merely nominal. One herder to every three hundred head is a fair estimate as to the number of hands to be employed, and these men can readily be hired at from $30 to $40 per month and board. Calculations made by reliable parties indicate that it costs about $4.50 to raise a steer to the age of three years and market him. If these figures are reliable the business is evidently a profitable one. It is said that in the past 40 per cent. on capital invested has been the average profit made by cattle men.

The last of May is the season for the "round up." By this time most of the calves have been born and are running, unbranded, of course, with their mothers. The stock men start out and gather the cattle from far and near, until a herd of 5,000 or 10,000 has been brought together. These are driven along, and as the ranch of each owner is passed the cattle are halted, the herd is looked over, and all the animals bearing the brand of this particular owner are "cut out" and held near the ranch for a few days. The remainder of the herd is then driven to the next ranch, where the same performance is gone through with, and so on until all the cattle have been sorted out. The calves, of course, remain with their mothers and are branded and ear-marked at once. A majority of each owner's cattle will be found on his own range, but some, mixing with the herds of different owners, wander 200 or 300 miles in the course of a season. It is astonishing to note how few cattle perish in winter and how small is the annual percentage of loss from all causes. Six per cent. is the highest allowance I have ever heard made and 2 per cent. the lowest.

It was estimated in 1878 that in Nebraska, Colorado Wyoming, Utah and Montana there were 1,525,000 sheep and 1,540,000 cattle, and any one who appreciates the enormous area of country covered by these States and Territories will see that the business to which we have referred is as yet in its infancy. There is room for millions of head, and the industry is constantly growing. Horses, too, as we have said, are being reared in large numbers, and the cross of the mustang with good American horses produces an animal unequalled for toughness and endurance, and yet with the size which the mustang lacks. Balch & Bacon, near Laramie, have a herd of over 1,000 head of horses, and many others have gone into the business, but on a smaller scale.

All this is digression, to be sure, but the subject is such an interesting one that I feel tempted to write even more fully about it than I have done. Perhaps, however, I have said enough to indicate the importance of the topic. I should add, perhaps, that the shipments of cattle—fat cattle, be it remembered—over the Union Pacific Railroad in 1877 were 95,000 head, one man alone, Mr. J. W. Iliff, since deceased, having shipped 15,000 of this number. I should say, too, that hay in this region is never fed to the range cattle. Most stock men cut a small quantity to feed to their bulls, which are kept up during the winter, and to their riding ponies, but the cattle shift for themselves. The snow rarely falls to any great depth and never lies long upon the ground. Even if it does not melt it is usually swept off by the winds, which are very severe during the winter. Sheep are usually fed hay.

My next letter will, I presume, be written in North Park, and I shall hope to be able to give you *novedades* of fine scenery among the snowy mountains, and perhaps of some interesting facts with regard to the fauna of the region.

Laramie, Wyoming.

—Remark of the oyster—"Here we R again."

The Rifle.

THE MANIPULATION OF CANNON.—Relative to the recent statement of our correspondent, "Ego," that the premature discharge of cannon is often caused by removing the thumb from the vent, a reader sends the following communication to the Troy *Whig*, from General Hagner, commander of the Watervliet Arsenal, relative to an accident almost identical with the one described by "Ego:"—

Editor Whig:—A news item published in your paper this morning stated that a man was injured by the premature discharge of a cannon he was loading to fire a salute on the Fourth of July, at Round Lake, and the reporter goes on to say, "the man who was covering the vent of the cannon with his thumb removed it, causing the premature discharge of the piece."

This opinion, so confidently expressed, giving no doubt great distress to the man who had "tended vent," that he could have caused, or prevented premature explosion by removing or retaining his finger on the vent—after the cartridge was introduced into the gun—is certainly erroneous, and I feel sure from my long experience in supervising the firing of cannon, that the poor fellow who is thus blamed may entirely acquit himself of being the cause of the disaster. The effect intended by closing the vent with the cushion of a thumb-stall while sponging the gun, is, that if any portion of the cartridge bag be left in the gun after the last fire, the sponge pushed down upon it would extinguish a live spark if the air was excluded from entering the vent. Hence the time when the closing of the vent can, even theoretically, do any good, is during the operation of sponging, for of course, when the sponge is out of the bore and the loose fitting cartridge is pushed in by the small rammer head, no exclusion of air can be effected by stopping the vent, and should the cartridge be ignited during the loading (by fire remaining in the bore) the effect of the vent being closed would be, that the thumb closing it would be blown off, as well as the arm of the man using the rammer. The moment the sponge is withdrawn, therefore, the thumb should be removed as it has then done all the good possible. I am myself convinced that the theory upon this subject is practically of no value; no sponge excludes the air so completely as to produce a vacuum even in the bore of a field-gun when the vent is completely closed, and in larger guns as bristle sponges and spring sponges are now used, of course no such effect can be produced; hence tending vent is unnecessary. The best precautions to urge upon all persons firing muzzle loading cannon are: First, use woolen cartridge bags, flannel, serge or merino; second, never use a soaking wet sponge, the water should all be pressed out leaving it damp only; third, be careful not to fire a blank cartridge with the bore elevated, let it rather be a little depressed so that no water may rest at the bottom of the bore; fourth, sponge carefully, pushing hard against the bottom of the bore and turning the sponge in the hand as it is withdrawn; this will gather together any fragments of the last cartridge bag and withdraw them from the bore; fifth, let number one, who loads, be careful to expose one hand only in front of the bore—no more is needed—and sixth, remember that the most probable cause of premature explosions in firing cannon is, that too wet a sponge used in a gun slightly elevated leaves water at the bottom of the bore, wetting the powder and the bag. When the gun is fired, the wet powder saturating parts of the bag forms a slow match, which, left in the gun by hurried sponging, spits out fire enough to ignite the next dry powder that touches it, and blowing out the rammer even before the cartridge reaches the [illegible].

P. V. HAGNER.
Bvt.-Brig. Gen'l, Colonel of Ordnance.

EVERLASTING SHELLS.

NEWARK, N. J., *Sept. 13th.*

Editor Forest and Stream:

In your issue of the 11th inst. I notice a communication from Texas signed "Bexar," in which the writer finds considerable fault with the "everlasting shell" used by him in the Ballard rifle. I should judge by the tone of the article that "Bexar" must be a habitual fault finder. He had no better luck with his shot gun than with the rifle, and it appears to me that the fault does not rest entirely upon the shell. I have a Ballard rifle and fifty everlasting shells, which I have used over a year. I have fired a great many shots in that time, and as yet I have not found one poor shell. On Tuesday last I began shooting about 8 P. M. and continued for about four hours, using but one shell. I have done the same thing a number of times before, and have never been troubled with expansion in the slightest degree. I have never been troubled with the extractor failing to eject the shell, and I have never seen any trouble of that kind where the owner of the rifle takes pride enough in the same to keep it clean. It is very easy to pull a boot out of a pool of clear water, but not so easy to get out of a mud-hole. My rule is—use plenty of lubricant, and blaze away. I have fired as high as seventy-five shots without wiping the rifle, and the result of the last shot was as good as the first. I know nothing about the climate of Texas, and as it would not look well to accuse "Bexar" of negligence in the care of his rifle and shells, I will lay the blame entirely upon the climate, and advise "Bexar" to seek a different climate, and his everlasting shells will not expand, but will remain, as they are rightly named,

EVERLASTING.

OIL CITY, *Pa., Sept. 13th.*

I see by your correspondent "Bexar" in your issue of the 11th that he is having considerable trouble with his everlasting shells for his Ballard rifle.

Last winter I purchased a 40-calibre mid-range Ballard. I had at first the same trouble with the shells that "Bexar" complains of. By advice of H. M. Farrow, Esq., I twisted each shell a number of times in a piece of emery cloth, since when I have had no trouble. I have used each shell I think at least forty times since I rubbed them down on the emery cloth, but since then I have had no trouble. I think it necessary, however, to keep the shells and rifle chamber very clean.

I imagine with my Ballard I can bore a deer from stem to stern, using 65-grains powder, at any fair distance. I mean to try it in November. We have plenty of game of all kinds this season.

"BELL MUZZLE."

CANADA.—The general competition of the Dominion Rifle Association opened at Ottawa on the 16th. The meeting is likely to be the most successful yet held on the Rideau River. There will be sixteen targets in operation, nine of Brunel's system, three of Cassel's, two of Baeen's and one Beers', also one target for the 1,000 yards range. At the conclusion of the competition the prizes are to be presented to the winners by Her Royal Highness, Princes Louise. The ceremony will likely take place in the Senate Chamber. Nova Scotia sends a strong team of 15, and others fine sets of men. Over $3,500 are offered, in addition to cups and rifles. Interest is also attached to the match because the four targets, all patents, are to be tested for government purposes during the match. No American will participate, although there is a competition open to all comers, for a purse of $400.

MASSACHUSETTS—*Boston, Sept. 12th—Mammoth Rifle Gallery.*—The regular monthly prize shoot is progressing finely. Mr. S. B. Braun, of New York City visited the gallery and made a fine score of 38, and now heads the list of competitors. The following is the standing of the several competitors to date: 150 feet; rounds 8; possible 40:—

S. B. Braun	5	5	5	5	4	4	5	5—38
U. A. Pollard	5	4	4	4	5	5	5	5—37
E. Whittier	5	5	4	4	5	4	5	5—37
C. Eastwood	5	5	5	5	4	4	5	4—37
W. H. Harrison	4	4	4	4	5	5	5	5—36
John M. Edson	4	5	4	4	4	5	5	5—36
Henry Lowell	5	5	4	4	4	5	4	5—36
J. M. Goldsmith	4	4	4	5	5	5	5	4—36
George Estes	5	5	5	5	4	4	4	4—36
M. O. Johnson	4	4	4	4	4	5	5	5—35
N. Taylor	4	5	4	4	4	4	5	5—35
H. K. Leyman	5	4	4	4	5	4	4	5—35
Geo. M. Smith	4	5	4	4	4	5	4	5—35

Boston, Sept.—There was a good attendance of members of the Massachusetts Rifle Association of to-day's meet at the range at Walnut Hill. The competition in two matches were quite spirited. The weather conditions were goods, the light being excellent, and the wind, which ranged from 7 to 8 o'clock, was very steady. Appended are the best scores made in the amateur series:—

D. Whittier	4	5	4	4	5	5	4	5—44
C. Doyle	4	5	4	5	4	4	5	3—43
R. A. Blood	4	4	4	3	5	4	5	4—41
A. B. Archer	4	4	4	5	4	4	3	4—40

In the "Silver Ware" match, the following scores are the best:—

W. Charles	4	5	5	4	4	4	5	5—38
J. Nichols	5	5	4	4	4	4	4	4—31
H. L. Lee	4	4	4	5	4	4	5	5—30
E. Whittier	4	5	4	5	4	4	4	4—30
J. Borden	4	5	4	5	4	4	4	4—30

—The Raymond Sportsmen's club held their regular competition in glass ball and rifle shooting Sept. 12th, at Bellevue range, Medford. There was, as usual, a large number of the sporting fraternity present. The weather conditions were favorable, and the competition in the handicap rifle match was well contested, Mr. J. S. Bennett coming to the front with a good 46 out of a possible 50. The following are the scores in the same, distance 200 yards, rounds ten:—

J. S. Bennett	4	5	4	5	4	5	4	5	5	5—46
J. B. Teele	5	4	5	5	3	5	5	5	4	4—45
D. Kirkwood	5	5	4	5	4	4	5	4	4	4—44
G. B. Blanchard	4	4	5	4	4	4	5	4	5	4—43
G. E. Everett	5	4	4	4	4	4	5	5	4	4—43
J. Harten	5	5	4	4	4	4	4	4	4	4—40
J. C. Smith	4	4	4	3	4	4	3	4	4	5—39
C. P. Gleason	3	3	3	4	4	4	4	5	4	4—38

Mr. G. B. Blanchard succeeded in scoring 29 out of a posssible 30 in the handicap glass ball match, the result of which is as follows:—

	Single Trap.	*Double Trap.*	*Rotary Trap.*	*Total.*
G. B. Blanchard	10	9	10	29
J. C. Smith	10	8	7	25
D. Kirkwood	9	8	8	25
R. J. Fish	10	5	9	24
J. B. Teele	8	5	8	21
G. H. Fox	7	7	3	17

Hopkinton, Sept. 10th.—The Rifle Club held a shoot at their range at Claflin's Grove last Saturday. The weather conditions were not very favorable, but some respectable scores were made. The "blackbird" and the "mag" were frequently shown. The conditions were 500 yards, ten rounds, with a possible 50. The following were the best scores:—

P. W. Smith	5	4	5	5	4	5	5	5	4	5—47
D. C. White	5	5	5	4	3	4	4	3	5	4—42
E. Rose	4	3	4	4	5	5	4	4	5	3—42
H. Rose	5	4	5	5	4	4	5	4	4	4—40
Charles Frost	4	5	4	3	5	4	3	0	3	5—36
G. P. Wood	4	2	3	0	4	4	5	3	3	2—30

Medford, Bellevue Range, Sept. 3d.—The following scores were made to-day in Sharps Rifle match:—

H. S. Harris	4	4	5	5	5	5	5	5	4	5—47
E. Whittier	5	5	4	5	4	5	4	5	4	5—46
Re-entry	4	4	4	4	4	4	5	5	4	4—42
W. Charles	5	5	4	4	5	5	5	5	4	4—46
H. Leyman	4	5	5	5	5	4	4	5	5	5—45
H. Kimball	4	5	5	5	4	5	5	5	4	4—46
J. B. Osborn	4	5	4	5	5	5	4	4	4	5—45
Re-entry	3	4	4	4	5	5	4	4	5	4—43
F. Hollis	4	5	4	4	5	5	4	4	5	5—45
Re-entry	5	4	5	4	4	5	5	4	3	5—42
C. B. Harrison	4	4	4	5	5	4	4	5	4	5—44
A. J. Greene	4	5	3	5	5	5	4	4	5	4—44
Re-entry	3	3	4	4	4	4	4	4	5	4—40
C. Russell	4	5	4	4	5	4	5	5	4	4—44
H. Symington	4	4	4	4	4	4	4	5	5	5—43
J. Russell	4	5	5	4	4	4	4	5	5	4—43
Re-entry	4	5	4	4	5	5	4	4	5	4—42

Milford, Sept. 13th.—At the third practice shoot of the team from Co. M, 6th Reg. M. V. M. held to-day, on the Co's range, the following were scores made. Distance, 200 yards; military Springfield rifle, state model, off-hand:—

Sergent Jacobs	3	4	4	3	4—18
Private Carpenter, second	4	3	2	5	4—18
" " first	4	3	2	4	4—17
" Gould	4	3	2	4	4—17
" Whitney	3	0	4	4	4—15
Total					85

Previous scores were, September 6th., 73; September 10th, 83.

This company have been enlisted only a few months, and the men composing the teams are entirely unused to range shooting; and above three scores are the only times they have ever used the rifles. Knowing this facts, the scores speak well for the future.

The "Fox" gun offered by the band at their fair, held during the past week, to the person receiving the highest number of votes, was secured by John Martin, he having the fortunate highest number.

SUMNER.

Clinton, Sept. 10th.—At the rifle shooting-match this noon James Burt did some fine work with his Creedmoor rifle, making 48 out of 50. John Greenwood made 49 out of 50.

CONNECTICUT—*Collinsville, Sept. 10th.*—Canton Rod and Gun Club, Riverside Range. Practice meeting at 200 yards; off hand; 3 pounds pull; 10 shots:—

	Mass.	*C.*		*Mass.*	*C.*
Lewis	97	43	Pfister	81	39
Hull	93	40	Andrews	79	38
Moore	89	41			

—The Bridgeport Rifle Association held their regular semi-monthly meeting at Sea Side Range, Friday, Sept. 12th. The afternoon was fine, the wind light and variable, ranging from about 11 o'clock to 1. There were five competitors with the following results:—

Sharps Rifle Match; 10 shots; carton target; handicap; 500 yards; 7 entries:—

F. W. Peck, mid-range, 1st prize	4	6	4	6	6	5	6	4	6	5—53
S. H. Hubbard, mid-range, 2d prize	5	5	6	5	4	4	4	4	5	6—48
D. N. Conger, mid-range, 3d prize	0	6	3	4	5	6	4	5	5	4—48

(The first and third score in this match was made with a Sharps mid-range rifle, 40-calibre, chambered for 50 grains powder.)

Sharps Rifle Match; 10 shots; 200 yards; 10 entries:—

G. W. Kerr, 1st prize	5	4	5	4	5	4	5	4	4	4—44
Harry Nichols, 2d prize	4	4	4	4	5	4	4	5	5	4—43
S. H. Hubbard, 3d prize	3	5	4	4	5	5	5	4	4	4—42

Silverware Match; 7 shots; 200 yards; 18 entries:—

Harry Nichols, 1st prize	5	5	5	4	4	4	5	5—32
J. McCourt, 2d prize	4	4	5	4	4	4	4	5—30
S. H. Hubbard	5	4	5	4	4	4	4	4—30

Nichols Gold Badge Match; 7 shots; 200 yards; 7 entries:—

Harry Nichols	5	3	4	5	4	5	5—31

Ladies' Match; 5 shots; 200 yards; 8 entries:—

Mrs. John Statcher, 1st prize	4	4	3	4—18
Mrs. S. F. Nichols, 2d prize	4	3	4	3—16
Mrs. F. W. Peck, 3d prize	4	4	3	2—16
Mrs. Geo. F. Hull	4	3	3	4—14

MANHATTAN RIFLE CLUB.—Fourth shoot for the rifle presented by Messrs. Shoverling, Daly & Gales, Friday, Sept. 12th, at Schuetzen Park, Union Hill:—

C. G. Zettler	15	14	23	20	17	25	25	19	21	24—205
John Raschen	18	19	20	23	17	22	20	21	23	24—207
Wm. Hayes	14	21	22	19	21	18	24	20	22	21—202
Wm. Klein	21	13	21	17	21	24	23	20	23	24—210
D. Miller	23	19	21	23	19	19	19	21	25	25—214
L. Vogel	23	10	17	17	15	16	23	10	19	21—180

NEW JERSEY—*Brinton, Sept. 6th.*—Winchester Repeating Match; fifth competition; 21 entries:—

P. Bonnett	4	5	4	4	4	4	4	3	4	5—41

P. BONNETT, Secretary.

West End, Sept. 15th.—Remarkable scores were made in the match for the Sharps mid-range rifle shot to-day at the range of the Columbia Rifle Association. In the last competition A. G. Holcombe of Brooklyn made the best score on record—199 out of a possible 200. The conditions of the match are 500 yards, 10 shots, any rifle, any position; military rifles allowed five points over sporting rifles. The winners of two former competitions were Dr. Dudley and Mr. Rathbone. Eighteen entered for to-day's match. The contest lay between Mr. Rathbone and the last winner, A. G. Holcombe. In the first round Rathbone and Holcombe each scored ten straight bulls-eyes; Falco, 47; Green, 43, and Turner, 37. The match then narrowed down to Rathbone and Holcombe. Rathbone again made ten consecutive bull's-eyes. Holcombe kept his string good until his tenth shot, when he made a centre. The competition and prize were given to Mr. Rathbone. The best scores were as follows:

Rathbone	5	5	5	5	5	5	5	5	5	5—50
	5	5	5	5	5	5	5	5	5	5—50
Holcombe	5	5	5	5	5	5	5	5	5	5—50
	5	5	5	5	5	5	5	5	5	4—49
C. Falco	5	5	5	5	4	5	4	5	5	4—47

The beginners' match—100 yards, ten shots, any rifle—was then shot, and resulted as follows: C. J. Falco, 43; Col. B. F. Hart, 42; F. Dudley, 41; W. O. Weatherbee, 40; J. K. Gorkman, 40; S. Parrish, 39.

LOUISIANA—*New Orleans, Sept. 7th.*—To-day was an important one at Frogmoor, and the riflemen were out in force. The weather was well suited for the sport. The sky was overcast with clouds but the atmosphere was clear and the wind very gentle and regular. Under the conditions the Washington Artillery team put up the best score yet made in the inter-State contest, while the Continentals secured points to an extent which in any of the previous matches would have given them the victory.

In the Louisiana Field Team, excellent shooting was made at the 200 yards target, the lowest score being 23 points.

The result of this match ties the Washington Artillery team with that of the Louisiana Field Artillery, both having won thrice.

SUMMARY—Inter-State, or Mobile trophy; sixth compe-

tition under the new rules, which require five innings to entitle to possession; distances 200 and 500 yards; teams of eight, with seven shots at each range and no sighting shots; military rules, military rifles and military uniforms. The prize was won the first, second and third times by the Louisiana Field Artillery team, the scores being 365, 396 and 345; and the fourth and fifth times by the Washington Artillery team; scores 345 and 363:—

The second contest of the day was for the definite possession of the new Lilienthal cup, the present of Mr. Edward Lilienthal, the eminent jeweler, which was first put up for competition May 11th, last. It was at one time generally conceded that Major Arms would secure the prize, but Mr. Bercegeay stepped in and the supposed final contest between these two, Sunday, July 27th, was looked forward to with great interest.

At this nick of time Mr. Renaud piled up the best score made during the contest. This was somewhat a surprise.

On the eighth turn, Mr. Selph redeemed his pristine reputation and put his name on record. The ninth contest was decided in Mr. Renaud's favor again, and to-day, on the tenth trial, Mr. Renaud obtained actual possession of the cup, having won the same three times.

SUMMARY.—New Lilienthal cup, tenth competition between individuals under military rules, distances 200 and 500 yards; five shots at each distance and two sighting shots; three winnings to entitle to possession of the prize. The first contest was won by Bercegeay, score 41; the second by Weiss, score 39; the third by Arms, score41; the fourth by Gowland, score 40; the fifth by Arms, score 41; the sixth by Bercegeay, score 43; the seventh by Renaud, score 44; eighth by Selph, score 41, and the ninth by Renaud, score 43:—

Game Bag and Gun.

GAME IN SEASON FOR SEPTEMBER.

Moose, *Alce Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorous.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*
Black-bellied plover, ox-eye, *Squatarola helvetica.*
Ring plover, *Ægialitis semipalmatus.*
Stilt, or long-shanks, *Himantopus nigricollis.*
Woodcock, *Philohela minor.*
Red-breasted snipe, or dwitcher, *Macrorhamphus griseus.*
Red-backed sandpiper, or oxbird, *Tringa Americana.*
Great marbled godwit, or marlin, *Limosa fedoa.*
Willet, *Totanus semipalmatus.*
Tattler, *Totanus melanoleucus.*
Yellow-shanks, *Totanus flavipes.*

"Bay birds" generally, including various species of plover, sand piper, snipe, curlew, oyster-catcher, surf bird, phalaropes, avocets, etc., coming under the group *Limicolæ* or Shore Birds.

☞This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

☞The seasons for shooting pinnated grouse or prairie chickens and other birds are as follows in the States named herewith:—

States	Pinnated Grouse.	Ruffed Grouse	Quail.	Woodcock.
Ill.	Aug 15 to Dec 1	Oct 1 to Jan 1	Oct 1 to Jan 1	July 4 to Jan 1
Ind.	Oct 1 to Feb 1	Nov. 1 to Jan 1	Nov 1 to Jan 1	July 1 to Jan 1
Iowa.	Sep 1 to Dec 1	Oct 1 to Jan 1	Oct 8 to Jan 1	July 10 to Jan 1
Minn.	Aug 14 to Oct 1	Sept 1 to Dec 1	Sep 1 to Dec 1	July 3 to Nov 1
Wis.	Aug 25 to Jan 1	Aug 25 to Jan 1	Aug 25 to Jan 1	Aug 25 to Jan 1
Neb.	Aug 15 to Feb 1	"	Oct 1 to Dec 1	No Restrictions
Kan.	Aug 1 to Feb 1	"	Oct 1 to Jan 1	Forbidden

THE "CITY OF WORCESTER."—The sportsmen's car, "City of Worcester" left Worcester, Mass., Sept. 9, with Mr. Jerome Marble and party, who go to Iowa, to the new town of Hallock, Minn., and other game regions.

A STRAYED DUCK.—Mr. Everett Smith of Portland, Me., sends this from among the "Bath Locals" of the Portland *Argus*, September 11th: "James T. Williams, while gunning in the bay yesterday, shot a duck, about one wing of which was tied a card on which was written 'Lewis Carlton, Harrison, N. J.'" The above slip will meet the eye of so many sportsmen, that the history of that duck and card of "Lewis Carlton, Harrison, N. J." may perhaps be reported to our columns.

—For Diving Decoys see "Miscellaneous Ads."—[*Adv.*]

THE CHARMS OF GUNNING.

Why do some people despise hunting? Not many months since I was on my way to the hunting-grounds, when a seedy specimen of the genus loafer accosted me with: "Huntin' agin, Jedge?" Not far on, another: "Goin' gunnin' agin?"

I had met the two worthies a few days before on my way to the shooting-ground. These two represent a class who, because their manner of amusement or recreation lies in another field, seem to have a holy horror and a hearty contempt for the sport of shooting as well as those who follow it. These same men will hang around a saloon all day and nearly all night and thumb, for "ten cents ante," a pack of greasy cards, or tramp three miles in the burning sun to see some old crow-bait limp around a race-course. Nay, I have seen this class of brainless idlers fairly wild over the ordinary pacing of some animated carrion as it lumbered round the race-track. The trouble with this class and a still better in society is that they can see no amusement, no use nor benefit in any occupation wherein the "almighty dollar" is not directly or indirectly the object to be attained. The banker, the merchant and professional man who despises the gentleman sportsman may always be found wearing out the delicate machinery God has given him to draw his frail body through the brief channel of this life, by clogging it hour by hour with the cares and troubles of money-making. A journal like the FOREST AND STREAM, fit to grace the library of the most prudish and fastidious—a book of science, a revelation of nature, and a vast flood of information for the scholar or sportsman—never cheers or illumines their abode. The musty ledger, the dusty journal, over which the grey cobweb festoons a winding-sheet for the future consumptive; the digest of debits and credits, assimilated mentally only to bring on chronic indigestion, are all of the health, the beauty and glimpse of nature ever known in these gloomy sepulchres for the living.

Take a gun and saunter forth in the woods. Leave the very thought of business behind. You will see more in one hour to mystify and astonish you than you ever dreamed of before. The woods are a vast animated world, from the strange insect with stranger habits among the fallen leaves to the great eagle overhead, the spread of whose pinions as he screams from his eyrie casts the cloud-shadow across your path. Here the animal and vegetable kingdom spread before you a banquet that never cloys nor enfeebles.

The massive rocks whose giant form and wondrous shape are full of life and food for the deepest philosophers, will reveal a past not found save in the sublime mysteries of nature.

Take a rod and line and repair to some quiet lake. Camp out if you can. The plain fare for the stomach, the lovely scenery for the eye, the pure ether for the lungs, will give you rest by night and a light heart by day. When you return from your vacation you find you have entered an unknown world. Take some good sporting journal and keep alive your love for nature's thousand forms of interest and beauty until the next vacation comes. Then you will feel a tenfold zest, a longing desire to return to your loved haunts and renew your courtship with this charming maiden—Nature. Around her shrine, whether in the summer or golden autumn, with the delicate rod in the fragrant solitudes of the northern pinery or in the vast sea of rice or celery at the coast or inland lake, you will find the genial, jovial gentleman—the true, big-hearted, hospitable sportsman—the peer of any noble on earth and a fit companion for the gods. The latch-string hangs always loose, and the right-hand of nature's own freemasonry is ever extended to welcome you. In return for the few dollars you have thus invested, even should you bag but little game, you put on a new garment of hope and health, and bathe in that perennial spring whose fabled waters can alone restore your youth.

Despise not these pastimes. They draw you in to "God's first temples" and in close communion with Himself. They lead your thoughts from vice to virtue. They teach you that there are joys that do not bring remorse or foul disease.

For all that you invest you receive a hundredfold in return, and as each fleeting hour goes past, the scenes and friends of other days grow warmer and brighter in your thoughts and twine more closely round your hearts.

By field or flood,
Wherein I chance to roam,
The tent 's my palace
And my friend 's my home.

R. W. H.

SHOT IN GAME.—The London *Lancet* has this seasonable word of caution concerning the presence of small shot in game:

This being the season when game killed by shooting, and probably containing the pellets, is eaten, it may be worth while to caution those who consume the flesh of birds with avidity, that the proportion of instances in which shot is found is probably small in comparison with the number of cases in which the pellets are unwittingly swallowed. It is a matter of speculation how much mischief a shot may do when passed into the intestines, but the fact that anomalous diseases have been set up by the presence of very small bodies which have become entangled in folds of the mucous membrane renders it desirable to put the public on their guard. Occasionally the most disastrous results have followed such small causes. We have in recollection the case of a physician who died, after prolonged and unexplained sufferings, from the impaction of a very small nail which had found its way into a pudding and was inadvertently swallowed. A little care will avoid this contingency, but, remembering that the bird had been shot, some pains ought certainly to be taken to avoid swallowing the missile.

GLASS BALL VS. BIRDS.—*Lewiston, Sept. 6th.*—Your editorial on "Glass Balls and Game Protection" gives promise of early fruit; much earlier than you anticipated. The subject will be mooted at Lewiston the latter part of this month, at the State shoot which occurs the 24th, 25th and 26th, and as far as I can learn meets with general approval. Wing shots are springing up on every hand, and clubs being organized, and to provide the necessary birds for this year's tournament it has been found necessary to send to Massachusetts and Chicago for prices, and to know if they can be supplied, as it has proved utterly impossible to gather twelve or fifteen hundred wild or tame birds in this State. The Androscoggin Sporting Club had contracts with several parties for wild pigeons, one party feeling confident he could readily furnish two thousand this fall, but when he was requested to forward birds not a bird could he send. This is also the predicament of several others who have been baiting birds. Our cities have been ransacked for tame birds; only four or five hundred can be promised. Does not this state of things point a moral for our sportsmen to consider? And is it too much to say that without a strict observance, and enforcement of our game laws, there will be no birds to shoot, and we will have to send further than Chicago for our shooting?

The expense each year is increasing as the supply diminishes, and this year the expense to the above-named club will exceed the receipts; even if they pay the same entrance fee as members of other clubs. Your idea of substituting balls and applying the difference in the cost into paying for the prosecution of game law violators, and importation and propagation of additional species coincides with my ideas exactly.

Our practice is wholly, or nearly so, at glass balls, and more skill is required, and a man is a more expert shot who can break eighteen glass balls from a Card rotary trap, and fifteen out of twenty from double traps, than the most successful pigeon shot in the country. I think pigeon shooting depends a great deal upon luck, and in this State upon having a heavy gun, as all are placed 21 yards from the traps, and a 6 lb gun must compete with one of 14 lbs. or retire. Within a few weeks I saw a beautiful double shot at Bratramian sandpipers, a right and left shot that the slow locomotions of a successful pigeon shot would never have attempted, but which the quick double ball shooting makes possible and probable.

I hope your correspondent "Maine" will attend the State tournament, as we need just such sportsmen to assist in inaugurating, and sending off with a boom the Maine Sportsmen's Association. FRANK HENSHAW.

MR. SCHAEFFER'S SCORE.—*Boston, Sept. 8th.*—*Editor Forest and Stream:*—On looking over your valuable paper of last week I saw an article headed "Schaeffer's score," and upon reading it, saw that it cast a great deal of discredit upon a very estimable young man and a first class shot. I know Mr. Schaeffer and his sons very well, and have heard from good authority that the younger son (the one the article was about) is but seventeen years old. The authority I give is from his father, and I think, Mr. Editor, that a father knows a son's age better than the one that signs himself "Pull." Let me add that the gun Schaeffer used in his last match was a gun made by himself, alone which is more than "Pull" or any of his followers can say. I say, by way of conclusion, that all had the same chance as Schaeffer, and did not or could not beat his score, viz, 89 out of 90. PUSH.

NOTES FROM VIRGINIA.—Anticipations of sport for the coming shooting season are more than usually bright. Birds and hares are more abundant than I have ever seen them, owing no doubt to the dry spring. The gunmakers' stores in this part of the world are, this fall, presenting a very different appearance from that of the same establishments, say five years ago; well finished choke bores now occupy the stands that in those days bristled with firearms of wonderful and fearful make. It is true that there can still be found back rooms devoted to these relics of bygone ages. The countryman of plainer mould still clings fondly to the five feet of barrel, along which he and his father before him have squinted since the days of flint locks. The army muskets brought out of the civil war have passed into the hands of the negroes and the woods continuously echo to their deafening explosions regardless of times and seasons. Tempting displays of leggins, thorn-proof shooting coats, and miscellaneous nick-nacks are to be seen, destined to carry dismay and astonishment into many a retired unsophisticated district where birds are more plentiful than tailors. A sporting club has been founded in this county, and glass ball shooting has, during the summer months, been the order of the day. In a few weeks time its members will doubtless betake themselves to more serious work. The streams on the eastern slopes of the Blue Ridge want restocking with trout badly. The supply is now very scanty owing to the action of the late winter's frosts added to previous unprecedented freshets. There is some talk of doing this, I am happy to say. RINGWOOD.

Bedford County, Va., Sept. 9th.

DR. CARVER ON MR. W. W. GREENER'S HAMMERLESS GUNS.—*Sir:*—On my arrival in England last winter, I noticed a discussion in your valuable paper relative to the merits of hammerless guns; and it occurred to me that they were just the kind of gun for my exhibition shooting, where rapid firing and easy loading are most essential. The only doubt I had respecting them was their durability, the work I have being very severe on the gun.

After much consideration, I selected the treble wedge-fast hammerless gun made by W. W. Greener, as the most likely to meet my requirements. Those who have

witnessed my exhibitions at the Crystal Palace will agree with me that the hammerless gun was put to a very severe test, my rapid firing so heating the barrels as to necessitate the constant application of cold water to render the handling of the gun agreeable. I have shot this gun one hundred and thirty consecutive days, generally in two, and often in three exhibitions per day, often in hail and rain storms, and during this period it has never been taken to pieces, the locks or action cleaned or oiled, or the stock taken off, and yet the gun works evenly and smoothly, and is quite as pleasant and efficient to use as when first turned out. This gun has gone through more rough work and has withstood more hard usage than is likely to occur to any gun during five years' game shooting I am acquainted with either in England or America. Rifle shooting is my great "forte;" but the way this gun breaks glass balls at long distances—60 or 80 yards—has called forth much applause.

I feel much pleasure in recommending this gun to the notice of my brother sportsmen in the United States as being the most reliable, the easiest to manipulate, the safest to use, and the best adapted for hard work. W. S. CARVER.—*London Field, Aug. 30th.* [*Adv.*]

BOGARDUS IN THE WEST.—The St. Paul *Daily Globe* in concluding an extended report of the State Fair of Minnesota, which closed on the 6th, says in its issue of that date speaking of the efforts of Capt. Bogardus and his son Eugene:

At the close of the racing Capt. A. H, Bogardus and his son Eugene entertained the crowd with a most interesting and rare exhibition of their skill in shooting glass balls and other smaller objects.

Captain Bogardus' fancy shooting is so well known that it is needless to speak of it specifically. This is the second season he has appeared before a St. Paul audience, and also the second time he has given an exhibition of his shooting abilities at the present fair. His performance, as did his previous efforts, elicited frequent and unbounded applause. One of his remarkable feats yesterday was the breaking of 34 glass balls out of 36 in the space of two minutes and fifty-five seconds. The time he allows himself for the breaking of fifty balls is 4 minutes, but yesterday he seemed determined to surpass himself, and succeeded most admirably. This feat, it must be borne in mind, is done with one gun which he himself loads. In short, the skill and unerring aim of the man is astonishing, and justifies the challenge which he has already made, of meeting and vanquishing any man in the world, in his peculiar specialty.

After the Captain had finished, Eugene, his 14 year old son, took the stand, and, for nearly half an hour, held the audience in breathless attention. Eugene is a youthful prodigy. For one so young his feats have never been equalled. With his little rifle, resembling more a toy firearm than a death-dealing implement, he astonished the lookers on by breaking forty-seven out of fifty glass balls thrown into the air, besides accomplishing many other odd and difficult feats. When Dr. Carver gave his exhibitions at the fair grounds last season, people looked upon them as remarkable and wonderful. But now comes a mere youth, who, almost with a toy rifle, does equally (if not more) difficult feats. Carver used a large rifle, of which Eugene's is but a miniature copy. Eugene's shooting record yesterday is ahead of anything Dr. Carver has done. Despite a strong wind, he not only showed himself able to break glass balls but to hit half dollars, quarters, marbles, nickels, and even three cent pieces. His quiet, impassive, retiring demeanor is also a matter of wonderment. Apparently unconscious of performing any extraordinary feat, he continues to load and fire his little piece, in no way elated at his success. Eugene is certainly a prodigy, and will no doubt astonish the world with still more remarkable performances in his line.

MAINE—*Lewiston, Sept. 6th.*—The Androscoggin Sporting Club are endeavoring to procure birds enough to permit of extending a general invitation to the sportsmen of Massachusetts. Friday, the 26th, will probably be devoted to sweepstakes shooting if the necessary birds can be procured. LEWISTON.

MASSACHUSETTS—*Plymouth Co., Sept. 14th.*—The past week has been a poor one for coot shooting, but the bay birds have been coming along lively, being most y black breasts and winters—the latter were in fine condition. A few woodcock have been killed, but they are hard to find. S. K., jr.

NEW JERSEY RAIL SHOOTING.—*Hackensack, N. J. Sept. 9th.*—I enclose the record of rail shooting as follows:—Sept. 1st.—Doctor Atens, 33 birds; John Ryan, 41. Sept. 2d.—S. F. Knapp, 45; C. R. Terwilliger, 56. Sept. 3d.—Fred. Ahrens, 23; John Wright, 26; C. G. Sisson, 2; S. S. Rowland, 26. Sept. 4th.—S. F. Knapp, 33; and Brother, 22.

I would also state that the bass and perch fishing in the Hackensack River, is better than for many years.

JOHN RYAN.

Forked River, Sept. 13th.—Some snipe have been flying, and your correspondent in company with Messrs. J. L. Kirkland, John Logan and T. Cuthbert shot some fifty birds one day last week. The house will be kept open for sportsmen during the fall and early winter, and we look for good duck shooting as there is plenty of feed in the bay. A.

PENNSYLVANIA—*Pittsburg, Sept. 8th.*—The prospects for quail hereabouts are good owing to the unusually favorable summer. A great many people raise the alarm at about this time of the year that there are none. Perhaps it is only because they are more scattered and folks don't look for then as earnestly as later, when they are on serious thoughts intent. From what I saw at Messrs. J. Palmer O'Neal & Co's., sportsmen are preparing for a vigorous campaign against birds and beasts. I was told that they sell a great many "mussel loaders" yet. It seems strange that people who can put forty or fifty dollars into a gun should put it into M. L., yet that this is often done is shown by the fact that this firm has closed out and just received another lot of fifty fine muzzle loading guns which though retailed at forty dollars or thereabouts, cost over a hundred to make. Am told they are great bargains. Bogardus and his son are coming in a week or so to shoot at the exposition, and will attract considerable notice from the shooters of this vicinity. A.

DELAWARE—*Port Penn., Delaware River, Aug. 13th.*—Rail bird shooting good, and will continue good all September. Reed birds yet plenty, but not as plenty as about the 1st to 5th (annually). English snipe coming in, and will soon be plenty. Some plover about, and shooting in general is good, and will continue so until the river freezes up. Come to S. Lord's comfortable sporting houses on the south bank of the river, four miles from Delaware City (by rail or steamboats), where hunting is convenient and board $1.25 per day or $8 per week.

H. W. MERRILL.

KANSAS.—*Abilene, Sept. 8th.*—We made some fair bags on chickens but not as good as last year. For some reason the birds are not as abundant, probably on account of so much breaking up of prairie which destroys the nests. G.

TRAP SHOOTING.

—The Far Rockaway Gun Club shot a match yesterday for the cup presented by Mr. Geo. P. Work.

MAINE—*Topsham, Sept. 12th.*—Return shoot between Riverside and Freeport Clubs; Bogardus trap; 18 yards' rise:—

J. Middagh	0	0	0	0	0	0	1	0	0	0—	1

Mendon, Sept. 10th.—A. C. Cook broke 46 out of a possible 50, the balls being thrown to the left and toward the shooter only. After this a string of 40 balls was shot, with the following results: Frank Taft, 21; Geo. Whitney, 20; Chas Evans, 23; W. R. Dennett, 17; Chas. Taft, 18; Chas. Whitney, 17; A. H. Harris, 15 out of a possible 20.

NARRAGANSETT GUN CLUB.—*Newport, R. I., Sept. 11th.*—Handicap sweepstake match for a subscription cup; 10 birds each; three misses out; seventy-five per cent. of entrance to second man.

E. W. Davis, Providence	29	1	1	1	1	1	0	1	1	1	1	1—	9

FOUNTAIN GUN CLUB.—The Fountain Gun Club yesterday held the first of a series of matches for four prizes, to be contested under the rules of the State Association. The object of the series is to attain excellence in plunge-trap shooting and to maintain the success of the club's representation at the State Convention. The matches will be shot on the Wednesday next to the third Monday of each month to, and including, May, 1880.

FOUNTAIN VS. MIDWAY.—*Morgan Station, N. J., Sept. 10th.*—On Wednesday, September 10th, the Fountain Gun Club with about 100 guests left Brooklyn *via* steamer *Nelson J. Hopkins* (chartered for the occasion) at an early hour in the morning, for a third contest with the Midway Club of New Jersey on their own grounds. The steamer was handsomely decorated with flags and received repeated salutes throughout the route. Soon after its departure a sumptuous breakfast was served by the well-known caterer John C. De Fraine, who is also a member of the club, and the supply of edibles provided were not consumed during the entire day. We can freely say that it was one of the most enjoyable occasions of the period, and we were sorry to see the Fountain Gun Club worsted after their lavish expenditure, but they all enjoyed the picnic and closed with three hearty cheers for the Midway Club. The following is the score—Fountain Club rules; ground traps; 21 yards; 80 yards boundary; use of barrel:—

BUCKEYE.

NEW JERSEY STATE SPORTSMEN'S ASSOCIATION.—The Committee on the State tournament are hard at work perfecting matters. The birds have been heard from, and President Eaton assures us that the tournament will be held early in October, the 7th, 8th, 9th and 10th probably. Eleven thousand birds have been gathered, and the prizes will amount to at least $2,000.

STEAM CATAMARANS.

It is no uncommon occurrence to find old and oft-discarded "inventions" re-invented over and over again and set aside as fast or as slow as the vanity or mulish propensities of the average specimen of humanity will permit. The steam catamaran has long been a hobby with that class of individuals who live and exist entirely in themselves, oblivious to the progress of the world around them. Like perpetual motion schemes, this very ordinary and not in the least mysterious or even ingenious device, is forced upon the public's attention from time to time as the fecundity of the bucolic mind ripens unto the idea. Successive attempts at building fast steam catamarans do not differ in slipshod reasoning at all, but only in the wonderful results anticipated, which vary in indirect proportion to the capacity of the inventor's brains. Thus it is that those who least understand the problems they claim to have solved serve out to the unprofessional press the wonders of their forthcoming feats in speed with the least compunctions as to possible disappointment, and the more or less gullible country audience jumps at the flattering, ambitious thought that their own little burrough should have produced such a profound genious to whose capacities the world is soon to bow. It is not surprising, therefore, to read of still another attempt to obtain the impossible by complacently setting aside well known laws of nature, and trying over again what has been proven a failure a score of times even to those who will not reason by induction, but are only to be convinced by a lost reputation and an empty pocket-book.

Two master-minds of a village on the Hudson are even now engaged in enlightening a turbid world upon the principles of naval design, having boldly taken hold in the shape of constructing a "steam catamaran." The logic employed, upon the strength of which somewhat visionary results are anticipated, and heralded far and near before accomplished, is about of the very flimsiest and unpretentious kind. We will not for a moment suppose that Messrs. Ward & Stanton, of Newburgh, who are said to furnish the engines for the new prodigy, take any stock in the affair, other than the precautions necessary to secure payment for their share in the work. It is hardly likely that the talent of a draughting office can be found to be abetting such a questionable piece of engineering. The logic employed by the inventers is this: —Sailing catamarans are known to be exceedingly fast, much more so than single hulled vessels, *ergo*, why not put steam into, or, we should perhaps say in the vernacular, "onto" a catamaran? The natural sequence would be, that she could steam much faster than anything else afloat because the sailing catamaran sails faster than anything afloat! Strange that this idea has not struck the world before, and that it was left to "the theories of a Mr. ——, and the practical experience of another Mr. ——" of a country town, to discover the possibilities hidden in the secrets of two hulls instead of one. That such experiments have been tried often enough, that many of them were known, even in the town referred to, to have ended in failure, were matters of minor consideration, for those experiment, though good enough in their way and undertaken by some of the ablest engineers of Europe, just lacked that little bit of extra genious which is depended upon to reverse the results of former years in favor of the two good citizens who have undertaken to startle the world afresh.

It is a disagreeable task to disabuse these gentlemen of their fondest hopes, and in a few lines to show them where their logic is so weak that the enterprise will probably fall through at that spot; but we have received a number of inquiries from persons whose imaginations have been fired at the thought of thirty miles an hour in a steam catamaran, and that they may not be led astray by designing schemers, their attention is invited to the following:—

Sailing catamarans are exceedingly fast under favorable conditions, because they combine in their construction excessive stability, or sail carrying or driving power, with a minimum of resistance, owing to their very fine lines and small area of "wetted surface." That is the whole secret and nothing more. If we now turn to the application of steam to such double-hulled craft, it is at once evident that the factor of enormous driving power in proportion to resistance disappears, for we have to substitute steam-engines for sail area; in other words, weight in place of stability. The excessive stability of the catamaran, which is one of her chief points as a sailer, altogether vanishes as a benefit as soon as we apply steam. Further, with a given weight of engine a lighter displacement can be obtained from the single hull than from the double, for the latter may be said to have four sides, against the former's two, to say nothing of the cross bracing and increased weight of a large deck area. The combined weight of hull and engine will be less in the boat of ordinary type than in the catamaran. Now, as in the new venture it is proposed—and much stress is laid upon this fact by the local wiseacres—"to have the ordinary hull split in two, the halves being placed about fifteen feet apart and the boarded perpendicular sides being exactly parallel to each other," it follows that no finer lines will be obtained than in a single hull, for the outside lines of a single hull need not differ at all from those adopted, if both hulls are supposed to be brought together along amidships. To sum up, the steam catamaran, which we believe is now well under way, has not a single point in her favor over launches or steam yachts of the usual style of construction. There is not only nothing whatever upon which to base the extravagant claims to a speed of nearly thirty miles in this revamped experiment, but on the contrary, in every direction is she inferior to the single-hulled steamer. In the first place, her "lines" are no finer; second, she has more wetted surface by nearly 50 per cent.; third, both of these causes of resistance are still further augmented by her greater displacement; fourth, at the high speed intended the "feathering" paddle wheels of small diameter which are supposed to constitute still another point of recommendation are decidedly objectionable, and a loss will result from "back pressure" as the buckets dip vertically in the water, something very well known to engineers, and the explanation of the fact that feathering wheels have not been generally adopted. Add to these drawbacks the questionable action of the "race" from the midship wheels between the hulls tending possibly to produce a lower water level aft than forward, and a hydrostatic "head" in consequence, and the determination "if she shows an astonishing speed, this marine wonder will be called the *Surprise*," is one which will certainly be justified. But what a lot of money and time might not have been saved to the two enterprising persons had it ever occurred to them before commencing their steam catamaran to lay their vague plans and expectations before some one conversant with such matters beyond the successful wielding of a broad-axe! When steam catamarans can be built any faster than ordinary single-hulled vessels, the world will stand on its head, and that time has not yet come.

THE GREENPOINT YARDS.—The new establishment of Piepgrass at Pottery Beach, Greenpoint, is now about finished and in working order. He has built a most complete yard for shipbuilding purposes, and is ready with his new facilities, etc., to construct any amount of tonnage, to haul out, repair and lay up whatever comes along. The yard is entirely fenced in and has a large basin attached, protected by booms on all sides. The mould loft and joiner shop is 75 feet long, has a commodious office and draughting room at one end and a spar shed, blacksmith's shop, two sets of ways and all necessary facilities in the yard. Piepgrass has in hand for the winter a sea-going steam yacht, a good deal of outside work, steam tug, racing sloop of some 60 feet, and much other work in the way of cutters in prospect. Greenpoint promises to become famous in the annals of American yacht building, for right adjacent to the yard described, Mr. J. J. Driscoll has his shops, and as both these builders have turned out fine and staunch work we may expect to find Greenpoint yachts figuring extensively among our racers and cruisers of the future. Mr. Driscoll has about finished a new racing sloop of 28 feet length.

THE ISLIP YARD.—The chances are that Mr. Alonzo Smith will put together a big lot of work this winter in the way of new yachts. He has now one under way for Erastus Corning, of Albany, and she is to be a beauty in the way of extra finish, such as mahogony waterways, hardwood and nickel fittings throughout. Sloop rig, with racing sails and a shifting cabin. Length over all, 39 feet 6 inches; beam, 13 feet 6 inches; hold, 3 feet 6 inches, with about 2 feet 6 inches water without board. Smith is figuring also on several yachts for neighboring ports and the Lakes. The success of *Niantic* this season, though not in racing trim, was a decided feather in his cap and shows that able-bodied yachts with "two ends" have not yet had their day by a long piece. To be fast, a yacht need not be a mantrap of a smoothing iron.

THE UNCLE SAM.—The crazy and profitless attempt made by one Captain Goldschmidt and wife to cross the Atlantic in an ill-modelled, ill-fated little boat of some fifteen feet long has resulted in disaster, the boat and her rig going to pieces the first gale they struck. Once in a while these stupid ventures succeed, but the failure of just as many should deter others from such crackbrained undertakings unless they have a properly modeled and well-rigged boat under them. These cheap and nasty affairs are not equal to the work imposed upon them.

BIG SHARPIE.—Mr. Minot Smith is now building at Port Jefferson, L. I., a big sharpie, intended for Florida waters. She is fifty-six feet long and thirteen feet six inch beam; has raking stem, elliptic stern, and will be schooner rigged and fitted with two centre-boards, one forward and the other abaft the cabin.

ATLANTIC YACHT CLUB.—The annual pennant regatta of this club was sailed on Wednesday, September 17th. Start flying, 10 minutes grace; two yachts to start in each class or no prize. Course for classes A, B, C, from Bay Ridge around Southwest Spit buoy 8½, thence around lightship and home. Class D will round a stakeboat near Gedney Channel buoy, and classes E, F and G return home direct from the Spit. No limit to time of race; time allowance based on mean length; working sails only. Judges—J. B. Morgan, J. L. Marcellus and H. E. Dodge. For further information apply to Fleet-Captain W. W. Richards or aboard the Commodore's flagship *Agnes*.

MORE DISASTERS.—Reports reach us every week of disasters to yachts, invariably by capsizing, and the drowning of many persons. Just as long as we adhere to the present type of light draft yachts, so long will the victims go to Davy Jones's by the score every month during the season.

COLUMBIA YACHT CLUB.—The race for the champion cup presented to the Columbia Yacht Club was sailed as appointed Sept. 9th, and brought many fast open boats to the line. We look for a material increase in the number of entries for similar events in the future, and should the Columbia Yacht Club repeat the experiment next year, and throw open the races to jib and mainsails as well, or, in other words, still further liberalize their races by discarding rig distinction in their "open" matches, as well as give all hands a chance at a limited outlay by prohibiting shifting ballast, their races will become one of the principal events of the season among the smaller yachts in this neighborhood. The management of this club is in excellent hands, who seek only its advancement and best interests, and they can, therefore, well afford to experiment in the direction indicated. If the style of racing we counsel is found incompatible with American prejudices, it is easy enough to return to the old way of doing things, a frigate's crew, sandbags and all.

The race for the champion cup, donated by the Derby Silver Plate Co., was open to all cat-rigged yachts, eighteen to twenty-five feet long. Course, triangular, from club-house, foot of East Eighty-sixth street to mark off Pleasant Valley, thence to mark off Weehawken and return; sail over three times; distance, fifteen miles. Time allowance, 1½m. to the foot; crews restricted to one hand for every three feet of length. Judges: Com. Dilks, W. B. Y. C.; ex-Com. Nobles, C. Y. C., and Jacob Varian. A flying start was effected a little after noon, with 10m. grace to cross the line. The *Garrison* led across, with *Pinafore* close aboard; then a long interval, and *Willie, Dilks* and the rest followed suit. The wind was moderate from N. N. W., with the tide the last half of the flood. As the the last five yachts did not manage to cross within the ten minutes, they were all handicapped. Strange that skippers of experience cannot handle their craft to better advantage. It was a long and short leg to the first mark, and when it was fetched *Dilks* and *Dean* had drawn out ahead, *Carrie Taylor* and *Rosy H.* good third and fourth. With the wind on starboard quarter, the second mark was made in the same order, *Dilks* gradually spinning out her lead. The first round was made without change. The wind had kept backing to the west, and lightened up. *Rosy H.* put in some some effective tide-cheating, and went into second place by the time the next round was completed, but upon the wind freshning again dropped to fourth. The final round was devoid of further events, and a fine day's racing, witnessed by large crowds from the bluffs on shore, terminated as under, the champion cup going to *Jennie Dilks*:—

Name.	*Club.*	*Length. Ft. In.*	*Elapsed Time. H. M. S.*	*Corrected Time. H. M. S.*
Jennie Dilks...	West Brighton...	24 07	4 12 25	4 12 25
Geo. B. Deane...	Hudson River...	21 10	4 25 48	4 21 44½
Willie.....	Hudson River...	20 03	4 32 50	4 28 29
Carrie Taylor...	Pavonia...	19 11	4 27 45	4 20 45
Rosy H.....	Jersey City.....	18 00	4 28 25	4 18 32½

The *Garrison, Pinafore* and *Warren* withdrew.

Yacht Bertie Jardine, North Beach, Barnegat Inlet, Sept. 11th, 8 o'clock, P. M.—A party of four, consisting of J. B. Bergen, G. H. Wild and Dr. R. F. Borden of Red Bank, N. J., and C. E. Hill of Newark, N. J, came down on Monday, the 8th, for a few days' fishing and snipe shooting, and up to the present have found all that heart could wish for. Plenty of snipe, the party getting from forty to sixty birds daily, and it has not been good weather for snipe either, the wind being fresh from the N. W., with but little variation, while the Captain, J. J. Dorsett, than whom no better posted man on Barnegat and its attractions can be found, says that it requires a southwesterly wind to bring them in good. Fishing has also been more than excellent; plenty of weakfish and barb. To-day blue fishing was tried with great success, not only by the party, who got all they wanted of nice ones, many on the average from four to seven pounds, but also the with one of nine and one of eleven pounds, the high boat entire fleet of pleasure and fishing yachts, the high boat being Sol. Stout's, who got seven and two, running from 8¼ lbs. the smallest, to 11 lbs. the largest. The flats and beaches have been remarkably free from mosquitos and beaches have been remarkably free from mosquitos and the party have had a most enjoyable time, and praise Captain Dorsett and the *Bertie* in the highest terms. They intend to leave for home to-morrow, and say that for genuine sport Barnegat beats the world.

RACING AT CITY ISLAND.—A match was sailed on the Sound Sept. 9th, open to catboats under fifteen feet. Course ten miles. Won by *Estelle*, E. A. Willis, Port Washington; beating *Nettie*, second, A. F. Vail, of City Island; *Mary B.*, S. T. Pell, of City Island; *Centennial*, and *Tomahawk*, B. Blizzard, of New Rochelle, and *Lizzie C.*, C. Iselin, of New Rochelle.

BOSTON YACHT CLUB.

The thirteenth annual regatta of the Boston Yacht Club was sailed Saturday, September 6th. Owing to a total lack of wind the first class could not be got off at all, and it was not until 2 P.M. that the signal was made from the schooner *Sprite* for the second class to get under way. This is much to be regretted, as the entries had been quite full and extra inducements were offered in the way of prizes to the owners sailing their own yachts. This feature of giving the gentleman helmsman neat little trinkets for handling their vessels outside of the regular purses is something to be commended, as personal interest and rivalry is thereby encouraged. The races were for schooners and sloops over thirty-eight feet, for same measuring twenty-six feet to thirty-eight feet, and for sloops measuring eighteen to twenty-six feet length. Course, from a point near judges' boat off the club-house, down the Westway, leaving Thompson's and Rainsford's islands on the starboard, Long and George's islands and Point Allerton buoy, No. 3, on the port, through the Narrows, leaving George's and Gallop's islands, Nix's Mate buoy, and buoy No. 7, off Fort Independence on the port; thence to the point of starting. Nothing was left undone by the Regatta Committee—Messrs. Thomas Dean, J. Alfred Mitchell, Geo. S. Rice, Frank A. Drew, and S. L. French—to insure a successful race, but the lack of wind at the start was against them and reduced the starters to a fraction of the entries. The yachts of the second class, after drifting slowly up to the line, were

sent away only to drift and fluke for an hour, when fortunately a smart breeze from southwest struck in and changed gloom to excitement and a glorious tiff between *Viking* and *Lillie* and *Rebie* and *Sunbeam*. Among the yachts of the second class, out of thirteen entries, only two schooners, *Loiterer* and *Cyda*, and four sloops, *Viking*, *Lillie*, *Polly* and *Comfort*, went across the line. *Viking*, well known as one of D. J. Lawlor's famous models, took the lead and kept it, after some close work with *Lillie* in company. Among the schooners *Loiterer* had tonnage in her favor. In the third class sloops, thirteen entries and six starters, *Fairy* made a bad start owing to mistaking the signal, and *Rebie* got away with a lead, but had to give in to *Sunbeam* after rounding the buoy off Fort Independence, again going to the fore, however, during the latter part of the race and landing first prize for her owner. In the evening a dance and supper was had at the club-house. The individual or "helmsman's" prizes consisted of a watch charm representing the club colors in enamel. Summary as under :—

SECOND-CLASS SLOOPS.

Name.	Owner.	Length. Ft.In.	Actual Time. H.M.S.	Corrected Time. H.M.S.
Viking	S. P. Freeman	35 00	3 32 03	2 54 39
Lillie	C. F. Loring	37 00	3 33 45	2 58 41
Polly	J. F. Sheppard	37 01	3 50 23	3 02 31
Comfort	E. W. Dennison	37 01	3 57 15	3 09 28

SECOND CLASS SCHOONERS.

Loiterer	W. W. Kellett	34 04	3 56 45	3 18 28
Cyda	R. C. Bridge	29 04	4 03 47	3 19 18

THIRD CLASS SLOOPS.

Rebie	J. P. Phinney	23 11	2 10 09	1 49 11
Edith	E. Denton	22 06	2 23 29	1 52 15
Sunbeam	W. S. Nickerson	24 11	2 22 02	1 53 04
Unknown	B. F. Wendell	24 00	2 27 00	1 57 07
Fairy	C. A. Perkins	24 04	2 32 01	2 02 12
Lada	B. Jenney	22 06	Not timed	

First prizes, $20, go to *Viking* and *Loiterer*, and $15 to *Rebie;* second prizes, $15, to *Lillie*, and $10 to *Edith;* third prize, $5, to *Sunbeam*.

EASTERN YACHT CLUB.

The fall regatta and postponed handicap regatta were sailed at the same time on Tuesday, Sept. 9th, off Swampscott, the start being made from an anchor, the first class sloops and first and second class schooners forming the first line, and those who had sailed on the 20th ult. being handicapped together. The small boats formed the second line, and were likewise handicapped.

The day opened with a strong W. N. W. wind, quite hard and puffy, resembling in the early morning that of the day of the B. Y. C. grand open race a fortnight ago.

Phantom, *Shadow* and *Intrepid* had come down the afternoon of the 8th, and the others soon began to appear, some of them reefed.

The large craft were started punctually at 11:05, the small ones, after a short wait for *Anna*, at 11:17 A. M., all going off toward Half Way Rock with a strong wind on the quarter. From Half Way the large boats went round Davis' Ledge buoy, and the small boats round the buoy off the Graves, both going inside of Egg Rock on the return—35 and 23 miles respectively.

Following is a list of the starters, with their sailing length, and allowance in the race and in the handicap. All sailed for the allowance prizes. *Halcyon*, *Foam*, *Fearless*, *Latona*, *Madcap*, *Sylph*, *Dream*, *Effie* and *Ariadne* were all the starters, that were qualified to compete for the handicap prizes.

FIRST CLASS SCHOONERS.

		Sailing Length.	Allowance in Race. M. S.	Allowance in Handicap. M. S.
Cupid	Lloyd Phoenix	106	00 00	00 00
Halcyon	Rear-Com. Hovey	91	05 21	00 00
Effie	Clas. J. Paine	84	09 21	00 00
Foam	Com. Boardman	84	09 21	13 00

SECOND CLASS SCHOONERS.

Fearless	G. B. Phillips	58	05 07	15 00
Latona	J. Pickman	64	00 00	27 00

FIRST CLASS SLOOPS.

Addie V	Mar[illegible] H. R. Abbott	62	00 00	00 00
Madcap	Walt[illegible] Lamont	44	18 50	22 00

SECOND CLASS SLOOPS.

Anna	Augustus [illegible]ainway	40	00 00	00 00
Effie	B. W. Crowell	36	04 10	00 00
Adriadne	Wm. G. Saltz[illegible]	36	04 10	10 00
Shadow	J. S. Bigelow	35	05 19	00 00

THIRD CLASS SLOOPS.

Sylph	A. O. Wheelwright	27	00 00	05 00
Dream	Greeley S. Curtis	25	02 26	07 00
Breeze	Joseph G. Minot	23	03 18	00 00

Halcyon, however, fell off in time, but found herself under *Phantom's* lee; with *Foam* and *Addie* just astern. Another start was greatly to the disadvantage of *Intrepid*, who was naturally slow in getting off; when she did start, she ran fast, but not fast enough to catch *Phantom* and *Halcyon* who had passed *Madcap*, and with big staysails and jib-topsails set, were going along at a great pace, *Phantom* a trifle ahead.

Off Pig Rock stakes there was a very heavy streak of wind, and as *Phantom* ran into it, her flying jib-boom snapped short off, and the next minute *Foam* was seen to be in the same plight. *Halcyon* got the same puff severely, splitting her staysail from head to foot, and throwing her down until her trunk was in the water, and anchors and furniture in the cabin were sliding down to leeward. *Phantom* housed foretopmast, but *Foam* rigged a jib-topsail to bowsprit end. Half Way rock was rounded as follows: *Halcyon*, 11.48; *Phantom*, 11.50; *Intrepid*, 11.52.10; *Foam*, 11.53.3; *Fearless*, 11.54; *Addie V.*, 11.59; *Latina*, 11.59.21; *Madcap*, 12.3.

Soon after rounding the rock the wind suddenly died out almost entirely, and the rest of the race was a drift, the light balloon sails of the sloops telling to great advantage, and *Intrepid* with her short rig being out of her element, and therefore out of the race. Davis Ledge was rounded as follows: *Madcap*, 3.16.55; *Halcyon*, 3.19.55; *Addie V.*, 3.34.3; *Phantom*, 3.36.30; *Intrepid*, 3.52.00; *Foam*, 3.52.30; *Fearless*, 3.54.30; *Latina*, 4.00.30.

From here to Egg Rock it was a dead beat in a very light wind; *Halcyon* gaining steadily and coming in at 6.30.56, with *Madcap* after her at 6.39.22. It was dark long before the others arrived, and only the leaders in each class were timed as follows: *Phantom*, *Addie V.*, *Foam*, *Fearless*, 7.33.20; *Latona*, 7.35.8; *Intrepid* going by the end of the line.

This race was declared off to be sailed again Monday, as the rules require a race to be sailed at the rate of five miles an hour.

The small yachts had a good breeze over the whole course. *Anna* made a very bad start. She came down late, and was not ready with her anchor when the signal was given. She also had in a reef, which had to be shaken out after starting. This was done, her big-topsail set, and she was gaining fast, when, on her setting her jib-topsail, the topmast went overboard and she was virtually out of the race.

Sylph went round the Rock at 12.13, *Dream* at 12.15.5, *Shadow* at 12.19, then *Effie*. *Anna*, *Breeze*, and *Adriadne*. The finish and corrected time are as follows :—

	Finish. H.M.S.	Cor. time. H.M.S.		Finish. H.M.S.	Cor. time. H.M.S.
Sylph	2 49 38	3 32 38	Effie	3 27 42	4 10 32
Dream	3 04 26	3 45 00	Adriadne	3 34 23	4 13 13
Breeze	Drew out		Anna	3 36 04	4 19 04
Shadow	3 09 08	3 46 49			

Sylph and *Shadow* take the allowance prizes in their classes—$25 each. *Sylph* takes first handicap prize, $50, and *Dream* second prize, $25.

It is greatly to be regretted that such a fine entry resulted in nothing, on account of the sudden drop in the wind. It was hoped that the wind and sea would be heavy enough to give *Intrepid* some sort of a show alongside of her smooth-water sisters. The club steamer *Minnehaha* followed the larger yachts over the course and afforded a good view of the racing. REEF POINT.

QUINCY YACHT CLUB.—The last race of the season of this Club, a special regatta, was sailed, Sept. 6th, off Quincy Great Hill. Three classes and three prizes—$5, $3 and $2.50, gold. Only the first was awarded in second class, there being only two starters. Judges—Messrs. J. W. Morton, Sigourney Butler and Samuel Bass—aboard the schooner *Water Lilly*. Wind from east. Course, the usual one, found in previous columns of FOREST AND STREAM. After some fine racing the finish was made as follows :

Name.	Owner.	Length. Ft.In.	Actual Time. H.M.S.	Corrected Time. H.M.S.
Allie	A. S. Wattles	26 07	2 29 19	2 01 34
Flyaway	Wm. Litchfield	22 02	2 46 16	2 12 55
Secret	J. Binney	23 03	2 40 46	2 13 30

SECOND CLASS.

Wildfire	H. A. Keith	18 02	2 14 07	1 43 50
Topsey	Chas. Kent	—	2 15 05	— —

THIRD CLASS.

Dolly Varden	A. B. Cleverly	16 08	1 44 09	1 17 38
Rocket	B. F. Bass	16 07	1 46 52	1 20 24
Undine	A. L. Neal	17 03	1 48 28	1 22 44
Elmer	P. Chubbuck	17 05	1 48 36	1 23 03
Imp	G. C. Adams	16 10	1 54 15	1 28 04
Dandelion	J. Q. Adams	17 03	1 54 19	1 28 50

Allie, *Wildfire* and *Dolly Varden* take prizes in their respective classes.

A pennant has been offered by Vice-Com. Nicholson, to be sailed for in a fortnight.

RACING OFF NAHANT.—A match was sailed off Nahant, Sept. 6th, between *Josie*, C. H. Minot, jr., and *Nora*, P. Snelling, for $30; won by *Josie*. Also one between *Psyche*, R. D. Sears, jr., and *Mirage*, Henry Sears, for $20; won by *Psyche*. Course in both matches from Nahant to Winthrop Head and return.

DORCHESTER YACHT CLUB.—The sail-off between *Rocket* and *Nattie* for the fourth class championship of the club came off September 10th. The *Rocket*, B. F. Bass, won in 1h. 18m. 50s.; *Nattie*, W. H. Nicholson, 1h. 20m. 6s.

RACING ON GENEVA LAKE (WIS.)—For the Sheridan cup, Sept. 6th, there were seven starters. *Whisper* and *Zuave* capsized, *Bonita* and *Lucy* withdrew, and *Geneva* won, beating *Fearless* and *Nettie*.

SALISBURY REGATTA.—A regatta was sailed Sept. 3d, at Salisbury, Mass., over a course from Keniston's wharf to stakeboat off "Tom Page's," 6 miles. Sloops *Idelette* and *Psyche* won in first class; *Annie* and *Gem* in second class. They were all undecked local boats.

LOUISVILLE BOAT CLUB.—Owing mainly to the exertions of Mr. A. H. Siegfried, of the *Louisville Courier*, and well known to the canoeing world, a new boat club has been formed in Louisville, Ky. President, A. H. Siegfried; Vice-President, L. A. Dunham; Secretary, A. R. Cooper; Treasurer, A. H. Barrett. One hundred and twenty-three members have joined, a boat-house is to be built and an equipment of boats ordered. The *Courier* very justly remarks :—"Why should our sporting enthusiasm go so largely to the turf, where few can do more than look on, when a sport open to universal personal participation offers its healthful and graceful pleasures not for one or two weeks, but during nearly forty of the fifty-two?"

ROYAL CANADIAN YACHT CLUB.

The annual regatta of the R. C. Y. C. was sailed off Toronto, Sept. 6th, the event being honored with the presence of the Governor General, the Marquis of Lorne, and H. R. H. Princes Louise, besides a large campany of distinguished guests invited to the club-house to view the races. There were some misgivings as to the probable number of starters who would put in an appearance, owing to several unpopular and unwise changes recently made in the sailing rules, but fortunately enough yachts from foreign ports were present to render the day's racing full of interest and the result quite instructive. Especially may this be said of the second class sloops, among whom there were several representatives of Toronto, for whom the rule forbiding shifting ballast had especially been rescinded in their favor. The match of the big ones came to naught through the drifting of one of the marks, whether through the neglect of the regatta committee in anchoring it or not we are unable to say, but it certainly is somewhat annoying to all concerned to find that all their trouble and a day's hard work had been thrown to the dogs by an accident which a little circumspection might have prevented. The classification and prizes were as follows :—

First class: yachts over ten tons—1st prize, champion flag and $150; 2nd, $75; 3d, $25. In addition to these prizes deep draft yachts competed for a cup presented by Mr. George Hawke and a purse of $30. The yachts of the Royal Canadian Club also competed for the Prince of Wales' Cup, and the R. C. deep draft yachts for the cup presented by the late Commodore, Dr. Hodder. Second class: yachts between five and ten tons—1st prize, a cup presented by the present Commodore and $100; 2nd, $60; 3d, $30; 4th, $10. Third class; yachts under five tons—1st prize, $30; 2nd, $15; 3d, $10.

When the signal was fired from the schooner *Geraldine*, 38 tons, flagship of Com. A. R. Boswell, the following yachts of the first class were sent away in a light wind :

First to cross was *Madcap*, Com. Boswell, built by Cuthbert and recently sold to Toronto; *Brunette*, sloop, 24 tons, C Heath, was next in the procession; *Rivet*, an old time iron cutter, 17 tons, R. Elmsley, was third away; *Coquette*, sloops, 17 tons, J. Stuart; *Oriole*, schooner, 95 tons, W. C. Campbell; *Alarm*, yawl, 38 tons. H. J. Grasett; and *Coral*, sloop, 16 tons, W. F. McMaster, brought up the rear. They headed to the westward to round the buoy off the Grand Trunk Elevator. *Madcap* made the mark first, followed by *Brunette*, *Rivet*, *Oriole*, *Coquette*, *Alarm*, and *Coral*. The second mark was a buoy at the east end of the Bay, and was rounded by *Madcap* first with a lead she was continually increasing. The fleet passed through the western channel to pick up the buoy off Mimico, without material change in their order. But the buoy was not to be found, and no race was made in consequence. There was not much question though, but what *Madcap* would have won as she liked in the weather of the day.

The second class yachts were started at 11 h. 40 m., in a light southerly wind as under :

Name.	H.	M.	S.
Gracio of Belleville	11	40	00
Emma of Kingston	11	40	20
Katie Gray of Belleville	11	41	20
Gipsy of Hamilton	11	45	00
Idler of Brighton	11	45	00

Imogene, yawl, 6 tons, Hon. W. P. Howland, C. B.; *Madeleine*, yawl, 6 tons, G. E. Gillespie, both of Toronto, and *Thistle* and *Kestrel* also started, but their times were not taken, the race being virtually between those named above. Light sails were in order. The course was from the *Geraldine* to a buoy one mile west, thence to buoy off Gooderham and Wort's; thence back to the westward and around the island twice. *Emma* and *Katie* ran up on *Gracie*, luffing matches between *Emma*, with Cuthbert at the helm, and *Gracie*, being of common occurrence. *Katie* got into the backwater of a propeller, during a lull in the wind, and lost some ground. With freshening breeze which came out from S. W. both *Emma* and the *Katie* gave *Gracie* the go-by, gaining steadily all the time. With the wind backed into the S. E. it was a free sheet for home after rounding the island the second time, and *Emma* looked a sure winner. When within 200 yards of the finish, however, her spar went by the board with a crash, snapped off clean just above the partners. The wreck was quickly secured, and a jury rig improvised in hopes of carrying her across the finish; but *Katie Gray* was also smartly handled, and dousing topsail slipped in first and secured the cup and $100, *Emma* taking second, and *Gracie* third prize, a result most satisfactory to the Belleville yachts. The rest of the fleet was distanced.

In the third class the starters were : *Fiona*, *Lily*, *Highlander*, *Reindeer*, *Pinafore*, *Wanderer*, *Kestrel*, *Mackinaw*, *Clara*, *Nellie*, *Petrel*, *Iona*, and *White Star*. Course : triangular; sail over three times, 15 miles. *Fiona* finished first, *Nellie* second, and *Wanderer* third, with *Reindeer*, *Lilly* and *Petrel* following. A banquet, toasts and demonstrations in honor of the Governor-General were frequent at the club during the day. It will be seen that "the East," that is to say Belleville and vicinity, carried off the honors of the day in first and second class, and Cuthbert's models still reign supreme among all his Canadian competitors in the building line. Now that the R. C. Y. C. will have time enough for reflection before the next race, we trust that it will strike from its rules the clause permitting shifting ballast and thus prove itself worthy the confidence of Canadian yachtsmen and an honor to its royal title. The Governor-General announced his intention of giving a cup to the club.

BERMUDA YACHT CLUB.—In the annual regatta of the Bermuda Island Y. C. there were six starters—*Irene*, Lieut. Harvey, 46th; *Psyche*, Lieut. Francis, 46th; *Spray*, Capt. Low, 46th; *Julia*, Capt. Browne, 46th; *Nameless*, Lieut. Handcock, 19th, and *Zephyr*, Lieut. Beauchamp, 46th. *Irene* got off first in a nice S. E. breeze. All had spinnakers set on the run down to Fort Catherine buoy. Up to Bailey's buoy it was a turn to windward, with *Spray* around first, followed by *Irene*, *Nameless*, *Psyche* and *Zephyr* in the order named, *Julia* having given up. On the wrk home *Spray* and *Nameless* made a hot fight for it; but the old boat again landed the prize, and showed how lightly time sat on her. *Spray*, 5h. 14m. 38s. and *Nameless*, 5h. 27m. 20s.

TO AMERICAN YACHTSMEN.—For complete records of all yacht races in England, as well as for a great variety of other matter of interest, such as cruises and yachting tales, read *Hunt's Yachting Magazine*, established 1862. Can be had of booksellers generally, or direct from Hunt & Co., 119 Church Street, Edgware road, London, E. C., England. Published monthly, one shilling sterling per number.—[*Adv.*

SHOALS OF STRANGE FISH.—Chippewa Bay, on the St. Lawrence, is filled with shoals of strange fish which made their appearance several years ago all along the St. Lawrence River, and which were supposed to be shad. They have increased in size since last year, and appear to be coming down from Lake Ontario. They are seen in myriads near the lake. Seth Green thinks they are not genuine shad. They are certainly new visitors to the waters of the St. Lawrence and Lake Ontario, and are a good article of food. Mr. Green, last year thought they accompanied the shad from the ocean. They were from six to eight inches long, and the water, as far as the eye could reach, fairly boiled with them early in the evening. In winter, when a hole is cut in the ice, they appear in such numbers as to fill it, and are often found frozen to the sides and bottom of the ice. They make excellent food for the muskelonge, pickerel and other fish of prey that inhabit the river, and which greatly prefer them to the silver spoon of the fisherman.—*Ogdensburgh* (*N. Y.*) *Journal*.

—The Lake House, at Islip, is one of the best known and most popular hotels on the south side of Long Island for sportsmen. It is excellently managed and the fare is the best we ever experienced at such a place. Mr. Stel[illegible]enwerk has kept the house for 30 years.

A POLICE DOG.—"Allen Pinkerton," the dog detective of the St. Joseph police force, is dead. Hundreds of our people who for the past eight years have seen a queer-looking little black dog, with white hair around his neck and a bushy tail that curled over his back, will read this announcement with surprise and genuine regret. The first known of the dog is that ten years ago he mysteriously turned up at the residence of John O'Connor, where he remained for about two years. At the end of that time he became a voluntary member of the police force, and demeaned himself in such a manner as to gain the name of "Allen Pinkerton," after the noted Chicago detective. He followed the men about day and night—first one member of the force and then another. Many a dark night has he assisted the officers in discovering the whereabouts of tramps who had concealed themselves in empty barrels and boxes, and his terrifying bark has caused hundreds of petty thieves to take to their heels. He prowled about the darkest corners in the alleys, and whenever an int oxicated man was found a yelp or two was sufficient to bring up the nearest officer to look into the matter. His well known voice was relied on with as much confidence as the sound of a policeman's whistle, and it was always answered. At roll call he was prompt as any of the men, and on such occasions he was the pet of the office. He had the most wonderful sagacity and appeared to almost comprehend the orders of the chief. Nearly every lady who visited the morning market knew the dog and spoke kindly to him, while the market women petted and caressed him whenever he came about, and always had a dainty morsel with which to tickle his palate. Of late years Allen has been growing feeble and for the past six months or a year he has been able to travel with his old associates but little. Since his health became poor he has made his home with ex-Policeman James Hudgens. On Thursday last Allen was taken sick, and notwithstanding everything was done for the poor dumb animal that man could do, he calmly died on Tuesday. During the last two days and nights that he lived Mr. Hudgen, who more than once while patrolling his lonely night watch realized the value of his cheerful presence, nursed him continually, and when his death was announced every member of the force felt the deepest regret. He was buried in Mr. Hudgens' yard, wrapped in a clean white sheet, and his remains enclosed in a neatly made coffin.—*St. Joseph* (Mo.) *Gazette.*

BOOKS RECEIVED.

THE GREAT SPEECHES AND ORATIONS OF DANIEL WEBSTER. With an Essay on Webster as a Master of English Style. By Edwin P. Whipple. One large octavo volume. 772 pages. Price, $5.

The publishers have done a great thing for the young men of to-day in presenting to them in accessible form the great speeches of Daniel Webster. Save the numerous extracts in school readers and speakers and the six large volumes of his "works" edited by Edward Everett, the former meagre and unsatisfactory, the latter too expensive for general possession, no means have been afforded to the student of making himself familiar with the English of this master of prose. The book now before us fills this want. No understanding of the momentous history of our republic can be complete without an acquaintance with the forensic debates of our statesmen. The value of this publication, both historical and rhetorical, cannot be overestimated.

—MESSRS. CASSELL, PETTER, GALPIN & CO. announce that they are about to enlarge their *Magazine of Art*, a monthly publication which is finding much favor.

—WE have received "The American Archers' Hand-Book and Guide to Correct Shooting," edited by W. Holberton and published by Conroy, Bissett & Malleson. It contains much useful information and valuable instructions.

THE PARKER GUN.

PARKER BROS., Meriden, Conn. New York Show Rooms, 97 CHAMBERS ST.

The Parker Gun Again Victorious!

In the Tournament just closed at the St. Paul Driving Park, **30 prizes** in the regular shoots and the sweeps following them were won by sportsmen using the Parker Gun.

The Rochester (N. Y.) *Democrat and Chronicle*, of recent date, in reforring to the remarkable execution of these guns at their tournament, in which the Parker Gun won the **Gold Medal for the Best Average**, says: "The Parker Gun is one of the finest ever admired by a true sportsman, and of late years it has been generally used where before nothing but those of European make would be thought of. This company has successfully succeeded in making their own steel barrels, which, together with other novel and important improvements, make their guns the finest yet introduced among lovers of field and forest sports. Dr. Carver, the celebrated American marksman, used this gun in his late exhibition before the Prince of Wales, and recommends it highly as a fowling piece, as do also Ira Paine and other noted shots.

ALSO MANUFACTURERS OF THE BEST PLAIN BALL IN THE MARKET.

Attention, Sportsmen!
Kay's Improved and Perfected Ball for 1879.

[PATENTED OCTOBER 13, 1877.]

A SUBSTITUTE FOR GLASS.

HAVING succeeded in producing a Ball for professional and amateur use at the trap, we offer the same with the following recommendations, viz: In breakage, the equal and superior to any glass; Uniformity, being of an exact uniform thickness of 1-20th of an inch, is superior to any blown material; Durability, is not affected by their solubility; Residuum, can be used anywhere, and on finest lawns, leaving neither injurious or unsightly refuse. Packed in barrels by a device peculiar to us, we guarantee against breakage in shipment. For particulars see circulars. Price, $2 per 100. All orders addressed to dealers, or **A. B. KAY & CO.,** Newark, N. J., Manufacturers of Buck and Heavy Drop Shot, Cartridges for Long-Range, viz.: Deer, Duck, and Geese, $3 50 per 100; also, the Chip or Expansive Concentrator, $1 25 per 100. A box of 50 sent on receipt of 75 cents by mail

THE CARVER TARGET BALL.

[CAVEAT FILED.]

GREENVILLE, PA., May 23, 1879.

DEAR SIR:—We take pleasure in notifying all admirers of Target and Ball Shooting that we have introduced a COMPOSITION TARGET BALL for Trap Shooting that is perfect in every particular. It has been thoroughly tested by many of the leading Sportsmen, and pronounced by all as the only perfect and unobjectionable Target Ball in existence. This Ball is very uniform in weight and standard size, and when broken leaves no *debris*, but will EVAPORATE in five days and acts as a FERTILIZER. They can be used on Lawns, Gardens, Fields or Parks, thereby doing away with the danger and annoyance consequent in using Glass Balls. We are now prepared to fill orders. Drafts or P. O. Order must accompany all orders. Organized clubs are invited to send for Sample Box, (25 balls) and Circular free.

PRICE LIST—Perthousand, $12. No charge for packages. Address,

J. H. WAUGH, Inventor

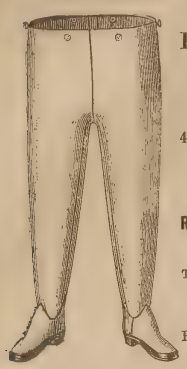
Maynard Creedmoor Rifle

THE MAYNARD AHEAD!

The following Targets were made by Prof. Chas. E. Dwinnell of Wheeling, West Va., on Range, August 12th and 13th, 1878, with a *Maynard Long Range Rifle*, and are the MARKSMEN RECORD. The grand total of 437 is a possible 450.—40 shots at the 1st has never before been accomplished by any Rifleman, or Rifle, in the world.

These scores were made in the competition for position on the American team for 1876; entire iron alliance of the United States, and were shot under the rules of the N. R. A., Full on sighting shots at either distance. These scores were all witnessed and sworn to by JAMES TOM, Secretary *Maynard Rifle Club*, Wheeling, West Va.

AUG. 12, 1878. 800 YARDS.



CREEDMOOR REGULATION TARGET, 6 x 12 feet, 3 feet Bulls-Eye.

The Maynard Arms are the most perfect in workmanship as well as accuracy, of any guns in the world, perfect attainders being paid to the *for shooting as well as the mechanical qualities* of guns. For full particulars and price list, address

Sportsmen's Routes.

"THE FISHING LINE."
TAKE THE
Grand Rapids & Indiana R.R.
Mackinaw, Grand Rapids and Cincinnati Short Line
FOR THE
Trout, Grayling, and Black Bass Fisheries,
AND THE
FAMOUR SUMMER RESORTS AND LAKES
OF
NORTHERN MICHIGAN.
The waters of the
Grand Traverse Region
and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.
BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.
The TROUT season begins May 1 and ends Sept. 1.
The GRAYLING Season opens June 1 and ends Nov. 1.
BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.
The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.
TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with
Hay Fever and Asthma Affections.
The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.
During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.
Dogs, Guns and Fishing Tackle Carried Free at owner's risk.
It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. B. LEET, Gen'l Pass. Agent, Grand Rapids, Mich.

Sportsmen's Routes.

St. Louis, Minneapolis
AND
ST. PAUL SHORT LINE.
Through Pullman Palace Sleeping Cars between St. Louis, Minneapolis and St. Paul.
Burlington, C. Rapids & Northern Railway.
QUICKEST, CHEAPEST AND BEST!
TWO PASSENGER TRAINS each way daily, between Burlington, Albert Lea and Minneapolis, crossing and connecting with all East and West Lines in Iowa, running through some of the finest hunting grounds in the Northwest for Geese, Ducks, Pinnated and Ruffed Grouse and Quail. Sportsmen and their dogs taken good care of. Reduced rates on parties of ten or more upon application to Gen'l Ticket Office, Cedar Rapids,
C. J. IVES,
E. F. WINSLOW, Gen'l Passenger Agent.
General Manager. tf

To Hunting and Fishing Parties.
The Pullman Car Company
IS PREPARED TO CHARTER THE new cars "DavyCrocket" and "Izaak Walton," which are fitted up with dining room and kitchen, sleeping apartments, lavatories, etc., also provided with racks and closets for guns and fishing tackle, and kennels for dogs.
Diagrams, rates and other desired information furnished on application to Gen'l Supt. P. P. C. Co., Chicago. je26 3mos.

FOR HALIFAX,
PORT HAWKESBURY, PICTOU, AND CHARLOTTETOWN.
THE first-class steamships Carroll and Worcester, will leave T wharf, Boston, for above ports, every Saturday at 12 M. Through tickets sold to all principal points in Nova Scotia and Cape Breton. No freight received after 10 A.M. on day of sailing. Shippers must send with receipts the value of goods for Master's manifest. For rates of freight or passage inquire of W. H. RING, 18 T wharf, or O. G. PEARSON, 219 Washington street. F. NICKERSON & CO., Agents.

TO SPORTSMEN:
The Pennsylvania R. R. Co.,
Respectfully invite attention to the
SUPERIOR FACILITIES
afforded by their lines for reaching most of the TROUTING PARKS and RACE COURSES in the Middle States. These lines being CONTINUOUS FROM ALL IMPORTANT POINTS, avoid the difficulties and dangers of reshipment, while the excellent cars which run over the smooth steel tracks enable STOCK TO BE TRANSPORTED without failure or injury.
THE LINES OF
Pennsylvania Railroad Company
also reach the best localities for
GUNNING AND FISHING
in Pennsylvania and New Jersey. EXCURSION TICKETS are sold at the offices of the Company in all the principle cities to KANE, RENOVA, BEDFORD, CRESSON, RALSTON, MINNEQUA, and other well-known centers for
Trout Fishing, Wing Shooting, and Still Hunting.
Also, to
TUCKERTON, BEACH HAVEN, CAPE MAY, SQUAN, and points on the NEW JERSEY COAST renowned for SALT WATER SPORT AFTER FIN AND FEATHER.

Ammunition.

Laflin & Rand Powder Co.,

No. 26 Murray Street, N. Y.,

Sole Proprietors and Manufacturers of

ORANGE LIGHTNING POWDER.

No. 1 to 7, strongest and cleanest made, in sealed 1 lb. canisters. Higher numbers are specially recommended for breech-loading guns.

ORANGE DUCKING POWDER.

For water-fowl, strong and clean. No. 1 to 5, in metal kegs, 6½ lbs. each, and canisters of 1 and 5 lbs. each.

ORANGE RIFLE POWDER.

The best for rifles and all ordinary purposes. Sizes, FG, FFG and FFFG, the last being the finest. Packed in wood and metal kegs of 25 lbs., 12½ lbs. and 6½ lbs., and in canisters of 1 lb. and ½ lb.

All of the above give high velocities and less residuum than any other brands made, and are recommended and used by Capt. BOGARDUS, the "Champion Wing Shot of the World."

Blasting Powder and Electrical Blasting Apparatus.

Military Powder

of all kinds on hand and made to order.

Safety Fuse, Frictional and Platinum Fuses.

Pamphlets, showing sizes of the grain by wood's cut, sent free on application to the above address.

GUNPOWDER.

DUPONT'S

RIFLE, SPORTING and BLASTING POWDER.

The Most Popular Powder in Use.

DUPONT'S GUNPOWDER MILLS, established in 1801, have maintained their great reputation for seventy-eight years. Manufacture the following celebrated brands of Powder:

DUPONT'S DIAMOND GRAIN,

Nos. 1 (coarse) to 4 (fine), unequaled in strength, quickness, and cleanliness; adapted for Glass Ball and Pigeon Shooting.

DUPONT'S EAGLE DUCKING,

Nos. 1 (coarse) to 3 (fine), burning slowly, strong, and clean; great penetration; adapted for Glass Ball, Pigeon, Duck, and other shooting.

DUPONT'S EAGLE RIFLE,

A quick, strong, and clean Powder, of very fine grain for pistol shooting.

DUPONT'S RIFLE, FG, "SEA SHOOTING," FFG and FFFG. The FG for long range rifle shooting, the FFG and FFFG for general use, burning strong and moist.

SPORTING, MINING, SHIPPING, and BLASTING POWDERS of all sizes and descriptions. Special grades for export. Cartridge, Musket, Cannon, Mortar, and Mammoth Powder, U. S. Government standard. Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 50 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. *only.*

Hazard's "American Sporting."

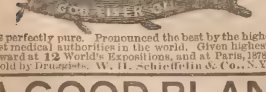
Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and 6½ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6½ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration.* For field, forest, or water shooting. It sanks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6½ lbs. and cans of 5 lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist.* The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.



Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office,

88 WALL STREET, NEW YORK.

MOLLER'S NORWEGIAN COD-LIVER OIL

Is perfectly pure. Pronounced the best by the highest medical authorities in the world. Given highest Award at 12 World's Expositions, and at Paris, 1878. Sold by Druggists. W. H. Schieffelin & Co., N. Y.

A GOOD PLAN

The most profitable way of dealing in stocks is by combining many orders and co-operating them as a whole, dividing profits *pro rata* among shareholders, according to the market, monthly. Each customer thus secures all the advantages of immense capital and experienced skill, and can use any amount, from $10 to $10,000, or more, with equal proportionate success. "New York Stock Reporter" and new circular mailed free. Full information for any one to operate successfully. Lawrence & Co., 57 Exchange Place, N. Y.

PURE TIN-COATED AND BURNISHED

DROP AND BUCK SHOT.

American Standard--Eagle Brand.

CAPTAIN BOGARDUS ON TIN-COATED SHOT.

EDITOR FOREST AND STREAM:— NEW YORK, Jan. 13, 1879.

HAVING been asked by many of your readers as to the merits of TIN-COATED SOFT SHOT, I desire to say that I consider it the best shot I have ever used. I have given it a very severe test, having shot my 6,000 ball match Jan. 8 and 9 with it. In that match I used two sets of double barrels, one of 10 and the other 12-bore, and each single barrel was discharged 1,500 times without being once cleaned. The inner surface of the barrels is bright and free from scratches, although in shooting I used them until they became so hot that they would not bear handling. I cannot imagine any case of ordinary use which could so severely test the cleanliness and perfection of the tin-coating and its freedom from injury by any heat which could ever result from continuous discharges of the gun. A. H. BOGARDUS.

THE LEROY SHOT AND LEAD MANUFACTURING COMPANY, NEW YORK.

United States Cartridge Company,

Old Judge Smoking Tobacco.

The Only Tobacco Ever Manufactured that does not Bite the Tongue.

"Old Judge" Cigarettes.

MANUFACTURED under Letters Patent granted Charles G. Emery, March 5, 1878, by which the rice paper used as wrappers is so prepared that the unpleasant odor and injurious effects of the OIL OF CREOSOTE thrown off when burning is completely neutralized or destroyed, and the paper made saliva proof to prevent its breaking or melting in the mouth. The great advantage and importance of this invention will at once be recognized by all smokers, and its truth demonstrated by the first "Old Judge" Cigarettes they smoke. Neither will they require a printed certificate from any eminent Professor of Chemistry to convince them they have heretofore, in smoking Cigarettes made of PURE RICE PAPER, been inhaling one of the deadliest poisons known.

A GREAT INVENTION!

IMITATION

STAINED GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or Elegantly Stained Window. It is easily applied to the glass in Windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented,* and not a single agency has as yet been established.

ONE GOOD MAN in each State wanted, to whom exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of $1.00.

Agents' Apply to L. Lum Smith, Patentee & MFR., 717 SANSOM ST., PHILADELPHIA, Pa. {Sole Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald:*

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to any part the most remote section of the country *free* of express or freight charges."

AGENTS' HERALD

The Largest, Spiciest, and only REPRESENTATIVE PAPER OF ITS KIND.

ACTIVE AGENTS GIVEN GOOD EMPLOYMENT EVERYWHERE

by over 200 responsible advertisers in this month's issue of the *Agents' Herald.* Grand outfit, including circulars, terms, and a beautiful 10x14 engraving of the *Smithograph,* sample card and full particulars of the AGENTS' DIRECTORY and sample copies of last month's *Agents' Herald,* all for 10 cents. Yearly Subscription, $1.00. One cent stamps taken. We cannot afford to give the paper away, so don't ask us. Address in haste,

BUNKER FISHING.

ON ocean waters, sound, and bay,
The twinkling Maytime sunbeams play,
And white with foam the billows shine
Where the moss-bunkers lash the brine.
Above them, flocks of seagulls swing;
Beneath, the hungry bluefish spring,
And deadlier still, the surf-men strain
The oar and run the meshing seine.

Where sweeps the broad and breezy bay
Engirt by shores with woodlands gay
In shoals innumerable as sands
That sparkle in the wrinkled strands,
The bunkers gather on the flood,
Roaming the ocean-paths for food,
And here the fisher-boats invade,
Deep with the shining burden weighed.

Off by the low New Jersey shore,
Off where Long Island surges roar;
Off where the Narraganset Bay
Its tribute to the sea doth pay,
Off Massachusetts Bay profound,
Off Maine shores with their pine woods crown'd,
Off where the billows chafe and fret
O'er rocks along New Brunswick set,
The fish innumerable pass
O'er tumbling seas, or seas of glass.

The watchman's eye from sandy mound,
Or eyrie in some tall tree found,
Surveys the broad extended main,
Views of the fishy shoal to gain;
And when the welcome prize draws near
In acres, all the waters clear,
He hoists his signal to the breeze,
That all may hasten to the seas.

Then rush the crews from shop and field,
Leave plow in glebe the oar to wield;
The surf-boat down the beach is drawn,
The oar is seized with arm of brawn,
The boat is launch'd where breakers pour,
While guides the helmsmen with the oar.

Then hard and emulous the toil,
Rivals all anxious for the spoil;
The ablest boat, the manliest crew
Tug hard with muscle and with thew,
And victor in the race, surround
The leaping fish with snaring bounds,
Then laden is the boat, till more
May not be added to the store.

They pull for shore, and soon the soil,
Is opulent with scaly spoil;
In glittering heaps the shiny hoard
O'er all the yellow sand is poured;
And not the wealth of Indian mines,
Dug deep where never sunbeam shines,
So fair, so gorgeous to behold
As this rich spoil of blue and gold.

ISAAC MCLELLAN.

A Winter in East Florida.

FIRST PAPER—AVANT PROPOS.

DURING the fall of 1878 I had, among other chronic patients, several young men who were improving but slowly, owing to the fickle climate and the too generous and imprudent mode of life common to central Kentucky. Knowing that a plain diet, pure air, bright sunshine, and varied exercise would work wonders toward their restoration to health, I advised them to accompany me on my trip to Florida during the ensuing winter. To this they readily agreed, as I assured them that by hunting, fishing, and living in the open air, they would not only enjoy themselves to the top of their bent, but that in no other way could they secure so fully and agreeably the benefits of Nature's great restoratives, air, sunshine, exercise, and sound sleep. I was certain that in no other climate could an open air life be indulged in with such perfect impunity as in East Florida, whose balmy atmosphere and genial climate cannot be surpassed, if, indeed, it can be equalled, even by the vine-clad hills of Southern France, or the sunny slopes of Italy; and, certainly, better opportunities for enjoying the sports of flood and field exist nowhere else.

As I had never been further south or east in Florida than Palatka, I recalled to my mind all that had been related to me by friends who had visited East Florida, and read up everything I could procure in relation to Indian River and the east coast; and, I might say in this connection, that I obtained more information from Hallock's "Camp Life in Florida," than from all other sources combined.

Having been accustomed to "camping out" and sailing since my boyhood, my plans were soon formed. I decided to proceed at once by rail and steamboat to Titusville, at the head of Indian River, there to obtain a suitable boat and sail down the east coast to Bay Biscayne, and on returning to sail down the St. John's River to Jacksonville if time would permit.

About the beginning of December I began my preparations for the journey. As our boat would be used only as a means of transportation, and most of our time would be spent ashore, I procured two A or wedge tents made of the best 10 oz. duck. Each tent being 9½ feet square on the ground, would comfortably accommodate three persons—there being six of us in the party. As my companions had not had my experience in "roughing it," I advised each of them to take, in addition to shot gun, or rifle, and hunting-knife, two old suits of woolen clothing, two flannel shirts, a change of underclothing, three pairs of woolen socks, two old felt hats, a pair of boots, a pair of brogans, two pairs of woolen blankets, a rubber blanket, a rubber poncho, and a huswife containing needles, thread, pins, buttons, wax, etc. My own immediate outfit was similar to the others, with the addition of a box of choice fishing tackle, a bundle of rods, my 12-gauge "Parker," and a hammock, with the further addition of 10-gallon can of alcohol sent me by Prof. D. S. Jordan for preserving specimens of Florida fish fauna. My *armamentarium medicamentum* consisted of a few leading remedies, a pocket surgical case, some adhesive and isinglass plasters, a couple of pairs of tooth-forceps, together with a dissecting-case, and several pounds of arsenic for taxidermic purposes.

Our party, comprising two dyspeptics, one incipient consumptive, one bad liver, one nasal catarrh, myself and my Royal Duke-Queen setter pup, Gipsy Queen, left Cynthiana, Ky., on the morning of Dec. 16th, amidst a flurry of snow, and arrived at Cincinnati at noon, where we embarked on the mail boat for Louisville in the afternoon. We left Louisville on the morning of Dec. 17th, and arrived in Jacksonville, Fla., on the bright, warm and balmy morning of the 19th.

I at once called on Dr. C. J. Kenworthy, better known to readers of FOREST AND STREAM as "Al Fresco." I found him in his garden superintending the planting of some sub-tropical fruit trees. Repairing to his library, we became better acquainted over a bottle of Florida orange wine, which, by the way, equalled old Madeira in body, boquet and flavor. I found the doctor genial and companionable, a clear thinker, an earnest worker, and a true sportsman in the highest sense of the term.

To my regret he informed me that he had never been in the Indian River country, though he had visited nearly every other portion of Florida. He endeavored to dissuade me from my contemplated trip to that region—said we would be devoured by fleas, sand-flies and mosquitoes; that the Indians had killed off all the game, and that the fishing was not so good as on the southwest coast. He advised me, by all means, to go to Cedar Keys, and cruise down the coast to Charlotte Harbor, Doctor's Pass, etc., to Cape Sable.

But I was dead-set for Indian River and beyond; my tiller was lashed, and, like Barney O'Reirdon, the Irish navigator, I would be turned from my "*sou*-aist coorse" by no man. I simply argued that for obvious reasons I invariably found game and fish more abundant where black-flies, sand-flies or mosquitoes were thickest. Besides, it would do my patients no harm to relieve them of a little of their bad blood—thus could I vicariously practice phlebotomy, which of late years has grown to be as unpopular as it is unnecessary. Then, again, the mosquito might be a blessing in disguise to those who frequent malarious districts, for, according to the late theory of some savant, the poison that he injects with his delicate hypodermic syringe is analagous to quinine, and acts as an efficient prophylactic to malarial fevers!

The Doctor, seeing that I was rash and determined, started down to the river with me to look at the sail-boats. I found quite a number of yacht-built boats of light draught, centre-boards, sloop and cat-rigged, and of the flat-iron model. I found one that suited me, which the Doctor was to ship to Titusville, provided I could find none at the latter place. While on our tour of inspection the Doctor showed me his little yacht, the *Doni*, only 16 feet long, in which he made his famous cruise from Key West to Cedar Keys, an account of which he gave to the readers of FOREST AND STREAM under the heading of "Marooning." She was hauled out and being "fixed up" for another cruise. He showed me where a shark struck her while anchored in Shark River, starting one of the butts of her planking, and startling the Doctor out of his nap. She is as trim and taut a little craft as one would desire to see.

Observing a crowd on one of the docks we went over and saw a huge alligator lashed to a plank being taken from one of the steamers. They said he was fifteen feet long and was from Indian River—this was encouraging. I merely glanced at the Doctor and said nothing, thinking that the saurian had mouth enough to speak for himself, and was certainly of age. Turning the corner on to Bay street I noticed that all of the fruit stores displayed conspicuous signs bearing the legend, "Indian River Oranges"—here was more encouragement, and food for thought and stomach too. The Doctor merely smacked his lips and said nothing. After introducing me to some "Old Salts," steamboat captains, and merchants with whom I would have some subsequent business transactions, he left me, cordially wishing me *bon voyage*, hoping I would change my mind as to my destination. But I knew it was useless to hope against fate and bade him "good-by." I watched his tall and graceful form as he stalked away, little thinking that it would be the last I should see of the charming "Al Fresco," but so it proved, for on my return in May he was away from home.

I now busied myself laying in our supplies of groceries, provisions, ammunition, fishing tackle, lantern, axe, spade, hatchet, etc., which were ordered to be well boxed and shipped to Titusville via Salt Lake. Saturday, Dec. 21st, was the day set for our departure from Jacksonville on the good steamer *Valusia*, Isaac Hall, Master. I proceeded to look up my companions, and found Ben in a canemaker's shop, intently watching the man carving alligators on the tops of orangewood canes—Ben has a penchant for canes—he then had in his hand a young hickory with a huge knotted head, which he had cut before leaving "Old Kentuck." He would have had this knot carved into some grotesque figure, but I dragged him away. From my knowledge of their proclivities I found Frank and Ed. where I expected—at the gun store. Frank was looking lovingly upon the guns and rifles ranged along the wall, while Ed. was gazing abstractedly at a fine display of salt-water fishing tackle. Frank can never see a gun but he must handle it, try the locks, bring it up to his shoulder, and bore some imaginary object through and through. I've no doubt but he had handled every gun in the store. Ed. seemed particularly taken with a shark hook with its chain and swivel. He is a monument of patience—will sit all day long under a shady tree in fond anticipation of the "bite" he may never get. I discovered Marion, who has an eye for mechanics, watching a machine hulling rice, while his brother Henry was trying to devour the contents of a fruit store near by. Henry of course was one of my dyspeptics. I told them to get their baggage down to the boat at once. An hour later and I was waiting for them aboard the steamer. They came at last, one at a time—they are never in a hurry. I observed that Ben came up smiling and swinging his cane, the top of which he had had carved into some sort of a head, either of a pointer or a clown, I could not tell which. Ed. had the shark hook sticking out of his pocket, while Marion was examining his latest purchase, a hollow handle containing all manner of awl blades, chisels, gimblets, &c.; he was vainly trying to get them all back into the handle again. The last to arrive was Henry, in great haste too, his pockets full of oranges and bananas and his mouth moving faster than his legs.

The little *Valusia* steamed out shortly afterwards and went puffing up the St. John's against a strong head wind. As this river has been so often described in FOREST AND STREAM I will not attempt it. We finally left the river on Tuesday morning and entered Snake Creek, whose tortuous windings we followed for a few hours, and arrived at Salt Lake about 11 o'clock. This is the head of navigation, and is 275 miles above Jacksonville. We were transferred to the shore in a lighter, or I should say to a car, which stood some hundred yards from the shore in the shallow water which but barely covered the track. There is a wooden tramway seven miles in length, extending from Salt Lake to Titusville. The car is drawn by two mules who travel outside of the track, one on each side, and entirely independent of each other—each having a pair of lines to himself, like a Mississippi steamboat with two engines, which can be forged ahead with one wheel while being backed by the other. We arrived at Titusville in time for dinner.

J. A. HENSHALL.

HUNTING THE SHARPTAILS AT HALLOCK.

HALLOCK, *Minnesota, Sept. 14th*, 1879.

The sharptailed grouse (*Pediœcetes Phasianellus*) is the original representative of this family in the northwest. It has never been found, I believe, south of latitude 43, but goes as far north as Great Slam Lake, and from northern Wisconsin to the Pacific, inhabiting prairies and oak-openings.

A peculiarity of this bird is that it disappears gradually in proportion as the country becomes settled and cultivated, and is then supplanted by the common prairie chicken (*Cupidonia Cupido*). As a game bird it is, in my estimation, superior to the last-named variety, being much handsomer in plumage, swifter on the wing and its flesh of more delicate flavor.

On the second instant at 5 o'clock P. M., Mr. C. W. Gliddon of Boston and myself left St. Paul by the St. Paul, Minneapolis and Manitoba Railroad for Hallock, for the purpose of enjoying a few days' hunting of these fine birds. The following day, rather late in the afternoon, we arrived at the place, but as the sun was yet an

hour high,we concluded to try our hand at once, and give our dogs a run after their long confinement in the baggage car. We had not to go very far, for within a quarter of a mile from the village we found a small covey of sharptails of which we brought down six in half an hour's time. Our dogs behaved well. I had with me old Rover,well known to you, Mr. Editor,and Mr. G. brought with him from Boston a young thoroughbred English setter bitch, Zelpa, who did admirably, considering that this was her first experience on the prairies.

The day following we were induced to start for a pond, some ten miles away on the prairies, where ducks and geese were said to be found in great numbers, but reaching the house of a farmer, who was to be our guide to the place, we found to our disappointment that the man was not at home,and after luncheon and a vain attempt on our part to find the pond, we started reluctantly homeward about 3 o'clock P. M. A little later we passed a newly broken field, where Mr. G. noticed a whole covey of sharptails sitting in full view, and to get down from the wagon with dogs and guns was only the work of a moment. Approaching the birds within twenty yards, they commenced running up the plowed field, and we had to step out pretty lively to follow them. This continued for at least 200 yards, our dogs at times crawling, at times pointing behind us. It was a very pretty and rather exciting sight to behold those beautiful birds, some fourteen in number, skipping along almost at our feet, heads and tails erect and apparently unaware of any threatening danger. Your correspondents often indulge in expressions about the "speckled beauties" of the mountain brook, but these fine game birds of the northwest might with equal right be called the "speckled beauties of the prairie." They are now in full plumage, almost white underneath and the arrowheads distinctly marked on their breast.

At last one took to flight, and Mr. G. brought it down. Thi was the signal for the whole family to take their departure, and would you believe it, Mr. Editor, looking at the birds I, for one, forgot to shoot. Incredible, but true. The covey settled on the prairie not more than 100 yards off, and in half an hour or less we had nine of them bagged. Left the balance for increase. Continuing our journey homeward, we found no scarcity of birds, and we arrived at the village by supper-time. Our bag contained twenty-two grouse and a blue-winged teal.

The day following was stormy and rainy and we stayed at home, but Saturday was fine, although the wind was rather high. We employed that day to explore the country on the Peninsula between the North and South Forks of Two Rivers. Here, on a stubble-field we found quite a number of birds, and on our way home we found them still more plenty; so much so, that we did not touch several coveys our dogs pointed within a mile or two of the village, for the reason that, if killed, we did not know how to use them. This day also our bag contained something over twenty birds.

Since then we have been out several times, killing all the birds we wanted and sending some big bunches to our friends in St. Paul.

Yesterday, for a change, we went duck-shooting. Within from one-half a mile to seven miles, there are several smaller sloughs where ducks and geese abound. But the two great resorts for these birds, where you may find them by the tens of thousands, are situated eighteen and twenty-five miles, respectively, by wagon-road from here. The latter resort is also the home of the elk, deer and moose.

The sloughs we hunted yesterday are four and seven miles off. From noon till 4 o'clock P. M. we killed twenty-three mallards, and on the way home a few grouse. A large black bear passed through the outskirts of Hallock two days ago, swam the river, and went into the woods towards the east, seen by several persons.

To-morrow we return to St. Paul. *Addio.* J. S.

Fish Culture.

RESULTS OF FISH CULTURE IN IOWA.—*Delhi, Iowa, Sept. 6th*—I notice in the issue of the FOREST AND STREAM of the 28th ult., a letter from M. G. Ellzey, of Blacksburg, Va., stating that trout two years old had been taken weighing one pound. We in Delaware County beat that a long way. On the 6th day of June, 1877, Hon. B. L. Shaw, the Fish Commissioner at Anamoosa, placed fry in a spring branch, in this county, a stream only two miles long, composed of two springs, and the first one caught in the April following weighed one and a half pounds; and but few have been caught weighing less. In August one was taken weighing one and three-quarter pounds. It seems to me if old Virginia is a good place for trout, they find a better home in Iowa. B. L. Shaw is making great effort to increase the fish. More than two millions were taken with seines last year from the sloughs which were about run dry, and placed back in the rivers. The Commissioner, has filled the Napsiepenico river, running north and south through the State, with bass and croppies.

There never has been such an abundance of black bass in our rivers before. The Maquakito, running through Deluce County, its source being only a few miles above the line of the county, is literally full. I see by the same issue that in Kentucky a bass weighing one and a half pounds is taken. We have caught them here weighing eight pounds, and in a string of fifty, twenty will weigh over four pounds. A party of four of us yesterday at the mill pond, the best on the stream and three miles from its source, caught seventy-five; the average weight being two and a half pounds, but many of them weighed three, four and five pounds. The great trouble we have here is to compel the building of dams and fish ways. If we had a McDonald fish way it would be worth a great deal to the people of Iowa.

The State Commissioner will in the spring put in the head waters of the Maquaketa, which is made of the coldest and purest springs, forty thousand trout, which we believe will soon fill all the streams emptying into the river. Spring Branch, where all the large trout are found has had placed in it from Commissioner Shaw ten thousand California salmon. They are thirteen months old, and seven inches long, and will take a fly beautifully.

VAN

GRATIFYING RESULTS OF FISH CULTURE IN VIRGINIA.—*Mr. Editor:*—I have tried the Greenhill River in the last few days for bass. The W. Va. Fish Commission has been stocking the stream in the last two years. I used a fly and found I could take plenty of small bass, which I put back into the stream. Friday evening late I fished a deep pool and took some seven or eight from a third to half a pound each. Once I had two at once, the smaller one-half pound, the other, one and a half pounds. In a year or two there will be fine fishing here. C. CLAY.

Natural History.

VITALITY OF SNAILS.—The vitality of some species of land and fresh water mollusca is remarkable, and, especially when considered with relation to their distribution over the earth, most interesting. It is a well-known fact that most of these organisms are exceedingly sensitive to the influence of sea water, and that immersion in it at once kills the eggs and in most cases the adults. It appears, however, from experiments made by Darwin that those shells which are provided with an operculum, or front door to their shells, or even a membranous diaphragm covering the opening, are less susceptible to the influence of sea water than those in which this is wanting. This naturalist found that several species in this state were uninjured after an immersion in sea water of seven days. A specimen of *Helix pomatia*, which had been thus treated and again became dormant, recovered after an immersion of twenty days. Baron Aucapitaine tried similar experiments. He immersed 100 land shells, representing 10 species, in sea water, and found that 27 recovered after having been in the water for a fortnight. Speaking of this subject Darwin says: "The presence of an operculum seems to have been of importance, as out of twelve species of *Cyclostoma elegans*, which is thus furnished, eleven survived." Not only do these shells have the power of resisting the injurious effects of sea water, but they can remain dormant for a very great length of time. Wallace instances some which have lived two years and a half shut up in pill-boxes, and speaks of a snail from the Egyptian desert which came to life after having been glued down to a tablet in the British Museum for four years!

Mr. James Ward has contributed to *Nature* an observation on this subject which is worthy of mention. Writing from Trinity College, Dublin, under date of Aug. 7, he says:—

At the beginning of July last year I placed a couple of the *Helix aspera* in a closed pot of earth immediately after copulation. They soon sealed themselves up, and so remained until the middle of May of this year, when it was discovered that of one of them that had died not a vestige was left except the empty shell. The other had shrunk to about a third its former bulk, but on being moistened and supplied with food soon began to eat and to thrive. It had to trust largely to chance for its provender; but notwithstanding this, by the end of two months it was as big as its present quarters would allow it to be. The natural thing would have been to secrete more shell, for the animal was not full grown. Instead of this, however, it burrowed in the ground and fell to laying eggs, the greater part of which hatched out a little colony of vigorous young snails. Had their parents been supplied with food and water after impregnation they would, of course, have begun life a year ago. I wonder how high up in the animal scale such temporary suspension of the earliest stages of development is possible?

JAPAN AND BERMUDA FISHES.—The Aquarium has again been successful in transporting live specimens of delicate tropical fishes from Bermuda, Florida, and Japan. Among those which arrived from Bermuda are squirrel fishes, grey and silky snappers, breams, turtle, flat and spiney lobsters, flying fish, land hermit crabs, granny whales, and several varieties of anemones. From the Florida coast are red snappers, marble groupers, shark pilots, yellow caranx, spotted bass, and from the neighboring coast are tuberlarians, balloon and swell fishes, sea robins, naked molluscs, and from Japan there are seven gold fishes of the celebrated long-tailed kingkiyo variety. There is also a very large collection of marine and fresh water algæ, which Mr. A. W. Roberts, the curator, has so arranged that the tanks look like marine pictures. Mr. Henry Reiche, the proprietor, guarantees to the public that at present the Aquarium possesses a finer collection than any other place of its kind in the world.

A BALLOON FISH.—E. R. Wilbur, Esq., of Wilbur & Hastings, Stationers in Fulton street, has left with us a very fine specimen in alcohol of the spotted ballon fish (*Diodors fuliginosus*), taken off the shore of Long Island. It is of a dark olive green, and covered with spirals. This fish is not rare in these waters, and is most frequently taken at this season of the year. It belongs to the family *Gymnodontidæ*, of which there are some sixty known species, all of which are covered with prickles or spirals, and have the power of inflating themselves into a globular ball, and in this state float on the surface. These conditions serve as their means of defence. The flesh of several species is poisonous. One species, the common puffer or blower, is abundant in this latitude, and affords a cruel diversion to fishermen, who scratch it on the belly to make it inflate itself, and then burst it with a loud pop.

ELEPHANTS FOR AFRICA.—The prolonged discussion over the advisability of employing the Indian elephant for exploration in Africa has at last brought forth fruit, and the experiment is about to be tried. The Indian Government has presented to the King of the Belgians four elephants to be used by his expedition, and they have arrived safely at Zanzibar and been landed near Dar-es-Salaam.

Our London contemporary, *Nature*, prints an extract from a private letter, written by an eye witness of the operation of landing these huge creatures, which shows that the scene was a very exciting one. The writer says:

We never thought the first elephant could get alive to shore. It swam more than a mile in distance, and was in the water for more than an hour. Long after it was half way it would keep turning round and trying to come back to the ship. I cannot describe to you the excitement there was on board. I fairly cried once with anxiety and excitement; it would have been too horrible to see it drowned. It tried to climb up the ship's side once. It was pouring with rain, which made things seem more dismal; we were all wet through, but nobody cared. We had to get our experience as we went on, as no one knew anything about elephants on landing. We managed the other three much better, and made the Captain take the ship nearer in shore.

The syntactical construction of the above quotation is somewhat peculiar, but we presume that our readers will be able to make out its meaning after a little study.

WHAT IS IT?—A correspondent sends us the clipping found below, taken from the Boston *Herald* of August 21, and asks us "what the writer is giving us?" The description is too meagre for us to venture an opinion as to what the fish may be, though if we were disposed to hazard a guess, we should say perhaps a goose fish (*Lophius*). The extract is as follows:—

Frank Blaney of Swampscott and an assistant, fishing in a dory off that place yesterday, caught a monstrosity in the shape of a fish, the name of which none can tell, not even the oldest fisherman of that town, it being decidedly unlike any other rare specimen ever captured in that section. It is flat, of a dark brown color, the greatest thickness of its body being about eight inches. It weighs 300 pounds, the length to the tip of the tail being five feet one inch, with the greatest width at four feet, the nose being three feet two inches across. The width varies but little at any point of the fish, with the exception of the tail, which appendage is shaped like that of a shark, and gradually tapered from the end of the body for about a foot. The eyes are very small, and are about four inches apart, the mouth being about eight or ten inches across. The belly is white, the fins are rather small, and altogether it is the most curious piscatorial specimen ever caught around these parts.

DEATH OF A NATURALIST.—Last spring or summer we printed a brief description of the collection of animals, birds and curiosities belonging to Mr. M. W. Clark, of Danville Junction, Me., who also kept a hotel near by, the chief attractions of which were mineral springs. Very many visitors have occasion to remember the place with pleasure. Well, the poor gentleman has gone where good naturalists go. He died recently, and the fact may be interesting to some of our readers who may at some time have been his guests.

—A black bass was discovered in the centre of a cake of ice at Rondout on Monday. It had been locked up there for eight months and was frozen stiff when cut out. It was placed in a sprinkling pot cotaining cistern water and in half an hour showed signs of life. Now, according to the Albany *Knickerbocker*, it occupies a place in a globe on the counter at a drug store and is as lively as it ever was.

MORE PARASITIC FLIES.—*Andover, Sussex Co., N. J., Sept. 1st*—Allow me, a stranger, to intrude on your time and patience sufficient to introduce to you three specimens of the partridge louse, or fly. During the hunting season of the fall of 1878 I first discovered this fly on the partridge. These three subjects were taken from a large owl on Saturday last, Aug. 30th. (Would that they would all take to the owl for their subjects for torment!) You should be very careful in opening the enclosure, or they may escape. They are like Paddy's flea. They are all lively this morning. They may not be new to you, but there are many sportingmen who don't believe there is any such thing. G. C. COCK.

The specimens enclosed by our correspondent are the true partridge fly (*Olfersia Americana*—Leach), and we are glad to receive them. As we have heretofore stated, they are found on owls, hawks, herons and ruffed grouse.

ANIMALS RECEIVED AT CENTRAL PARK MENAGERIE FOR WEEK ENDING SEPT. 13th, 1879.—1 Yellow faced Amazon (*Chrysotis xanthops*), presented by Dr. J. W. Clowes, N. Y City; 1 English Pheasant (*Phasianus colchicus*), presented by Mr. J B. Brice, N. Y. City; 2 Flying Squirrels (*Sciuropterus volucella*), presented by Master H. S. Chatfield, Elizabeth, N. J.; 2 Japanese Rug Dogs (*Canis domesticus*); 1 Magpie (*Pica candata*); 1 Jay (*Garrulus glandarius*); 2 Love-bird Parrakeets (*Agapornis pullaria*); habitat, West Africa; 4 Striated Finches (*Munia striata*); habitat, India; 1 Alexandrine Parrakeet (*Palaeornis alexandri*), habitat, India; all purchased; 1 Chamleon (*chamaeleon vulgaris*), habitat, Africa; presented by Mr. John Lowry, N. Y. City.

A. CONKLIN, Director.

—A new survey of the Catskills, by Prof. Guyot, reveals mountains that were not known to exist. A large part of the region, especially the southwestern, is an untracked forest, and in several cases the only chance for making triangulation was by climbing to the tops of high trees. He found higher points than were before recorded. His table of altitudes contains three peaks over 4,000 feet, thirteen over 3,800 feet, and thirty-six over 3,500 feet. The highest point is one of the previously unknown, Slide Mountain, in the southern Catskills, 4,205 feet above tide.

BAKER'S BREAKFAST COCOA is a general favorite. Medical men recommend it as preferable to tea or coffee for nervous or delicate constitutions. Sold by leading grocers everywhere.—[*Adv.*]

The Kennel.

DOGS AT AUCTION.—One of the most important and successful sales of dogs at auction ever held in this city was that of a draft from the kennels of Messrs. Lincoln & Hellyar, of Warren, Mass., offered by Messrs. C. W. Barker & Son, on the 17th inst. The prices realized were far beyond those usual at forced sales, which may be accounted for from the fact that the animals offered were well bred and as represented in the catalogue. A large number of well-known breeders were present, and the bidding, in most instances, quite spirited. The red Irish setter Arlington, the first on the list, was not offered on account of his condition. The red Irish setter bitch Flora brought her full value, if not more, in spite of her prize winnings. The two pointers by Snapshot sold at less than their value, if it was only for their breeding, old Snapshot being dead, and but comparatively few of his progeny being in existence. The dog puppy was a remarkably handsome little fellow, giving promise of resembling his sire. Frank II. was a cheap dog at $95, his field qualities and breeding being considered. Seven of the red Irish setters and two of the pointers were not offered. After the sale of Mr. Lincoln & Hellyar's stock, a draft of red Irish setters from the Harrison kennels (Mr. C. W. Bassford's) of White Plains was offered; but bidders were diffident, and few of them were sold. A miscellaneous collection of mongrels was also offered, with which the sale concluded. The dogs sold, with the prices and purchasers, will be found in the following list:—

THE PROPERTY OF MESSRS. LINCOLN & HELLYAR.

Flora—Red Irish setter, imported, Mr. Eastman	$70
Gypsy—Black and white pointer, two years, by Cal out of Vaythe, Mr. Doerr	20
Rose—Lemon and white pointer, one year, by Snapshot out of Gypsy, Mr. Livingston	20
Frank II—Orange and white setter four years, imported, Mr. Williams	35
Glen—Lemon and white pointer, three and-a-half months, by Snapshot out of Gypsy, Mr. Hall	25
Czar—Black and white pointer, brother to above, Mr. Cooper	15
Sefton—Black and white pointer, brother to above, Mr. Covert	8
Daisy—Liver and white pointer, six months, by Rake II out of Daisy, Mr. Foster	21
Red Irish setter dog puppy, 3 months, by Dash out of Flora, Mr. Jackson	24
A litter brother to the above, Mr. Walker	18
A litter sister to the above, Mr. Boger	11
Red Irish setter bitch puppy, three months, by Chance II out of Phantom, Mr. Mott	8

THE PROPERTY OF THE HARRISON KENNEL.

Carnation—Red Irish setter, three years, by Dash out of Gypsy, withdrawn	
Dog puppy (red Irish) by Rory O'Moore out of Gypsy	15
Birch puppy (red Irish) by Rory O'Moore out of Gypsy, Mr. McLaughlin	11

MISCELLANEOUS.

Grace—Cocker Spaniel bitch, McKoon breed, Mr. Aston	21
Carlo—Black and white watch dog, Mr. Collins	4
Fanny—A poodle	4
Paddy—A Scotch terrier	6
Crib—Bull terrier	6
Dash—Red Irish setter, two years	35

MEASUREMENTS OF CELEBRATED IRISH SETTERS.—Our English contemporary, *The Country*, gives the following measurements of some of the most celebrated Irish setters in that country, all being well known prize winners and the property of Mr. T. Hilliard. These measurements are useful as giving other breeders an opportunity to compare them with the measurements of their own dogs:

Palmerston: Age, 11 years; weight, 65lb.; height at shoulder, 23½in.; length from nose to set on of tail, 44in.; length of tail, 15in.; girth of chest, 30.; girth of loin, 24 in.; girth of head, 16in.; girth of forearm, 9½ in.; length of head from occiput to tip of nose, 10½in.; girth of muzzle midway between eyes and tip of nose, 10in.—Count: Age, 2 years 9 months; weight 54lb.; height at shoulder, 23in.; length from nose to set on of tail, 37½in.; length of tail, 13in.; girth of chest, 28½in.; girth of loin, 23in.; girth of head, 15½in.; girth of forearm, 10in.; length of head from occiput to tip of nose, 9½in.; girth of muzzle midway between eyes and tip of nose, 8⅜in.—Tilly: Age, 4½ years; weight, 45lb.; height at shoulder, 22in.; length from nose to set on of tail, 37in.; length of tail, 14in.; girth of chest, 27in.; girth of loin, 20½in.; girth of head, 14½in.; girth of fore-arm, 8½in.; length of head from occiput to tip of nose, 9½in.; girth of muzzle midway between eyes and tip of nose, 8⅜in.

SUGGESTED TREATMENT OF HYDROPHOBIA.—A writer in the *Lancet* (Dr. Lownds), says: "As all treatment of the established disease seems useless, I would suggest that some such plan as the following affords at least a possibility of mitigating the sufferings of the patient, and perhaps give time for the disease to run its course. The suggestion is that enemas of water at 98 deg. should be administered each half hour, alternating, if necessary, with Liebig's raw soup, with wine, to keep up the strength. The suggestion is founded on the well-known fact that the water of the blood in hydrophobia is diminished some 20 per 1000 compared to the average of health, and the object being to supply this deficiency, and also strength, through the medium of the bowels, to enable the patient to beat up long enough for the disease to run its course, and thus assist the remedial powers of nature in effecting a spontaneous cure. We would suggest that the plan should be tried on rabid dogs; any one unfortunate enough to have a dog seized with this malady would be doing good to his fellow men, and likewise to the whole canine race, by having this or other suggestions from a like authoritative source put in practice, instead of, as is too common, having the animal destroyed before it has been ever made sure that rabies is the disease affecting the animal."

FOX HUNTING IN NORTH CAROLINA.—*Gaston, Sept. 21st.*—The present week we have had splendid sport. Had a great race after the kenneled fox; several packs in the chase; caught him, and then caught my old female red, and run to earth a third, which we did not secure. Caught yesterday my old male, put him to earth, dug him out and now have him on chain. Do you want him? or what disposition shall I make of him? T. G. T.

REPLY.—Do *we* want him? Nary red. Some of our friends may speak for him, however, and glad to get him too.—ED.]

FROM ANOTHER SPORTSMAN'S WIFE.

Editor Forest and Stream:—

Having just read "Zena's" letter, I feel like rising to give my experience as a sportsman's wife. I think the duty of a good wife is to enter into a husband's joys and sorrows, and to sympathize with and aid him in all his pursuits as far as possible. I have been married nearly nine years, and flatter myself that my, not worse, but smaller half—for I am no feather-weight—still enjoys my society as well as of yore, which is more than a good many married women of myyears, or even a less number of, can say. My husband is passionately fond of hunting, and knows no greater pleasure than to don about four vests, numberless coats and his seven-league rubber-boots, take the worst-looking hat he can find—which would scare anything but a duck to death—shoulder his trusty "Parker" and start for the bay shore, when the equinoctial is blowing the ducks down from the north in screaming, quacking flocks, and the cold rain drives slanting into his face. There he will stay from early dawn until "pitch dark" at night, and come home tired, hungry, cold and wet, but happy as a king and laden with game, and the legal cobwebs all blown from his brain, and ready for a fresh hold on business on the morrow. In the face of all this, how could I chide him for indulging in what he enjoys so thoroughly? He has had quite cold water enough all day without my throwing any more at him.

But it is not all rainy day hunting. In the autumn, when the acorns are dropping and the scarlet and yellow maple leaves are floating through the air and falling in a gorgeous shower, we take a horse and buggy and drive up the river about four miles. Hitching our fiery livery steed to a tree, we start into the woods for partridges—"big Injun" ahead, squaw following after—and occasionally, with "hist!" our sportsman steps cautiously forward, when, "whirr" goes a plump, brown beauty into the air, only to be arrested in his headlong flight by a well-directed load of "No. 6," which brings him to the ground with a thud. Thus we pass that glorious Indian summer afternoon until the lengthening shadows warn us to return.

We drive home in the twilight with more or less game, as the case may be, but always with wood mementoes enough—such as ferns, mosses and lovely leaves—to brighten our home and give us a breath of forest life for months to come.

Many times have we gone a mile or two through the woods to the boat-landing, and, rowing out into the wild rice when the weather was fair, hunted for ducks, rail and whatever game there was, and it always does me so much good that I would rather go out for half a day's sport in that way than to attend all the white-kid parties I could be invited to in a year.

Too many ladies think they cannot enjoy what their husbands do. Neither could they if their husbands spent their time loafing on the street corners or playing billiards or cards in some miserable saloon; but there is no man so churlish as to deny his wife the pleasure that he himself enjoys, provided it be legitimate fun. On the contrary, if he be an average man he will feel flattered that his wife chooses what pleases him; and they will be brought into closer unity and sympathy with each other, and thus realize the true happiness of wedded life.

A taste for sporting, like a taste for oysters, may have to be cultivated in some, but it was born in me; and by sporting, I don't mean to say that a lady must always shoulder a gun when she goes out, but it is well to know how. I hope to enjoy yet many years of solid fun, and we don't intend to grow old as long as our hearts are young and the eye true.

Although I have been hunting a great many times, it has always been in the capacity of a spectator, until the last time we went. D. said: "This time you must shoot something." I thought the gun too heavy, but concluded to try. A few minutes after, D. shot a teal and wounded a mud-hen sitting close to it. "Here, shoot that bird," and he put the gun into my hands, with carefully worded directions as to holding, aiming, &c. I took good aim and fired. Whether that bird was hit or not, one thing is certain, it was never seen or heard from again; and out of consideration for my feelings we will suppose that I killed it, but it must ever remain an open question.

The next attempt was at a rail sitting perched upon a stump. It looked at me as if to say: "Don't shut your eyes when you fire." So I didn't, but fired boldly, and, much to my surprise, knocked poor little rail off the fence. So far, good. The next time I hit something, but with this trifling difference, that the object struck was at the wrong end of the gun. Two rail, sitting in loving proximity, challenged me to a trial of skill. I calmly announced that I would proceed to bag them; but my well-laid plans did "gang aglee." In endeavoring to "draw a bead" on those provoking little things, which wouldn't sit still long enough for me to cover them with the gun, I forgot the importance of holding the gun firmly to my shoulder; and when I pulled the trigger the gun kicked, and the stock made intimate acquaintance with one of my front teeth, very much to the detriment of the latter, and, I am afraid, in the interests of the dentist, as I am not the possessor of that perishable quality—beauty. I didn't worry about that, and only when I found that my birds were safe and sound did I mourn, not so much for the lost fragments of my teeth as that I had been so careless, and thus met with a double loss.

I have never been subjected to all of "Zena's" tribulations on account of dogs. We never owned but one, and that was one too many—at least of that kind. I like dogs where they belong, but would as soon have them to eat at my table as to sleep under my bed.

Our dog was a setter, and purchased when only a puppy of a few weeks. He hadn't cut his wisdom teeth, and couldn't distinguish between a table-cloth and a bone; consequently our dry goods suffered. But "the most unkindest cut of all" was a caper which he cut. We kept chickens in those days, under the insane delusion that it was profitable. I needn't say that the theory was exploded long ago. "Bright," our dog, during his master's absence, broke from his kennel. It was in winter, and a very deep snow lay upon the ground. He entered the hen-yard and with one blow of his powerful paw broke the glass in the window of the poultry-house. Of course the chickens availed themselves of the chance for liberty, and when out in the deep snow they were helpless. How long it took that dreadful dog to demolish those poor bipeds, history saith not; but when I went out there I found nineteen of our finest chickens stretched stiff and cold upon the snow.

If any man had wanted to earn fifty cents by swearing for me he could have had the contract off-hand; but in the absence of a candidate, I talked in small capitals on the back of that dog with a stick, soundly and roundly. Soon after he was presented to a lumberman and taken up into the woods, where he came to an untimely end by eating meat "fixed" for wolves. Thus ended our trials with dogs, and, like "Mrs. Josiah Allen," I have never "encouraged" the purchase of another.

I enjoy reading FOREST AND STREAM more than I can tell; and if we cannot all, like the Princess Louise, pull in big salmon, we can enjoy reading about others who have that privilege. Tell "Zena" to take courage, and inasmuch as her husband is good and kind during the "close season," and only guilty of going "gunning" the rest of the year," to let him get what fun he can. Life is too short and full of sorrow for us to deprive any one of one innocent amusement.

We will be thankful that our husbands are sportsmen and not "sports;" and as long as they keep aloof from all lowering and disreputable diversions, let us not begrudge them the satisfaction of smashing enough glass balls to build a second crystal palace if they want to, for after all it is only another way of playing marbles. All honor to true sportsmen. May their numbers never grow less! DIANA.

Will "Zena" send us her address?

—Mr. Chester G. Cutter, of Boston, claims the name "Jock" for his liver and white ticked pointer dog, puppy ex Gillespie's Fan by Rex, born July 13th, 1879.

ST. LOUIS DOG SHOW.—*Editor Forest and Stream*:—Will you please announce in your news columns that Major J. M. Taylor, of Lexington, Kentucky, has been appointed to judge fox terriers, hounds (all classes), Spaniels, and the non-sporting division of dogs.

CHAS. LINCOLN.

CORRECTION.—In a communication of last week announcing a litter of red Irish setter puppies, by Messrs. Lincoln and Hellyar, Arlington, out of Doe, there were two mistakes interfering with the sense of the facts. The bitches name is Doe, not Zoe; and Messrs. Lincoln and Hellyar's name should be familiar enough with our readers.

—Mr. Henry W. Livingston's lemon-and-white pointer bitch Rose (Snapshot-Gypsy), has been bred to Mr. Orgill's lemon-and-white champion Rush (Flake-Lilly).

Game Bag and Gun.

GAME IN SEASON FOR OCTOBER.

Moose, *Alce Americana.*	Wild turkey, *Meleagris gallopavo.*
Caribou, *Rangifer caribou.*	Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Elk or wapiti, *Cervus canadensis.*	Ruffed grouse or pheasant, *Bonasa umbellus.*
Red or Va. deer, *C. virginianus.*	Quail or partridge, *Ortyx virginianus.*
Squirrels, red, black and gray.	
Hares, brown and gray.	
Reed or rice bird, *Dolichonyx orizivorus.*	

☞This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

THE GROUSE SHOOTING SEASON.—We have received from our correspondent, Mr. S. H. Turrill, the following very favorable account of the present pinnated grouse shooting at the West. Mr. Turrill writes:—

Chicago, Sept. 18th.—I left here August 15th, via the Chicago and North Western Railway to Missouri Junction in western Iowa, then in a nothwest direction, over a branch road of the above company to Wisner in Nebraska, for a chicken shoot with my son. It is one of the most beautiful prairie countries I have ever seen, well adapted to stock and grain raising. It is quite undulating, with as fine valleys and natural blue joint grass as can be seen anywhere in this western section, and pinnated grouse are plenty. We bagged 750 of them in about three weeks, with the assistance of two friends, I. McMillian, of Wisner, who was out with us for two days, and C. P. Mathewson, of Norfolk, who also was out two days. The largest bag was made in the vicinity of Norfolk, 122 by two guns; and this would have been much larger if it had not been for an unforseen accident. But however the above bag is sufficient for any two sportsmen in one day. We did not leave the hotel until eight o'clock in the morning. It was the most pleasant and satisfactory chicken hunt I ever had. The country is not fenced at all, and you can take a team and drive anywhere you please, and let your dogs range the prairies and stubble fields to your heart's content. When they find and point the birds, get out, do your shooting, and pick them up and put them in the wagon and drive on for more. I killed quite a number while driving along the road. The only unpleasant thing was that the distance being so far from home and weather so warm, I could not send the game to my friends instead of giving it to strangers in the country where it was killed. I kept the hotels where I stopped well supplied and feasted for three weeks. Wish you and other eastern friends could have been along to enjoy the sport.

The pinnated grouse shooting season is now fairly in its prime. The success which our correspondent met in Nebraska is in keeping with the reports from other chicken centers of the West. The season has been favorable for a large supply of birds this fall, and the favorite grounds, whither scores of gunners repair, are yielding

an immense harvest. As the days grow cooler and the air more bracing, the pleasure of the sport becomes greater. Those who have deferred their "week off" to the present, will be amply rewarded by the increased enjoyment of the fall shooting. Perhaps no other kind of gunning for small game affords such abundant evidence of success as western pinnated grouse shooting. The bag is there denoted by numbers which would in Eastern States and with other game mark the gunner as an inordinate pot hunter.

DIVING DECOYS.—In reply to the inquiries of correspondents we append the following description of this device, which is very simple :—

The apparatus consists of a canvas bag that will hold ten pounds of sand (to be put in on the shooting ground), a cord thirty yards long and a pulley-block. The pulley-block is attached to the bag at its mouth, the cord is run through the pulley-block, and by means of a screw eye is attached under the breast of the decoy. The bag is filled with sand or stones, and dropped wherever one wants to shoot. The end of the cord is then taken to the blind, and when ducks are approaching on the wing or alight on the water out of gun shot, the cord is pulled and the decoy dives in perfect resemblance of a living bird. The ducks seeing it diving as if feeding, suspect no danger, and come in without hesitation. On a calm day, when the water is unruffled, the diving decoy is especially effective, as it agitates the water and can be seen diving and rising from a long distance.

COURTESIES ACKNOWLEDGED.— The Ausable River Gam and Fish Protection Society, which is located at Ausable Forks, N. Y., has very courteously made the Editor of this paper, Mr. Chas. Hallock, an honorary member of its body, for which we beg to tender due acknowledgments, and wish the Club every success in its laudable undertakings. Its officers are: George Chahoon, President; John B. Chase, Vice-President; W. J. Gillespie, Secretary, and Rich. L. Trumbull, Counsel.

A FOOL WITH A GUN.—*New Haven, Sept. 17th.*—Who says that game is not plenty in Connecticut? A man hearing a rustling in leaves takes it for granted that some wild animal is there. Panthers, wild cats and bears resort to the grape-vines on the verandah in huge flocks, and on leaving the house one must shoot eight or ten before looking around. Here is a case in point from the newspapers :

A distressing and probably fatal accident occurred at New Preston last Friday at Edward Beeman's house. A city boarder of hunting proclivities started out with his gun. In passing through the garden he heard a rustling in the grape arbor. He at once fired, and wounded Eddie, an eight-years-old son of Mr. Beeman, sending a bullet into one side and out at the back. R. T. M.

CANADA—*Saint Martins, Sept. 8th.*—A sad accident which occurred here on Thursday, the 4th inst., has cast a gloom over the whole community, as the deceased was a general favorite with every person who knew him, and especially with every sportsman in this part of the country.

On Sept. 4th James L. Flewelling, of this place, was accidentally killed by the bursting of a gun. The following are the particulars of the affair : Being well acquainted with the woods he went out with William Power, and as it is now the season for grouse he took his gun with him. They sat down to rest some two miles or more from home, when a hawk came sailing along, and Mr. Flewelling, who was an excellent shot, asked Mr. Power for his gun to have a shot at the hawk, but the bird not coming near enough he still held the gun in his hands, when a woodpecker lighting on a stub some distance off, he aimed at it and fired. The breech end of the barrel burst and blew all to pieces as far up as the barrel, which is turned down to less than a one-sixteenth part of an inch in thickness, is screwed into an eighth square piece of apparently nothing but malleable cast iron. A piece the whole length of this block, some three inches or more, and about half the circumference of the barrel, was driven into his brain just behind the right temple, carrying a portion of the skull in with it, and Mr. Power, who was sitting some five or six feet from him, was knocked senseless by the concussion, but with the exception of a few grains of powder in his face, was not much hurt. He immediately started to the village for help, but Mr. Flewelling died before they could get him home. The gun was a single barrel breech-loader, 14-gauge and 30-inch barrel, and upon examination of the fragments I find it is one of the cheapest Stevens guns, and made of poor material.

We have again and again cautioned our readers against the employment of cheap guns. They are dangerous. It requires good material and good workmanship to make a safe gun. Good material and good workmanship both cost money. Safe guns, therefore, are not cheap guns.

Montreal, Sept. 15th.—Early Monday morning, September 1st, friend Beatty of H. M. Mail Service, and the writer, had our decoys out up Dead Creek near Highgate Springs, Vermont, but to little purpose, as we had only half a dozen shots all told. During mid-day we beat up the sloughs and small creeks through hundreds of acres of wild oats, but no ducks. Pot hunters with their dogs were there before us early in August. Since that date I have beat over a large territory in the province of Quebec, and have not seen one woodcock, ruffed grouse, or duck, where I found dozens last year. My dog caught a young woodcock but a few days out of the shell, while we were taking dinner near the mouth of Dead Creek, September 1st. Plover have made their appearance near this city; a few good bags have been made.

STANSTEAD.

NEW YORK—*Hornellsville, Sept. 22d.*—I have read considerable about Master Bogardus' and Schaeffer's shooting. We have also a smart boy with the gun here. His score at ruffed grouse since September 1st, up to Saturday night was forty-six. The best shots here have not bagged one quarter as many. He shoots an eighteen guage muzzle-loader, modified choke, two drachms powder, seven-eights ounce shot. JOHN.

MASSACHUSETTS — *Plymouth Co., Sept. 20th.* — Coot shooting has now fairly commenced and some fair bags have been made this week, although the heavy flight is yet to come. Plover shooting has been good, and the regular flight went south this week. Woodcock are now quite plenty for this section, but partridges are as yet to be heard from. S. K. JR.

Good Ground, L. I., Sept. 17th.—We are having good shooting now and have had for two weeks past. On Sunday was the biggest flight of the season, and on Monday, the 15th inst., Mr. Vanderbilt, a guest, with my sons, Will and George, killed 150 bay birds besides some few teal. The birds seem to fly after every storm. I wish you could have been here last Monday, as you would have had all the shooting that you could have wished.

WM. LANE.

—Bird shooting among the reeds along the marshy shores of the Delaware is perilous to the hunters, in consequence of careless marksmanship. The Philadelphia *Times* says that a Philadelphian accidently put a few shot into the arm of a Jerseyman a few days ago. The angry Jerseyman, seeing a wreath of smoke rising out of the marsh, returned the fire. Without getting any nearer to each other the two gunners paddled out into a small clearing, where the reeds did not obstruct the view. Then they quarrelled, and finally the Jerseyman put up his gun to fire again. His opponent followed suit and they both pulled triggers at the same moment. The duellists were then about forty yards apart, a distance at which a great deal of pain could be inflicted, with no danger of fatal results. They fired away until both were extensively punctured, when they stopped by mutual consent. They at once stripped off their clothing. They were dotted with blood and little purple-black spots, where the shot had entered.

WEST VIRGINIA—*Ronceverte, Sept. 16th.*—I came back a short time since from an expedition to the woods after trout. The waters were so low that I made a smaller basket than ever before; some streams were almost dried up and contained no trout, where last year I caught hundreds. However, I had a pleasant trip. I lined some bees and found a bee-tree, which we cut the morning I left for home. When I got back to the cabin, after taking out the bees it was only 10 o'clock, so I suggested that we should kill a turkey before dinner. I took my Winchester and Franz his call. We came back to dinner with two turkeys and two pheasants. I mounted my horse at 3 P.M.; stopped an hour for tea and horse feed; rode steadily all night with no other stoppages, and reached here at 7.30 A.M. Now, would that sort of ride suit some of our city friends?

When I got here I found my old bear dog ailing, and two days afterwards he died. He was a noble dog. When in his prime he would handle a two-year-old bear by himself. I stand six feet, and the old dog thought nothing of standing on his hind legs, with his paws on my shoulders, and his nose in my face. I miss that old fellow, but console myself with "Stoop" and "Blaze," two fine setters sent me by Captain Clay, of Wilcox, Pa.

CECIL CLAY.

ALONG THE CAROLINA COAST.—*Elizabeth River, N. C., Sept. 14th.*—Three of us left Norfolk, Va., Monday morning, after puchasing a boat suited for our purpose, and loading baggage and provisions. The first stage of our journey was up the river into the Chesapeake and Albemarle Canal, through that into the Currituck Bay. The weather was fine and it was pleasant to row along beneath the great cyprus and pine trees which overshadowed the canal. Vast swamps of these trees extend each way from the canal for miles, until they merge into the Great Dismal on one side, and reach the pine-lands of Queen Anne County on the other. After we entered Currituck Bay we saw now and then a few ducks, mostly buffleheads, with now and then a pair of wood ducks. But we were too early in the season to see the great quantity of water fowl which throng Currituck during late fall and winter. We could well see the reason of their congregating here. Such fine feeding grounds for wild fowl are hard to be found elsewhere, I think. We called in at Currituck Court House, an exposed, isolated place. After leaving Currituck Bay, we entered another part of the canal, which cut the long points of land stretching down into the Sound. This part of the canal is short, about five miles out from the bay to Broad river. We ran down Broad river into the sound before a stiff wind, rounded the point and entered Elizabeth river. We rowed up to Elizabeth City as the wind was unfavorable to sailing, made a short stay and returned down the river, upon the banks of which we are at the present writing. We shall next run for the mouth of the Roanoke river.

Our boat is 16 feet long, with 4½ feet beam. She rode some pretty wild waves on the sound, and rode them well, though she is quite heavily loaded.

The days are still quite hot here, but the nights are so cool that insects have ceased to be troublesome.

C. W. B.

BIRD NOTES FROM THE SOUTH.—*Savannah, Tenn., Sept. 10th.*—Dr. W. C. Avery, a keen sportsman and an enthusiastic ornithologist, of Greensboro, Ala., has written to me recently an account of the capture of a mallard on the Black Warrior River on the 3d of Sept. The duck was one that had been wounded in the wing some time last winter, and was thus prevented from making its accustomed migration. When killed it was in fine condition, and its stomach yielded on examination a quantity of grass seed and the seed of some species of *Polygonum*. The Doctor captured on the same excursion a fine specimen of the red start, *S. ruticella*, the first of its species he has ever observed in that locality. WILL.

FLORIDA—*Titusville, Brevard Co., Sept. 10th.*—Peeps (*Ereunetes pusillus*) have been abundant on the river beach for the last three weeks back. A fair sprinkling of willets (*Symphemia semipalmata*) occur with them. Too hot to do much shooting. AL. I. GATOR.

IOWA.—*Vail, Sept. 21st.*—Quail are very plentiful with us this fall; more so than I have ever known them to be. E. B. B.

WASHINGTON TERRITORY—*New Tacomah, Sept. 4th.*—Jasper Woolery, of Pugallup Valley, killed four bears last week about the head of the Stuck. Jasper, who is a young man, not yet twenty-two years of age, has already killed ninety-six bears, and before the season is through expects to knock over the hundredth. There is money in it for such experts as he is. The State pays $5 bounty for each bear.

BEXAR'S SHELLS.—John writes: I think the trouble with Bexar's shells is caused by using too fine or too quick powder. He should use no finer grain than T. G. If the shell is expanded of course the extractor will not work as it should. I have known a Ballard everlasting shell to be fired over 500 times, and it is good now.

TRAP SHOOTING.

LONG ISLAND GUN CLUB.—There was a pleasant reunion of the Long Island Gun Club at their rooms last Saturday evening, when they gave a happy "send-off" to their esteemed comrade, Mr. Walton, a veteran sportsman of seventy-two years of age, who was about to shoulder his gun and depart for the chicken fields of the West. Notwithstanding his age, his step is as light as ever, and he will follow the dogs through brake and stubble from morn till dewy eve without tiring, "allee same" as fifty years ago. Should any of our Western friends discover a tall old gentleman looking around in quest of something, with a dog ranging wide in the outfields, they may venture to guess it is Mr. Walton, and, if they please, offer him a friendly hand. This is not "old Isaak," but a good enough Walton all the same.

NEW GLASS BALL.—Mr. F B Spencer, of the firm of Irwin & Spencer, Elizabeth, N. J., has now in his possession two brown mice securely entrapped in a glass ball, such as is used by marksmen. He found them a few days ago in a barrel of glass balls at Brinton Range. The balls had been stored there nearly all summer for occasional practice, and last week Mr. Spencer emptied the barrel to clean it out. In picking out the balls he noticed that one near the bottom of the barrel felt a little heavy, and, examining it, found the two bright-eyed little creatures securely imprisoned in their crystal home, unable to get out, and with none too much room to turn about. He brought the little captives home, and has fed them and taken good care of them ever since. The question how they got into the ball, is somewhat of a conundrum, but it is supposed they crept in through the small opening when they were young, and, being fed there, grew till they could not get out.

A GOOD GUN.—In the score of the Narragansett Gun Club which we printed last week, we should have stated, in justice to the winning gun (H. E. Gore's), that it was made by the veteran gun-maker, William R. Schaeffer, of Boston.

NEW HAMPSHIRE—*Exeter, Sept. 6th.*—Match between the Powow Shooting Club, of Amesbury, Mass., and the Exeter Club, of Exeter, N. H. It was one of the most closely contested matches ever shot in this vicinity, as will be seen by the score. The Amesbury team led the Exeters three balls on the Bogardus trap, and tied on the rotary. Twenty-five balls each man—10 from Bogardus', 15 from Card's; 18 yards rise; shot on Exeter grounds :—

C. A. Gove	1 0 0 1 1 1 1 1 1 1	1—9
G. M. Perkins	1 0 0 1 1 1 1 1 1 1	1—7

Gerrish, Wales, Cooper and Godsoe divided first money on 10; Bicford, with 18 at 21 yards, miss and out, took second; ties of 8 divided; Hatch won fourth; and Cram took fourth, which went to lowest score. On our arrival at the shooting grounds we were nobly entertained by the ladies of the Exeter Club, who provided a bountiful lunch for us. A return match will be shot in a short time.

JOHN J. PREVAUX, Sec. Powow Club.

Manchester, Sept. 15th.—Annual shoot of Manchester Shooting Club. Good attendance. The club was divided into four classes, according to the per cent. of breakage of glass balls by each member at the regular shoots of the club during the past summer. Bogardus' and Card's traps; 10 balls :—

FIRST CLASS.

	Single.	*Double.*	*Rotary.*	
Ira A. Moore	9	7	7	23
Charles A. Jackson	10	9	8	27
Hiram P. Young	8	8	8	24
William E. Parsons	8	6	6	20
Moses Wadleigh	7	6	9	22
G. D. Moore	7	5	7	19
C. L. Harmon	4	6	7	17
G. H. Hubbard	5	3	4	12

Jackson, first prize, silver ice picher; Young, second, gun-case; Moore, third, fishing-rod; Wadleigh, fourth, silver ash receiver; Parsons, fifth, 100 paper shells.

SECOND CLASS.

	Single.	Double.	Rotary.	
Horace Tobey	6	4	6	16
J. Frank Drake	9	5	6	20
Charles J. Darrah	9	7	7	23
Oliver Greeley	6	5	5	16
Alfred Walker	6	5	6	17
S. S. James	6	3	3	12
J. G. Sturgis	1	1	2	4

Darrah, first prize, silver cake basket; Frank J. Drake, second, shooting coat; Walker, third, silver vase; Greeley, fourth, cleaning rod and implements; James, fifth, 100 paper shells.

THIRD CLASS.

	Single.	Double.	Rotary.	
Henry Wheeler	6	3	6	15
N. A. Robinson	6	1	3	10
J. E. Wilson	7	2	3	12
C. W. Farmer	6	2	3	11
Benjamin F. Clark	4	3	7	14
George H. Stearns	5	0	2	7

Wheeler, first prize, two dozen nickel shells, powder and shot chargers; Clark, second, boat cartridge box; Wilson, third, the "Sportsman's Gazetteer;" Farmer, fourth, twenty-five pounds shot; Robinson, fifth, 100 paper shells.

FOURTH CLASS.

	Single.	Double.	Rotary.	
Orlando Huse	6	2	2	10
Frank Dowst	7	2	4	13
G. F. Elliott	8	4	4	16
W. H. Vickery	5	3	2	10
L. Simons	4	2	3	9
C. R. Littlefield	0	1	3	4

Huse won on the shoot off. Elliot, first prize, revolving cartridge belt; Frank Dowst, second, cartridge-box; O. Huse, third, two dozen brass shells; Simons, fourth, five can pound powder; Littlefield, fifth, 100 paper shells.

C. B. Littlefield, president of the club, and Dr. J. S. Sturgis made the two poorest scores, and were tied, each breaking 4 out of a possible 30. They shot off the tie, and Littlefield won, receiving a prize of a silver cup. The consolation prize, consisting of a stuffed grouse, was won by C. L. Harmon.

MASSACHUSETTS—*Amesbury, Sept. 6th.*—Match between Edward Rowell and Jason Spofford, two of our crack shots; 100 balls per man; Card's trap, set at the lowest notch; 18 yards rise; Bogardus rules:—

Spofford—1111111111100111011111111111111110 111111011111111111111111101110111111011011111111 111111111111111111—91.

J. J. P.

Brookfield, Sept. 16th.—Seven of the Brookfield Sportsman's Club participated in to-day's shooting:—

C. H Giffin	0	0	1	1	0	0	0	0	1	0	—3
H. D. Mathewson	0	1	0	1	1	1	1	0	0	1	—6
H. E. Capen	1	0	0	0	0	1	1	1	0	1	—5
J. P. Crosby	0	0	0	0	0	0	0	0	0	0	—0
H. P. Gerald	0	0	0	0	0	1	0	0	0	0	—1
Albert Shepard	0	1	0	1	1	0	1	0	1	0	—5
H. Heredean	0	0	1	1	1	1	1	1	1	1	—8

Spencer.—The Sportsmen's Club has appointed Wednesday afternoon of each week for their glass ball shooting. The annual hunt will take place Oct. 15th.

FAR ROCKAWAY GUN CLUB.—Match for a cup presented by Mr. George P. Work; 10 birds each; handicap allowances; winner to take cup and twenty-five per cent. of entrance money; second man, fifty per cent. of entrance money; third man, twenty-five per cent. of entrance money. The match was attended by the *elite* of Far Rockaway, both ladies and gentlemen, and although there was a high wind and many drivers, the shooting was very creditable and the score good:—

	Handicap Allowances.											
John Jarvis	28	1	0	1	1	1	1	1	1	1	1	—9

Cannon	1	0	1—2	Cable	0	0	0—0
Warm	0	1	1—3				

First divided. Ties on 2 won by Hughes.

G. L. W., Secretary.

PENNSYLVANIA.—Captain and Eugene Bogardus gave an exhibition of their shooting at the Pittsburg Exposition last week. This way of entertaining country fairs and city exhibitions appears to be highly popular.

GRAND SHOOTING TOURNAMENT.—A shooting tournament for a series of prizes aggregating nearly $1,000 will be held at the Pittsburgh (Pa.) Exposition, beginning Oct. 2d, open to all, barring Bogardus and Paine. The prizes are:—First, to the team of six from any regularly organized sportsmen's association or shooting club in the United States or Canadas, making the best score at 300 glass balls (each member to shoot at 50 balls), an elegant solid gold badge; second, to the individual making the best score at 50 balls, whether a member of a team or an individual entry, one W. & C. Scott & Son premier quality gun and case, value, $400; third, to the individual making the second highest score at 50 balls, whether a member of a team or an individual entry, one Parker Bros.' best quality gun, value, $300. Teams will be required to furnish certificates of membership in regularly organized clubs. No entrance fees will be charged, save a tax of five cents for each ball shot at. All matches to be at eighteen yards rise.

As this meeting is in the hands of competent managers, who always make a success of their undertakings, we look for a well-conducted tournament. Pennsylvania has the name of doing these things well. All communications should be addressed to the Pittsburgh Exposition Society, Pittsburgh, Pa.

Rational Pastimes.

THE GAME OF CRICKET.

FIXTURES.

Sept. 25-26-27—Nicetown.—Gentlemen of Ireland vs. Philadelphia eleven.
Sept. 25-26-27—Detroit.—Daft's English eleven vs. eighteen Peninsular Cricket Club.
Sept. 30-Oct. 1—Ardmore.—Gentlemen of Ireland vs. Merion Cricket Club.
Sept. 30-Oct. 1—Syracuse—Daft's English eleven vs. 22 Central New York.
Oct. 3-4—Staten Island.—Daft's English eleven vs. Twenty-two of New York and Boston.
Oct. 7-8—Ottawa.—Gentlemen of Ireland vs. Ottawa.
Oct. 10-11-12—Nicetown—Daft's English eleven vs. All Philadelphia.
Oct. 13-14—Hamilton.—Gentlemen of Ireland vs. Hamilton.
Oct. 15-16—Guelph.—Gentlemen of Ireland vs. Guelph.
Oct. 18-20—Coburg.—Gentlemen of Ireland vs. Coburg.
Oct. 22-23—Detroit.—Gentlemen of Ireland vs. Peninsular.

DAFT'S ELEVEN VS. TWENTY-TWO ANGLO-CANADIANS.—The second game in the Daft series was played at Toronto, Ont., Sept. 12th and 13th, and for lack of time resulted in a draw. Score:—

TWO SUGGESTIONS FOR MR. DAFT.—First. That his team play an amalgamated eighteen composed of the Irish eleven and native Americans. Second, That his team oppose twenty-two of the best base-ball players in the country. This game would attract a large number from the base-ball community, and in a practical way illustrate that there is more in cricket than that class are now willing to admit. We often hear the game condemned by persons who have never witnessed it; let them now go and see the best exponents of cricket in the world.

OAKLAND CRICKET CLUB, of California, organized July, 1878.—Though this club has been established but a year, it is in a sound and prosperous condition, and numbers among its members some of the best cricketers on the Pacific coast. The club's grounds are situated at Emery Station, on the line of railway, and are without exception the finest in the State. Officers:—President, Archibald McKinley, Esq.; Vice-President, F. C. Thomson, Esq.; Treasurer, Rev. G. F. Degen, and Secretary, W. M. Johnson, Esq.

WINNIPEG (ONT.) CRICKET CLUB.—The following are the officers of this organization:—President, James H. Rowan, Esq.; Vice-President, Campbell Sweeny, Esq.; Secretary-Treasurer, A. M. Ramsay, Esq. (care Bank of Montreal); Managing Committee—Messrs. W. N. Kennedy, E. W. Jarvis, C. D. Richards, W. J. Souch, and E. H. H. Armstrong.

ALTOONA VS. COLUMBUS.—These clubs played their first match together on Sept. 13th at Columbus, O. The game was interrupted in the second inning by a rain storm. The score will show that the play was very close:—

IRELAND VS. ST. GEORGE.—The first match in the annals of American cricket between Irish and American players was begun on Sept. 12th on a very good wicket at the St. George's Ground, Hoboken. The weather was exceedingly fine throughout, and the attendance the most numerous seen on the grounds this season. From first to last the utmost interest was manifested in the friendly bout between the representatives of the two countries. Before giving the details of the play it may be well to say to those to whom the ways of the game are dark and obscure, that the Irish eleven, or rather the Gentlemen of Ireland, as the side is called, is composed of a party of gentlemen tourists, who are now visiting our shores for the purpose of playing a series of cricket matches and seeing the country at the same time. Ten out of their regular eleven are amateurs, while Rylott, who stood umpire in the game, is an English professional from Lord's Ground, London, who has been grafted on the team to strengthen the bowling. He may play later on against Philadelphia and Canada. The past record of this player is excellent, and in England he is only considered second to Shaw and Morley, who are now with Daft at Detroit. In batting, as was shown last week, the visitors are very strong, and it is to be regretted that the team could not have been entirely an amateur one; but the best of Irish bowling is not of the strongest, and several good men were not available. L. Hone, one of the original team, who it will be remembered kept wicket for Lord Harris' eleven in the match this spring, was prevented from coming at the last moment, but Wm. Hone, who made top score, proved to be a worthy substitute.

Although this eleven is the first team that has been sent out to represent Ireland, inter-continental cricket is by no means a new feature of the game in this country, for from time to time, since 1859 both amateur and professional teams, representing England and the Antipodes, have contested with local and regularly selected sides in the United States and Canada, and up to this date have always been victorious. For this reason, heretofore, it

has been deemed advisable to play odds against them—that is, sides composed of either twenty-two or eighteen players, but the great stride cricket has taken this season, and the proficiency with which a large number of our countrymen now handle the bat and ball, led the "Dragon Slayers" to play on even terms.

At 11.30 the St. Georges, having won the toss, wisely decided upon taking the field, and W. Hone, jr., and Nat. Hone (captain) commenced operations for Ireland on one of Giles' best wickets. Soutter (fast round) started the bowling from the upper end. A brace of threes was the crop of the first over. Sprague (fast underhand) followed from the club-house end, and in his third over N. Hone drew him beautifully to square leg for 2. After fourteen overs had been put down, Moeran (medium round) went on at Soutter's end, the score being 27. When the telegraph showed 33, N. Hone was finely caught at long-field-on by Giles, off the new bowler. His innings of 23 was marked by fine cutting. Sir George Colthurst took his place, but in Sprague's fifteenth over, W. Hone, jr., was bowled by him, 41—2—9. D. Trotter, "the swell bat," followed. In Moeran's next, Sir George gave way to a beauty from him, 51—3—11. Broughman, the next batsman, began at once a lively innings, and after Sprague had got Trotter for 5, and Munn, his successor, for 2, a change was deemed advisable, and Giles was grafted in his place. W. Hone, who for years has been considered one of Ireland's best players, joined Brougham, and the first stand in the game took place. Both soon got warmed up, and when at last Brougham got stumped by Cross, the score stood, 102—6—33. His inning was free and dashing. He had completely collared Giles, putting him for two sixes over the fence, into the heart of New Jersey. Casey, the seventh man, was run out, the result of a tip-and-run game, he and W. Hone had been playing for several overs, 112—7—1. Soutter and Sprague went on to bowl again, and Geffrey Hone and his cousin effected another stand. At 140 Frazer (slow round) took Sprague's place, and at 153 Bance (lobs) followed him. These changes were very expensive, and not until the tins showed 172 was the elder Hone caught by Soutter at mid-on. His innings of 52 was, with but one chance, a rare exhibition of conscientious cricket. Hamilton made 11, captured by the underhand bowler, and Exham made his exit for 1, not out, the innings closing for 184.

At 4.10 the home club began their venture against Hamilton (very fast round) and Exham (medium round). Little can be said for the New Yorkers. Moore alone showing any form, the side being out for the absurd total of 25. The St. Georges were consequently obliged to follow their innings, and when time was called at 6 P. M. had lost three wickets for 23, Moore, the Staten Islander, again getting a score of 14.

The game was resumed at 12 on the following day, with Cross and Soutter, the two "not outs," at the bat, against the bowling of Exham and Munn, the latter having exchanged with Hamilton. The performances of the New Yorkers was simply wretched, and their innings closed for 35, leaving the Irish team the easy winners by one innings and 114 runs.

The game was umpired by Rylott for the Gentlemen of Ireland, and by George M. Newhall, of Philadelphia, for the St. Georges.

The score tells the story :—

WISCONSIN.—*Milwaukee, Sept. 16th.*—Saturday afternoon a spirited game of cricket was played between the Willows and Young America Cricket Clubs which resulted in a score of 50 to 49. Leaving out extras, the score stood 50 to 31.

ARCHERY.

AMERICAN BOWS vs. ENGLISH NOTIONS.

Archery as imported from England, like any other sport so imported, will be Americanized and improved not only in the sport itself, but, in the material used, will go through the same course. Long-range rifle-shooting, after years of practice in the old country, especially in England under Government patronage, was taken up by a few enthusiastic Americans, and in less than no time positions were reversed, rifles invented and improved, and the Yankee team brought home the trophy and keep it; and to-day our rifles and riflemen are without a rival. Anything, whether sport or business, that our people take hold of is improved, until but little of the old original is to be found. We simplify and cheapen so that all can have a chance. Our pigeon shots go to England and await challenges that do not come. It is a natural quality of our people to take up ideas and make something new out of them, in sport, science or mechanics; while, on the other hand, the English are a little fogyish, and in archery they certainly are so. They do not make as good bows now as they did when every man was an archer, or else the stories, as written at the time, of their bows, are false. We have imported the sport, and with it some notions in the form of standard rules relative to the tools that to me seem ridiculous. Bows should be five feet, five feet six inches and six feet long, and arrows from twenty-five to twenty-eight inches long, and any one that says anything else will have an English precedent hurled at his head, and the "idea that a Yankee without experience should set up to criticise archery as imported only shows his ignorance." Now to me there is something so unscientific in the English rule of to-day that I propose to have a shy at it. Two men, one five feet two inches high and the other six feet two inches, each with the power to pull the full length of their arms a 50-pound bow, buy bows and arrows of the standard length—six-feet bows and twenty-eight-inch arrows. The shorter man finds that he can pull his arrows to the head when the right hand is at his ear, while the latter one finds that he cannot get his right hand within several inches of his ear, owing to the greater length of his arms. But they are both using standard implements. Now it seems to me that the mere statement of this common case—it is to be found in every archery club in the United States of forty members—would bring about a change, and the idea of standard lengths would die out at once. But if the tall gentleman had said, "I want arrows of a length that I can get the full length of my pull," he would have looked in vain for them. He might have found a few thirty-inch ones, but not a hair's breadth longer, as they are "not standard;" and as for a bow to shoot them, even if he could have found the arrows—"we do not import them, not standard." A bow should be—and was in the day's of archery—about the height of the man using it, and the arrow the full length that the person can pull. The strength of the bow should be so that the user could pull it the full length of his pull without fatigue. The reason that an arrow as long as possible should be used is a mechanical as well as a personal one. Let me state it mechanically. All power is measured by the standard "foot-pound." Steam engines, horses, men, guns, everything wherever "weight in motion" is measured, is by this and only this standard. A "foot-pound" is the force required to raise one pound of weight through one foot of space. Where the quantity is very large, the term foot-ton is used, and where very small, the term inch-pound or parts of each, but it is always the same measure. Now let us measure archery bows by this standard. The short gentleman's bow is strung as usual, with six inches between the bow and the string; the bow is 1¼ inches deep at the handle and the steel head of the arrow three-quarters of an inch long. So he has an actual pull of twenty inches. The bow pulls 50 pounds at the end of the pull. Now there was no pull or pressure at one end, and 50 pounds pressure at the other; then the average pressure on the nock of the arrow from end to end would be 25 pounds. If we multiply this by the 20 inches of motion we will have a result of 500 inch-pounds as the pressure applied to the arrow when the string was loosened. The latter gentleman finds he can pull thirty-six inches and have his hands in the same position to himself, his bow-hand extended at the same angle to his body, and his right hand to his ear or chin, as did his shorter friend. His bow was strung six inches, and the same allowance of eight inches is made as in the other case, and he has pulled his bow twenty-eight inches, with 50 pounds at the end of the pull, and the average pressure on the nock of the arrow was 25 pounds. Multiply this by the length of pull, 28 inches, and the result is 700 inch-pounds. Now can any one doubt which arrow would have the highest velocity when it left the bow-string, and is a bow used in archery for any other purpose than to give the arrow initial velocity? The velocity will not be as 7 to 5, as there is another law that comes in. To increase the velocity the power is increased as the square. Now the flatness of the trajectory is in proportion to the velocity of the arrow. Any one that doubts this can try it by using two bows, a 50-pound and a 30-pound one, or any other between which there is a difference of 20 or more pounds. Pull the heavy bow with a spring balance until the scale shows the same 30 pounds, and measure the distance pulled. Use an arrow pulled just that distance, or until the pressure on it will be 30 pounds, and shoot then with the same arrow on the 30-pound bow; pull the full length, and you will find the light bow with its long pull will have beaten the short pull from 35 to 50 per cent.; and measure them both by the inch-pound and you will see just where the joke comes in.

It requires time to overcome inertia easily; and if done instantly, it must be at the expense of a large quantity of power; and as the arrow is at rest and must be started gradually, and the motion constantly accelerated until it leaves the string, and that by a pressure that is constantly decreasing from the greatest pressure at the starting to nothing at the end of the stroke, it will be seen that everything should be done to give the arrow the highest initial velocity with the least expenditure of strength by the archer.

Now the flatness of the trajetory is in proportion to the velocity of the arrow. The arrow that gets to the target in one second, rises only one fourth as high as one that takes two seconds to go the same distance. So that "keeping a length" would be just that much easier for the long pull as the initial velocity was higher. Our English friend, or his American copyist, will say "we can't get any such bows imported." True, my dear sir; but the Yankee has already invented two bows that will shoot the "cloth-yard shaft" of our ancestors, and they can be had by any one and at no fancy prices. I speak of Mallison's split-bamboo bow, and my own rawhide backed bow. The lady that was so unfortunate as to lose 28 from her score at Chicago by her arrows not sticking in the target, would have saved her score and no doubt improved it had she used a bow of the same power and two inches more pull, and of course arrows in proportion. About standard arrows, it strikes me the weight of arrows in old English silver shillings and pence is just a little ridiculous. No one pretends to understand it, and no one ever will. Suppose we drop it and let American arrow makers give us weighted arrows in ounces and grains, so we may know what weights we are using. We have to take somebody's say-so for the weights now, and cannot verify them without great trouble. Every town in this country is supplied with scales to weigh pounds, ounces, and parts of each, but silver shillings and silver pence are not to be found, and as the bow is weighted in pounds, let's have the arrows in the same scale.

As arrows get their velocity from the power of the bow and keep it from their form and weight, it would be well to see if their form and weight cannot be improved as well as the bow. An arrow cannot be made too light, and have the requisite stiffness to prevent buckling when shot; but one grain of weight, or one sixteenth of an inch of increase in the cross section more than is actually necessary, is a detriment to its flight and velocity. Mr. Henry's shooting at Chicago with four-shilling weight of arrow gave the lowest trajectory—why? Because the bow had a less weight to move, and so moved it through the space in the quickest time (on other points of power that I hope to discuss at some future time). Why should an arrow, shot from a 35-pound bow, be of the same weight of one shot from a 65-pound bow? But they are; and the size and weight of ladies' arrows are the same, or nearly, except the length. Bows are used for target practice at 100 yards and under; the bow that will throw an arrow the distance with the greatest velocity is the best bow; and the arrow starting with a given velocity that reaches the target with the greatest velocity is the best arrow; and with that bow and that arrow any archer can do better shooting than with any bow and arrow that is below them in those qualities. Who knows the speed of an arrow in feet and inches, seconds, and parts of a second? We know all about the flight of projectiles from rifles and cannons, and we will know about arrows, for the American mechanic has got hold of the subject and will get to the bottom of it before he is done with it. The Express rifle shoots a light ball with a heavy charge of powder at so high a velocity for 150 yards that the sights need not be changed for any intermediate distances. Now this high initial velocity is only got by using light projectiles. The same law holds good with arrows; the lighter the arrow the swifter it can be shot, and the swifter the straighter it will go follows as a matter of course. So the arrow of the future will be a light stiff arrow of as small cross section as possible, and feathered so as to make as little resistance to the air in its passage, for the feathers retard the arrow more than the body of the arrow does. This arrow is not for sale now; but I have an impression that before the next year is over it will be found. I have great faith in Yankee ingenuity. Every archer wants better arrows, and only knows that those he uses and pays such prices for do not quite fill the bill. I have seen fine arrows, but the feathers in their cross section were one and seven-eighths by one-sixteenth of an inch. This is a heavy handicap for a bow to force such a feather through the air. If archers will measure their feathers, the thickness and their height, they will be surprised, and reject every arrow that has not a thin fine feather put on each one in the same line, if they be straight or curved. Remember that the air has to be pushed aside in their flight, and every particle of movement is taken from the arrow's flight, and awkward feathers are often the reason of the slow "get there" of the arrows. There are faults in archery implements, and by open and fair discussion they will be improved.

JOHN W. SUTTON.

No. 95 *Liberty street, New York.*

HIGHLAND PARK ARCHERS.—*Highland Park, Ill., Sept. 15th—Editor Forest and Stream:*—Highland Park has become quite an archery centre. On nearly every lawn in town is to be seen a well-used target. Since the organization of the Highland Park Archers early in the summer of 1878 the growth of archery here has been steady and healthy. During the first season our team shot a series of matches, winning a majority of them. Practice was kept up until snow came, and even afterwards by some. Then a 20-yard range was fitted up in a hall, a one-foot target being used, and a series of very interesting matches shot by members of the club; and we wish to speak a good word for this short-range practice. The time will soon be here when we shall have to put our bows aside for several months, unless we can shoot indoors; in which case we must shoot at short range; and by so doing we constantly increase our skill. The distance being point blank, we do not gain skill in taking elevation for different distances; but we can keep our muscles in condition and improve our drawing and loosing, and enjoy many an hour through the winter. Indoor telegraphic matches could also be shot with pleasure and profit.

This season there has been a large addition of active members to the club, several of whom are developing into first-class archers. Before the great Chicago meeting we shot three matches with the Chicago Archery Association and won two of them. We also tried our skill with Buffalo three times, and Buffalo won twice. In Chicago our team stood second to the Wabash Merry Bowmen, there being eleven teams shooting. Recently we shot a match with the Marietta (Ohio) team at the American Round, and were defeated by 12 points. We then shot a York Round with the Wabash Merry Bowmen, and again suffered defeat by 24 points. In both of these matches we did the better shooting at 60 yards, this seeming to be our strong range. In our recent match with Buffalo, reported in the FOREST AND STREAM, we did our best shooting. Recently fine practice scores, with 90 arrows at 60 yards, have been made by several members as follows: Gray, 438; Hall, 415; Weston, 411;

Kyle, 390; Beebe, 320. Mr. Gray made 34 hits (140) with 24 arrows at 60 yards, and with 60 arrows Dr. Weston made 59 hits, score 393, at the same distance. Mr. Hall recently did some fine shooting at 80 yards, with 48 arrows, making 34 hits, 182 score. We shall shoot several more matches this fall, the scores of which will be sent to the FOREST AND STREAM. We wish clubs would send more of their scores to the FOREST AND STREAM—send not only match scores, but the best made in practice.

We have been interested in the several articles, "American vs. English Bows." The best archers in our club have used bows of at least five English makers and several American, and now all use Aldred's goods, both bows and arrows. When we find bows, and especially arrows, made in this country as good as Aldred's, we hope to be patriotic enough to use them. N. K. D.

Highland Park, Ill., Sept. 9th.—Dr. E. B. Weston, who is one of the most reliable shots in the country, and who carefully preserves a record of every arrow shot in public or private practice, has recorded the following extremely fine and regular shooting for the past week. The scores are the result of 30 arrows each at 60 yards:—

«27—115 25—133 23—105 27—121 27—133 25—131 29—119
28—130 26—100 25—109 26—132 25—115

Of course several archers may show some higher scores, but the regular excellence of the above scoring is hard to equal

Mr. Ford P. Hall, of the same club, has lately made the following fine score:—

	Hits.	Score.		Hits.	Score.
American Round....	88	482	30 arrows at 60 yards.	28	164
American Round....	89	501	48 arrows at 60 yards.	46	258
Single York Round	78	338			

Sept. 10th.—The Wabash Merry Bowmen shot for a prize of a half dozen fine Horsman Club arrows, presented by Mr. Will H. Thompson, who also took part in the shooting, but did not contend for the prize:—

AMERICAN ROUND.

	40 Yds.		50 Yds.		60 Yds.		Total.	
	Hits.	Score.	Hits.	Score.	Hits.	Score.	Hits.	Score.
J. A. Booe	30	192	27	149	26	142	83	483
T. McMechan	30	176	28	130	25	125	83	431
W. H. Thompson	30	214	30	189	29	171	89	565
M. Thompson	30	210	29	159	26	139	85	508
Grand total	120	792	114	618	106	577	340	1,987

We think the above is by more than 200 points the largest American Round ever made by four archers shooting together. On the next afternoon the following scores were made by three of the same archers:—

NINETY ARROWS AT SIXTY YARDS.

	1st 30.	2d 30.	3d 30.	Total.
J. A. Booe	131	140	142	403
Maurice Thompson	138	142	151	431
Will H. Thompson	169	171	183	523

In this shoot in the second 30 arrows Mr. Maurice got four successive golds, and at the first three arrows of the last six Mr. Will H. Thompson got three golds.

—Mrs. John Lee, of the Wabash Merry Bowmen, shot the Double Columbia Round with the following result:—

	30 Yards.	40 Yards.	50 Yards.	Total.
Mrs. John Lee	48 304	44 276	38 182	130 772

This is the best Double Columbia we have yet seen.

On Sept. 6th, at the Des Moines Driving Park, the Crescent and Toxophilite teams shot the American Round for the championship of the State of Iowa. The Toxophilite team came off victorious, as the score below will show:—

CRESCENTS.

Names.	40 Yds.	50 Yds.	60 Yds.	Totals.
Sherman	101	137	114	412
Bartell	102	110	60	272
McCann	99	88	83	270
Eason	84	97	83	264
Grand total				1,218

TOXOPHILITES.

Hussey	176	162	145	483
Henry	151	117	85	353
Pinkbine	169	125	49	344
Fullerton	83	74	43	200
Grand total				1,380

—A telegraphic match was shot on the 9th of Sept. between the Brooklyn Archery Club, of Brooklyn, N. Y., and the North Side Archery Club, of Chicago, Ill., at the American Round, with the following result:—

BROOKLYN ARCHERS.

	40 Yards.		50 Yards.		60 Yards.		Totals.	
J. O. Blake	21	105	20	88	12	44	53	237
Capt. Hoyt	22	110	11	37	12	48	45	195
Dr. Wemple	21	105	17	77	11	43	49	225
Major Constable	16	60	12	54	8	26	36	140
Grand total							183	797

NORTH SIDE ARCHERS.

J. Wilkinson	20	170	23	103	20	86	73	359
C. H. Means	27	127	24	92	19	85	70	304
G. D. Conklin	23	97	17	51	11	47	51	195
D. P. Wilkinson	25	113	18	84	16	62	59	259
Grand total							253	1,117

—The Williamsburgh Athletic Club will hold their first annual fall meeting on their grounds, Bedford Avenue, Rutledge and Hayward Streets, E. D., October 11th.

THE WALKING MATCH.

The fifth contest for the Astley belt began at Madison Square Garden, this city, at 1 o'clock last Monday morning, with thirteen competitors—Weston, Rowell, Panchot, Hazael, Guyon, Hart, Dutcher, Ennis, Krohne, Federmeyer, Jackson, Merritt and Taylor. With the exception of Jackson, all of these men have been accorded more or less of the peculiar notoriety attaching to pedestrians. Weston is the present holder of the belt. The scores of the men at 8 o'clock Wednesday afternoon—the end of sixty-two hours—was: "Weston, 208 miles; Rowell, 268 miles; Panchot, 197 miles; Hazael, 239 miles; Guyon, 245 miles; Hart, 235 miles; Ennis, 212 miles; Krohne, 207 miles; Federmeyer, 189 miles; Jackson, 203 miles; Merritt, 247 miles; Taylor, 121 miles.

The attendance of spectators has been very large, notwithstanding the extreme charge of $1 per head admission, and the whole town manifests an unwonted interest in the hourly bulletins. Next week we will give the full official score of the match by hours.

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We make no charge for answering inquiries in this column.*

CONSTANT READER, Portsmouth, Va.—See another answer in this column.

E. J. S., McVeytoson, Pa.—You will possibly obtain the articles desired by addressing the dealers in sportsmen's goods.

S. H. H., Concord, Mass.—Is pigeon shooting from a trap against the laws of New Hampshire? If so, when was the law passed? Ans Yes: law passed last session.

FRANK FORESTER, Augusta, Ga.—We fail to find the description of the loading board mentioned by "Wood Duck." Perhaps he can tell you about it through our columns.

R. B. C., Cameron Depot, N. C.—We do not know how the dea mouse strayed into the specimen copy of FOREST AND STREAM. Our theory of the strange occurrence is found elsewhere.

PLUVIER, Boston.—How would you load an 8-lb. 10-gauge, moderate choke gun for coots at forty and sixty yards? Please give size of shot, etc. Ans. Four drachms powder; 1¼ oz. No. 4 shot, 2 wads over powder.

W. E. L., Cincinnati, O.—We cannot answer questions regarding the merits of guns of different makers. There are very many of the guns in use, and with proper care but little danger of their bursting.

L. F., Brooklyn.—Will you please inform me whether a water spaniel can be made to retrieve by land at the age of one year and if so, how? Ans. Yes, by the ordinary method employed by dog breakers in teaching a dog to retrieve.

D. L. B., Holly, Michigan.—The wild turkey open season in Michigan, is from October 1st to January 1st. For good turkey shooting go to Escanaba and the country around it. Flint, Genesee Co., is another good place.

D. K., Westfield, Mass.—Eaton's Sportsman's Emporium no longer exists. You will probably be able get all you require for an outfit from L. H. Mayott, Springfield, in your State. You can get archery goods at Mayott's.

G. W. B., New Berlin.—Where can I procure a copy of "Camp Fires of the Everglades," by Chas. E. Whitehead? Ans. Out of print long ago. You will probably be able to procure a copy by advertising in our columns.

H. A. H., Boston, Mass.—Will you kindly give me the address of any proper person with whom I may correspond about stocking a trout stream? Ans. Address E. A. Brackett, Winchester, or Theo. Lyman, Brookline, Fish Commissioners of Massachusetts.

C. B. G., New Haven.—1. Can you tell me the price of Coues "Key to North American Birds?" 2. Do you think it would be a good book of reference for a beginner in ornithology? 3. Is there any book on New England birds alone? Ans. 1. Seven dollars. 2. None better. 3. "Samuels' Birds of New England."

ASTHMA, Boston, Mass.—We do not know where to direct you to go this winter. Oakland, on the Baltimore & Ohio Railroad, is highly recommended. Some parts of Florida and the Carolinas are good for your trouble. Perhaps some of our readers who know from experience can help you.

DICK DEADEYE, Montpelier, Vt.—To dye your duck coat dead grass color: Boil the goods in a bath of two lbs. ferrocyanide yellow prussiate) of potassa, wring out half dry, and then boil in a solution of half pound of sulphate of copper in ten gallons of water.

J., Baltimore.—Can you inform me if there were any dog shows held at the Royal Aquarium, London, in 1876 or 1877, other than that of ladies' pet dogs June, 1877? Please give dates. Ans. We have no means of supplying this information, but are confident that no general show of dogs, including sporting and others, has ever been held at the Aquarium.

BOWLER, Philadelphia—Cricket is most amply supplied with the necessary words and phrases coined to represent the game in its manifold aspects antecedent to and attendant upon the play. Tice (derived from the verb entice) is a ball pitched up to the block hole. Yorker (a word often used wrongfully) is a ball between a tice and a full pitch.

E. T. C., New York.—We can give you printed instructions for caponizing poultry, but it would be difficult for you to intelligently understand them. The poultry dealers in the city will refer you to some place where you may see the operation performed. Mr. Robert B. Engle, of Masonville, N. J., is an expert. Write to him.

McC., Brooklyn.—I have a dog that has had distemper, yet he is now sick with his eyes running and inflamed, and a sore on the top of his nose. Ans. The dog has probably taken cold. Give him a Dovers powder three times a day, and for the sore apply carbolic salve after washing it with Castile soap.

S. S. H., Galesburg.—There is no record of any such target as you mention. The usual English test is at forty yards, thirty-inch circle, 1¼ oz. No. 6 shot. If you are going to shoot constantly, an Irish setter might suit you. They are only superior to pointers in very thick cover and in cold wet weather, when their longer coat is more of a protection to them.

J. P. P., Boston.—1. Which is better for use in hunting large game, a telescope or a double glass (opera)? About what size and price ought to be paid? 2. What is meant by expression "Goldens setter?" Ans. 1. An opera glass is more conveniently carried and is generaly more powerful. Apply to an optician for price. They are as high as $40; $20 would be a fair price. 2. Probably a misprint for Gordon setter.

J. E. Elmira, N. Y.—What reputation has Lip ping & Lawdon a gun-makers, and are their guns considered as good as any? 2. Can a cylinder bore gun be successfully choked? 3. Do you know anything of White's patent loader, does it increase the pattern and penetration as much as claimed by the maker, viz., to make a cylinder bore shot as well as a choke? Ans. 1. We have had no experience with their guns. 2. Yes. 3. We have never used it.

H. H. S., West Shokan, N. Y.—I would like to ask if any of your readers have ever noticed any instance of water snakes eating trout. A day or two ago I saw a snake in a stream at this place with a large trout in his mouth. Are trout ponds subject to this danger? Ans. Black snakes and water snakes are among the most destructive enemies of trout in some sections. They generally place themselves at the outlets of the ponds, and lie on the edge of the apron of the dam.

M. DEW, Norfolk, Va.—To remove mildew, use hypochlorite of alumina. Moisten with water, rub well into the cloth, moisten again with dilute sulphuric acid (1 to 20), and, after half an hour, rinse thoroughly in soft water and then in water containing about an ounce to the gallon of sulphite or hyposulphite of soda. A stiff brush may be advantageously employed in applying the hypochlorite.

T. B. T., Bridgeport, Pa.—I have a Maltese cat and kitten terribly infested with fleas. What shall I do to rid them of the pests? Ans. Blow Persian insect powder into the fur, and after a few hours wash with carbolic soap, and then in an hour afterward with clean, warm water. The powder alone will be sufficient for the fleas, but something else is needed for the nits. See also advertisements of flea powders in our columns.

R. D. H., Oconto, Wis.—I send a curious insect resembling a wasp. When found he had two common house flies in his clutches. In the sheath under his belly is a long black spear which is now not visible, but when taken stood out at an angle from his body. I have never seen such an insect before. Can you tell me what it is? Ans. Your insect is a hymenopta, belonging to the family of the woodwasps (*Crabronidæ*). These insects bore holes in trees or stumps in which they deposit their eggs. The holes are stored with insects on which the larvæ feed when hatched.

BRITISHER.—Would hardly recommend the Rocky Mountains now for hunting, as the Utes are now on the rampage, which renders hunting there risky. Take Pennsylvania R.R. to Chicago and thence either Milwaukee & St. Paul, or the Chicago and Northwestern R.R. to St. Paul, thence by St. Paul, Minneapolis & Manitoba R.R. to the town of Hallock, near the British line. There is a great variety of large and small game in the vicinity, and the section has been very little visited by sportsmen.

J. H. P., Williamsport, Pa.—Why is it that chilled shot carries together and makes a hole like a bullet? Two friends of mine I saw try it to-day. One shot a Scott & Son 10-bore medium choke, and the other a Parker gun, 10-bore, at forty yards, both barrels of each gun, and the loads from the four barrels went altogether, (with the exception of about eight or ten shot,) like a bullet, and through an inch board, and if you can tell me the reason for it, you will greatly oblige. Did you ever hear of any thing of the kind before? Ans. We never heard of such a case and have shot a great deal of chilled shot. The cause must be in the loading of the shells.

A. C. W., City.—I have heard the name Oswego and Otsego applied to fresh-water bass. Please tell me if there are two varieties; if not, which is the proper name? How do they, or it, differ from the black bass? Ans. The Otsego bass is a species of whitefish belonging to the family Coregonus; the Oswego bass is microptecous salmoides, and belongs to the Percidæ, or perch family, while the Oswego bass, or black bass, is a voracious feeder and biter at the hook. The Otsego bass scarcely ever takes the hook. It appears to be peculiar to the Otsego Lake. See "Hallock's Sportsmen's Gazetteer."

B., Hanover, N. H.—1. What part of Maine or the borders of Canada, accessible by water, would afford the best hunting and trapping for a party of two, if they went from thirty to fifty miles away from any settlement? 2. Could not the 40-calibre 265 grain bullet commonly used in the 50 grain cartridge be used to a good advantage in a 70 grain cartridge? if not, why? Ans. 1. The East Branch of the Penobscot would be a good trapping section; perhaps the best in Maine. 2. Certainly not. One is too small and will not take the grooves; the bullets must fit. Manufacturers are most exact in making ammunition.

C. D. H., Columbus, O.—1. If not sure whether dog has film over eye, would it injure him any to blow burnt alum into his eye? 2. Do you know any one who buys, sells and exchanges coins? 3. What is the off season for wild duck and teal in Ohio? 4. If in shooting glass balls a ball is hit so as to be plainly heard by judge and spectators, has the judge a right to score it for the shooter? 5. Is thirteen out of fifteen pigeons considered good shooting when they are shot as they fly past, after having been shot at and missed? Ans. 1. No, if not repeated. 2. Scott & Co., 146 Fulton street, this city. 3. Open season commences September 1st. 4. It must be broken. 5. Yes.

T. F. K., Easton, Pa.—I have a setter dog two years old; on last December 1st, he was taken with distemper; the peculiar part is, he did not discharge at the nose as is usual, but laid around. About the usual time, three or four weeks, his eyes turned green and have remained so up to this time; can hardly see in the dark; will run against anything in his road. Will you please inform me what to do in the case if anything can be done? Ans. The trouble such as you mention frequently follows distemper, but as the dog recovers his strength, disappears. Attempts to relieve it often result in more damage. The best course you can pursue is to give your dog a tonic, say quinine three grains a day.

OATKA, Le Roy.—My setter is troubled with sore eyes; ever since I first purchased him his under eyelids have been hanging, and the eyeballs more or less blood shot. There is in the morning especially, a good deal of matter about the eyes. He injured one eye among some flags and rushes this summer, and now almost every morning the eye is entirely closed with thick yellowish discharge. Health otherwise very good. Has plenty of exercise and good appetite. Has one good meal a day of scraps from table, and is fat enough for work. Please prescribe. Ans. The best course to pursue would be to put a seton on the poll. A wash of two grains of zinc to the ounce of water might prove beneficial.

LIVER POINTER, New York.—1. I have a pointer dog about six years old who has just got over a severe case of mange, and it has left him with inflammation in the eyes. He can't keep them wide open, seems to be blinking all the time. I have syringed them out once a day with a weak solution of vitriol and sugar of lead. It does not seem to do them any good. 2. He has a fistula on the bridge of his nose near his eyes, which seems to heal, but fills up and discharges with a little pressure, dark blood and sometimes pus. I have syringed it out with a weak solution of carbolic acid. Ans. A seton on the poll would probably remove both causes of trouble.

COLUMBUS CRICKET CLUB, Columbus, O.—The rule in practice at Lord's Ground, England, in the case of one day matches is:—"That a match in the absence of express stipulations to the contrary must be played out or given up before one side can claim the victory agreeable to law and with respect to bets. It must therefore be decided between the two sides whether they intend to stand by the first inning or not before the commencement of the game. If they do not decide and the match is not played out it is of course 'drawn.'" The above, we presume, will cover the case you refer to. You do not, however, state the terms of the match.

TO AMERICAN YACHTSMEN.—For complete records of all yacht races in England, as well as for a great variety of other matter of interest, such as cruises and yachting tales, read *Hunt's Yachting Magazine*, established 1852. Can be had of booksellers generally, or direct from Hunt & Co., 119 Church Street, Edgware road, London, E. C., England. Published monthly, one shilling sterling per number.—[*Adv.*

FOREST AND STREAM ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY,

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

***Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, SEPTEMBER 25, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remited to us is lost.

☞ Trade supplied by American News Company.

THE CREEDMOOR MEETING.—The very full report given in our columns this week is so complete as to preclude the necessity for any editorial notice. The story of the meeting is well told in the scores given with careful elaboration, while the lessons of the contests have in part been hinted at. The report makes a heavy drain on our space. Yet we consider it well given, for from one end of the country to the other, and over Europe as well; in fact, wherever the FOREST AND STREAM circulates, there are readers anxious to know the story of Creedmoor and its fall meeting. These annual gatherings have come to stand as guages of the rifle work of the year in the field of practice, and in the workshop of manufacture. The improvement pointed out is marked; and to everyone, whether a participant in the pleasure of the keen rivalry before the butts, or one of other inclinations, the progress at Creedmoor means safety and prosperity. We bang away at a passive iron slab; yet indirectly every shot makes one atom in the breastwork we are raising against foreign invasion or domestic insurrection. The score ticket-figures mean congratulation to the winners at present, and a fund of safety for us all from this time on. Thus far the militia have led the army in range endeavor. Yet another year we think will change the tune, and the civilian soldier will then be glad to take his cue from those who should rightly offer it.

YALE AND HARVARD.—The Yale oarsmen are wisely profiting by their defeat at New London in the last race, and have gone to work with a will to prepare for a different record next year. At a mass meeting of the students last Friday, Captain Rogers reported that twenty men would go into immediate training and work steadily through the winter. The College voted to challenge Harvard to row a four-miles race on the Thames next June.

It is certainly to be hoped that Yale will do better next year than she has for the last three years. One-sided boat races are not very interesting affairs. Yale and Harvard were the first colleges to meet in competitive strength upon the water. Their races are events of national interest. Restricted within proper normal bounds, college boating and other athletic sport is to be encouraged. Our alumni need more chest measure. The vast change in college health and strength which has come about within the last ten years, is largely due to the general participation in rational pastimes. Some of our colleges, notably Amherst, have methodical courses of gymnastic exercise. But in most of these institutions the students must rely upon their own spontaneous participation in athletic sports. The intercollegiate rivalry, such as that between Harvard and Yale, is an important factor in fostering this athleticism. The great intercollegiate regattas have not only proved unwieldy, but, as the public has long ago learned, they are conducted largely in the interests of betting men, hotel keepers, and, as the Saratoga visitors of former years learned to their cost, hack drivers. The collegians themselves are doubtless innocent of any mercenary motives, but that they have been made tools of by scheming speculators, the very dullest looker on must well understand.

Harvard and Yale have withdrawn from this hippodroming. They have been censured for the course. They rather deserve commendation.

We hope to see a close bow-and-bow race next June.

FLORIDA.—We begin the publication this week of a series of descriptive sketches of Florida from the able pen of Dr. J. A. Henshall. As the season for the annual winter migration to the South is approaching rapidly, the value of these letters will be sufficiently appreciated.

GAME PROTECTION.

THE NEW BRUNSWICK GAME LAWS.—A correspondent of the Boston *Journal of Commerce* recently made some harsh strictures upon the non-resident license fees exacted by the game laws of New Brunswick. To these Chief Game Commissioner James T. Fellows replies in an eminently sensible letter, a portion of which we copy below. We have repeatedly held up the course of our neighbors as a precedent to be followed by ourselves. Just what the causes were which compelled New Brunswick to adopt her present game regulations, and how this enforcement has resulted, is well told by Mr. Fellows:—

Nova Scotia and New Brunswick have long been noted for the excellence of their fishing and hunting; it is desirable that they remain so. The markets of Boston and New York are witnesses of the immense quantity of game supplied them from this section, chiefly by pot-hunters.

These vandals infest our marshes, lakes, rivers and forests, destroying without stint, careless of the season, mating or pregnancy periods, of sex or of the means of capture, so long as the market demanded and the "coast was clear" for their peculiar line of trade. Instances are known where thousands of wild fowl have been baited, netted and shipped away in schooners to foreign markets by foreigners; where large companies of hunters, French and Indian, from Quebec, have invaded the moose country in February and March (when deep snow and heavy crust aided them in easily securing their prey), destroying hundreds of these noble animals, killing them for their peltry alone, their carcasses left for carniverous birds and beasts, and where carribo and moose have been killed while big with young.

To so great an extent had this wholesale slaughtering been carried on that game was fast becoming scarce and in danger of extinction. Nova Scotia sportsmen awoke first to the necessities of the situation, and secured a law forbidding the capture of moose or carribo for three years, making provision for preserving game, and exacting a license fee of $20 from all except Nova Scotian sportsmen. The effect produced by this last proviso was to turn foreign sportsmen and pot-hunters into our province. For a time the destruction of game was startling; but a number of our sportsmen met, formed a society and established a fund to defray the expenses of scouts and prosecutions against offenders, and otherwise to assist in carrying out the game laws. Certain amendments were enacted by our legislature—one of which was the charging a license fee, like Nova Scotia, of $20. We have a Chief Commissioner, one County Warden for each county, one Parish Warden for each parish, and in some counties have 20 deputies beside. With this machinery we hope to so protect the game that no person can very well object to pay the fee; no sportsman will.

Mark this: The law operates equally against all, whether American, English or Canadian. By the fostering and protection thus afforded, the game must increase and the pleasures of the sportsman be multiplied, while his fatigues and disappointments lessen; and since we expend our funds in game protection, we simply ask others who wish to enjoy its capture to contribute theirs.

It may be urged that no fee is exacted by any State in the Union,* and that it is therefore unfair to exact such of Americans; but the reasoning is absurd. Both game birds and animals are nearly extinct in many States, while others, which boasted of plenty a few years ago, are rapidly becoming tenantless. Now that the game is nearly exhausted, every State in the Union has its game law, which may be made effective through the assistance of game protection societies, whose funds are expended, like ours, in prosecuting offenders; but these must soon tire of contributing to such a purpose while outside sportsmen reap the benefits thus conferred, gratis. The time is therefore not far distant when resident sportsmen in each State must submit to losing their game entirely or obtain an efficient license law. In proportion as the haunts of game become broken up, so will sportsmen multiply in the remainder; consequently, Americans or others who may be too prodigal of their game at home should submit to the more provident laws and customs of other lands when they choose to visit them.

To conclude, Mr. Editor, no law-abiding person is debarred from hunting in New Brunswick. Our game license law is not likely to keep American sportsmen away; we hope it may terrify American pot-hunters. The law is not intended to shut out Americans from participation in legitimate wood, marsh or sea shooting. The law is aimed against pot-hunters of any nationality and foreigners who object to pay the lawful fee towards protection, and was instituted strictly to preserve and foster the game of the country.

It may be interesting to know that Nova Scotia has found it necessary to increase her license fee to $50.

* Delaware and New Jersey each have a non-resident license law.—ED. F. & S.

MAINE—*Portland, Sept. 6th.*—Our local sportsmen have at last organized a club for securing legislation for the protection of fish and game, etc. It will be known under the name of "The Mulnomah Rod and Gun Club," with the following officers: President, J. W. Whalley; Secretary, Will. L. Chapman, Treasurer, M. F. Spencer. Among its members are some of our most influential business men and leading professionals, and all bespeak a brilliant future for the club. WILLIAM LANG.

THE VERMONT WOODCOCK LAW.—*Ferrisburg, Vt., Sept. 6th—Editor Forest and Stream*:—Desirable as a common close time is, the close time as now established here for woodcock amounts to almost total prohibition, for in nine years out of ten these birds have all left us by the 1st of September. What shall we do in such a case? Be self-sacrificing for the good of others? A few may be willing to do so, but it is next to impossible for these few to enforce the law as it now stands. It is hard enough to enforce such protective laws as are indisputably just.

R. E. R.

THE MASSACHUSETTS GAME LAW.—It is to be regretted that the case mentioned below could not have been thoroughly tested in the courts. The defendants' failure to appear, however, was a virtual defeat. We commend the Massachusetts Association for its earnest and efficient action:—

BOSTON, *Sept. 19th.*

Editor Forest and Stream:—

The case of this Commonwealth vs. Hall & Whipple, proprietors of Young's Hotel, came up in the Superior Court this week. As many of your readers are interested in the case, I would inform them that the defendants failed to appear and prosecute their appeal, thus being defaulted. We regret that the case was not carried to the Supreme Court, but the offenders well knew that defeat awaited them, and wisely avoided further contest. There is no question as to the strength of the law, even though certain parties would attempt to set up claims that it is a weak and unjust law. *Dat Deus immiti cornuta curta bove.* JOHN FOTTLER, JR.

THE NON-RESIDENT LAW OF DELAWARE.—*Poughkeepsie, Sept. 20th*—I could not help noticing the contrast between the magnanimity of Mr. W. H. Merrill, of Delaware, in the last issue of your paper, and the Delaware game laws. Lest some of your readers might, to their sorrow, be misled by that invitation, would it not be well for you to call attention to that section of their game law which will not permit any one being a non-resident of the State to even shoot upon the land of a brother or friend under severe penalty; also the adroitness shown in the wording of the statute, so that there can be no possible avoidance of it.

Their law as to non-residents is in keeping with their other relic of barbarism—the whipping-post; and the two are unmistakable proof of the half-civilized tons of their Legislature.

I have often wondered that severe comments have not been made by the sporting papers upon that feature of their game laws. A.

REMARKS.—The inference of our correspondent is the same which seems to obtain generally as to the attitudes of the States of New Jersey and Delaware toward non-resident sportsmen—namely, that residents may shoot *ad libitum*, while non-residents are charged a fee. The truth is that *any person* who shoots in Delaware is obliged to take out a license, whether resident or non-resident. The first year a license costs residents $3 and non-residents $5. After the first year there is no discrimination. The effect of the law is to make *all* who participate in the sport bear a portion of the expenses. Those who value shooting privileges sufficiently to pay a small sum per annum will be likely to interest themselves in protecting the game and enforcing the sensible laws for its protection. What we possess and enjoy is generally enhanced in value by what it costs us.

A TRIP TO NORTH PARK.

(FOURTH PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

OUR party which left Laramie about three o'clock on a bright, pleasant Wednesday afternoon, consisted of five individuals. Two of the number, A. and W., had never before been west of the Missouri river, and so every thing would be new to them. Fuller, our teamster, and William, the cook, with the writer, made up the company. A stout team drew the Studebaker wagon, which carried our provisions, bedding and ammunition, and three excellent saddle horses were provided for the accomodation of those who preferred riding to a seat in the wagon. Our start was not marked by any incident of special interest except to one of the party. I had mounted and was about to ride on to overtake the wagon, which had already moved off, when A., who hastily, approached his horse, carrying his rubber coat in his left hand, attempted to spring into the saddle. A gust of wind spread out the coat, the horse gave a sidewise bound just as the rider left the ground, and the consequence was that A. sprang clear over his steed and alighted on his head in the road on the other side of the beast. Happily the fall resulted in no injury, and in a moment more A. had mounted, this time without the accompaniment of a rubber coat, and we were trotting along on our way to the Park.

The first day's march took us to Leroy's on the Laramie river, a distance of only seventeen miles. The road is a good one, hard and level, and over it the greater part of the freight which goes to the mines passes. The country

is full of cattle, and we passed several large flocks of sheep and goats in charge of mounted shepherds, each of whom was attended by a dog, of mongrel breed it is true and showing none of the points either of the Scotch or Mexican sheep dog, but still, as could be seen from their actions, very servicoable assistants in caring for the herds.

For twenty miles up the Big Laramie that stream is fenced so that only at a few points can animals get down to the river to drink. These fences are built by the ranchmen to keep the cattle off their hay bottoms. Strangely enough, the cattle prefer the coarse but juicy bottom grass to the finer and much more nutritious buffalo and bunch grass which grows on the uplands among the sage brush, and but for the protecting fences would spend a considerable part of their time in the bottom, thus making it impossible for the stockmen to get any hay. For, as some of your readers may not know, it is only in the creek bottoms, where there is constant moisture, that grass grows in sufficient quantity to make it worth while to cut it. On the upland the ground is for the most part bare, though the sage brush gives it, from a distance, the appearance of being covered with vegetation, and the grass is scattered about, a bunch here, another there. A sod is unknown on the upland.

Ten or twelve miles from Laramie I noticed in the road, which at this point ran for some little distance close to one of these fences, the tracks of several antelopes, and a mile or two further on we saw the animals themselves. They were evidently trying to get down to the water, and were following the fence along, searching for an opening through which they might pass. So intent were they upon this that we rode up to within six or eight hundred yards of them before they saw us, and we might have approached still nearer to them had it not been for the wretched dog owned by our teamster, which as soon as it caught sight of the game started in hot pursuit. Of course he could not catch the antelope any more than a tortoise could catch a streak of lighting, but this "Shep" did not know, and was never able to learn. The antelope did not pay much attention to him until he got to within about a hundred yards of them, and even then they merely cantered off slowly. When, however, he still gained rapidly on them and was soon only fifty yards behind the herd, they seemed to realize that he was chasing them. A little cloud of dust obscured the clump of fleeing beasts for a moment and then they emerged from it running, literally, like the wind. The dog seemed to be standing still, and, in less time than it takes to write it, the antelope were out of sight. A little while after this "Shep" tried the experiment of chasing a Jack rabbit, and proved himself about as good on this game as on antelope. He could go faster than the rabbit as long as it ran straight, but at the first double it would gain ten or fifteen yards, and before the dog could make that up, his wind would give out, and after a few despairing yelps, which he gave vent to with a fury that led me to believe that they were representative of the most emphatic execrations, he would give up the chase.

The ride over the open prairie was most delightful. It was a pleasure and an excitement to breathe the light exhilarating air of the mountains. The scent of the sage brush, bringing to mind a thousand similar rides through this and other regions, called up a host of pleasant memories and of kindly thoughts for the friends with whom I had campaigned in former years. I recognised with a satisfaction, which seems, even to myself, almost absurd, all the different flowers on the prairie, and of each well known bird or animal that appears I have some story to tell. The shore larks flutter along the road with their soft melancholy twitter just as they do almost everywhere in the west. Maccown's bunting easily recognisable to the limit of gun shot, brings back to my mind Central Dakota where they breed so abundantly, and at the sight of the mountain plover my thoughts turn to Hopley's Hole in the Judith Basin, where first I saw this graceful species.

The sun was setting when we reached Leroy's, and by the time our tents were up and the animals fed it was quite dark. An early start was made next morning, as the march which we proposed to make was over thirty miles. I lingered behind to examine some fossils which had been found in the bluffs near the river and which were supposed to be of peculiar interest. The specimens proved to be the bones of the great Dinosaurian reptiles, which lived in such great numbers in this region during the Jurassic age. They were in good preservation, but did not appear to differ materially from specimens already in some of our eastern museums. I caught up with the team and the other riders just as they were leaving the river. At this point Messrs. Balch and Bacon are erecting the most pretentious house, I venture to say, to be found in the territory, outside of the large towns. It is to be finished inside with lath and plaster and has two bow windows!

Soon after leaving the river the road commences to ascend, and the dark mountains which have hitherto seemed vague and indistinct in outline, begin to appear more clearly cut. Directly in front of us, although the road passes to the right of it, appears Steamboat Mountain, one of the most striking objects seen on the trip. Standing almost alone and separated from the undulating prairie merely by a single bench, a few hundred feet in height, which is covered by the greenish gray of the almost universal sage brush, it rises square and bluff to a height of two or three thousand feet above the plain, and presents on its northeastern aspect an almost vertical precipice, the lower half of which is wholly bare of vegetation. The deep red Triassic rocks, so characteristic of this region of the mountains, are here exposed in a superb section to a great height, and the different strata, inclined at a slight angle toward the north, are clearly defined. Above the red beds is a smaller thickness of light colored rock, and above this stupendous precipice the mountain, bright with the pale green foliage of the quaking aspen, slopes gradually back to its summit. Here and there the verdant covering is interrupted by patches of silvery gray, showing where, in past years, the fires, kindled by Indians or by the careless hunter or prospector, have swept over the mountain, destroying the splendid forests by which it was once covered and leaving only the mouldering and weather-whitened trunks of the pines and spruces to bear witness to man's improvidence.

As we approached our third and last crossing of the Big Laramie the country becomes more rough and broken, and the team travels so slowly that we on horseback find ourselves several miles in advance of it. Occasionally we see a few antelope on the distant hillsides, but they are very wild and take to flight as soon as they see us. We see as we ride along many typical western birds which are new to all but me, and I point out the Ferruginous and Swainson's buzzards, the Lanner falcon, magpie, Say's flycatcher, Brewer's blackbird, the greentailed finch, western white crowned sparrow, and a number of others to my interested companions. Here, too, we see our first sage grouse, and from the sloughs in the river bottom start a number of mallard ducks and a brace or two of teal.

Having crossed the river and ascended one long hill we find ourselves in the mountains at last. I have longed for them for a year, and now I am among them once more. I see with some anxiety, however, that there is a great deal of travel over the road which we are following, and I fear that unless we can get far away from the freight road, I shall be disappointed with regard to game. The trial is a pleasant one to march over; there is so much variety about it. It is hilly, as might be expected, and on either hand the mountains, usually timber covered, rise above us. At short intervals we plunge into the sombre silent pine forests, soon to emerge again and pass through beautiful little parks, each watered by a crystal streamlet. While passing through the pine timber I noticed the three-toed woodpecker, the common cross-bill, and the Western Canada jay, the bird fauna thus indicating that we had attained a considerable altitude.

Toward evening we reached Beaver Creek, a tributary of the Laramie, and after following it up for a few miles camped for the night. We had no fresh meat in camp, and the task of procuring it seemed to fall upon me as the senior of the party. Accordingly, about an hour before sunset I shouldered my rifle and started out alone on foot to try to kill a deer, while A. and F. proposed also to go out with the same object in view. The valley through which the Beaver flows is a narrow one, and the hills rise on either side in a series of steep benches to a height of several hundred feet, their summits being clothed with green pine timber. This timber is delightful to hunt through. At the point where I struck into the forest there was neither undergrowth nor fallen trees; the ground was covered with the needles of the pines on which the foot falls noiselessly; little open parks occur at frequent intervals, and those which have streams flowing through them are favorite feeding places for deer. For some time I proceeded through the timber as carefully as I could, keeping a good look out, not only for game but for "sign" as well. A good many old deer tracks were to be seen, but scarcely any fresh ones. This of course was to be expected, as the game would naturally be driven back from the road. It was nearly sunset when I turned to go back to camp, somewhat disheartened at having nothing to carry with me. I walked fast, as it was important, if I proposed to spend the night in camp, to reach it before dark. It is not always easy to find one's way through thick pine timber in the day time, and I felt no ambition to try to do it after night had fallen. I walked quickly, therefore, not trying to follow the track by which I had come, but taking the shortest way. As I approached a little park, in the centre of which was a pool surrounded by willows, I distinctly heard a deer jump, and, running forward, caught a glimpse, through the branches of the trees, of a doe running across the park. I had no chance to shoot at first, but when I got to the edge of the timber I saw the doe on the other side of the opening trotting along among the tree trunks. As a running shot is always an uncertain one, I determined to try to stop her and so imitated the cry of a fawn. To my surprise, instead of stopping the doe whirled around and started back toward me, while a young fawn, which had been following her and which I had not seen, came into view, and, confused by the retrograde movement of its mother, turned toward me and paused. To decide to kill, if possible, the fawn, required not a moment's thought, for I knew that the does at this season are usually thin, having been nursing their young all summer. As the fawn paused, therefore, I threw up my rifle, took a quick sight and fired. When the smoke cleared away there was no fawn in sight. Slipping another cartridge into my gun I started across the park, and before I had gone ten steps my eye caught a movement among the trees and I soon made out my game struggling on the ground. The ball had entered the left shoulder just at the right spot and had come out an inch or two in front of the right ham, and the animal had run fifty yards or so before falling. Altogether, the shot was a very satisfactory one, because it was a very quick one and made in an uncertain light. It took me about three minutes to cut up the fawn, and then throwing the hams and saddle over my shoulder I strode on toward camp. The sun was just setting, and the sky, when I could see it through the trees, was becoming somewhat overcast, so that I began to think that I should certainly have to sleep out on the mountain side. I counted my matches and found that I had only three, enough of course, unless the wind commenced to blow. I knew well enough the direction in which the camp lay, but felt pretty sure that I could not go straight to it. If the light did not fail me, however, I should soon strike the valley, through which the road led, and in that case should be sure of sleeping under a blanket. These thoughts passed through my mind as I hurried on, and I soon saw through the trees an opening toward which I hastened. Just before I reached it I heard a movement in a quaking aspen ravine at my left, and turning, saw a fine mule deer climbing the hillside less than a hundred yards from me. To have killed him would have been an easy matter, for he stopped and looked at me for some moments; but if I had shot him I had no way of getting the meat to camp, nor had I time enough to gralloch him before dark, so I let the fine fellow go.

A few moments' brisk walking brought me to the opening, and I saw from the size of the brook that flowed through it that I must be near the Beaver. The event proved my supposition a correct one, and in about ten minutes I found myself on the road over which we had passed in the afternoon. As I turned toward camp I heard signal shots being fired, which were evidently intended for my ear, and after answering them once I trudged steadily along. It was now quite dark, but of course it was impossible to lose the road, and half an hour's brisk walking brought me to camp, supper and bed. Yo.

Pinkham's Ranche, North Park, Col.

—The famous thoroughbred mare Nina died in the thirty-second year of her age, at the farm of her owner, Major Thomas W. Doswell, in Hanover County. Her reputation as a racer and brood mare is co-extensive with the Union. She was the last survivor of the progeny of the celebrated racer Boston.

The Rifle.

THE CREEDMOOR FALL MEETING.

The 7th annual Fall meeting of the National Rifle Association held at the Creedmoor Range from Sept. 16 to 20, inclusive, must be recorded as a successful one. The scores were fine in many respects. The fancy shooting, if one may speak of the long range small bore work by that name, did not show any very brilliant totals, but in the team shooting and at the off-hand work, where, after all, the bulk of range practice will always remain, and for work at which off the range the greater part of butt drill should directly tend, the records show a vast improvement. The meeting was fortunate in having fair weather, though of course there are those who attended the meeting and who found a baffling wind blowing over the lawn, who will declare that the weather could not have been worse, and will point to score-book for documentary proof. Yet the absence of raw winds, or of wet skies, made the camp week on the range a pleasant one; allows the tenters to think of the days spent under canvass as pleasant ones, and enabled Col. J. H. Cowperthwait, the executive officer of the meeting, to carry out his schedule and squadding arrangements without break or variation. Financially, too, the meeting was a measurable success. It might have shown a larger balance in favor of the Association, but considering the amount of effort put forth and the inducements held out to such as need those stimuli, the financial return is a very satisfactory one. From first to last, too, the meeting passed off without a serious protest, and the fact that not a single matter was presented for the consideration of the Executive Committee shows the freedom from wrangle which marked the many sharp contests. There were at times expressions of feeling from men who were certain that their "nippers" were bulls-eyes rather than the centres they were marked, and the new rule of the N. R. A., applied for the first time, that the marking from the first should in no wise be questioned, at times seemed to work hardship. This question drew out an expression of opinion from a large number of the marksmen present which was put in the form of a paper to the Board of Directors. It is fair to assume that the markers are fallible, and the present rule either considers the butt-men incapable of committing an error or makes rifle practice a mere matter of chance. Frivolous protest from men who transfer their personal irritability and perhaps nervousness or biliousness, to mean carelessness on the part of the marker, is to be avoided, but it is fair that an important and palpable mistake on the part of the marker should have an avenue for rectification. A simple way would be the introduction of a forfeit system. Let any one protesting the marking of his last shot deposit a sum, say $2, as being neither excessive nor trivial,

then permit an examination of the target. If the marking as signalled be found to be correct the sum is forfeited to the Association, if not there is no forfeit and the marksman gets his exact justice in the matter. The sooner the N. R. A. managers prepare and establish such a modification of the present inelastic rule, the better.

The old range, if one may use such a term in describing an institution not yet in its teens, never looked better for work. The camping arrangements carried on by Gen. Wylie were excellent, and ample accommodation was furnished to all of the troop visiting the range. The camping however, will not be complete until the "Member's Lines" are established, a section of the camp where a member not connected with the National Guard, or in any way associated with the military, may find a temporary home in a tent. There is no reason why the Creedmoor week shouldn't be made one of out-door enjoyment as well as hard work before the target. It is set in a delightful period of the year, and while Creedmoor offers no outside attractions to the campers as a settlement at Newport or any watering place might, still it could be made for a week a place of rare attractiveness. It might even pay, were the Association to take the initiative and offer to members from a distance an opportunity to secure a breezy, pleasant tent, sufficiently furnished, at a moderate rate, instead of as now compelling the few visitors who may be accommodated to find shelter in the surrounding hotels. The regulars had made for themselves quite an establishment in the center of the best lawn and gave illustrations of a well kept camp. At the shooting points there was no complaint, and the squadding gave each and every man equal opportunity to gain one of the many prizes.

The meeting was one of surprises in many respects. The favorites, or those for whom the first places were in popular opinion reserved, did not fill them, and the big scores which were expected from others of the marksmen did not come on the score tickets. The representation of marksmen was a wide one. The State prize drew teams from twenty commands in the State, and every section was seen in delegates from its local guard. The Regular Army had all the representation it could well have, while of private clubs all were to be seen in some form; teams in many cases, and in others by single members; and while on this topic of the general meeting, it might be well for the N. R. A. in its record of individual as well as team shooting to designate the club of which the marksman is a member.

The arrangement of the matches was such as to enable each man to know to a certainty just when and where he was to present himself before the targets. There was no waste of time in waiting for this or that match to come on, and military teams were enabled to put their scores on record and get away without the least unnecessary delay. In this respect Col. Cowperthwait has shown good executive ability. The statistical department is one of hard work; it is the one of all others which should be placed in charge of competent paid help. It is not fair to the gentlemen of the press, who in daily and weekly issues have done so much to build up the Association, to be treated as a gang of intruders when they endeavor to get at the results of the meeting, nor to have a mass of erroneous results flung at them. It is not a department to be given over to the manipulation of boys nor to be saddled upon an officer of the Association to grind away in a minor clerical capacity, footing up scores, and generally making the best of the meagre accommodation provided. And Creedmoor will not be a desirable place for the general public to visit, until that general public can be properly and decently fed during its stay on the range. No such accommodations now exist, and the *menu*, habits and service of a cheap restaurant are not such as to attract any one to a second visit to the range.

The firing opened on Tuesday morning 16th inst. with the off-hand matches, the popular Judd match leading the list. In this there were 226 entries, and military rifles blazed away all along the line. The day was excellent, a gray sky toning down the light to a desirable shooting point while the wind blew, when at all, in a lazy ineffective manner. That it was a good day for shooting is shown in the general high degree of excellence all along the list of entries. In 1875, J. Mason the Canadian shot carried off the prize with 30 points, while now after 30 prize places have been taken, a 30 score man is left out without a place. The winning score was the same as that of the past two years, 33 in a possible 35, which means very close work with an open-sighted, heavy trigger pull, low charged military arm. The winner was an out-of-town man, and throughout the meeting the successes of men other than those accustomed to know Creedmoor as a regular practice ground, must have led to the conviction that come who may, they are certain of fair play, while the impartiality of the range indicated that there is no trick of the grounds, or acquaintance with peculiarities to give an advantage to Creedmoor men, as the beaten foreign teams in previous international matches were so ready in asserting.

Following close upon the Judd match came the Short Range match, where any rifle is admissable. As was the case last year, a military rifle in the hands of a non-Creedmoor man was the successful one; and by the same score as an hour or two had taken the Judd prize. These facts should serve as evidence against the absurd practice of handicapping rifles instead of men, in rifle shooting. It is the man's record which affords the only true basis of comparison, and to handicap the weapons seems to go on the untenable basis that the rifle will do the work be the skill of the rifleman behind it what it may. The Laflin & Rand match at 200 and 500 yards, also with military rifles, was taken by very nearly a highest possible, B. Blue of the Regulars, putting in 68 in the possible 70; while the other two medals in this series went to members of provincial military regiments. During the afternoon of the first day, too, the Directors conducted their "duffer" match though Col. Cowperthwait found time to slip in a winner. The interest of this first day culminated in the team matches for the Gatling gun, and for the *Army and Navy Journal* cup. Both of these matches were established at the first annual meeting in 1873, and have given occasion for a great amount of team effort. The cup went first to the Twenty-second Regiment; then to the Seventh N. Y. In 1875 to the Second Regiment of Connecticut. The year following it went again to the Seventh; and in 1877, traveled up to Oswego with the Forty-eighth Regiment team. The Regulars took a leading hand last year, and for a time it rested with the Engineer Battalion, U. S. A. This year it goes to the Twentieth Separate Company of Binghamton. This victory and the subsequent ones of this meeting, which have given the Binghamton boys a full measure of glory, go to show that for the securing of a strong team, the selection from a great regiment is not necessary. The strongest teams on the range were in many cases those from small bodies of men. The Twentieth Company, with a muster roll of perhaps seventy-five names, is able by its position in relation to the ranges of its *personnel* to make up a dozen shooters which the Seventh and Ninth Regiment's organizations, a thousand strong, cannot compete with.

The Gatling Gun match was shot immediately after, and went with the cup to the Twentieth Separate Company. It became their private property, too, by this second winning, and ceases to be a challenge object any more.

The following table shows the ups and downs of the several regiments competing for this cup. In 1873 and 1874, the possible team total was on the old target, 336, since that time it has been 420:—

* Regiment. † Separate company.

This exhibit shows in a compact form the history of the Gatling gun, and the performances of the National Guard in connection with it. The Remington State Arm has been used always by all the men.

The second day of the meeting brought a new style of weather. The wind from being dull and listless was now entirely over active, and was sufficiently strong to make the tent-flies flop with a violent motion, while "holding for wind" became a sort of wholesale job. It was a team day entirely. The Twentieth Separate Company came in for a leading place on the State team, followed by three other teams made of "hands," as the local boys delighted to call them; but they found that the steady hands and clear eyes won, while our crack city regiment was compelled to go without even a place on the prize list. The division and cavalry matches went where everybody expected they would; but the short-range team match was a close struggle to the finish. None of the teams were satisfied with their scores. Each and every team has done better work, but all things considered the arrangement was a very fair one. It would have been somewhat of a surprise had the N. Y. club teams failed to receive a leading place among themselves, and the close push which the Zettler's gave them shows that there is little to choose between these two excellent off-hand clubs.

The second day had been a sharp cross wind; but Thursday, the 18th, saw the wind spinning down the range from the 6 o'clock quarter. This was *the* day of the meeting. On it the regulars and militia teams came together before the butts, while the Inter-State matches were fought out. The one distinguishing feature of the day was the marked improvement shown by the teams from the regular army. In place of the two teams from the Atlantic and Missouri Departments only, the Pacific was this year represented as well. The men have been in camp on the ground for weeks, and have become thoroughly familiar with the range. They were officered by men full of enthusiam and determined to win; but they were outmatched in rifles and in system. The Bochard military gave its best work in the hands of the N. Y. team, while it is manifest from other scores made at the same meeting that the Springfield rifle was not manipulated to the best advantage in this match. Odd as the assertion may seem, rifle practice is an innovation in the army, and neither men nor officers are yet able to get the best work out of their weapons. The scores, however, showed such a great advance over those of last year that it is evident that the anomaly of an army valueless as a shooting corps is gradually being wiped out. The men should receive more assistance from the officers. It is one thing issuing an order to have so much rifle practice performed, and it is quite another to see that such practice is rightly and economically conducted. The army may rest assured that they will receive fair play, and win or lose on their merits at Creedmoor. If it be that they are able to defeat the civilian soldiers in this form of contest, let them show it; if not, let them shift about for a very good excuse. If they are not armed properly, let that fact be known and the error rectified. If it be that the fault lies in the conduct of army affairs, let that fact be shown, and the men who make of the army a company of helpless armed men be held to account. As it is now, until the army comes up to better form at Creedmoor, the public will be very apt to look with distrust on their pretensions to be considered as effective protectors of the Commonwealth. To show the advance made by the army since last year, the scores of the first contest a year ago are given:—

	200 *yds.*	500 *yds.*	600 *yds.*	*Total.*
State of New York	345	370	329	1,044
State of Connecticut	345	311	227	883
Military Division of the Atlantic	312	311	239	862
State of New Jersey	328	301	232	861
Military Division of the Missouri	303	276	224	803

The State match went again to New York, but by a very close margin indeed; and New Jersey may be congratulated on being shoulder to shoulder with the Empire State in rifle practice, and who so says that Brinton and Columbia and Stockton are not to be considered as effective establishments, fails to read the record alike; and Governor McClellan is to be congratulated on the position he has enabled the soldiers of his State to take in this trial.

Turning again to the record, the figures on this match stand for previous years:—

1875—	*N. Y.*	*Conn.*	*Cal.*	*N.J.*	*Mass.*	*R.I.*
200 yards	446	375	—	—	—	—
500 yards	418	308	—	—	—	—
Totals	864	683				
1876—200 yards	474	443	—	—	—	—
500 yards	382	386	—	—	—	—
Totals	856	829				
1877—200 yards	480	505	499	411	—	—
500 yards	487	446	496	333	—	—
Totals	967	951	995	744		
1878—200 yards	483	476	—	455	387	481
500 yards	491	440	—	439	335	392
Totals	974	916		894	722	853

The Military Championship for individual work again brought the out-of-town men to the front.

The 19th saw another twist with fickle Creedmoor wind, which came up the range from the butts in true 12 o'clock style; except when it became fish-tally and fanned one cheek and the other in irregular alternation. The long range men found hard work to keep on the target, and the "magpie" and "red-eye" came up far too often. There were five long range teams in the Inter-State match. For a time it was doubtful whether the old Amateurs would have a team or not. That such a question should have been started in this club, seems to show that something is wrong there. The Jersey men came in strong with a couple of old Amateur men. The Washington team had lost Partollo very unexpectedly, and the Creedmoor record stands robbed of some of those wonderful strings of bull's-eyes which everybody looked for and none saw, because two days before M. P. had taken occasion to vacate the ranch, leaving behind him much indignation and some damaging rumors. Yet the Washingtonians received the highest individual total of the day. The Massachusetts team simply and flatly went to pieces. Had any one asserted that such a thing was probable, he had been scoffed at for a fool; but with a miss at 800 yards the team went floundering about, and got a place somewhere down the list where the Walnut Hill men did not care. Enough for them to know that it was not first. The Champions' match was more in order; and when it went to Sumner nobody was surprised in the least. The Military Championship, second stage, was well contested; and, while excellent Borchard rifles were used, it remained with an army officer, Lieut. Geo. N. Whistler, of the Fifth Artillery, stationed at Atlanta, Georgia, to take the championship by an excellent record. He redeemed the team's defeats, and showed his fellow-officers and the men that the Springfield rifle is capable of the finest work.

The wind-up on Saturday last was with a single match—that for the Wimbledon Cup. The long-rangers' plague—a fish-tail headwind—was about again, and scores ran poor; for out of a possible 150 the cup went with 137 made by Laird of Washington, while next to him stood another Washington man, Dr. S. I. Scott, late of Baltimore. The New Yorkers went down, while the Bostonians were even further in the rear. If the Directors take the hint and make the Creedmoor Fall Meeting assume the character of a gathering of the champions of the whole country, the meetings will be affairs worthy of record. If this course be notfollowed, the Prize Meetings will fall to the working level of the ordinary monthly matches.

Saturday evening at the State Arsenal witnessed a general distribution of the prizes, with some speech-making not quite up to bull's-eye standard.

The following will be found the record of the meeting, each match given in its conditions, with the winning scores in detail:—

"DIRECTORS'" MATCH.—Two hundred yards; open only to Directors and Honorary Directors of the N.R.A.; rounds, five; position, standing; weapon, any rifle. Prize, the Directors' Championship Gold Badge, shot for annually, and held by the winner during the year:—

J. H. Cowperthwait	4 5 4 5—22	G. W. Wingate	4 3 3 4 4—17
E. H. Sanford	5 4 4 4—21	W. W. Judd	3 3 3 4 4—16
J. G. Story	3 4 5 5—21	G.S.Schermerhorn,jr.	3 2 4 3 4—16
Col. Litchfield	5 3 4 4—20	J. Holland	2 3 4 3 3—15
H. Fulton	5 3 4 4—20	M. Morris	4 3 2 3 3—15
D. D. Wylie	5 2 2 4—15	J. R. Jones	0 4 2 4 2—12
G. D. Scott	4 3 3 4 3—17		

"JUDD" MATCH.—Offered annually, under resolution of Board of Directors, to commemorate the services rendered by Hon. David W. Judd in securing the passage of the law by which the Association was enabled to secure its range. Open to all comers; weapon, any military rifle; distance, 200 yards; position, standing; rounds, seven; entrance fee, $1. First prize, a Ballard mid-range rifle, offered by Messrs. Schoverling, Daly & Gales, No. 84 Cnatham street, New York, value, $65; second prize, a life membership N. R. A. (transferable under the rules), value, $25, and cash, $15, total value, $40; third prize, a Sharps military rifle, model of 1878, offered by Sharp's Rifle Co., Bridgeport, Conn., value, $22.50; fourth prize, cash, $15; fifth prize, cash, $10; sixth, seventh, eighth and ninth prizes, each, cash, $5; tenth, eleventh, twelfth, thirteenth, fourteenth and fifteenth prizes, each, cash $3; sixteenth, seventeenth, eighteenth, nineteenth and twentieth prizes, each, cash, $2; twenty-first to thirtieth prizes, the return of entrance fee:—

Second Stage.—Open to the highest sixty in the first stage. The winner of the first prize in this stage is entitled to the "Championship of the United States of America" for one year. Distances, 800, 900 and 1,000 yards; rounds, seven at each distance; weapon, military rifles of any pattern that has been regularly adopted by any National or State government. Competitors may use their own rifles, or receive rifles suitable for the range in this stage from the superintendent of the range, who will take receipts for them, and to whom they must be returned immediately on conclusion of the match. Pool targets will be opened at 800 yards one half hour before the commencement of this stage; at 900 yards on conclusion of 800 yards range for half an hour, and at 1,000 yards on conclusion of 900 yards range for half an hour, the match shooting at each range to immediately follow the closing of the pool targets at such range. Position, any; entrance fee, $1. First prize, the United States Military Championship Gold Medal, value, $125; second prize, cash, $50; third prize, cash, $25:—

"International Military" Match.—Open to teams of twelve from the following :—

1. United States of America—A. The Army of the United States, one team from the troops stationed within each of the three military divisions—Atlantic, Pacific, and Missouri (three teams in all). B. The United States Navy (one team). C. The National Guard or uniformed militia of the several States and Territories, including the District of Columbia (one team from each State or Territory).

2. Other countries—England, Ireland, Scotland and each of the Provinces of Great Britain, each of the Provinces of Canada, and all other countries, one team each, from the following :—A. The Regular Army. B. The militia. C. The volunteers. D. The navy of any country. Separate teams to be sent only when the organizations are separate. The members of each team to be officers or enlisted men, and active members of the corps or organization which they represent, and to appear in the authorized uniform (full dress or fatigue) thereof. They shall be selected in such manner as shall be prescribed by the military authorities of the country or State they represent, and shall if required be certified to by them as being their authorized representatives. Distances, 200, 500 and 600 yards ; rounds, seven at each distance ; position, standing at 200 yards, any with head toward the target at 500 and 600 yards ; weapon, any military rifle which has been adopted as an official arm by any State or Government ; ammunition, any ; entrance fee, $1 each man. First prize, a trophy, presented by Hon. Henry Hilton, of New York, to be shot for annually at Creedmoor or such other range as the National Rifle Association of America shall select ; to be held during the year by the head of the corps or organization whose team may win it, and to be returned to the N. R. A. at the expiration thereof ; second prize, a Hotchkiss sporting rifle, offered by the Winchester Repeating Arms Company, New Haven, Conn.; to be awarded to that member of the United States Army making the highest aggregate score in this match, value, $35 :—

"Inter-state Military" Match.—Open to one team from each State and Territory in the United States, consisting of twelve members of the regularly organized and uniformed National Guard or Milita of such State or Territory, chosen in such manner as shall be prescribed by the military authorities thereof. Each team must be provided with a certificate from the Adjutant-General of the State it represents, certifying that each of their number is a regular member of their uniformed militia, in good standing, and was such on the first day of June, 1879. They shall appear in the uniform of their corps. Distance, 200 and 500 yards; position at 200 yards, standing; and at 500 yards, any, with head to the target. Weapon, any military rifle which has been adopted as an official arm by any State or Government. In cases where the State has adopted no particular model (which must be certified to by the Adjutant-General), the team will be allowed to use the rifle in use by the Regular Army of the United States, or by the uniformed militia of any other State. Rounds, ten at each distance; entrance fee, $2 each man. First prize, a large bronze "Soldier of Marathon," presented by the Commander-in-Chief, on behalf of the State of New York, to be shot for annually at Creedmoor, and to be held during the year by the Adjutant-General of the State whose team may win it, value, $350; second prize, a new regulation presentation sword, offered by Messrs. Baker & McKenney, No. 141 Grand street, New York : value, $30; third prize, an order offered by Mr. John Boylan, No. 135 Grand street, New York, for a complete uniform, appropriate to the winner's rank, value, —.

"Second Division National Guard" Match.—Open to teams of twelve from each regiment, battalion or separate company of infantry in the Second Divisioneof the National Guard S. N. Y. All competitors to appear in the uniform of their corps (full dress or fatigue), and to be certified by their regimental commander to be regularly enlisted members of the regiment, battalion or separate company they represent, and to have been such on June 1st, 1879. Weapon, Remington rifle, State model; distances, 200 and 500 yards; five shots at each distance; position, standing at 200, any, with head to the target, at 500 yards; entrance fee, $1 each man. First prize, the New York State Second Division Prize, value, $100; second prize, a bronze female figure, cost $80; third prize, a trophy of medieval arms, cost $45:—

CONLIN'S SHOOTING GALLERY.—*N. Y., Sept. 23d.*—The fourth of the series of ten weekly contests for marksmen's badges took place on last Monday evening, Sept. 22d, 1879. 800 yards target, reduced for the range; 7 shots; possible, 35. Mr. D. A. Davis proving the winner with a fine score of 32. Mr. A. J. Howlett, also made 32; but having won a marksmen's Badge, his score counts in for the champion's badge, which will be won by the highest aggregate score on ten targets, 70 shots. The following are ten of the leading scores;—

D. A. Davis	32	W. H. Cadwell	30
A. J. Howlett	32	Wm. F. Morgan	30
G. J. Seabury	31	F. O'Donnell	29
D. S. Banks	31	Wilson MacDonald	29
Fred Alder	30	Dr. M. M. Mattlay	28

The next competition will be held on Modday evening, Sept. 20th, Open to all comers.

NEW JERSEY STATE RIFLE ASSOCIATION.—The fall prize meeting of the New Jersey State Rifle Association will be held on Brinton Range, near Elizabeth, N. J., Tuesday, Sept. 30th, and the four following days. About $1,500 in cash and valuable trophies will be shot for at long and short range, and by regimental and company teams of the National Guard. Programmes of the meeting will be ready for distribution in a few days.
P. BONNETT, Sec., Elizabeth, N. J.

Oct 15—Scawanhaka Y C Ocean Match, Center Cup.

THE LEAVEN WORKING.—In several new publications of a more or less nautical nature, displaying more or less ability in their conduct, and pretending to keep a weather-eye upon yachts and yachting, a wonderful change has come over the spirit of their promoters. The once all-pervading adoration of beam and light draft seems gradually to be fading away. Popular sympathy is being guided from dangerous open boats and shingle-bottomed sloops to a style of ship more deserving of confidence and support. All these newly-fledged publications are based, for matter as well as for ideas, upon the columns of FOREST AND STREAM, and we suppose the flattering indorsement thereby given must be our consolation for the liberal manner in which the followers in our wake help themselves to our work without credit. But since they are sure to be on the right tack, by all means let the good leaven work, though it be at our cost.

STEAM CATAMARANS.—Hardly had our objections to steam catamarans been in type, when the news of the trial of the Poughkeepsie venture reached the city with exactly the results we had predicted. The trial of the new steamer took place September 17th in presence of a large crowd of sanguine spectators from that town. It is needless to add that the venture proved a total failure, even row-boats being able to outrun the new invention. As predicted in these columns, the feathering-wheels were found altogether impracticable, and though the wheels churned away at a rapid rate the boat hardly moved. So it was resolved to substitute fast buckets for the feathering-gear in the hope that eventually with the old-fashioned wheel the concern might redeem itself. In the language of the inventor: Our wheels are a failure, but we have the boat still. Unfortunately there is as little hope for the boat as there was for the wheels. The inventor is said to have sunk $10,000 in his attempt. This is to be regretted, and we are forced to conclude that he is the only person living who does not read FOREST AND STREAM, for it would have been a matter of satisfaction to our innate generosity to have saved that sum to the enterprising individuals engaged in revolutionizing nature, and all for the small sum of $4 a year or 10 cents per copy.

SEAWANHAKA YACHT CLUB.—A circular has been issued by the Secretary in reference to the ocean match for the "Centre Cup," value $500, which is to be sailed between the 15th and 20th of October. Entries close on the 12th prox., at the office of the Chairman of Regatta Committee. The match is open to sloops and cutters of the S. Y. C.; no time allowance; three to start, or no race; course, from Sandy Hook Lightship to and around Five Fathom Lightship off Cape May, and return to start. Paid hands and storm canvas allowed. It is to be regretted that the probabilties of a good entry for this event do not seem very flattering. We have but few large sloops, and it will hardly be maintained that our smaller ones are fit for open water work. Still, should the weather be mild, we hope the required three will put in an appearance, and trust to find the cutter element fully represented. A finer sight than a match of this kind between *Muriel* and *Volante* in such a sea as a northwester is likely to raise along a weather shore, need not to be wished for. The stretch is a long one for such little fellows, but for want of other material that can venture out, they would make the best racing pair we can muster for the purpose. Now, if we only had a class of crack forties, sixties, or hundred tonners, what a grand race might not be expected! The *Britannias*, *Nevas*, or *Formosas* would laugh at the play an autumn wind and smooth sea would afford them while in chase for so fine a trophy, but our *Visions* and *Gracies, et al*, will know better than poke their noses outside the Hook should times be a little nasty. So that the race may be a success, let us pray for a gentle zephyr instead.

PROVIDENCE YACHT CLUB.—The club regatta, sailed Thursday, Sept. 11th, was open to all cat-rigged boats in Narragansett Bay. There were ten entries, among which were some of the fastest boats in the bay. The day was not all that could be desired, as the wind was very light most of the time, though there was a good breeze from the S. E. when the race was started. The course was from a stake-boat anchored off Field's Point to and around the red buoy off Nayatt Point and return, a distance of 11 miles. The following is a list of the entries:

FIRST CLASS.

Name.	Port.	Length. Ft. In.	Actual Time. H. M. S.	Corrected Tim. H. M. Se
M. Delorcy	Providence	25 04	3 14 55	2 39 30
Helie	Newport	24 08	3 14 06	2 38 13
Lookout	Pawtucket	23 09	3 12 59	2 36 045
Lizzie Hull	Providence	23 06	distanced.	
Harnest	Pawtucket	22 09	3 38 19	2 50 02

The first prize, a silver water-pitcher, was taken by the *Lookout*; the second, a silver cup, by the *Hebe*.

SECOND CLASS.

Name.	Port	Length. Ft. In.	Actual Time. H. M. S.	Corrected Time H. M. S.
Rarus	Providence	18 8	3 38 53	2 54 20
Vision	Providence	16 08	3 39 46	2 55 05
Wilcox	Providence	17 07	3 24 03	2 38 11
Henry White		16 09	3 54 07	3 05 54
Della		16 05	distanced.	

The first prize, therefore, goes to the *Wilcox*, and, according to the figures, the second should be awarded to the *Rarus*; but a protest is still held in abeyance until the decision of the yachting editor of FOREST AND STREAM is rendered on the legality of sculling with the rudder—a means of propulsion resorted to by *Rarus* and *Vision*. The annual race for the E. J. Anderson Cup will be started Sept. 25th. E. T. DUSTIN, Sec. P. Y. C.

We have forwarded the decision asked for—the gist of which is that yachts can profit from sculling with the rudder, and a protest lodged by a competing yacht upon such grounds must be entertained, if insisted upon, in literal interpretation of the rule that "no other means than sails to propel the yachts are to be used." It is not required that a protest to be successful need show that actual advantage accrued to the protested yacht. A single infraction of rules is enough to debar from prizes if demanded by a protest made in proper form and in the way prescribed. This right is necessary to preserve a full observance of sailing rules.

THE BOSTON YACHT CLUB REGATTA.—The owner of *Fairy* writes us that his sloop started 29m. late, owing to a misunderstanding of signal, but reached the finish only 13m. astern of the leading yacht, therefore actually beating the best time around the course by 16m. actual time. In the Dorchester Yacht Club's champion regattas, *Fairy* won first and second races and took the champion prize in her class, a handsome brass cannon.

CANOE RACING.—Among the other races of the Fifteenth Annual Regatta of the Passaic Boat Club was one for paddling canoes, open to all comers. There were seven entries from the various canoe clubs. The *Qui Vive*, paddled by J. West, and winner of the Jersey City Canoe Club Regatta, went to the front at the start, and held it till the half-mile stake boat was turned, when the *Elise*, paddled by Fred Hussey, took the lead, which she gradually increased till the finish, winning by about six lengths in nine and a half minutes, the other boats coming in close together. The race was for the Championship of the Passaic River. The prize, a handsome silver vase in the shape of a canoe, to be held by the winner till the next regatta of the club.

Sea and River Fishing.

FISH IN SEASON IN OCTOBER.

FRESH WATER.

Bluefish. *Pomatomus saltatrix.*
Spanish Mackerel, *Cybium maculatum.*
Cero, *Cybium regale.*
Bonito, *Sarda pelamys.*
Kingfish, *Menticirrus nebulosus.*

"THE BEST HAUL EVER KNOWN."—Dr. Atwood Crosby, of Waterville, Me., sends us a clipping from the Bangor *Whig*, of September 9th, in which two men, D. D. Smith and H. Powers, are credited with having caught in six hours, at Greenwood's Pond, Katahdin Iron Works, eleven hundred and eleven trout, "the best haul of fish ever known here." Happy word, that, "haul;" it fits the case better perhaps than grab, scoop, swoop, plunder, or steal would do. "Haul" is suggestive. Beasts of prey pounce on their victims and haul them in. When a gambler relieves another man of his money he "makes a haul." The word is common in the riff-raff jargon of dead beats, men who live by their wits and nimble fingers. Possibly, however, the writer of the newspaper item did not use the word in an invidious sense. "Hauls" are, as a rule, discountenanced by respectable people; but there are of course persons who do approve of them. The human race has not yet arrived at that stage of moral development when all classes apprehend absolute right, and are governed by such apprehending. The standards of right and wrong, honor and dishonor, are sadly at variance. In this one particular phase of morals, *i. e.*, in regard to "hauls," thanks to the repeated and unwearying efforts of gentlemen sportsmen, the tone of the community at large is improving. The time will come, before many years have passed, when all, save professional fishermen, whose legimate business it is to draw the seine, will be ashamed to see themselves paraded in the papers as having made the biggest hauls ever known. When that day does come, a decent angler may have some chance to fill his creel. As matters are now at Greenwood's Pond, Me., we see no chance for any such decent angler to compete with the haulers. We should be pleased to learn how, in this instance, the trout were hauled in. Eleven hundred and eleven fish in six hours for two men, would average 1 13-22 fish per man per minute. Was it fly fishing?

STRIPED BASS—There is a fine run of one to four-pound striped bass now in the Shrewsbury River.

MAINE—*The Forks.*—The Forks of the Kennebec River is a fine fishing and hunting country. There are several fine trout brooks which run into the Kennebec and Dead Rivers, and six miles from this place is Moxey Pond, noted for its fine trout fishing. This pond is nine miles in length. They get trout which weigh three pounds, and a few that are even larger. One man went out from there about a week ago; he caught 200 pounds to salt for winter use. There is a man who lives at the head of the pond who has a good log-house and quite a farm cleared. Mr. Clark, the landlord of The Forks Hotel, is talking of fixing the road so they can go in with a horse and wagon. They go on horseback now. Partridge are very plenty this fall; they can be bought for ten cents apiece, and there is not a market for all they bring in. Trout, ten cents a pound, the insides taken out. E. M. G.

MOVEMENTS OF THE FISHING FLEET.—The Bay-men are coming home, and the mackerel fishery will soon be brought to a close. The large schools of mackerel lately reported in the bays and harbors of Maine fail to put in an appearance this way, and the prospect of winding up the season with a good catch of fat mackerel becomes well-nigh hopeless.

The Bank codfish fleet continue to arrive with good fares. The whole number of arrivals in this branch for the week, from long and short trips, has been 12, and the total receipts, 1,750,000 lbs. codfish and 8,000 lbs. halibut.

Bank halibut are in better supply, the number of arrivals since last report being 14, and the total receipts 427,000 lbs.

The Georges fleet are making long trips, being delayed in procuring bait, some of the late arrivals having been absent three weeks. The fares average well for the season, but there is no crowding of stock, and prices are firm. We notice 48 arrivals the past week, bringing 768,000 lbs. codfish and 24,000 halibut.

Whole number of arrivals for the week, 98. Aggregate receipts, 2,588,000 lbs. codfish, 459,000 fresh halibut, 280,000 lbs. fletched do., 2,782 bbls. mackerel.—*Cape Ann Advertiser, Sept. 19th*

NEW YORK—*Syracuse, Sept. 19th.*—Gover Alvord, who has returned to Syracuse from his summer St. Lawrence home, thus triumphantly sums up his season's catch of fish:—Black bass, 2,309; rock bass, 1,762; perch, 366; pickerel, 373; chub, 179; all other kinds, 35; total, 5,024; greatest day's fish, July 1st, (fly) 333.

—Last week Capt. James Millward and John B. Spafford, of New York, caught 152 pounds of pickerel, and a muscalonge weighing 47 pounds, the largest ever caught at Clayton, trolling on the St. Lawrence.

TENNESSEE—*Nashville, Sept. 16th.*—Col. Geo. F. Aken and General Jones returned from their grand fishing excursion to the northern lakes. The first grayling ever seen in Nashville was brought back by them, and have excited considerable interest among our amateur sportsmen. I saw the head of an enormous catfish on Saturday, that had been caught in the Cumberland. I wish it were in my power to describe graphically, the expression of countenance of the "darkey" who was the fortunate possessor of it, as he spoke of the "Courbonillon" he intended to have made of it for his Sunday breakfast. Edison's electric light is scarcely more bright than was his smile. J. D. H.

THE PARKER GUN.

PARKER BROS., Meriden, Conn. New York Show Rooms, 97 CHAMBERS ST.

The Parker Gun Again Victorious!

In the Tournament just closed at the St. Paul Driving Park, **30 prizes** in the regular shoots and the sweeps following them were won by sportsmen using the Parker Gun.

The Rochester (*N. Y.*) *Democrat and Chronicle*, of recent date, in referring to the remarkable execution of these guns at their tournament, in which the Parker Gun won the **Gold Medal for the Best Average**, says: "The Parker Gun is one of the finest ever admired by a true sportsman, and of late years it has been generally used where before nothing but those of European make would be thought of. This company has successfully succeeded in making their own steel barrels, which, together with other novel and important improvements, make their guns the finest yet introduced among lovers of field and forest sports. Dr. Carver, the celebrated American marksman, used this gun in his late exhibition before the Prince of Wales, and recommends it highly as a fowling piece, as do also Ira Paine and other noted shots.

Ask your gunmaker for the FEATHER FILLED AND TAKE NO OTHER. **SPECIAL NOTICE TO DEALERS.**—Owing to the great demand for the FEATHER FILLED BALL, we will from this date pay strict attention to our factory and the careful production of the ball only, and have appointed the well-known house of **HAGERTY BROS. & CO., 10 Platt Street, New York,** as our authorized agents, to whom all orders and communications may be addressed.

ALSO MANUFACTURERS OF THE BEST PLAIN BALL IN THE MARKET.

Attention, Sportsmen!
Kay's Improved and Perfected Ball for 1879.

[PATENTED OCTOBER 13, 1877.]

A SUBSTITUTE FOR GLASS.

HAVING succeeded in producing a Ball for professional and amateur use at the trap we offer the same with the following recommendations, viz: In breakage, the equal and superior to any glass; Uniformity, being of an exact uniform thickness of 1-20th of an inch, is superior to any blown material; Durability, is not affected by their solubility; Residuum, can be used anywhere, and on finest lawns, leaving neither injurious or unsightly refuse. Packed in barrels by a device peculiar to us, we guarantee against breakage in shipment. For particulars see circulars. Price, $2 per 100. All orders addressed to dealers, or **A. B. KAY & CO., Newark, N. J.,** Manufacturers of Buck and Heavy Drop Shot, Cartridges for Long-Range, viz.: Deer, Duck, and Geese. $2 50 per 100 also, the Chip or Expansive Concentrator, $1 25 per 100. A box of 50 sent on receipt of 75 cents by mail

VICTOR GLASS BALL TRAP.
STOCK & MORRIS PATENT.

This Trap is destined to revolutionize glass-ball shooting. It weighs but four pounds, and can be set up anywhere, without previous preparation, in two minutes. It is so simple that it can never get out of order. It throws balls without breaking, at any desired velocity, in any direction, faster than twenty guns can continue to shoot them. To become a good shot it is now unnecessary to go to club grounds for practice, as anyone can find a good place for shooting within a few rods of his dwelling, and have an hour's daily practice without the slightest trouble or inconvenience. The Trap has been entirely remodeled and greatly improved, both as regards efficacy and finish.

No. 1 (Plain), $4. No. 2 (Nickel-Plated), $5. Will close out the balance of Old Model Traps at $3.

CHAS. FOLSOM, Sole Agent,
For Sale by Dealers Everywhere. 53 Chambers street, New York.

PEORIA, *August 8th*, 1879.

Mr. Charles Folsom, Agent for the Stock & Morris Patent Glass Ball Trap, No. 53 Chambers street, N. Y.

SIR—You ask the opinion of the Peoria Shooting Club on the above trap, which is now used exclusively on our grounds. We give it decided preference over all. It delivers the balls with varying velocity, thus more closely imitating the natural flight of a bird, and in this point it has no competitor. We have yet to see its equal for any of the following qualities:—Simplicity of construction, rapidity and certainty of action, durability, lightness, and portability. It works perfectly and is so simple; it does not break down or get out of order at all. We recommend it in highest terms for the use of clubs, and also for amateurs for private practice. For those who would like frequent practice on their own premises, without the need of costly and tiresome preparation, it fully meets a long-felt want, as it weighs but four pounds, and can be set up ready for use anywhere in two minutes. It was to-day tested on our grounds for power and speed, when it threw fifty-nine (59) glass-balls an average distance of twenty-five yards from a single cup in sixty seconds, keeping two balls constantly in the air at the same time. The new model is a decided improvement upon the old. We wish you success in its introduction, and think its use will do quite as much to popularize glass ball shooting as anything that has yet been found. Yours, &c.,

THE CARVER TARGET BALL.
[CAVEAT FILED.]

GREENVILLE, PA., May 26, 1879.

DEAR SIR:—We take pleasure in notifying all admirers of Target and Ball Shooting that we have introduced a COMPOSITION TARGET BALL for Trap Shooting that is perfect in every particular. It has been thoroughly tested by many of the leading Sportsmen, and pronounced by all as the only perfect and unobjectionable Target Ball in existence. This Ball is very uniform in weight and standard size, and when broken leaves no *debris*, but will EVAPORATE in five days and acts as a FERTILIZER. They can be used on Lawns, Gardens, Fields or Parks, thereby doing away with the danger and annoyance consequent in using Glass Balls. We are now prepared to fill orders. Drafts or P. O. Order must accompany all orders. Organized clubs are invited to send for Sample Box, (25 balls) and Circular free.

J. H. WAUGH, *Inventor*

PRICE LIST—Per thousand, $12. No charge for packages. Address,

Maynard Creedmoor Rifle

THE MAYNARD AHEAD!

The following Targets were made by Prof. Chas. E. Dustin of Wheeling, West Va., at Bangor, August 12th and 13th, 1876, with a *Maynard Long Range Rifle*, and are the MARKERS ON RECORD. The grand total of 417 in a possible 450—50 shots at the last has never before been accomplished by any Rifleman, or Rifle, in the world.

☞ These scores were made in the competitive for position on the American team for 1876. Entire best citizens of the United States, and were shot under the rules of the N. R. A., Full re sighting sheets at either distance. These scores were all witnessed and sworn to by JAMES FOX, Secretary *Maynard Rifle Club*, Wheeling, West Va.

THE MAYNARD ARMS are the most perfect in workmanship as well as accuracy, of any SPORTING, PRACTICE OR MILITARY RIFLE in the World, and for whatever shooting or field use they are intended, they fill the requirements and prove the best.

Sportsmen's Routes.

"THE FISHING LINE."

TAKE THE

Grand Rapids & Indiana R.R.

Mackinaw, Grand Rapids and Cincinnati Short Line

FOR THE

Trout, Grayling, and Black Bass Fisheries,

AND THE

FAMOUR SUMMER RESORTS AND LAKES

OF

NORTHERN MICHIGAN.

The waters of the

Grand Traverse Region

and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING Season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.

The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthma Affections.

The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. B. LEET, Gen'l Pass, Agent, Grand Rapids, Mich.

Sportsmen's Routes.

GUNPOWDER.

DUPONT'S

RIFLE, SPORTING and BLASTING POWDER.

The Most Popular Powder in Use.

DUPONT'S GUNPOWDER MILLS, established in 1801, have maintained their great reputation for seventy-eight years. Manufacture the following celebrated brands of Powder:

DUPONT'S DIAMOND GRAIN,

Nos. 1 (coarse) to 4 (fine), unequaled in strength, quickness, and cleanliness; adapted for Glass Ball and Pigeon Shooting.

DUPONT'S EAGLE DUCKING,

Nos. 1 (coarse) to 3 (fine), burning slowly, strong, and clean; great penetration; adapted for Glass Ball, Pigeon, Duck, and other shooting.

DUPONT'S EAGLE RIFLE,

A quick, strong, and clean Powder, of very fine grain for pistol shooting.

DUPONT'S RIFLE, FG, "SEA SHOOTING,"

FFG and FFFG. The FG for long range rifle shooting, the FFG and FFFG for general use, burning strong and moist.

SPORTING, MINING, SHIPPING, and BLASTING POWDERS of all sizes and descriptions. Special grades for export. Cartridge, Musket, Cannon, Mortar, and Mammoth Powder, U. S. Government standard. Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 70 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. *only.*

Hazard's "American Sporting."

Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration.* For field, forest, or water shooting, it sinks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6¼ lbs. and cans of 5 lbs. FFFG is also packed in 1 and ¼ lb. canisters. Burns strong and *moist.* The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office,

88 WALL STREET, NEW YORK.

ENGLAND AND AMERICA.

COLT WEBLEY.

The two GIANTS in gun-making at the present time, are P. WEBLEY & SONS, Birmingham, England, and the COLT FIRE ARMS CO., Hartford, Conn. Both owe their marvelous success to the same two causes. First, that they learned just what constituted PERFECT GUNS. Second, that they applied labor-saving machinery to their production. The result is, THE BEST GUNS IN THE WORLD, AT VERY SMALL COST. You can now buy a COLT or a WEBLEY gun, which it is a pleasure to use, for no more than is commonly paid for guns bearing unknown or fictitious names.

OF WEBLEY'S GUNS we have the TREBLE WEDGE GUNS—every gun having beautiful Damascus or laminated steel Barrels, Rebounding Bar Locks, Pistol Grip, Lever Forepart, Double Bolt, and Extended Rib.

DOUBLE BOLT GUNS (Top and Side Lever). | **WEBLEY-LANG SELF-COCKERS.**
SINGLE BOLT GUNS (Top and Side Lever). | **EXPOSITION GUNS** (various styles).

The last four styles named above constitute a **JOB LOT**, which we are selling off at about half their real value. These guns are in NO WAY inferior to the Treble Wedge guns as regards quality of material or EXCELLENCE in shooting, and are the CHEAPEST lot of guns we have ever seen.

OF COLT GUNS, we have all the regular grades, and, in addition, THE CLUB GUN. This gun is made for US, with selected barrels and the very finest materials, and is designed especially for Glass Ball and Pigeon Trap Shooting. Gentlemen who indulge in these contests will be obliged to either shoot the COLT CLUB GUN, or lose the prizes.

Every one of these guns has an elegant heel plate, with the Rampant Colt in a circle, and the words "The Club Gun," beautifully embossed upon it. *Any* Colt gun not answering to the above description is *not* the Club Gun.

Besides the Webley and Colt DOUBLE guns, FOREHAND & WADSWORTH, of Worcester, Mass., make for us a SINGLE barrel breech-loader with Scott pattern Top Lever. These guns are very light and handy, and just the thing for BOYS or men who cannot afford to buy Double Guns. They cost but a mere trifle. We are happy to announce that we are the principal distributing agents at New York city for all three of the above-named manufacturers.

P. O. Box 4,309. **H. & D. FOLSOM, 30 Warren street, New York.**

PURE TIN-COATED AND BURNISHED

DROP AND BUCK SHOT.

American Standard--Eagle Brand.

CAPTAIN BOGARDUS ON TIN-COATED SHOT.

EDITOR FOREST AND STREAM:— NEW YORK, Jan. 13, 1879.

HAVING been asked by many of your readers as to the merits of TIN-COATED SOFT SHOT, I desire to say that I consider it the best shot I have ever used. I have given it a very severe test, having shot my 6,000 ball match Jan. 8 and 9 with it. In that match I used two sets of double barrels, one of 10 and the other 12-bore, and each single barrel was discharged 1,500 times without being once cleaned. The inner surface of the barrels is bright and free from scratches, although in shooting I used them until they became so hot that they would not bear handling. I cannot imagine any case of ordinary use which could so severely test the cleanliness and perfection of the tin-coating and its freedom from injury by any heat which could ever result from continuous discharges of the gun. A. H. BOGARDUS.

Old Judge Smoking Tobacco.

The Only Tobacco Ever Manufactured that does not Bite the Tongue.

"Old Judge" Cigarettes.

MANUFACTURED under Letters Patent granted Charles G. Emery, March 5, 1878, by which the rice paper used as wrappers is so prepared that the unpleasant odor and injurious effects of the OIL OF CREOSOTE thrown off when burning is completely neutralized or destroyed, and the paper made saliva proof to prevent its breaking or melting in the mouth. The great advantage and importance of this invention will at once be recognized by all smokers, and its truth demonstrated by the first "Old Judge" Cigarettes they smoke. Neither will they require a printed certificate from any eminent Professor of Chemistry to convince them they have heretofore, in smoking Cigarettes made of PURE RICE PAPER, been inhaling one of the deadliest poisons known.

FOR SALE BY ALL DEALERS.

STAINED GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or Elegantly Stained Window. It is easily applied to the glass in windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented,* and not a single agency has as yet been established.

ONE GOOD MAN in each State wanted, to whom exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of **$1.00.**

Agents Apply to **L. Lum Smith,** Patentee & M'f'r. 717 SANSOM ST., PHILADELPHIA, Pa. Sole Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald:*

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to even the most remote section of the country *free* of express or freight charges."

THE SING-AWAY BIRD.

O SAY, have you heard of the sing-away bird,
That sings where the Runaway River,
Runs down with its rills from the bald-headed hills
That stand in the sunshine and shiver?
"O sing! sing-away! sing-away!"
How the pines and the birches are stirred
By the trill of the sing-way bird!

And the bald-headed hills, with their rocks and their rills,
To the tune of his rapture are ringing,
And their faces grow young, all their gray mists among,
While the forests break forth into singing,
"O sing! sing-away! sing-away!"
And the river runs singing along;
And the flying winds catch up the song.

It was nothing but—hush! a wild white-throated thrush,
That emptied his musical qiver
With a charm and a spell over valley and dell
On the banks of the Runaway River.
"O sing! sing-away! sing-away!"
Yet the song of the wild singer had
The sound of a soul that is glad.

And, beneath the glad sun, may a glad-hearted one
Set the world to the tune of his gladness.
The rivers shall sing it, the breezes shall wing it,
Till life shall forget its long sadness.
"O sing! sing-away! sing-away!"
Sing, spirit, who knowest joy's Giver,—
Sing on, by time's Runaway River!

LUCY LARCOM, *in St. Nicholas.*

A Winter in East Florida.

(Second Paper.)

INDIAN RIVER, TITUSVILLE AND VICINITY.

TITUSVILLE, though a small village, is a place of considerable importance in East Florida, being the emporium for the entire country south for a distance of two hundred miles. Its former name was Sand Point, which it still called by the boatmen and lower country people. This, sandy point projecting into the river a quarter of a mile above gave it this name. It is now known as Titusville in honor of Col. H. T. Titus, one of its pioneer residents, and whose enterprise gave it its initiative impulse of activity and importance. It has now two hotels and a half-dozen stores, and is the distributing and shipping point for Southeast Florida. The products of the country, such as oranges, limes, pineapples, bananas, cane syrup, early vegetables, green turtle, oysters, venison skins, hides, etc., are shipped to Jacksonville *via* Indian Lake, while the return cargoes consist of groceries, provisions, clothing, household goods, etc. Its wooden railway will be extended to Lake Harney—some twenty miles—this season, which will add greater facilities for shipping and travel. Mr. S. J. Fox is the principal owner and manager of this road, and sportsmen and tourists will find him genial, jolly and fully alive to their interests.

The hotels are the "Titus Hotel" and the "Lund House," the former owned by Col. Titus and the latter by Capt. Lund, of the Jacksonville and Salt Lake line of steamers. Both are good houses. The "Titus" was kept open winter by Messrs. Bodine & McCarty, and the "Lund" by S. A. Merrill, Esq., of Lynn, Mass. Mr. Merrill expects to "run it" again next winter, and I can cheerfully recommend it to the notice of tourists. It is charmingly located near the river beach, and is a most comfortable hostelry. Mr. M. "knows how to keep a hotel," as he has had an experience of twelve years in conducting a summer house on the Massachusetts beach. He intends introducing a novel and desirable feature next winter—he will have several yachts, in charge of competent skippers, who will take parties of guests on camping and fishing excursions down the river, at no additional expense to the regular per diem rate of the hotel, which is $2 per day.

There are a number of places of interest in the immediate vicinity of the village. About a mile northwest of Titusville is quite a large and thrifty settlement, settled, I believe, Pfeistersville. The settlers are engaged in the culture of oranges and early vegetables. About six miles above, on the same side of the river, is the settlement called Aurantia. From Titusville to the head of Indian River is fourteen miles; to the Haulover Canal, connecting Indian River with Mosquito Lagoon, is ten miles, and the celebrated Dummit's orange grove is in that vicinity. Opposite Titusville is the head of Merrit's Island, which is a wedge-shaped island about thirty miles long, bounded on the north by Banana Creek, on the east by Banana River, and on the west by Indian River. It is ten miles wide on the northern end, and runs to a point at its southern extremity, opposite Eau Gallie. At the head of the island there are plenty of deer, and on Banana Creek, the mouth of which is five and a half miles east from Titusville, the gunner will find good wild fowl and snipe shooting. The fishing is all that can be desired, and the angler will need no guide to find the best places, for fish will be found wherever there is water. Quail are plentiful, and one can hear them cheerfully piping "bob-white" in the palmetto scrub among the pines, not two hundred yards from the hotel.

At the several stores everything in the way of "grub" can be obtained at reasonable rates. Self-raising flour, bacon, coffee, sugar, canned goods of every description, and the great Florida staple, hominy, or "grits," can be purchased at about Jacksonville prices; but the sportsman must take his ammunition and fishing tackle with him, or at least procure them in Jacksonville.

Indian River is an extensive but shallow sheet of water, 150 miles in length, and above the narrows varies from a mile to five miles in width. It is not a river, properly speaking, but a shallow salt water lagoon, or sound, with two inlets from the sea—one opposite Fort Capron and the other at its extreme southern end, at Jupiter River. From Jupiter Narrows to the head of the river there is no current, and the mean rise and fall of the tides is but three inches. From Jupiter inlet to the Narrows there is a strong derivative tide-wave of greater mean. The general course of the river is N. N. W. and S. S. E. The variation of the compass at Titusville is 2 deg. 54 sec. E. It is a magnificent body of water, separated from the Atlantic by a narrow strip of land, generally from a fourth to a half mile in width, though in places the intervening strip is not more than from seventy-five to two hundred yards wide.

Being so near the sea, there is a good sailing breeze almost every day, and with an easterly or westerly wind one can lay his course either up or down the river. While the breezes are almost always fresh, gales are very infrequent during the winter season. "Northers" are dreaded most, chiefly on account of their coolness, but a "sou-wester" is the most treacherous, baffling and squally wind that blows on Indian River.

The entire carrying or freighting business is done by small yachts and sailboats, consequently there are plenty of boats and experienced boatmen that can be chartered to convey parties or individuals to any portion of East Florida. These boatmen are, as a rule, intelligent and accommodating. An Indian River boatmen is *sui generis;* a peculiar and unique combination of sailor, fisherman, hunter, guide, cook, woodman, and philosopher; an animated Salmagundi, full of all kinds of expedients for all kinds of emergencies. The boats are necessarily light draught and centre-boarders. There are the "skimming-dish," the "pumpkin seed," and the "flat-iron" models, all half-round yacht-built boats, broad and beamy, cat-rigged or sloop-rigged; they all pound and spank in a sea-way, and are very wet. Then there is the "skip-jack," a much superior model for sailing;" will go to windward much better, but, as they are built very flat, with little or no sheer, and with chubby bows, they are also wet. There are a few ships' boats, picked up on the beach mostly, built over, and usually schooner-rigged; they do very well sailing free, but on the wind are logy. Last and best is the "batteau," of good length, little beam, and flat bottom, with "pirogue," or "periauger," rig—that is, two leg-o'-mutton sails like the "sharpie." I will say here, that if the "sharpie" is ever introduced in East Florida, it will rapidly take the place of all other boats, for it is undoubtedly *the* boat for Florida waters, being fast, safe, weatherly, easily handled, of extremely light draught, great carrying capacity, and cheap.

The day after we arrived in Titusville was Christmas day; but it was hard to realize it with the thermometer at 75 degrees, with the birds singing merrily, and flowers blooming in the open ground; while all around were trees and shrubs luxuriant in their green and graceful foliage. Feeling ten years younger, I hastened to the river in search of a suitable boat for our party; and, by a stroke of extreme good fortune, I hit upon a "skip-jack" yacht, cat-rigged, 19 feet long, 7 feet beam, drawing 15 inches when loaded; she was decked over forward and aft, with a very roomy cock-pit. I examined her thoroughly and found her tight, in good order, and sound condition. She was called *Blue Wing*, and proved to be one of the fastest and safest boats on the river. I purchased her for quite a moderate sum—about one-half her real worth. Of course, my purchase was soon "noised abroad" among the boatmen; and at night there were "all hands and the cook" mustered in the office of the hotel. With an eye to the main chance, many were quite anxious to go with me in the capacity of skipper and guide. They were quite solicitous in regard to our welfare; and I was entertained graphically with the difficulties of navigating Indian River with its intricate channels, rocky reefs, treacherous shoals, oyster bars, variable winds, and sudden squalls. I was regaled, mysteriously, with highly-colored descriptions of the best fishing grounds and hunting localities, known only to a "chosen few." But as I deemed my past experience in sailing—ten years of my youthful life in Chesapeake Bay, and later on Long Island Sound, and still later on Lake Michigan—sufficient for Indian River, I declined their kind offices with the best grace possible, and put a bold face on the matter as the following colloquy may witness. After I had been interviewed by a number, one who appeared to be a kind of "oracle" amongst them, approached me and cast off his "jaw-tackle" in this wise:—

Oracle (patronizingly)—"Doc., I'd like to sail the *Blue Wing* for you fellows, and learn you the ropes. How long will you be on the river?"

"About four months."

O. (surprised)—"Why, most parties only go down for two or three weeks; but I 'spose you'll run down to Jupiter and make long camps all the way down?"

"I shall stop but a day or two at Horse Creek and Elbow Creek; a few days on Banana River; then Crane Creek and Turkey Creek; a week on Sebastian Creek; through the narrows and Capron for another week; then St. Lucie River and through Jupiter Narrows, and Hobe Sound to Jupiter River. After a few days at Jupiter I will go to Lake Worth."

O. (emphatically)—"But you can't get the *Blue Wing* through the saw-grass to Lake Worth!"

"No; I shall go over Jupiter bar, and sail outside to Lake Worth Inlet."

O. (amazed)—"But she has never been outside; and, if you'll take my advice, you won't try it."

"And from Lake Worth I will sail to Biscayne Bay."

O. (astonished)—"Jerusalem! Why, that's 150 miles *outside* sailing!"

"No, only about seventy-five miles, with two good harbors between; New River and Hillsboro' River."

O. (vanquished)—"Well, Doc., you'll excuse *me*—I don't want any of that outside bizness in mine—not in an 18-foot boat, anyhow!"

"Then I may cruise along the Keys to Key West, and if the boys stand the racket pretty well I will sail up the west coast to Charlotte Harbor and Pease Creek, where I will sell the boat, hire an ox-cart and team, and go across the country to Lake Okechobee and come out at Fort Capron, where I will charter your boat to bring us up to Titusville, provided you are on hand."

O. (admiringly)—"Why, Doc, you must be a regular old salt!"

"Yes, I can discount Lot's wife for saltness; I am the saltiest of the salt—saltpetre and Epsom salts—a double dose."

O. (reflectively)—"Are the rest of your party good sailors?"

"I don't think either of them ever saw a sail-boat before they reached Jacksonville, and I am certain that none of them were ever in one."

O. (decidedly)—"Well, they'll have a rough time of it if they follow you."

"That's what I brought them here for, to *rough* it."

The oracle moved away and mingled with the crowd. Frank told me afterwards that he heard him tell the others that "that doctor from Kentucky had been to Indian River before, and knows the ropes like a book."

It being Christmas night, every one was now in a thoroughly good humor, and we were "swapping yarns" and retailing old jokes. Some one then suggested to Mr. Long, the shipping-clerk of the railroad, to get his violin. He readily complied, and after he and several boatmen had taken a turn at it, the "oracle" sidled up and requested me to "play a tune," observing that he knew from the "cut of my jib" that I could do so. Nothing loth, I scratched off "Devil's Dream," "Grey Eagle," "Arkansas Traveller" and other lively tunes, to the great admiration of the crowd, and especially of the "oracle" himself, whose delight seemed unbounded, and who seemed to take a patriarchal or proprietary interest in me, exclaiming:

"First you're a doctor, then you're a sailor, and now you're a fiddler!"

"Yes," said I, "I sometimes fiddle for my patients; it does them more good than medicine."

At Mr. Long's suggestion we then repaired to the parlor, when I surrendered the violin to him and accompanied him on the piano. It was not long until the "oracle" again approached me, confidentially, and asked me to "sing something," naming several of my favorite songs. I wondered a little at this, but when he called for "The Nine Little Pigs," then I knew that my party had been "giving me away." However, I accepted the situation, and with a few "forecastle songs" I sung myself right into the hearts of those rough but honest boatmen, and during my stay in Florida I had no better friends. They were always ready, and more than ready, to do me any favor in their power."

On the morning of Dec. 27th we doffed our "store clothes," packed them in our trunks, which were left at

the hotel until our return, and arrayed ourselves in flannel shirts, "old clo'" and brogans. The balance of our camping wardrobe was made into compact bundles, with rubber blankets strapped outside to protect them from the spray. The *Blue Wing* was already loaded with our supplies, which were covered with a large tarpaulin. The guns, ammunition, flour and sugar were snugly stored under the forward deck. Everything being trim and ship-shape, I sung out, "All aboard," made sail, hove anchor, and the *Blue Wing* was soon dancing merrily over the waves with a fair wind, and bound "down the river." It was a perfect day, the thermometer about 70 degrees, and the sun, shining brightly, kissed the glad waves as they reared aloft their foaming crests. We waved our hats to the boatmen on the pier, who wished us "good luck," and Titusville was soon left astern.

J. A. HENSHALL.

THE LAND OF THE MONTAUKS.

"There is no country like Montauks' rude isle,
Strange are its rolling hills, its valleys smile,
Its trees, lone dying in their ancient place,
As if in sorrow for a dying race.—
* * * * * * *
The golden eye whose sounding pinions wake
On either side the echoes of the lake;
The heavy brant and grey duck, modest drest;
The painted widgeon with the russet crest,
And teal, light springing through the tranquil air,
In the first-passing shades to the still lake repair.

J. A. AYRES—"Legends of Montauk."

Long Island, though scarcely 115 miles in its greatest extent, contains within its bounds many charming pieces of natural scenery.

It was my good fortune on a warm day in last August, to visit this *ultima thule*, Montauk, in company with a party, who had been sojourning at a pretty hamlet near Sag Harbor. A sail of five hours brought us to an inlet connecting Gardiner's Bay with one of the largest ponds on Long Island, namely, Great Pond. On emerging from the inlet into the broad expanse of the pond, one is at once impressed with the beautiful view, the shores being surrounded with rolling hillsides and dark verdant vales. Across the pond on the eastern shore, is the reservation or Indian Field, as it is called; while south, just peeping above the hills, was Third House, or Statton's. The three farm houses familiarly known as First, Second and Third House, which, three and-a-half miles distant from each other, and the lighthouse, constitute all thed wellings within a radius of sixteen miles. Here is a place within half a day's journey from New York, where "far from the maddening crowd's ignoble strife," one can behold a truly primitive spot. No hand has guided the plow through these lonely vales. The silence is only broken by the distant murmur of the surf, as it breaks heavily on the beach, or perhaps the lonely cry of the loon far out on the lake.

Montauk, of which the extreme end of the peninsula alone is recognized on charts by that name, commences at the ridge of hills at the east end of Neapeague Beach, known as Nommonack Hills, which extend to the hills of Montauk, and is, as its Indian term truly signifies, a hilly land. The two large ponds or lakes extending almost across the peninsula, are Great and Fort Ponds; there are also three smaller lakes lying east of Great Pond, known as Reed, Money and Oyster Ponds. Near Fort Pond (or Kongonack Lake, as it was anciently called), is the place where once stood the citadel of the sachem, or Wyandanch, or monarch of the Montaukett Indians, and was the scene of a mighty conflict between them and their allies, the Manhassetts, on the other. Here was once the home of a large tribe, to whom all others on Long Island paid tribute, now decreased so that they number only fourteen all told. Stephen Pharoah, their last king, died on the 30th of August. He reigned over two families, the Pharoahs and the Fowlers. He was a noted sportsman, being esteemed the best snipe hunter on the peninsula, nor was he a small pedestrian, for it is said that he walked from Great Pond to Brooklyn in one day, a distance of 110 miles. The light-house stands on Turtle Hill, or Wompônomon, as the Indians called it, and is 200 feet above the sea. The light is one of the most important on our coast. It was erected in 1795, at a cost of $22,300, and from its lofty elevation sends its friendly warning far out to sea.

But aside from its geographical and historical features, it is a great game resort. Quail and woodcock are very abundant. In season, wild fowl in great numbers resort here, from the stately Canada goose, to the ox-eye snipe. There are also some red foxes to be seen occasionally in the swamps. Fish are abundant in the large ponds, such as perch, flounders, eels, etc.; and in the ocean, blue fish and bass. The mode of fishing for these latter named fish, is to stand on the beach and throw a baited line 100 feet or more out into the surf; and during our stay a gentleman boarding at Statton's, had the exceeding good luck to land a sea bass weighing forty-nine pounds.

During June and July, but few birds are to be found in this vicinity; but towards the close of summer, the plover, tattlers, sandpipers, turnstones and curlews arrive, and shortly after their advent, the teal, followed by other early arriving ducks, come to swell the number. But it is not till October that the Canada goose and brant arrive to complete the list.

Observe what a writer in 1843 says in regard to Great Pond as a sportsman's paradise:—

"The chief place of resort for the wild geese is the Great Pond, which is very commonly known as Goose Pond, and a sportsman coming in sight of it for the first time, and seeing the geese covering acres of its surface, and listening to the uninterrupted music of their honking or the loud roar of their wings as the whole throng start to flight at once, is apt to think that they cannot all escape him. But when he has started at early dawn, and has lain shivering behind the stone wall (which by the way, is the original boundary of the Indians' property, and that which they sold to the whites) or on Reed Pond beach, and seen ten thousand geese pass into the pond, but not one within his reach, and then when at night he has seen them all pass out, going precisely where he did not expect them, and has wended his way back in the darkness, cold and hungry, and found that the remainder of the company had come in from their several stations with the same tale, he will begin to think that shooting a goose on Montauk, is not so easy as he first suppose. And the next day's experience will fully confirm him in the belief."

On the 22d of October, there will be sold at East Hampton, all the land, with the exception of Indian Field and the Government property, which will open up this section to cultivation, and perhaps settlement, so that if this latter calamity will happen, it will inevitably destroy this place as a famous game resort. HARRY HUNTER.

Natural History.

FLORIDA MOSQUITOES.—Our vivacious correspondent Al. I. Gator, sent us last month an account of the Florida mosquitoes which infest the western part of that State. The statements of the writer were large—or rather, the mosquitoes were large, very large. The account contained internal evidences of truthfulness. It was a plain unvarnished tale of what we saw no reason to doubt were facts.

The "FOREST AND STREAM'S Mosquito Story," as our friends have been pleased to term it, was immediately copied into the daily and weekly papers of the country, and some of the party organs at once, by connecting the mosquitoes figures with the last Presidential election returns from Florida, attempted to make political capital of it. The New York *Sun* especially, having always given much attention to Florida matters, has published the testimony of numerous correspondents as to the Florida mosquitoes, native corn juice, politicians, canals, and railroads. Disclaiming at this point, once and for all, any desire to foster the political bearing of this question, we now revert to the subject simply that as a fact (or myth) of natural history, the Florida mosquito may be set before our readers in his true person. It behooves all intending immigrants and visiting sportsmen to know fully what they will be obliged to encounter in this vampire or gnat, whichever it may be. We invite the truthful testimony of correspondents who have personally encountered the Florida mosquito in his native fastnesses. That we are not seeking to unduly magnify the importance of this matter, will be seen from the following letter:—

OFFICE OF THE COMMISSIONER, BUREAU OF IMMIGRATION, STATE OF FLORIDA—*Jacksonville, Sept. 8th.—Editor Forest and Stream*:—A correspondent in New York sends to this office a communication clipped from the FOREST AND STREAM, the communication dated from Titusville, Fla., Aug. 2. The writer of that article, whoever he may be, has either ignorantly or wilfully stated what is not true. I have written to Titusville to a friend to know who the "romancer" is, and, with your permission, will send you an article on the subject which will be reliable. Dr. Kenworthy (Al. Fresco), your correspondent, has just been into the office, and I gave him the article to read; he advised me to write you and say, that he, Dr. Kenworthy, had never lost an hour's sleep in Florida on account of mosquitoes, and had suffered more annoyance on the shores of Lake Superior from them than in Florida. Ordinarily I would not seek to answer such an evident "canard," but such an article is read and believed by intending immigrants who are deterred from coming here

SAM. FAIRBANK, Asst. Com., Bureau of Im., Fla.

THE FLORIDA GALLINULE IN CONNECTICUT.—While rail shooting on the meadows of the Housatonic River in Connecticut Sept. 20th, the Natural History editor took a specimen of the Florida gallinule (*Gallinula galeata*), or, as it is usually called in that State, the king rail. The bird was a young male, and was preserved.

This is a Southern species, which, on the seaboard, occurs only casually in New England, though inland it has been reported as far north as Canada West and Minnesota. We have previously taken one or two specimens in the locality from which this last came, and some facts, which have recently come to our knowledge, lead us to believe that the species is to be found regularly in small numbers in Connecticut in the fall. Whether it ever breeds, there is at present doubtful.

THE SECOND BROOD OF WOODCOCK.—A correspondent. J. W. S., who writes from Bridgeport, Conn., under date of Sept. 19th, says:—

While out with dog and gun this morning I moved a young woodcock just able to fly. I am sure, from experience, that woodcock breed twice, but this must have been a third brood, or a very late second.

We should be disposed to regard the bird as one of the second brood, unless we had more direct evidence on the point than our correspondent gives us. It will be remembered that last summer there was a great deal of rain, and some second brood nests unfavorably situated might well have been inundated and the eggs destroyed.

THE BLACK SKIMMER IN NEW JERSEY.—*Philadelphia Pa., Sept. 15th.*—While at Point Pleasant, N. J., this summer, Mr. Charles B. Davis, of Philadelphia, shot a sea bird which is pronounced a "black scissors bill." I not this a rare bird on our coast? C. E. P.

The black skimmer (*Rhynchops nigra*), for we presume, though our correspondent fails to give us any description of it, that this is the bird referred to, is not especially rare on the New Jersey coast, though this is somewhat north of its usual range. It strays even farther occasionally, and we have known of its being taken off New York, and Coues gives it as occurring casually in New England, From the coast of the Carolinas southward to Florida, however, is the true home of this bird, and it is here that they are extremely abundant. That their manner of life has not been more carefully studied, is partly due to the fact that they to a certain extent nocturnal in their habits, for they feed only by night.

Another correspondent, R. H., of Point Pleasant, has sent us an account of the capture. He says:—

Charles B. Davis, of Philadelphia, was fortunate enough while staying here a few days ago to shoot a rare bird, in this part of the country, at least—the black sea skimmer, from the West Indies. The body and wings of the bird are a jet black, the legs and bill, which is about an eighth of an inch broad and three inches long, the lower being an inch longer than the upper (and it is owing to this peculiar formation the bird gets its common name of scissor's bill) are a bright red. The bird has been mounted and can now, I believe, be seen at a store —— Third street, Philadelphia.

DRUMMING OF THE CANADA GROUSE.—*Bethel, Maine, Sept. 15th, 1879.*—I notice in your issue of September 11th reference made to the drumming of grouse, and especially the Canada grouse, or spruce partridge, and I am very glad of the chance to offer my mite to the Natural History department of your valuable paper. I take great pleasure in reading this department, and find many valuable zoological facts described by your many interesting correspondents.

I have followed the occupation of hunting for twenty-five years in the northern part of Maine, and am pretty familiar with the habits of birds and animals of these regions. The spruce partridge is quite plentiful in the swamps and low lands of these northern countries, and is a very pretty bird when in full plumage, especially in the months of March and April, when they can easily be approached, being very nearly as tame as our domestic fowl. They are easily captured by a slip-noose on the end of a long pole, which can be slipped over the head and quickly drawn up. I have made a business of capturing and keeping them alive through all seasons of the year, and have sold them in pairs to go to all parts of the country. The cock is very finely marked with black ground and pure white spots with red lines over the eyes. They are about half the size of the ruffed grouse. I have frequently seen them drum, if drumming it can be called. They fly up into a tree some ten or fifteen feet, and by beating their sides by short, quick, nervous action of the wing, in their ascent, produce a loud sound. They remain but a short time in the tree, when they almost noiselessly descend, and very soon repeat the same operation. This they often do when they have one or even two or three hens with them. They feed on the tender boughs of spruce and fir in winter, and in summer on berries and various herbage. I. G. R.

DESTRUCTION OF RUFFED GROUSE IN CONNECTICUT.—*Waterbury, Conn.*—You will be interested to know that our worst fears are confirmed, that the wood-ticks [*larvæ* of the partridge fly.—Ed.] are destroying the ruffed grouse in Connecticut. A young friend of mine was exercising his dog in August last, and flushed a brood of young chicks just able to fly. He caught one; and in examining the bird he found seven ticks on the little fellow's head; one swelled out with blood, to the size of a pea. The young man then hunted for the other birds, and found five more; and on all he found from two to seven ticks. Since that time he has several times looked the locality over to find the birds, but found none but the old bird. The destruction of this noble bird is a great misfortune to sportsmen. Connecticut has heretofore been famous for numbering its ruffed grouse. W.

THE CROW ARRAIGNED.—*Millersburgh, Dauphin Co., Pa.*—In FOREST AND STREAM of Sept. 11th your correspondent, W. B., asks the question, Are crows thieves or benefactors? W. B. seems to think, "as no doubt many others do," that, upon the whole, crows are benefactors. There is not the least doubt that they do gather in many bugs and worms; especially is this the case in early spring, when Mr. Crow is starved and hungry; it is then that he follows the plough and picks up the insects that might possibly prove a bane to the farmers' crops. This is one of the crow's virtues. He has still other virtues, one of which is that he does pick up the dead fish along our inland streams, which no doubt is a benefit to both crow and humanity. But his virtues amount to very little when compared with his faults. Crows will take all the eggs they can get; they rob the nests of our quail, ruffed grouse, wild turkey, wild pigeon, turtle dove, and the nests of small birds coming within their keen and extended vision. Not only do they take the eggs, but the young birds also. They will take a brood of young chickens one by one, and take the young robins out of their nests close to human habitation. If the young birds destroyed by a pair of crows while feeding their brood were allowed to live they would destroy more insects in a single day than a pair of crows will destroy in a whole year. Why is it the small bird harrasses the crow when he comes in sight? Simply because the small bird knows him to be a cruel enemy. As to the damage done by crows to the crops, it amounts to nothing. They are really not hard to frighten. A dead crow hung upon a pole in the corn-field will effectually cause his living relatives to give that field a wide berth. The common blackbird will pull up more corn than the crow, and no amount of effigies or dead relatives will keep him away. The above is based upon personal knowledge gained by observation, which has brought me to the conclusion to shoot or catch all the crows I can, and I would advise all lovers of game and birds to do likewise. CX.

HABITS OF THE BUTCHER BIRD.—We notice in the *Journal of Science* for August a brief, though interesting, article on this subject by Mr. D. M. Marshall. The writer gives some account of the nest and eggs of this species, and mentions that it breeds near Toledo, O. Some interesting facts with regard to the mode of impalement of its prey are furnished, and Mr. Marshall gives an account of the capture of a garter snake 12 inches in length by a shrike.

Fish Culture.

FISH HATCHING OPERATIONS IN CALIFORNIA.—*U. S. Fishery, Baird, Shasto, Co., Cal., Sept. 12th.*—The busy part of the season at the United States Salmon Fishery, on the McCloud River, California, has arrived. We have had our annual scare arising from the fear of a scarcity of spawning fish, but are gradually gaining confidence, as the number of spawners in the river increases. Our alarm this year was occasioned by the very diligent fishing of the cannery men, on the main Sacramento, be low us, who fished so assiduously with their impassible column of drift nets, that only an extremely small number of large salmon found their way to the McCloud River. The large salmon were so effectually stopped by the nets two hundred miles below us, that strange as it seems, we would frequently make a haul of 500 or 1,000 salmon and find only four or five large female fish in the lot, all the rest being small grilse, weighing from two to six pounds.

On the first of August, however, the law protecting salmon came into force, and ten days after, large salmon, including many spawners, began to be caught in our net, showing, by the way, how long the spawning salmon are in the Sacramento at this season; travelling a distance of 200 miles, their rate of speed being here seen to be twenty miles a day.

The spawning salmon have since increased in the river to such a degree that we cherish hopes of another prosperous season in taking salmon eggs. We have now in the hatching house four million eggs.

The most prominent feature of the work of the U. S. Fish Commission on the McCloud River this year, is the establishment of a station for taking and distributing eggs of the California trout (*Salmo iridea*). Prof. Baird gave me instructions last year to take the matter into consideration; and this year, on the 25th of July, I located the first U. S. Trout Ponds at the mouth of a creek emptying into the McCloud River, four miles above the salmon fishery, and called Geo. Crooks' Creek, after the name of a white settler who was murdered there by the Indians the second year that we came to the McCloud to take salmon eggs. The place settled is a peculiarly favorable one. A large stream of clear, cold water furnishes an unfailing water supply all the year round, and trout from two to six pounds weight are found in great abundance in the river. With these two essentials secured, there seems to be no reason why the new trout breeding station will not be able to give a good account of itself at no very distant day. We have had soldiers at the fishery this season, but not to protect us from the Indians, who are well disposed this year, so much as to maintain the authority and dignity of the United States at the reservation generally.

LIVINGSTON STONE.

FISH CULTURE IN MISSOURI.—Col. John Reid, one of the State Fish Commissioners, left this morning for Kansas City. Ex-Governor Woodson, of St. Joe, and Dr. Steadman, of St. Louis, the other members of the Commission will join him at that place. The Commission meets for the purpose of selecting a site for the fish hatchery as contemplated by the fish law of the State. We are glad to learn that several very desirable locations have been offered as a gift to the State. On Friday the Commission, will visit Saline County, on the Chicago & Alton Railway, and examine a very large spring, which is offered by a gentleman, together with five acres of land. Columbia, Boone County, will be the next point visited; then Forest Park, St. Louis, and probably the southeast part of the State. If the proper effort had been made, Lafayette County could have secured the hatchery, but those most interested neglected the opportunity.—*Lexington Register.*

TRANSPORTING EELS.—*Detroit, Sept. 20th.*—In reading the account of the transportation of fish across the continent, H. A. L. lays claim to having made a discovery in the way to transport eels. The Commisson of this State for the past three years have transported eels in mud and grass, with a handful of ice in each can, and have been very successful. We planted in the waters of this State, this spring, over 400,000 eels, that were from one inch up to six inches in length. The night of the 14th of June, the night H. A. L. speaks of as the night they met with their first trouble, we met with trouble on the same account, and lost a great many. But if the temperature is kept right there cannot be any trouble in transporting young eels to any distance, if packed in mud and grass.

A. J. KELLOGG,
Fish Commissioner, Mich.

—The *Myriophyllum* is recommended as a plant for aquaria and trout ponds. It is one of the most beautiful of aquatic plants, having a leaf something like a fern.

A CARD.—*U. S. Fishery, Baird, Shasta Co., Cal.—Editor Forest and Stream:*—Sometime last spring, you were kind enough to publish a request from me that some one interested would inform me when and where I had made the statement attributed to me, that "all the California salmon died after spawning."

As no one has given the desired information, I take it for granted that no one can; and that it is now admitted that I never made the statement. Under these circumstances, I must acknowledge my surpiso, that the writer of the Massachusetts Fish Commission Reports for 1877 and 1878, has not retracted the assertion contained in those reports, that this statement was made by me; and I must request him, as an act of simple justice, to rescue me from the imputation of giving utterance to such an utterly stupid and senseless speech.

LIVINGSTON STONE.

WHY SALMO QUINNAT DOES NOT TAKE THE FLY.—*Salmo quinnat* is the representative salmon of the Pacific coast. This is the species or variety so extensively canned for export, and whose ova are distributed throughout the States by fish propagators. Those of our readers who have been told that these fish never take the fly of the angler will be able to discover why by reading the very intelligent article of C. R. in our "Sea and River" department. The very sufficient reason he gives is that at the time when the salmon ascend the rivers the water is discolored by the annual rise, which is caused in great part by the melting snow on the mountains. There are fifteen other less known species of salmon on the Pacific, many of which do take the fly and afford abundant sport to the angler.

The Kennel.

INSTINCT AS ALLIED TO REASON IN DOGS.

I PROMISED you an article upon this subject, predicated for the most part upon my own experience and observation, and said that it would be chiefly anecdotal. I did not and do not contemplate, however, confining myself solely to the illustration of the theory held by myself and many other lovers and observers of man's most faithful friend. Far less do I propose to inflict upon the readers of FOREST AND STREAM any attempt at a philosophical disquisition, even were I fitted for it. What I will have to say will bear, it is true, more or less directly upon my subject; but some of it will go further, and relate to well authenticated facts of canine doings, which must be explained, if at all, by reason more profound than mine. Many, if not most of the distinctions attempted between instinct and reason, strike me as fanciful; nay, absolutely arbitrary. Nor have I in my reading seen anything which more clearly and satisfactorily sets forth this truth than the following:

"It has been usual to describe the actions of the lower animals as guided by principles different from what obtain in the human constitution. The power of self preservation is considered as reason in man, and as instinct in brutes, but this contrast does not contain a real opposition. The most important meaning connected with the term instinct, is what contrasts with experience, education, and acquired knowledge. *In point of fact both men and animals alike possess both instincts and acquisitions;* for although in man the preponderance is greatly in favor of the acquired; he, too, must start from something primordial, the basis of the other."

At ten years of age I had a long legged, rather oversized solid liver colored pointer, given me by a kind country neighbor, who, it is true, had almost forsaken the brush and stubble for the hunting field, but said he made over Don to me because he could not be kept away from our house. No doubt Don preferred my society to his master's, because I showed more appreciation of his enthusiastic eagerness for sport. Looking back at his performances through the light of subsequent experience, I cannot say the old fellow was well trained; but he always found many more birds in one day than I could shoot at, not to say kill. And couldn't he trot! Always galloped when hunting, but when night fall was approaching and Bertrand, Don and I found ourselves belated, perhaps ten miles from home, the old horse would gallantly respond to the demand upon him and lay himself out in a long swinging gallop; Don the while trotting right along side, and never breaking his gait unless in a spirit of boyish mischief I would press the horse to an unusual speed. This, Mr. Editor, was before I knew of stop watches and quarter seconds, but my belief, nevertheless, is, that Don could and did trot his mile in few if any seconds over four minutes. The intelligence and loving faithfulness of this dog impressed me. I learned by his methods to respect the pointer. Years and extended experience have all confirmed the impression that noble fellow made, and upon his death I determined whether I owned deer or fox hounds, terriers or beagles, that the pointer was my first love, and him I should breed carefully and test thoroughly his intelligence and capacity of culture, his docility, faithfulness, and courage, with those of any other dog you should start; be he spaniel, setter, or aught else you please.

So much for the direction of my tastes. Old Don, given me in his old age, died, so far as I know, without blue blood issue. Certainly I never owned one of his progeny thorough-bred. The next pointer was also given me—a short legged, close coupled white and liver bitch. I was quite a little shaver still, and knew nothing of breaking save a little smattering picked up from such books and papers as occasionally fell in my way. She was over cautious and consequently slow, but had a nose of the keenest; was staunch and untiring. Though, as is implied above, I hunted much on horseback, I never saw her flag at the end of a long day's shoot, far less break down, and have seen many more showy and stylish dogs accompanying companions, setters for the most part, utterly played out when she was comparatively fresh as a daisy. Well do I remember the chagrin of a cousin, somewhat older than myself, who came up to spend a week of his vacation at my father's plantation. He was gorgeously arrayed in sportsman's apparel, and brought with him a big red setter, who, he said, was to show me what a good dog was. "Why for heaven's sake, Will," said cousin Ed., "do you take the trouble to feed or care for such an undersized, bandy-legged brute as that?" I replied, "Ed., I shall never forget one day boasting in father's presence of my thorough mastery of a certain school subject, and the impossibility (arrogant little ass that I was) of stumping me on it. Pater familias quietly drew me out, probed me, and only said this: 'My son, my son, let not him that girdeth on his harness boast himself as he that putteth it off.' When we come home this evening abuse my dog if you will, but better postpone your strictures till then. Handsome is, you know, as handsome does." Well, we went. Birds were not scarce, but somehow the bandy-legged bitch made three points to his handsome gentleman's one, and at 3 o'clock was all alive and on her legs, while he, forsooth, walked slowly and sadly behind us, and would not, poor fellow—I believe could not—have scented a covey under his nose.

Have you ever, Mr. Editor, studied the *disposition* of dogs? Or have any of your worthy colleagues psychologically inclined and done so? Yes? Then you or they, or both can underwrite what I now say. They differ amongst themselves pretty much as men do. Are affectionate or crusty, forgiving or implacable, generous or selfish as we bipeds are, and all I show to be true in this regard bears upon my subject. Sappho, sr., was never bright, but ever tender, true and faithful, naturally cautious, and somewhat timid. She would have laid down her life for me, I verily believe. One day, I well remember. In hunting the home fields in winter, my custom was to rest on the banks of a creek making up into the place, if the tide admitted. I bared my feet, gathered the single oysters from the bed of the stream and roasting them on the adjacent bank, shared with old Sappho my primitive lunch. That over, I would recline upon the fragrant pine straw, listen to the musical sighing of the breeze through the tree tops, and drink in copious draughts of health inspiring oxygen. The balmy southwest, the kindliest wind that blows in our latitude, came free from the ocean, scarcely three miles away, undiluted by the smoke of factories or the suspicion even of intervening towns or villages. Every fibre responded to the gratification of simple, if sensuous enjoyment. I never slept, but rested merely ere I went upon the beat homeward. Sappho would always doze beside me. One day I suppose my thoughts had wandered far away, when my attention was aroused by the dog getting up, moving restlessly about, and whining. I guessed what was the matter, closed my eyes, and remained motionless, feigning helplessness. Her concern increased, till finally she came close alongside, whined more loudly, and gently pulled my coat to rouse me. I kept still and showed no consciousness till her distress became so great I could not tease her longer, and got up. Was her action predicated upon something primordial, or was it dictated by "experience, education, and acquired knowledge?" I think she remembered; compared one day's experience with another, and reasoned out her conclusion, which, though erroneous, nevertheless seemed warranted by her premises Per contra:

In my early youth I recall a dog owned by my grandfather who afforded an instance of a temper as resentful and implacable as that of the bitch just described, was gentle and forgiving. Marquis was half hound, half mastiff, as we believed, but we only knew his mother, and she was a fair type of the well-bred Southern hound. He grew larger, heavier and handsomer than the average hound is with us, and was so fierce that he had to be chained during the day. Once a cousin and I were amusing ourselves with our bows and arrows about the yard, both of us about six or seven years old. In fun I proposed to have a shot at Marquis, who was chained about twenty yards off. Cousin John was wiser than I, and would not shoot; but I let fly an arrow, which only grazed, and surely did not hurt him. He flew at me, and breaking loose, would doubtless have handled me roughly had I not darted up the piazza steps, and thus escaped his rage. Months elapsed ere I saw this dog again, and then it was at our summer house, a seaside village twenty miles away from where I had shot at him. I tried in vain to overcome his animosity to me by feeding him twice a day. It was agreed, in fact, that no one else should feed him while I remained. He would not attempt to molest me till he had done his breakfast or dinner, and then only the length of his chain limited his angry spring at me. He seemed to love and respect my grandfather, father, sister and cousin, and the butler and coachman; the other members of the household, white and black, he tolerated; but me he hated to the bitter end. Six years after my childish insult to him he would gladly have torn me to pieces, if opportunity had offered. When the tidings of Marquis' death were brought, believe me, I rejoiced that he had been gathered to his fathers.

Sappho, sr., lived to a good old age, faithful and indefatigable to the end, but never showy. The poor old lady's latter days were made heavier by deafness. Why is this malady so common amongst pointers and setters? I never maltreat my dogs, nor suffer children or anyone to do so, and yet have had several devoid of hearing in the decline of life.

Near me while I write lies a setter not over eight years old. If any dog's lines ever fell in pleasant places, his surely have. He is the pet of the household. I do not recollect ever having struck him, and the ladies and children are too fond of Rep to do so. Yet he is as deaf as a post, and would be of as much use in the field as—well, a very deaf dog. Dame Eleanor "Spearing's" trumpet, the virtues of which Hood so eloquently described, would be useless to him. Here appropriately may be told a true story of dog intelligence.

When I left home for college, Sappho, sr., was left to my mother's care, with the charge that she was to look after the comfort of my old companion and friend. This charge was never forgotten, though ere vacation time came the latter was gathered to her fathers. Upon my return home mother told me this, and her testimony was corroborated by that of other members of the family. After each meal (my practice was and is to feed my dogs always in part from the table), when their food was ready Sappho was served first. Tray, Blanche and Sweetheart looked on meanwhile. Sometimes the old dog was lying in her kennel, and could not hear the summons. Tray, Blanche and Sweetheart, knowing they would get naught till their superior dined, would run together to her house, and by some language, unrecognizable by human ears, call her out and announce, "Dinner is served, may it please your ladyship."

Now, this happened not once, or twice, or thrice only, but became almost a daily occurrence. Will FOREST AND STREAM kindly tell me whether the action of Tray, Blanche and Sweetheart was primordial, and, therefore, instinctive only, or the result of reason, based upon experience?

The next pointer I hunted, but did not own, was lent me on a long loan by a friend. He—not the friend, but the dog—was solid liver in color, of stalwart build, and weighed when in condition, seventy-five pounds. All of his accomplishments were natural, for "Brush's" early education had been much neglected. He was two years old, perhaps two-and-a-half, when I got him; had been taught nothing, and learned nothing afterward but from experience.

The first day I took him out he made me almost frantic; perhaps he had never been out with a mounted sportsman, but whether or no, the way he ran into, through and over coveys was calculated to make one tear one's hair. I was about to ship him back to town to his owner the night of the first day's trial, but forebore. The next day he improved somewhat, and at the end of a week was one of the most reliable dogs I ever saw. I do not remember his ever breaking down, though grossly fat when I commenced to hunt him, and notwithstanding the fact, too, that in four weeks he had little rest, except on Sundays. He would retrieve out of the water, but never on land, hunted with a high head, and was, in short, a good, but not first class dog.

A more jealous chap I never saw on either two or four legs, and I can tell a most amusing incident illustrative of the abnormal development of that passion in him.

Soon after I had possession of Brush a pointer puppy of three weeks old, out of one of the oldest and best known strains in the State, was given to me. My wife and I vied in friendly rivalry as to who should take the best care of her, and not a day passed that she did not receive a lesson in house-breaking, till there was scarcely a trick to be acquired or a faculty undeveloped.

In time she became a first class retriever, and the fastest swimmer I ever saw, be its coat long or short.

I was once shooting snipe on the banks of a creek, and having royal sport. Brush and Sappho, Jr., a puppy of eighteen months, hunting steadily on the rush-covered banks, and retrieving birds beautifully, so that I lost not one that was hit (and I missed but two), when two sprang closely together and flew to cross the creek. Ere they got half way one fell to each barrel, and both dogs plunged in to retrieve. Now, Sappho, Jr.'s power in the water was simply marvelous, and she swam five feet at least to Brush's two. Making for the nearest bird she came back, gave it to me, and leaping in again overtook the older dog, and ere he could gather the second bird snatched it from under his nose, and returned in triumph to me. If ever I saw sulky, mortified vanity, Brush showed it then, nor could I induce him to hunt another foot or retrieve another bird that day. He slunk at my feet with downcast head and drooping tail till we reached home.

Whether Philip of Macedon or his royal son was the greater man, is still a mooted point. But I have no such doubt as to the transcendant merit of Sappho the second, and to her, with your leave, Mr. Editor, I will devote another chapter. W. B. B.

THE DOG POUND CLOSED.—The New York City dog pound was closed last Friday, the last installment of doomed dogs, 200 in number, being drowned. The whole number killed during the season was 5,400. The contractor is said to have realized a fine profit on the dog skins which he sold to glove makers.

RICHMOND DOG SHOW.—A dog show will be held in Richmond, Va., in connection with the State Fair on the 28th inst. The prize list reaches us too late for this issue, but will be printed next week. The judges are J. S. Wise, Esq., Capt. J. W. Foster, and Judge Theo. Garnett.

LONDON (ONTARIO) DOG SHOW.—The proposed show at London, Ontario, will not be held. Coming so close to that of the St. Louis Kennel Club, the entries from the United States would have been very few, and altogether the committee did not feel warranted in going to the expense of erecting a building, and incurring the outlay necessary to make the affair a success. We hope our Canadian friends will try again at some more propitious season.

FIELD TRIALS.—*St. Louis, Sept. 26th.—Editor Forest and Stream:*—I am instructed by the Committee on Field Trial Rules of the National American Kennel Club, to inform you, for the benefit of your readers, that the scale of points has been changed as follows: Pointing, from thirty, changed to 35; Backing, from 10, changed to 8; Obedience and disposition, from 10, changed to 7; thus leaving the total the same.

Mr. E. C. Sterling, the President of the Club, is now in communication with sportsmen in different places in the State of Illinois, relative to a selection of suitable grounds for holding the Trials in November, and as soon as a decision is arrived at, you will be promptly informed. We already have positive promises of quite a number of entries, and there is every reason to hope that we shall have the most important Trials ever seen in this country. Two prominent gentlemen, one Eastern and one Western, have already consented to act as judges, and as soon as the third is selected you will be notified, and their names can be made public. We desire owners of dogs to communicate with Mr. Sterling, 701 Pine St., St. Louis, as to the probability of entering for the Trials. At this time it is impossible to get entries from all who expect to make them, but we desire to be able to form some idea of the number we shall have, and we will thank the gentlemen to let us hear from them. Dr. Samuel Choppin, of New Orleans, was in St. Louis yesterday on his way to Kentucky, from a month of sport in Minnesota. He joined the N. A. K. Club, and will visit the Trials in November. The Doctor is owner of some fine dogs, and is an ardent sportsman. The membership of the Club now numbers about one hundred. JOHN W. MUNSON, SEC.

COCKER SPANIELS—*Hamilton, Ont., Sept. 22d.—Editor Forest and Stream:*—According to my promise in a former letter, I herewith give my idea of a cocker-spaniel useful for sporting purposes, ignoring the fine silky pets only fit for ladies' lap dogs. The cocker spaniel able to stand a long day's work should not be less than twenty-four pounds weight, or more than thirty, remarkably strong built, full of courage and endurance; in fact a very compact, strong dog, not afraid of water though it may be near freezing point. They should be first-class retrievers from land or water. Cockers should not be mute; they ought to give tongue when on the scent of game. Color no object. I have seen good ones of all colors. I never saw a good dog a bad color. The coat may be wavy, but should not be curled nor have a decided tuft between the ears. They are more energetic then the Clumber, and a more useful general purpose dog. The Clumber-spaniels are useful dogs where game is abundant. Twenty-five years ago I saw a team of twelve of them shot over at Clumber park. They were not allowed to retrieve. The man working them kept a large black retriever to heel for that purpose. To sportsman whose time is limited and whose shooting is varied, and who can only afford to keep one dog, I would advise such to get a cocker-spaniel as I have described, a dog that will do his work effectively whether he be hunting woodcock, snipe, quail, ruffed grouse or retrieving ducks. I admit it is a fine sight to see a brace of well broken pointers or setters with heads well up ranging and quartering to perfection, standing and backing in a way that only sportsmen can appreciate. But, what I affirm is, that the beauty and usefulness of pointers and setters should not be impaired by using them in cover where their fine qualities cannot possibly be brought out and seen to their fullest extent.

In company with a friend shooting woodcock over a brace of Irish setters in a piece of low ground where the nettles were of immense growth, some twenty or thirty minutes elapsed without our seeing one of the setters, a bitch eight months old. After calling her for some time she came out of the nettles with a fullgrown woodcock in her mouth. The bird was alive and uninjured. The inference is, that she was setting the bird a few feet from her nose, and in response to our repeated calls, had sprung on the bird, a lesson not desirable for pointers or setters to learn. RANGER.

HOW TO MARK A DOG.—*Editor Forest and Stream:*—Some years ago a farmer in Washington recognized a fine setter that had been given to him when a pup, in the street. He seized his lost dog and was assailed by the person who had got possession of him.

"This is my dog gentlemen, and you don't take him from me unless you take my life at the same time."

Finally the parties were taken before a magistrate.

"Judge, this is my dog, and I can prove it to you." So he stooped, pinched up the skin of the chest below the fore leg, made a straight incision with a knife, and took out a bird shot which he showed to the judge and which had certain knife marks or crosses on it.

"Judge, this pup was given to me three years ago, by Gus. T——, and Mr. I——; the grocer on L street at the corner; can tell you that as soon as I got the dog I took him to his store, marked a shot, and put it under his skin, first making these crosses with my knife on the lead."

After this, the oaths of the other party that he had raised the dog from a pup were of no avail. The farmer took his dog. This will suggest to the reader a safe method of marking their valuable dogs.

DIED.—In Cazenovia, N. Y., on the morning of September 8th, 1879, Old Jack; age unknown. He came among us in 1868 or '69, and even then looked anything but young. Was owned by two or three people here; but finally fell into the hands of W. D. Smith, a sportsman of no mean ability, whose *forte* is better in killing grouse and woodcock than in breaking glass balls. With the exception of Mr. Smith, the writer has killed more birds over him than any one else. Old Jack was not what we would call a handsome dog, and would make but a poor appearance in a Bench Show, for it would be hard to tell whether he was a setter or a spaniel. But he stood most of his birds; and while he lacked the graceful lines of a setter when on a point, there was a rigid firmness in his attitude that told to a certainty that game was there. He was what some would call a "kicker," for, if he had hunted a bush and flushed a bird which flew away without being shot, and was afterward driven back into the same bush, no amount of coaxing or driving could induce him to enter it again; and, if too much force was used, he would run home. While he had (like all of us) some faults, he had a good many virtues. On the morning of his death he appeared as well as usual, and was on his way to the hunting grounds—dying in the harness, all ready for the fight. He had a way of rolling on the ground and growling; and, while doing this, something different in his manner attracted attention; but before any one could get to him he was dead; dying as I trust "Jersey" may when his time comes. And if there is a Heaven where good dogs go, I sincerely hope that Old Jack has found it. We buried him at Frogmoor, the shooting club's ground, where he has often been. The funeral was attended by most of the sportsmen for whom he had hunted, and by the dogs who had been with him in field and flood.

HAMMERLESS.

AN AMERICAN DOG IN AFRICA.—The true liver-pointer Sky, formerly owned by J. Hopkins Smith, which was purchased last summer from its then owner by W. E. Bevan, of Malaga, Spain, arrived safely at its destination on the other side of the Atlantic about September 1st. Mr. Bevan writes that he intends to take the dog over into Morocco, and try him on the birds there. We hope to hear of his performances in African fields.

HARD LUCK.—Only last week we noted the whelping of a litter of puppies by Snapshot, out of Mr. J. W. Coffin's Venus. Mr. Coffin writes us that all of the litter are dead except two, and he has small hopes of saving these. But as misfortunes never come singly, the same gentleman has also lost his pointer bitch, Lola, by Sensation, out of Mr. Chas. Schreiffin's Juno. Lola was winner of first prize in the puppy class both at New York and Boston, and having been broken, had turned out a most excellent field dog.

—The pointer bitch, Venus, by Rake II, out of Hadley's Buff, owned by Mr. J. W. Coffin, of Providence, R. I., whelped on the 28d inst., nine puppies, five dogs, and four bitches, all white and lemon, sired by Snapshot. The bitches will be destroyed.

—The setter bitch, Mattie Boyle, belonging to P. Mealy, of Gloucester City, N. J., whelped on the 20th inst., 13 puppies, 9 of them dogs.

—Mr. L. F. Mercilliot has purchased from Mr. John H. Meyer the prize pointer dog Sport; and the same gentleman's English setter bitch Pet has been bred to Mr. H. P. Morris' champion Lark.

—The Clumber spaniels, Trimbush and Fairy, are offered for sale. Trimbush was imported direct from the Duke of Newcastle's kennels, at Clumber. For price and particulars apply to Kennel Editor of this paper.

—In another column will be found an advertisement of a Colorado ranch, stocked with cattle and ready for occupancy, for sale. Such an opportunity rarely occurs to purchase on easy terms a valuable and productive property in such excellent condition.

Game Bag and Gun.

GAME IN SEASON FOR OCTOBER.

Moose, *Alce Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorus.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*

☞ This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

CAPTAIN BOGARDUS.—Captain Bogardus has been shooting at Pittsburgh, where he and Eugene have succeeded in performing some unusual feats with the shot-gun and rifle. The Captain is now out with a new challenge, which reads as follows:—

PITTSBURGH, *Sept. 27th.*

Editor Forest and Stream:—

As there are a great many good glass ball shots in the country, I will make the following challenge:—I will shoot against any six men in the world for from $100 to $500 aside each man; and for from $500 up to $2,500 that I make a better score than all the six. I will give each man 200 broken balls in 1,000, each of them to shoot at 800 apiece, and I to shoot at 6,000—1,000 each day for six days. The match to be shot in Boston, New York or Philadelphia between the 15th day of December and the 1st day of January. Cartridges to be loaded and brought on to the ground, and each man to shoot from the same rifle, and each man to stand his share of expenses and take his share of the gate money. The match to be shot from three of my traps and according to my rules, with this exception—the rise to be fifteen yards, and if shot indoors the distance between the traps to suit the place of shooting. Each man who accepts this must send $100 to the *Clipper* office, New York, between now and the first day of December. I have sent $1,100 to the *Clipper* office to-day, which is the whole amount of stakes, unless the parties that accept wish to shoot for more money.

A. H. BOGARDUS,
Champion Wing Shot of the World.

THE PLEASURES OF GUNNING.—*Cohoes, Sept. 22d:*—*Editor Forest and Stream*:—Your correspondent, "R. W. H.," inquires why some people despise hunting. I do not see how they do it, but they do. There is no better way to study nature than to take gun and dog and start for the woods. When I go gunning I do not go on a murdering expedition. I always make it a rule never to kill more than three or four birds; do not care if I come home with empty bag. The beauties in nature are always something to occupy one's attention. You can find specimens that have escaped your eye should you visit the woods every day for a lifetime.

If some of those old, dried-up fossils would get a gun and dog, and hunt a little, perhaps it would thaw out the milk of human kindness which has been congealed in their hearts so long. For my part, I was well pleased with "R. W. H.'s" article; it is right to the point. Hunting and fishing are among the greatest blessings that God has given us. We can for a time lay aside all bustle and wear and tear of life in the deepest solitude of the woods, and when we emerge again it seems as though we were men ready to buckle on the armor, and begin anew the battle of life, and look back on our hunting and fishing exploits as the happiest periods of our existence.

H. MILLS.

AMERICAN VS. ENGLISH GUNS.—*Editor Forest and Stream:*—When I hear a man nowadays talking about buying a foreign gun, and no other, I put it down as pure ignorance or affectation. The American gunmakers make as good a gun as the best shot in the country could possibly desire. In fact, since muzzle-loaders went out of fashion, pretty much everything is made in this country superior to anything in Europe.

I brought down a wild pigeon the other day flying directly from me at sixteen rods with No. 6 shot. This shows how close and strong American guns shoot, and mine is only a $55 gun. It was not a chance shot either. In my statement as to loading in a late number, I should say that the manner of loading there given is for tolerably course powder, but for those who can buy only fine rifle powder the results are the same, if, as should be, 4¼ drs. of powder are used, instead of 5 drs.

VERITAS.

TENDING VENT.—*Editor Forest and Stream:*—After some careful inquiries of my unfortunate neighbor, I am satisfied that the accident described in my recent article, "Last Day on the Delaware," was not attributable to the cause assigned, and therefore the man who was serving vent cannot be held responsible for the premature discharge of the gun. It was so reported at the time, and this explanation seemed sufficiently authentic to satisfy the local reporters; but it turns out that, although no thumbstall was employed, a new buckskin glove supplied the vent, and enabled the wearer to keep his thumb over the vent until after the explosion of the charge had taken place. His thumb was not injured, Brevet Brigadier-General Hagner to the contrary, notwithstanding. The explanation of the cause is that the cartridge was not properly made, and that it broke before reaching the bottom of the bore, when some loose fire ignited the scattered powder, and sent the rammer in slivers across the square. The loader felt the cartridge break, and leaped aside instantly. Had he not done so the charge would have blown him to pieces.

If I remember rightly, the gun was not sponged at all. I have no doubt that the Colonel of ordnance, whose opinion you reprinted on the 18th inst., is good authority, but he is certainly mistaken about the liability of the vent-server losing his thumb. Nevertheless, from my own observation and the experience which all boys gain with small cannon, I am satisfied that his exception is well taken, and that the old-fashioned method of tending vent (not "serving vent," which is pricking the cartridge), is wholly useless and unavailable, so far as preventing accidents is concerned. The only way to prevent a premature discharge is to carefully sponge, and repeat if traces of fire in the bore are encountered. EGO.

Home, Sept. 30th.

TIN-COATED SHOT.—*Bridgeport, Sept. 24th.*—I have of late been using tin-coated shot, but I found that my gun did not seem to kill as much game at eight rods as when I used the common shot. I have been trying both kinds at a target at forty yards, and find that the common shot made a target twenty-five per cent. better at forty yards than the tin-coated. A number of my fellow-sportsmen have been trying targets with the two kinds of shot, with the same result. I find by taking two of tin-coated shot and chafing them together, that they seem to rough up and slip by hard; but it is not so with the common shot, for you may rub them together as much as you like, and they slip by easy.

Now, I am in favor of the tin-coated shot as far as keeping a gun clean is concerned; but I should like to see my brother sportsmen try the same shot, and see if it is my fault or that of the shot. I have used two guns, and they both throw the shot about the same. C. M. A.

CANADA—*Sherbrooke, Sept. 22d.*—I have just returned from Lake Megantic, having this time extended my trip to Arnold Park and the north part of Maine. Our guide shot three moose (cow and two calves); but on account of the number of amateur sportsmen attracted by the facilities for reaching Spider and Megantic Lakes afforded by our new railway, the sport in that immediate vicinity is falling off. D. T.

MASSACHUSETTS—*Boston, Sept, 25th.*—I have been away two weeks shooting on the coast of Maine, and on counting the game find the following scores for three guns: 240 coots, 28 boons, 13 gray squirrels, 46 partridges, 15 black ducks, 28 blue winged teal (killed in four shots, only saw one flock, in which were between forty and fifty), 4 peach crates of sand birds, and 109 yellow legs and black-breasted plovers. These were shot within twelve miles of Portsmouth, N. H., a place I discovered about eight years ago. Our house faces two large ponds and a marsh. One hundred yards from the marsh is a beach, and three hundred yards back of the house is the best partridge ground in Maine. I tried my new Gordon dog, Shot (begotten of Van Velzer's Don), and he did beautifully for a pup, standing as staunch as an old dog. His nose is wonderful. I took my "Gazetteer" with me on my trip, and got "piles" of information out of it. It is as good as having an old gunner by your side all the time. I own twenty-seven other sporting works, and your "Gazetteer" contains more than all the rest in one book. Of course, Frank Forester is far behind the times now in some things. J. B.

CONNECTICUT LAKES.—*Applebackville, Pa., Sept. 21st.*—I returned home Sunday from the Connecticut lakes regions. We had a fine time fishing and hunting; shot two deer, three wild cats and plenty of ducks. Fishing is splendid in the lakes and rivers there. Plenty of lake trout in the First and Second Lakes. Caught plenty of mountain and brook trout in August, but were not allowed to catch them this month. It is a splendid country for game and fish. Would you be so kind as to let me know where I could get in with a market hunter I would like to get in with one down in Maryland, Delaware or Virginia. SAMUEL T. LAUBENSTEIN.

BLUE WING TEAL ON THE DELAWARE.—This duck has made its appearance in the Delaware River. It is the earliest comer to our waters, arriving here in September and remaining with us until the frosts of early winter drive them southward, where they become very fat, and are shot as well as trapped in large quantities on the rice fields. The blue wing teal is less cunning than most of the other varieties of wild fowl, as they are not very difficult to approach, and stool readily. It is said that if the decoys are set in the mud they will stool better to them than if set in the water; and in this respect they differ from every other duck. They drop down among the stool ducks almost as suddenly as a woodcock in a tussock, and go to eating as if they were surrounded by busy companions like themselves.—*Easton (Pa.) Free Press.*

ILLINOIS—*Warsaw, Sept. 18th.*—But a few years ago the great range of overflowed lands impinging on the south suburbs of this city was a vast hunters' resort, but by a recent act of the Illinois State Legislature a drainage law was passed, and a levee is now being built debarring the submerging of tens of thousands of acres of superior land, extending from here to Quincy, Ill., on the east bank of the Mississippi. Agriculture strides to the front. Where I, with a few comrades, rowed about over a vast lake miles in extent, among willows and trees, a few years ago, shooting ducks, a bountous harvest has just been gathered of corn and wheat. Thus the old haunts pass away one by one, and the region is metamorphosed into greater usefulness.

Out of a spirit of reverence for the "dearly departed," a club of old school sportsmen congregate at uncultivated portions of the said area every week or so, and hold a carnival over baked salmon, croppie, pike, catfish or bass, and now and then have a general assembling of the hosts, and a chowder is served.

The strong currents that prevailed during the semi-annual overflows washed out long, deep channels, which remain now as sloughs, abounding in fish. During high water in the river the water backs up considerably from Lima Lake, a famous duck region, ten miles south of here, and at proper seasons many ducks are bagged therein. The best fishing now is in a few of these large sloughs, although many are caught with trout lines thrown across the channel of the river. The channel catfish is a great favorite, but give me a salmon in preference to all other fish in these waters for flavor, absence of small bones and delicacy.

A party of hunters at Lima Lake recently got quite a respectable bag of teal ducks, and another party got some twenty plover of different varieties, a few snipe and woodcock. The season has been so dry that game has not made its appearance in any quantity as yet.

We do not have any grouse hunting of value in this immediate vicinity. The best prairie chicken region known to sportsmen here is believed to be up in northern central Iowa. Some of our neighbors at Keokuk, Iowa, have visited that section of the State since the open season commenced, and are enthusiastic over the abundance of those birds to be found there.

Quail are plenty in many localities near here, and we anticipate a good time among them when the law allows. There are here, as elsewhere, many pot-hunters to contend against, and our Sportsmen's Club has exercised a good deal of vigilance to compel a respect for the game laws of the State. One transgressor, on a visit here from St. Louis, began depredations among our quail, and was notified to desist by our club, or they would prosecute. Nothing like a little nerve in such matters.

AARON AROUND.

WISCONSIN—*Fond du Lac, Sept. 24th.*—Shooting thus far quite unsatisfactory; few pinnated grouse and woodcock, and small scores reported in duck shooting. The deer hunters are getting in motion for the fall campaign. Messrs. S. B. and John Amory, accompanied by Charles Boardman, expect to get away early in October. Mr. L. M. Wyatt, accompanied by his wife and his old companion, Mr. H. J. Briggs, has already taken his departure. Mrs. Wyatt goes out for a third season, having a great partiality for the pleasures of camp life among the pines.

TRIANGLE.

OREGON—*Portland, Sept. 11th.*—Our fall shooting has fairly commenced. Some good bags were made Saturday last. Bob B. brought home seventeen wood ducks and mallard, and Judge W. is credited with twenty snipe. A number of others killed from five to ten ducks each. A party of four (writer included) sally forth tomorrow to wage war on the festive snipe.

MULTNOMAH.

WASHINGTON TERRITORY—*Portland, Oregon, Sept. 20th.*—I leave Portland next Monday for the "great Spokane country," where the shooting and fishing (especially the latter) are unexcelled. In Lake Cœur d'Alene, Idaho Territory, one may take trout ranging in weight from five to twenty pounds. The different streams teem with beautiful brook trout. Prairie chickens and grouse are abundant, and the more adventurous sportsman may find in the foot-hills and mountains deer and bear in plenty, together with an occasional cougar.

Deep Lake, located about thirty-six miles west of "Cœur d'Alene," is about three miles in length and one in width. In the centre soundings have been made to the depth of three hundred feet and no bottom found. The Indians inhabiting this part of the Territory regard this lake with a superstitious dread, and you cannot induce one of them to go anywhere near it. They call it "Bad Medicine," and think it is the dwelling place of some horrible monster, who makes a business of catching and devouring all Indians who come near his abode. Another leading feature of this sheet of water is the fish. They are described as being of great size, and closely resembling the family of *Esocidæ*. They are taken with hooks baited with meat or worms, and are very game. A gentleman direct from Iowa informs me that they were the perfect image of the *Esox lucius*, or pike, except in size, being much larger, some of the largest that have been taken weighing as high as sixty-five pounds. During my sojourn in that section I propose to fully investigate these reports, and if they are true there will be no end to the fun, as they bite ravenuously and die hard. There is also in the vicinity of Four Lakes a mineral lake which is remarkable for its virtues. It is used by the sheep-herders in the neighborhood as a remedy for the "scab," and is unfailing as such. It is also a great specific for rheumatism, and parties suffering from that painful disease experience much relief from bathing in it. A person could write pages about the beauties and wonders of this comparatively unknown region.

MULTNOMAH.

—The article in the October *Scribner's* on "Field Sports in Minnesota," written by Mr. Charles A. Zimmerman, the photographer, of St. Paul, Minn., is one of the few magazine contributions on sporting subjects which are written by competent persons. The paper is a most excellent description of the sport it treats of, and the illustrations being his own, are of course correct and suggestive. We commend the October number to our readers' attention.

HINTS FOR LOADING.

FORT JOHNSON, N. C., *Sept. 15th.*

Editor Forest and Stream:—

I have just read the communication of your correspondent, "Bexar," and would suggest that his list of "all the extras" omits two of the most important required to properly re-load shells for a rifle, viz., a resizing die and punch for driving out resized shells, and swedge. The names of these implements probably sufficiently indicate their uses. I have never used any but brass shells, and do not know anything about what "Bexar" terms the "everlasting" shell, but if made of brass the following instructions are applicable:—

The shell should be wiped perfectly clean with a dry rag, to remove grit and dirt. If it has not been recently fired use a rag moistened with water, using care not to wet the inside. Slightly oil the outside, to prevent abrasion of the shell and wear of the die. It is then forced into the resizing die, using a small wooden mallet, after which it is driven out by means of the driving punch and mallet.

Care must be taken that neither water nor oil gets into the shell or primer, as either will injure or destroy the powder or fulminate.

Shells properly resized will enter the chamber as readily as when new. But I am at a loss to account for the failure of the extractor to work properly, unless the shells have been used, and thus expanded, and fit too tightly when forced into the chamber. If they expand so much the first time used that the extractor will not freely eject them, they are worthless, not possessing sufficient elasticity. All shells, of course, expand as much as the chamber will allow when fired, but good ones possess sufficient elasticity to return in part to their former size, and are generally quite readily ejected.

The shell should never be "dressed down;" the die obviates any necessity for such procedure.

"Bexar's" bullet moulds are all right, and were purposely made to cast a bullet too large, as they were made to be used in connection with a swedge, an implement as nessesary as the mould, and is used to give the bullets uniform size and density, so essential in long-range target practice, and of course no less desirable when accurate firing is necessary, that the sportsmen in the field may bring game to bag. In using the swedge it is first wiped with an oiled rag, as is also the bullet, which is thus inserted into the swedge, the drift struck a heavy blow with a mallet or a hammer, and the process is completed, and the bullet is ready for use.

If the swedge is properly sized to the gun, no trouble will be found in loading the shell, provided always that the shell be properly made. It may be made too thick, and, of course, useless. Have the swedge properly made for the calibre of the rifle, and if the bullet, properly swedged, will not enter the shell, reject it, and obtain others.

Brass shells are the best; they are cheap, and will stand, on an average, about ten discharges. Outside primed cartridges should always be selected, such as the Bridgeport, Lowell or Winchester, which, I suppose, can be ordered of various lengths, to suit the length of the chambers of "Bexar's" cal. 44 Ballard. If it has been purposely chambered to preclude the use of any but the "everlasting" shell, it is not the gun for use in Texas on the frontier.

I may be permitted to add, that for large game soft lead should be used for bullets, as upon striking it flattens out and makes a large hole, which a hardened one will not do. For target practice add about five per cent. of tin. When there is danger of defacing the bullet in transportation in camp, etc., the hardened one may be the best, as the accuracy of its flight it may put a smaller hole through a deer, when a defaced soft one might fail to kill at all. S.

DIVING DECOYS.—The diving decoy apparatus described in our last issue is patented, and all persons are therefore warned against making them.

SHOOTING MATCHES.

—The Pittsburgh, Pa., shooting tournament is now exciting day for the hunters in this village. Capt Bishop, not being satisfied with his last year's hunt longed for another. So his opponent, Captain W. Lund, was willing to meet the Bishop and arrange for it. The following is the name of the contestants, their respective scores:—

Captain.	*Score.*	*Captain.*	*S*
W. P. Lund	555	F. Bishop	
L. Howard	170	C. Bishop	
R. Hamilton	215	H. H. Lund	
E. W. Lund	365	J. Waite	
T. Hobbs	330	F. Hosmer	
Ed. Cook	50	J. Greenwood	
C. Hager	25	F. Searles	
G. Byron	130	C. Searles	
E. Fairbanks	55	L. Turner	
J. G. Lund	255	W. Baker	
F. Newton	100	C. Baldwin	
J. Williams	115	C. Earl	
J. Dunlop	75	Geo. Cutler	
S. A. Smith	270	F. Maynard	
C. Merritt	20	J. Maynard	
Total	2730	Total	

L. Greenwood and J. M. Perley acted as Judges, gave the best of satisfaction.

DEER SHOOTING IN TEXAS.

ON the morning of the 15th inst. three of your readers started from this port in the good little sloop *Ethel*, for a tour of observation, recreation, and venison. Sailed all day to the east and then north, with light head winds, and anchored off St. Joseph's Island at about 5 P.M.

"Old Mitch" and your subscriber went ashore to hunt for a certain "Tule lake," said to be somewhere in that locality, and supposed to be a favorite watering place for deer. But the fates were against us, for it had rained one of those little Texan showers which usually follow a six months drouth, and we found an average of about six inches of water on the flats between us and the sand hills on the Gulf side of the island. Now don't imagine because this water rained down that it was fresh. It was salter than a kiss from Lot's wife would have been after she looked back, for these flats were before the rain, covered with from two to six inches of pure crystal salt.

A walk of a mile over these flats through coarse, bunchy grass, which harbored millions of mosquitoes, brought us to a higher dry table-land of about half a mile in width, in the centre of which stood what appeared to be a big yellow post. After looking at it for a few moments we concluded it was a deer, and for once we guessed right. It proved to be an old doe ; she turned broadsides to us, and I let loose with my Pacific Ballard, 44-calibre, 75 grains powder, everlasting shells, patched bullets, etc., and then that old doe turned loose, too, and her fawn got loose also ; for as far as we could see they were busy hunting for a place a long way from where we were. We tried the sand hills and found nothing, and started back for the boat just as the sun set. "Old Mitch" found a family of rattlesnakes in a hole, and we had our revenge on them. We got away with ten of the varmints. We didn't stay long in that vicinity, for the mosquitoes grew bold and we were glad to leave a strip of clear water between us and them. Next morning we hoisted sail and moved up the island to the "scrags," a famous resort for deer. We got there at noon and anchored.

The "scrags" are clumps of bushes set in salt flats. We found no deer tracks and only one deer. As I was on the way back to the boat, just ready to give up in disgust, a yearling buck bounced out of the bunch of bushes and ran past me to the bunch I was steering for. When just abreast, about seventy-five yards off, I turned the Pacific Ballard, double set triggers, clearing rod under the barrel, etc., loose on him. I heard the ball spat as it went through him and saw it strike in the water at least two hundred yards beyond. That deer had a hard time to make the "mott" of bushes, and I expected to find him dead when I got there ; but to my surprise he jumped up and ran as though nothing was the matter. I had to let the old Pacific loose once more, and he tumbled. The ball had travelled through him endways and spoilt one ham and shoulder. The first ball went in a little hole just back of his ribs, and came out of a big one directly opposite, from which his entrails were protruding. We voted him aboard after dressing him, and made sail for Shamrock, on the road home, a place which we had left for the last, as what we killed there we could carry back to Corpus Christi. We reached Shamrock at 10 P.M., having stopped at Shell Bank to get supper. Our sleep was tranquil. At daylight I was put ashore to take a stand, for this was a long narrow peninsula and all were to drive but one. I found a narrow place sixty yards wide, and among a lot of Spanish daggers I found a nice hole in the ground to sit down in and smoke. The balance of our party set sail for the point of the peninsula, two miles distant, and I rolled a cigarette and smoked to keep off the mosquitoes.

I had only half finished my first cigarette when I saw the deer coming, and I dropped my smoke and picked up my ten guage Nichols & Lefever, loaded with nine buckshot in each barrel.

On they came, all unconscious of danger, eight heavy antlered bucks loping lazily along. As they passed within thirty yards of me I picked out the two largest ones and turned the "scattering scopet" loose. It was really grand, the style those old monarchs had. One dropped with a broken back and the other ran on fifty yards and turned and faced me. Just after I fired the two charges of buckshot I picked up the Pacific Ballard and turned loose at the last buck as he passed ; but although only thirty yards distant, I made a clean miss. I shoved in another everlasting shell and was just drawing a bead on the buck that was looking at me, when he sank down dead. He had four buckshot through and through him, one directly through the heart. I bled these two deer and went back to finish my smoke. I think I had smoked about two cigarettes when I saw more deer coming. They were a drove of does, seven in number, and they stopped about forty yards distant and looked back. With rifle in hand I scanned them to find one with horns, but the heads were all smooth, and I would not shoot them, as they are poor now. They saw me after a while and being penned, took to the water and swam a mile to the main island.

Just then a fawn showed his ears above the grass about sixty yards off, and I spoilt him with a rifle ball before he found out what I was. So I had two big fat bucks and one fawn for my half hour's work. I dressed my game and by that time the hunters who were driving had come up and the boat returned.

We hoisted sail at 7:30 A.M. and reached Corpus Christi at 11 A.M., just in time to dress for dinner. We are watching for the ducks and geese impatiently, and hope some of the sportsmen of the north will pay us a visit to help shoot them.

Lots of deer, turkey, quail, ducks and geese all winter.

BEXAR.

FLUCTUATIONS IN THE SALMON FISHERIES.—We can gather some general knowledge from the following statistics which may be of service to us in estimating probabilities. Migrations of fish of all kinds cannot be depended upon with certainty. Shore fish come and go without fixed periodicity. After many years of abundance they suddenly disappear altogether, and after an interval return again. Apprehensions of perpetual scarcity are therefore needless. The ocean is broad and deep, and its fish supply is not easily exhausted—nor will it ever be while the human race survives.

One peculiar feature in the subjoined statistics of the salmon catch is the immense proportion of grilse taken. In America the proportion is relatively very much less. What we copy is taken from the London *Field*, and refers to the season of 1879 on the river Tay, as compared with other seasons enumerated :—

The net-fishing season on the Tay, which closed on Wednesday, Aug. 20th, has been undoubtedly the worst experienced for a great number of years. The cause is difficult to discover. Nothing exceptional seems to have occurred on the Tay, and no trace of salmon disease was observable. Some parties, however, would attribute the scarcity to the severity of last winter ; but it has not been proved that severe winters have had an injurious effect on the salmon produce. The winter of 1878–79 was certainly the hardest we have seen since 1838. In the latter year the storm lasted ten weeks, and the Tay was frozen over from Scone down to the mouth of the Earn for nearly eight weeks, and public dinners were held on the ice-bound river opposite the town of Perth. That was a hard winter in earnest ; but did it affect the salmon produce? The returns of the produce of the whole fishings in the Tay, made up by the authority of the Perth Navigation Act, and extending from 1836 to 1846, will enable us to judge—during which period, be it noticed, the operations for deepening the river were in progress :

	Salmon.	*Grilse.*		*Salmon.*	*Grilse.*
1836	27,623	32,672	1842	26,779	80,559
1837	23,871	54,060	1843	33,979	43,254
1838	21,422	41,398	1844	31,213	34,353
1839	23,981	23,754	1845	21,282	44,439
1840	12,650	30,102	1846	33,807	29,954
1841	24,374	39,562			

We find here that the produce of 1838 was lower than that of 1837 by 2,379 salmon and 12,138 grilse ; but 1837 showed a larger decrease as compared with 1836, of 3,752 salmon, though accompanied with an increase of grilse. The year 1840 fell to 12,650 salmon and 30,162 grilse ; and again, the year 1845 showed a sudden decrease, from 1844, of 9,931 salmon, though with an increase of grilse ; while 1846, though showing an increase of 11,525 salmon, had a decrease of 15,455 grilse. In fact, the fluctuations in the produce of the Tay fishings, in regard to the relative numbers of salmon and grilse, have often been remarkable. It will also be noticed that the produce of 1845 was almost the same as that of 1838.

A considerable number of large salmon were netted during the season just closed, the most noteworthy of these captures being the following : On the upper waters, three salmon of 40lb., 50lb. and 62½lb. On the lower waters, thirteen salmon of 40lb., 45lb., 45lb., 45½lb., 47lb., 47lb., 50lb., 51lb., 51lb., 55lb., 56lb., 60lb. and 65lb. These may be contrasted with the captures of previous years, the heaviest salmon (of 50lb. and upwards) from 1874 to 1878 being as follows : In 1874, four salmon of 51lb., 53lb., 54lb. and 60lb. ; 1875, two salmon of 53lb. and 53lb. 10oz. ; 1876, two salmon of 64lb. each ; 1877, six salmon of 50lb., 59lb., 60lb., 61lb., 64lb. and 70lb. ; 1878, two of 52½lb. and 60lb.

Some very marked features have been noticeable in our own (Canadian) waters throughout the season just passed. In some rivers there has been a great dearth ; in others a superabundance. The dearth seems to have followed the north shore of the St. Lawrence. On the south shore, and especially on the Bay Chaleur, the catch has been extraordinary. For instance, a marked falling off was noticed in the Godbout, while in the Marguerite, which is a tributary of the Saguenay, 17 rods took but 100 salmon. Quite the reverse is noticeable with respect to the Grand Cascupediac, which empties into the Bay Chaleur. Here three rods took 622 fish, averaging over 25 pounds each, and aggregating about 16,000 pounds in weight. One day's fishing yielded 36 fish, weighing 927 pounds ! We are speaking now of rod-fishing, while the Tay statistics refer to net takes. But the fact of relative dearth and abundance holds good as regards the gross yield of the north and south shore fisheries of the St. Lawrence. There would seem to be no cause for discouragement in coming seasons as respects the one, or assurance of continued plenitude as respects the other. Fish, like Sambo's white man, are mighty onsartain.

—The following-named gentlemen were on the river Marguerite the past summer. One of the great advantages which this river affords to anglers is the excellent accommodations afforded by the half-dozen cottages erected by Wyllys Russell, of Quebec, for the exclusive use of salmon anglers. The fishing was interrupted the past season by salmon-nets set at the mouth of the river, but Fish Commissioner Whitcher has promised that these obstructions shall not interfere next season :

First came Judge Hadley and George Dawson, of Albany ; next, Col. Charles H. Smith, of New York City, and following at intervals were Bishop Bissell and John Grant, of Vermont ; Walter M. Brackett, David H. Blanchard, John Shields and I. Sargent, jr., of Boston ; Mr. Penfald, N. Y. Gifford, J. Q. A. Ward and H. K. Brown, all artists of reputation ; also Mr. Sweet and Mr. Lyons, and last, Street and Green of New York.

FISHING ON THE ST. MARGUERITE.

MR. EDITOR.—I saw in one of your recent letters from Canada a recommendation of the river St. Marguerite. I am sorry to contradict such an authority as you are, but I have been there. I leased a station on the river this season, with the understanding that the same arrangements were to be made with the net owners at Tadousac as in previous years, i. e., that Messrs. Russell & Powell were to pay a certain sum to have the nets raised three days a week, including Sunday. When I got to the river I found that no such arrangement had been made. The nets were left down every day except Sunday. I was on the river five weeks and only seventy salmon had been taken by eighteen rods, (while the nets at Tadousac took plenty of fish). This was not the fault of the anglers, as there were no salmon in the river. I went in my canoe over almost all the pools on the river, and as a rule there would not be ten fish per mile—most all the time none at all in the pools. On my section of the river there were eight pools, and for the last three weeks there were not fifteen fish in the whole of them, and a large portion of those were net marked. There were three rods on my section, and our entire catch was seven fish. The pools were fished carefully every day, and one at least of the fishermen was an experienced salmon fisher. This does not speak very highly for the river. As regards the houses on the river, I was told by Mr. Russell that I should find everything necessary in my house, but I found my outfit very deficient. I should never advise anyone to go the St. Marguerite unless they were sure that the nets at Tadousac were lifted for three days a week, and had been so lifted for at least a year previous to their going there, as otherwise it is simply time and money thrown away. If anyone doubts the above statements, I stand ready to prove them, and give further details at any time. J. SARGENT, JR.

Brookline, Mass., Sept. 30th.

REMARKS.—As we understand this matter, the party who is really to blame for the dearth of the river, is the Canadian Government, which leases the estuaries for nets, and the upper waters for rods. It strikes us that the lessees of the river must be common sufferers with the anglers to whom they sub-let fishing privileges.—ED.]

MT. DESERT.—One and one-half miles from the Freeman House, Southwest Harbor, and reached by a foot path, is what is known as "the marsh." a bit of brackish water, full of deep holes. In these pools are great numbers of large trout. Col. Hayden, of Cleveland, Ohio, well known to sportsmen east and west, spent some time there the past summer and reports the trip, the scenery, sport and surroundings delightful.

Magog, Sept. 18th.—I have an old friend some twenty miles from here, whom I make a point of visiting twice every year to spend a few days trout fishing. Will. is a first rate fellow, and a lucky down fisher. I always have a good time. I think he would divide his last worm, and give up his last line, and fish with his suspenders, to accommodate a friend. As I had but two days this time I started from Will's for one of my old pools in Black River, where I caught the largest trout I ever captured some five years ago, but there has a change come over that old place, for I tried all my fancy flies but could not get a rise ; then bait, with no better luck ; could not get the color. The next day we went to a small pond where we had splendid luck ; we took them in fast. I weighed five of them ; they tipped the beam at seven pounds—we caught no small ones—the handsomest colored trout I ever saw. They were copper color ; acted tame, and some of them were full of eggs. I suppose that accounts for how trout so large got there. I cannot see but they must have grown from very small brook trout, as the brook is often dry in the summer, but not the pond. We only fished two hours, then it began to rain, and we left to return again in the spring. Now I shall go for lake trout till the fifteenth of October, but shall not forget the grouse and larger game. Why don't some of your sporting friends come to Magog? Good fishing till the middle of October, and hunting. A. WELLINGTON.

NEW YORK—*Keeseville, Sept 24th.*—I am just from the dear old woods—the Adirondacks, completing my twenty-seventh year there with my rod and gun. What changes during that period ! As a sportsman I deprecate the disappearance of the trout and deer, also the appearance of the detestable small steamers on the Upper and Lower Saranac, on the Raquette River and Raquette Lake, and all for the almighty dollar. It does seem that we might have one spot on earth where these inroads of civilization, fashion, biled shirts, and Saratoga trunks, would not mar our solid comfort and enjoyment. The woods have been overrun, and wherever there is a shanty it has been literally packed. The tide is now turning homeward, and transportation in all sorts of vehicles demanded.

J. R. ROMELYN.

—Edward Hardy, while fishing near Riverhead, L. I., fell overboard, and his head and shoulders stuck fast in the mud. He was fast suffocating, but feeling the boat passing over his feet he clutched it with his heels, and was thus enabled to draw himself out.

OCTROI DES POISSONS—*New York, Sept. 22d.*—Apropos of the splendid run of fish we have been having for some time past, I send you an extract from the letter of a friend in Paris (John Britton, of Brewster & Co.) :—

"They (the Parisians) dote on a sensation. Hundreds of them will stand for hours on the bridges crossing the Seine watching the vagabonds, who, with pole and line, stand all day waiting for a bite, and when a miserable fish sails up the river and nibbles at the bait the excitement is intense. One day a fish seven inches long was

caught by one of these patient anglers and all Paris was agitated. Every article of food that is brought into Paris pays, as a municipal tax, a small sum, which is called 'Octroi;' and what agitated Paris over this capture, at least in my opinion, is that this tremendous fish had got into the city without paying Octroi." F. E.

WHITEFISH IN LAKE ERIE.—The statistics of the whitefish fisheries in Lake Erie from 1867 to 1879, as given by a fish dealer in a western paper, show the following variations of the annual catch: In 1867, 1868 and 1869 the catches were large. In the following year the American fishermen barely paid expenses, but on the Canada shores the yield was greater than usual. This would show not a decrease in the supply of fish, but rather a change of their locality. In 1871 a good catch was made, especially on the south shore; in 1872 were very heavy storms, both in spring and fall. The year 1873 was an extraordinary one, and all the great fishing firms reaped a rich harvest. The spring catch of 1874 was very good, but in the fall a very disastrous storm so wrecked the implements engaged that the men could not recover from its disastrous effects in season to fill out the year's quota. The years 1875-6-7-8 were poor, but the yield of the year 1879 so far has been greater than that of 1868-9 and 1873.

SALMON FISHING ON THE PACIFIC.

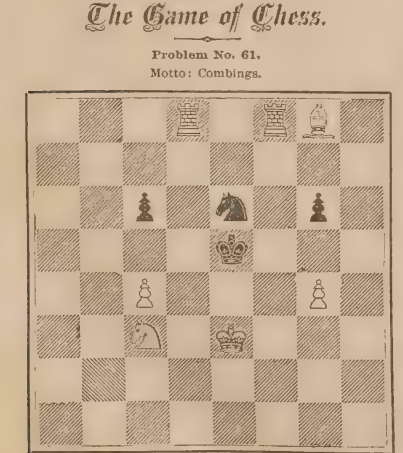
THE writer of this has had considerable experience in taking salmon with the fly on many of the streams which enter the Pacific Ocean from the lordly Columbia to the latitude of Point Concepcion in California.

There are very many varieties of salmon which enter the rivers of the Pacific, and they all have different habits in selecting their spawning grounds.

Salmo quinnat.—The salmo quinnat, which is the largest salmon entering these waters, is found in the greatest abundance in the largest rivers, principally the Columbia and the Sacramento. These are the salmon which are canned in such immense quantities on this river, and they are the earliest salmon to seek the fresh water streams for the purpose of spawning. They arrive in the Columbia river in April and ascend that river and its great tributary, the Snake river, to near their sources in British Columbia and the Rocky Mountains. They do not take the fly for the reason that when they enter the Columbia that river has already commenced its annual rise, and its waters are too much discolored for a salmon to see a fly. This immense run of salmon ceases by the middle of August or first of September, b which time the waters have again fallen to an ordinary stage and become comparatively limpid.

Steel Heads.—There are a few salmon accompanying this run of *salmo quinnat* which the fishermen call "steel heads." They are much longer in proportion to their depth than the *salmo quinnat*, and are a blueish green on top with silvery white bellies.

Silver Sides.—This spring run of salmon is almost immediately succeeded in the Columbia by another variety of salmon, called here silver side salmon, which generally weigh from ten to twenty-five pounds. They are a handsome fish, very good on the table, and are caught for smoking, but not extensively for canning purposes. It is this variety of salmon which afford fine sport for the angler—"disciple of Isaac Walton" is a little too old. As I have said they enter the rivers after the freshet has subsided and the waters are comparatively clear.



Dog Salmon.—During the month of September and October still another variety of salmon enter the Columbia and also the small streams entering the ocean and Puget Sound. These salmon do not seek the head waters of the Columbia river to spawn, but ascend all the small rivers and creeks which enter that river. They are a most villainous looking fish and will weigh about twenty or twen-

MOVEMENTS OF THE FISHING FLEET.—Whole number of fishing arrivals for the week 79; receipts, 1,377,500 lbs. codfish, 454,000 lbs. fresh halibut, 87,500 lbs. fletched do., and 6,605 bbls. mackerel. For the week ending Sept. 20th. the number of fishing arrivals at Gloucester was 83, and the receipts, 2,240,000 lbs. codfish, 394,500 lbs. fresh halibut, 288,000 lbs. fletched do., and 2,395 bbls. mackerel.—*Cape Ann Advertiser, Sept.* 26.

The Game of Chess.

Problem No. 61.

Motto: Combings.

White to play and give mate in three moves.

1—B-B2 1—Any.

2—Q, Kt or B mates.

The chess editor takes this opportunity to state that the original diagrams of the tourney problem, are not at present accessible to him, but that he will rectify the misprinted diagrams of the two last problems as soon as possible.

J. H. C., Massachusetts.—One of the seeds you send, found in the 'crop of a wild pigeon, is that of the wild buckwheat; the other, the round one, we cannot identify.

SPORT, Nahant.—Could you refer me to any one having thoroughbred bulldog pups for sale from stock not over thirty-five or forty pounds in weight? Ans. Write to D. P. Foster, No. 3 West Third street, this city.

BEAGLE, N. J.—Is there anywhere, in the immediate vicinity of New York City, where I can have three beagles taken care of during the fall and winter? Ans. Write to A. J. Huyler, Tenafly N. J.

SPORT, Yonkers.—For an all-round gun such as you mention, a 12-gauge would be the best. Your weight and measurement are good, though for 7½ lb. gun would prefer 28-inch barrel to 30-inch barrel.

BLUE STAR KENNEL, Franklin, N. Y.—I am in very delicate health; where can I go this winter and find a dry comfortable climate, healthy, etc., where it is like fine September, and some sport with shot gun? Ans. We have advised you by letter.

CAPSTAN, Jersey City.—Please state if the screw propeller was not invented by Com. Stevens, who constructed the great iron floating battery at Hoboken? Ans. Col. John Cox Stevens invented the screw propeller, the model of which can now be seen at the Hoboken Institute for Engineers.

H. W. F., Rutherford.—What can I do for my Gordon puppy four months old. He has had two fits within two weeks; he never has them until I take him out with me for a run. He is in perfect health; appetite good; he is fed from the table? Ans. The fits are caused by his teeth or worms, probably the former. He will outgrow them.

NILMAH, Elmira.—I have a breech loader chambered for Parker metalic shell 12 A. Can the chamber be reinforced without injury to the gun so that a 12 paper shell can be used? If yes name responsible person to do it. Ans. The chambers can be reinforced. Send the gun to Parker Bros., Meriden, Conn.

J. N. C., Mobile.—We quote the *Manufacturer and Builder* as authority for the statement that breech-loading muskets were invented by John H. Hall of Massachusetts, in 1811. In 1807 Thomas Blanchard, an American, made an apparatus for rifling gun barrells.

C. L. J., Willis, Texas.—I wish you would state one thing in your Answer to Correspondents. Does it matter if a manuscript is written on both sides? No doubt many correspondents would like to know. Ans. It is a rule in writing for publications to write only on one side of the sheet. It is of very material service to both editors and compositors (printers).

W.—I have heard it declared that a trout hasn't any scales. Is that true? A word from you will settle the point. Until then I insist upon the scales. Ans. A good microscope will easily settle the question; but the best way to test it is to handle the fish, and let the slime dry without wiping off. You will then detect the scales very easily, but they are quite minute.

S. L., Boston.—The specimen you send us is *Glococyx californianus* (Lesson), locally known by a great variety of names, such as the road runner, chapparal cock and ground cuckoo, from its resemblance to the flight cuckoo. To a stranger its movements are as mysterious and interesting as are those of the water turkey or drake bird to visitors to Florida.

E. L., New Orleans.—1. Please give me the benefit of your judgment as to the bore, dimensions, etc., of breech-loading shot gun suitable for all game; also latest improved? 2. Does Edwinson C. Green's gun compare with Webley's, Scotts' and Greener's, and equal to the merits claimed by maker in the London Gun Trial of 1879? Ans. 1. Twelve-gauge, 3-inch barrels, 8 pounds weight; top snap; rebounding locks. 2d. His reputation is excellent.

M. M., Fort Clark, Texas.—I have a female bear ten months old, which had a sky-blue film growing over her eyes for the last four months. I have tried sugar, burnt almon with a quill, and also nitric silver, but cannot remove it. I had to kill the male bear two weeks ago, as he got entirely blind from the same cause. If it is a cataract, how should I treat the same to save her eyes? Ans., It is a cataract, and can only be removed by a surgical operation.

H. T. A. Milwaukee, Wis.—Can you name any town in this vicinity, say within 500 miles, that is surrounded by good shooting (rifle and shot gun) and fishing? Ans. Steven's Point, Butternut Lake, Phillips or Ashland, on the Wisconsin Central Railroad are all excellent points. For full information inquire at the company's office in Milwaukee.

BEGINNER, New York.—1. What is the proper load for quail gun, 28 inches., 10 gauge, 8¼ lbs. Also for duck gun, 33 inches., 10 gauge, 9½ lbs.? 2. Are two wads on powder of any special advantage? 3. How must I load shells to make shot scatter? 4. What is the best soap for washing dogs? 5. What is the best flea powder, and how must I use it? Ans. 1. 4 drs. powder, 1 1-8 oz. shot, 5 drs. powder, 1¼ oz. shot. 2. Yes. 3. Increase charge of powder or decrease charge of shot. 4. Spratt's. 5. Steadman's; rub it in.

C. H. W., Hickman, Ky.—Is there a book that treats of hunting, camp life, camp hunts, etc., and if there is, where can I obtain it? 2. At what place can I get the best No. 12 (Parker gun) paper shells, and cheapest? If you publish a catalogue of hunting and camp equipments, please send me one? 1. Ans. Hallock's "Sportsmen's Gazetteer." Price, $3; for sale at this office. 2. Send to Parker Bros., 97 Chambers street, New York. All leading gun dealers sell them. We have mailed you a catalogue.

J. M. J., New York.—About eight months ago my pointer dog had a very strange attack. He coughed constantly for nearly a week, he would throw his head between his front legs, and would act as if he had a bone in his throat, and could only get temporary relief by vomiting up some white slick looking substance. I examined his throat for a bone and found none, and concluded he had distemper. I did nothing for him, and in two or three weeks he was apparently well. He now has another similar attack. He was in good condition and looked healthy when attacked each time. Will you be so kind as to tell me the cause of these attacks and the remedy? Ans. Presume he has taken cold. Give him the following: Friar's balsam, 15 drops; syrup of poppus, 1 drahm; diluted sulphuric acid, 5 drops; mucilage, ½ oz.; water, ½oz. Mix and give two or three times a day.

S. H. G., Newmarket.—In the last number of your paper there is an account of the bursting of a Stevens single-breech-loader with fatal results. I am using the single-breech-loader of this pattern of their best grade, with laminated steel barrel. The retail price was $18. Is there any danger to be feared in using this gun with 2½ drams of powder? Shall I keep on using the gun or throw it away and buy a different one? Ans. There are so many causes which may lead to the bursting of a gun, such as overcharging, dirt in the muzzle, etc., that it is hard to say that the fault is always with the gun. We should say that with the charge you are using the gun is perfectly safe.

STEIN, Sherman, N. Y.—Where can I go in Georgia for good quail-hunting? Please name guide. Shall I take a dog or can I get a dog there? Would prefer near line of railroad. Can take tent if necessary, but prefer a quiet boarding-house. Ans. Address A. Winter, Cairo, Thomas Co., Ga. He keeps and trains dogs, and can probably let you have one or two to shoot over. There is no end to quail in the vicinity of Cairo, with some fine snipe-shooting, and many lakes with as good duck-shooting as one can wish, and all within a radius of five miles; daily communication with railroad. You cannot go astray on quail anywhere in the South. You will have to pay a trifle at Cairo, perhaps $1 per day, for the privilege of shooting on the ground named. There is a tract of 10,000 acres here which can be leased for shooting.

WISCONSIN.—I am going to Wisconsin next month and would be greatly pleased if you would mention a place in that State where good hunting for small game could be had? Ans. Wisconsin is a very large State. If we knew to what part of it you were going we could perhaps answer your query more intelligently. Wrightstown, Fort Howard, Green Bay and Du Pere, in Brown county; Portage City, in Columbia county; Madison, in Dane county; Fox Lane, in Dodge county; Menomonee, in Dunn county; Fort Atkinson, in Jefferson; Wonewoc, in Juneau county; Bangor, in La Crosse county; Montello, in Marquette county; and dozens of other places, might be named. The whole State is full of game. You can hardly go amiss.

LEWISTON, Maine.—To acclimatize domestic quail here, where would be the best point for me to procure them? Would not the quail from some of the Western States prove a hardier bird than those of York State? Can I procure them in the spring, or should I have to get them this fall for the purpose named. Which would you recommend, planting them out this fall or next spring? What do you think of the success of the undertaking? Can you tell me who I can procure them from? Ans. We should recommend birds from New York State for your purpose. They cannot be procured in spring. Your best plan would be to get them in the fall from some of the parties who advertise in our columns, and keep them through the winter, turning them out the first of June. We doubt the success of the undertaking, but the experiment is worth trying.

C. S. G. S., Vance's Ferry, S. C.—1. What is the right length of shell to use for Greener B. L. gun, 30-in. barrel, 6 lbs. 13 oz. wt.? 2. I have a pointer, eleven months old; seems to be troubled with worms; has passed several of them. He has a good appetite, but is very thin; coat in bad condition, and hair rubbed off on angular points; smells mangy. I feed him on corn meal, sour milk, and table scraps. 3. How do you discover whether a gun is choke-bored or not? Ans. 1. Probably 2¼ in. You can tell by measuring the chamber. 2. Give him, say sixty grains of Areca nut, on an empty stomach, following it in four hours with a dose of castor oil, say one ounce. Rub his skin with crude petroleum, and administer internally two capsules of tar per day for two days. 3. Pass a wad through from breech to muzzle; or measure the diameter of the bore at the muzzle, and at different points in the barrel.

INFORMATION, Savannah, Ga.—My pointer bitch, now fourteen months old, came in heat May or June this year. I did not put a dog to her, and she got over it apparently; but her parts remained very much swollen and protruded like a goose egg. Latter part of July she was in heat again, and on the 8th of August I had her lined by a very fine dog, one whose services I have never known to fail. To-day, only twelve days before whelps are due, I cannot feel any pups in her. She has not gained much in size, but her teets are swollen considerably and show the presence of milk. Her parts are still much swollen, and are continually moist or discharging. Otherwise the bitch is in perfect health and condition, lively and vigorous. Ans. The case is a peculiar one, although instances of bitches that would take a dog at any trial have been known. She will probably not breed while in this condition. The pressure of milk at the period named is not unusual save when the bitch is not pregnant. We can only suggest a low diet, with plenty of exercise. She may come right in time.

VIDI, Boston, September 27th, 1879.—I noticed about three weeks ago that my setter bitch (fourteen months old) was a little weak in the legs, as she fell once or twice while running on the marsh, and seemed to be unable to turn short to avoid any obstacle when going fast. Later, her hind legs would slip and sprawl round on the floor, and she went up and down steps with difficulty. Then weakness increased, so a strong wind would blow her over, and she seemed to partially lose her faculties; could not hear well; would not mind (apparently not understanding what was wanted), and became *blind*. Has remained so about a week; but is stronger on her legs than ten days ago. Is *perfectly blind*, and will wander round the room or yard stumbling over obstacles, and trying to crawl through or over chairs, etc. Ans. From the description of symptoms your dog has paralysis; probably the result of rheumatic fever, contracted by exposure to too much wet, coupled with high feeding. The disease has probably affected the whole nervous system. You can do no better than to try the empirical remedy recommended by Stonehenge. Score a red herring with a knife, and well rub in two drachms of nitre; give every morning on an empty stomach, and keep the dog without food for two hours after. At night, give one drachm of camphor made in a ball. If the sight does not return, try a seton in the poll.

—Attention is called to the advertisement of Mr. S. J. Bestor, of Hartford, Conn., who is reputed to have the finest stock of cocker spaniels in the country.

WHAT'S IN A NAME?—One of our subscriber's names is Lashbrook—which is a good enough name for an angler, but it happens that he doesn't fish.

—The bicycle is doing wonderful things in England. In the first five days of a bicycle match in the Agricultural Hall, London, Walker, an Englishman, rode 1,200 miles, nd Terron, a Frenchman, 1,185. This almost equals allway tra velling.

FOREST AND STREAM
ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY,

AT

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

*** Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, OCTOBER 2, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remitted to us is lost.

☞ Trade supplied by American News Company.

NEW YORK'S PARKS.—New York is waking up to the discovery that her Central Park is fast going to ruin. The Park possesses rare advantages in the character of its natural formation, and when laid out some years ago by the very competent landscape artists to whom the work was intrusted, it promised to become in time the finest example of landscape gardening in the world. Hundreds of thousands of dollars and long years of skilled labor have been put into the task of accomplishing such a result, only now to be frustrated by the bane of political scheming, inefficient management, and culpable neglect. The designs of the artists have been ignored; rare landscape effects have been destroyed; and official mismanagement, shiftlessness and obtuseness have thwarted the realization of the artists' plans. Now that the citizens of the metropolis are beginning to comprehend this sad condition of affairs, there may be some partial remedy of existing abuses, but to restore the park to its former state of promise will require a vast additional outlay and many years.

MAJOR H. W. MERRILL.—This gentleman has written very many valuable contributions for FOREST AND STREAM during the past six years over the signature of "Old Scout," the most noticeable of which have been those relating to the trajectory of projectiles. His sketches of frontier life in Texas and Florida have also been frequent in the time past, and always instructive and entertaining. Blessed with a hale old age, and enjoying a fuller measure of the good things of this life than usually falls to the lot of retired army officers (who get few comforts and poor pay for their long and arduous service), the Major assiduously keeps the field, and follows his dogs with a step as lithe and untiring as the pedestrians who contest for belts. He has a passion for roving, and moves rapidly from point to point, shooting a little here and a little there, enjoying the sweets of out-door life, like the bee. A short time ago he was in Delaware, now we hear of him in Wisconsin, and are glad to see printed, and to be able to copy the following deserved notice of the "Old Scout" from the Waukesha *Democrat* of Sept. 20th:—

Major W. W. Merrill, of New Rochelle, N. Y., a veteran of the Florida and Mexican wars, arrived in this place yesterday. He proposes spending a month here with his nephews to enjoy the pleasures of his annual hunts and fishing in this vicinity. He is the owner of Army Lake farm, near East Troy, where his preserves afford him good sporting grounds. He served under Gen. Taylor in the Florida war, and again under him in Mexico up to Monterey, thence under Gen. Scott, participating in all the battles from Vera Cruz to Mexico, and finally had the pleasure of escorting (as one of his dragoon body guards) the old General into the city of Mexico on September 14, 1847, now thirty-two years since. Mr. M. graduated at the U. S. Military Academy in 1838, and served in the United States Dragoons for twenty years, most of which time he spent on the Indian frontier of Texas and in "bleeding Kansas."

THE CLERGY AND FIELD SPORTS.

"The gown of the clergyman is now being gradually made to appear as the jerkin of the jocky."—*Boston Congregationalist.*

WHEN the Christian Church was established nearly two thousand years ago, the race of sporting clergymen was inaugurated, and since that time, in spite of opposition, they have gone on increasing, until to-day they grace all the legitimate walks of sporting life. There are still left a few "Friar Tucks" who occasionally overstep the prescribed limits; but of these it is not our province to speak; their influence is pernicious and their actions are to be decried. But those representatives of "the cloth" who enter the field through right motives deserve a word in their behalf, and what better medium can be found through which to urge their claims than FOREST AND STREAM

Clergymen are but human; lineal descendants of the same first parents with us all, and inheriting with us their modicum of original sin. And in view of this recognized fact, why is it such a hue and cry goes forth when a clergyman derivates from the strict path of rectitude? We are apt to expect too much from the ministerial fraternity. We look up to them as models by which to mould our own lives, forgetting that they are tempted in all points like as we are. So if by chance the old man obtains the mastery and some great divine is indiscreet, unfortunate, or actually falls, immediately society is shaken to its centre and the peaceful cause of religion receives a terrible shock. The world's people are always looking for blemishes in the body politic of the church, and while the numerous imperfections constantly being revealed, offer no excuse for the rejection of the truths of the gospel, they still furnish food for sneers, and it is a lamentable fact that in any issue involving the fair fame of a clergyman or church, an unfeeling world never waits for the verdict, nor gives the party involved the benefit of the doubt. To be suspected is to be condemned already.

The gentle occupation of the clergymen, necessitating as it does sedentary habits, makes out of door exercise positively essential to his physical well being. This variety of recreation naturally fills him with a deep love for nature and her manifold wondrous works, and so he drifts easily into the legitimate sporting rut and there finds that which being in perfect harmony with his thoughts and feelings, affords him rest and health giving amusement. The legitimate sporting field, embracing as it does shooting, fishing, boating, base ball, riding, cricket, archery, etc., is a blessed boon to the profession. Will not he who makes consecutive bull's-eyes at the range or cuts down a grouse at forty yards, be sure to make centre shots from his pulpit the following Sabbath? Will not he prove himself a more expert "fisher of men," who with skillful hand and supple wrist casts his fly deftly over the surface of a trout pool? Will not brain naturally follow the bone and brawn developed at the oars or in the saddle, and the results be better thoughts and more fervid eloquence?

Who are our best preachers? Look over the list and see if they, who by reason of active out-door exercise, combine a sound body with a healthy mind, are not the ones who hold the attention of the largest and most intelligent audiences and do the most real good in their sacred calling.?

What folly to frown down the sporting clergyman when on him rests the hope of the church. An indoor preacher who gets his ideas from cyclopedias, is like a closet naturalist, who, using the eyes and experiences of others, eliminates ideas and foists them upon the world as his own. He pursues the same old beaten track trodden for ages by his ilk, and after a lifetime of unremitting toil, finds that the simple truths embodied in one idea religion are not enough for the advanced notions of the age. Not so the sporting clergyman. He goes forth with gun or fishing tackle, happy and care free. With each breath he draws in fresh inspiration. His Creator seems nearer and more real as he looks up to Him through the medium of the clouds, the mountains, and the placid lake. With renewed strength of body and mind comes a greater depth of thought and feeling, and his whole being is revitalized as he enters into the ennobling pastimes of the field, forest, and stream.

Has our clerical friend belittled himself, or in any way disgraced his calling, by indulging this God-given proclivity? Does obedience to the natural instincts which prompt him to take part in those athletic sports that build up the body and give cheerfulness and buoyancy to the disposition, make him any the less a man and a Christian? Far from it. It is his duty to foster and protect the body God has given him, and how can he do so better than by a moderate indulgence in field sports.

To carry on the great work successfully in which the clergy are engaged, soundness of body and mind are absolutely essential. This is an axiom that they would do well to heed, and while storing the mind with sound theological truths, give that exquisite structure in which it is encased a chance to expand, carry the development of mind and matter along together, so that one may support the other and bring forth results at once beneficial to the people and pleasing in the sight of Him who is the Great Head of the church.

It is to be hoped that the time will soon come when those who frown down the sporting clergy, will see the error of their position and acknowledge the wide difference between them and the clerical sports which grace their calling. It is no great matter of wonder that people sometimes lose faith in the average clergyman after the unsavory developments of the last few years. But the mass of earnest, hard-working, conscientious christian gentlemen, at the head of our churches, should not be made to suffer for the indiscretions and sins of the few. A man in any walk in life is not responsible for the reprehensible actions of those who may be treading in the same pathway with him. Because Smith, the dry goods merchant, fails, it is not proof positive that Brown, in the next business across the way, is financially unsound.

Then let us all exercise that greater of the two graces, "charity," toward the clergy, and instead of indulging in reproach of their tendencies toward the innocent and manly giving pursuits of the field, encourage them in it, for there it is they will draw fresh stores of health and vigor to collect to carry on the work whereby they are called.

H. W.

A GENUINE AMERICAN SPORTSMAN JOURNAL.—[illegible] uable, high-toned American sportsman's journal, [illegible] AND STREAM AND ROD AND GUN, under the efficient management, its originator, Mr. Charles Hallock, has [illegible] a point of success in this special branch of literature equaled by any similar publication in the United [illegible] Number 1, of volume 13, appears in an entire new type and material, which is an evidence that the [illegible] conducted with energy, forethought, good taste [illegible] cess. Starting with the first issue, we have come found this publication a regular weekly visitor in the *finder's* sanctum. We have never failed to find [illegible] EST AND STREAM full of valuable statistics and in reading matter, suitable and valuable to every A sportsman throughout the country.—*New York [illegible] cial Pathfinder.*

Our thanks are due to the above veteran journal for expression of its good opinion, which we much [illegible] coming from a publication which is now in its fi year. The *Pathfinder* is a *vade mecum* for the tile part of New York's business men.

FAITH IN OUR PERPETUITY.—Within the past we have had many letters enclosing price of subs to FOREST AND STREAM for three years, to 1882, a fair indication of the trust which our cons place upon our continued existence. We see no that our confiding friends will be disappointed, a them for the trust they have placed in us.

GAME PROTECTION.

THE MAINE TROUT LAW.—We had a call last w Col. Hayden, of Cleveland, Ohio, then on his w from Tim Pond, Eustis, Maine. The fishing the learned, has been superb the past season. The full of large, game trout, and numerous streams and lakes in the vicinity afford change of scene any decrease of good luck. Trout fishing in thes is not attended with any uncertainty. Unless a specially gifted bungler he can catch a gr more fish than he and his companions can eat wise legitimately dispose of.

The best fishing days were in August. Septem yields large returns, but the fish are then gra toward the latter part of the open season, wh closes October 1st, the fish are spawning or spawn. Their capture then is simply disgusting persons. There seems to be no question about th limitation of the open time here. September 1 be the date. It is undoubtedly for the imme vantage of guides and boarding house keepers t the visits of their customers, but reason pre earlier close season than that now in force, season the Tim Pond region bids fair to be over anglers. New accommodations are to be provi facilities of access afforded, and the old stor Adirondacks, and a thousand other like re enacted. We are promised some interesting j this country before long.

THE MASSACHUSETTS LAW.—*Boston, Sept. 2 tor Forest and Stream*:—Since sending an item number of your paper, concerning the case of of our woodcock law, we find that the defenda sel has had his name entered on the docket, a fault taken off. This looks like business, and that the signs won't again fail. JOHN FOTT

GAME LAWS AND THE COTTON CROP.—A g for the blackbirds is thus spoken by the Nat (La.) *Vindicator*:—"Our farmers tell us that of blackbirds are swarming in the fields of cotto stroying the cotton-worm as they go. Very fe can be found 'webbed up,' and the planter i The destruction by the birds this year is acco only by the effects of the game law, which are felt." Such facts as these will soon teach peopl game laws are not designed to benefit a sma "sportsmen."

—As a light, mild beverage, agreeable to the cate digestive organs, the Cocoa preparations o Baker & Co. are recommended to invalids and cents as well as to those in full health.—*Adv.*

A TRIP TO NORTH PARK.

(FIFTH PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

THE rapidity with which our western country is settling up, impresses me more and more each year. Just as soon as any section becomes safe, the Indians having been driven off, the cattle men begin to drive their herds into it, and before long, one hears complaints that there are too many cattle there. The older settlers complain that the newer comers are "crowding them," and soon the most energetic commence to move off in search of "fresh fields and pastures new." I am told that horned cattle have never yet wintered in North Park, and it used to be said that the snow laid on the ground there all winter to a depth of ten feet and more. Nevertheless, there are at present about six thousand head of beef steers on this range, a large part of which will pass the winter here. Last season the winter was an unusually open one, and the hunters that remained in the Park reported this spring, that there was but little snow on the ground at any time. Besides these cattle, there are a considerable number of horses here, most of which, however, will be kept up, and fed hay. The experiment which is thus being tried, will be watched with interest by stockmen, and, if it should prove successful, I shall expect to see many thousand cattle in the Park next year. It is not very probable that farming, as applied to the production of cereal crops, will ever be carried on to any considerable extent in this region. The elevation is so great that there are few nights in the year when there is not a frost. Almost every morning a film of ice more or less thick is found on the water left in our buckets over night, and on one occasion this ice was about half an inch thick.

Soon after leaving our camp on the Beaver, we reached what is termed the Neck of the Park, and passing over the divide, followed down a valley, at first narrow, but gradually becoming wider, which led us over a good, though somewhat hilly road, toward a more open country. Two or three hours of riding brought us to Pinkham's ranche, where the Park begins. The road forks here, the left-hand branch leading along the east side of the Park down to the Owl Creek Mines and the various passes across the Range into Middle Park, while the right-hand road goes to the Han's Peak Mines. We followed the latter for some distance, as it was our intention to go around Independence Mountain, and then strike back east to the road that leads to the Arapaho pass.

Just after leaving Pinkham's, we passed a ranche near which is a small spring, from which bubbles up a constant supply of cool water abundantly charged up with carbonate of soda. It was fresh and delicious to the taste, and, could it be bottled and sent to a market, would no doubt compete for public favor with some of the famous mineral waters now so popular. On the marshy spots near the spring were numbers of plover feeding, and W., with his shot gun had good sport among them during the half hour which we occupied in tasting and testing the waters.

The country at this point had been burned over, and was black and extremely desolate in appearance. I inquired the cause of the fire, and learned from the owner of the ranche that the burn had been made to clear off the sage brush, which takes up so much room that might be occupied by grass, "And then," said my informant, 'the cattle won't graze where the sage brush is thick, they can't; the branches stick into their eyes and 'most blind 'em." When the sage has been burned off, it is usually followed the next season by a crop of grass, and the field is thus very materially improved. The sage is a plant of slow growth, and requires many years to gain any great size or stoutness. One bad result which often follows this treatment of a range is that one of the first green things to make its appearance in spring is a plant which is said to be poisonous to cattle. This plant, of which, because it was so common, I failed to obtain specimens, and so cannot identify, is somewhat bushy, grows to a height of from one to two and a half feet, has a pinnate leaf, and bears numerous racemes of purplish or lilac colored flowers. It is quite showy and striking in appearance, and, though not uncommon anywhere, it springs up in greatest abundance on ground that has just been burned over. It is said, I know not how truly, that cattle eat it greedily in early spring, and that it is harmless unless the root is eaten. One individual stated that men who have large herds send out parties of skinners, with teams, in spring to secure the hides of poisoned cattle, but this statement, if received at all, should be taken with a very large allowance of salt.

Soon after leaving the Soda Water Fountain we crossed a high and steep ridge, and then commenced a gradual descent toward the North Platte River, on which we intended to camp. The scenery through which we were passing was rugged and grand, the weathered pillars of granite standing out bare and grim among the ancient junipers on the hill side. The mountains, though not high, had a weird and spectral look, which came perhaps from their being absolutely bare of vegetation, except where an occasional cedar, extending its roots through a crevice in the granite had succeeded in drawing a little nourishment from the scanty soil beneath, and in maintaining an insecure foothold among the piles of rounded rocks. The weathering of the granite was finely exemplified here, and this hardest of rocks was worked into a thousand fantastic forms, each differing from its fellow, yet all presenting points of resemblance to one another. The granite contains much iron, and is therefore easily worked upon by the weather, for as the iron oxidizes, the surface of the rock is disintegrated and breaks off with a cubical fracture, thus exposing a fresh surface. It results from this, that the rocks are all rounded and smoothed, and have no sharp angles. Many of them indeed resemble the *roches moutonnées*, or sheep-backs, which are so often seen along the track of a glacier.

The valley of the North Platte, where we pitched camp, was perhaps a mile and a half wide, a superb level meadow, covered with fine grass, on which, in the morning and evening, from two to five hundred antelope were in sight at one time. Sage and dusky grouse, ducks and jack rabbits abounded here also. If I had the space I would give in some detail a description of this country, for it is a most delightful one, and game is very abundant. It is only necessary to get back from the road to find both deer and elk. There are places, of course, where game is tamer, more abundant and more easily killed, but there is enough here for any one who does not care to slaughter recklessly.

It is a curious fact, and one that I have never yet heard satisfactorily explained, that there are no trout to be found in the streams tributary to the North Platte River, while those which flow into the Grand, and the feeders of the Green, abound in small though most excellent fish. There is nothing that I know of in the character of the water or bordering country which should prevent these fish from doing well in the numerous streams that flow into the Platte, but the fact remains that they are not there. Some enterprising individuals have even tried the experiment of transferring trout from the heads of streams flowing into the Snake and Bear rivers to springs which pour their waters into North Park, but I have heard no reports as to the success or failure of these attempts to stock these streams. Cannot some fish culturist furnish to the readers of FOREST AND STREAM an explanation of this, to me, puzzling question?

Toward evening of the day on which we left our camp on the Platte, we reached the point where we had decided to leave the Haus Peak road and pass behind Independence Mountain. Just after leaving the road the wagon stuck in a creek crossing, owing to Fuller's overweening confidence in his team: and we had two hours work to get them out again. Experience has taught me that it does not pay to try a bad crossing, until you have done all you can to improve it; but Fuller, who thought that his team could pull any load through a bog, jumped his horses off the bank into the creek, and there they stayed until with axe and shovel we made a road by which they could get out.

Half a mile beyond this we camped in a narrow valley, and Fuller and I set off on foot to explore for a road behind the mountain. We found a very good one, leading through a broad valley on which the grass in some places stood waist high. All this pasture, for more than a mile before us, was dotted with antelope; there must have been two or three hundred within half a mile from where we stood. They were feeding, perfectly unsuspicious of our proximity, and the nearest of them within easy rifle range. As we had plenty of meat in camp, however, and as neither A. nor W. had ever killed an antelope, we concluded not to disturb them, but in the morning to bring the boys around and let them try their hand; so without showing ourselves we withdrew and returned to camp.

The next morning I was aroused by several shots in front of the tent, and found that a black-tail doe had walked into camp and had been killed by William, our cook. The antelope seen feeding the night before were found where we had left them, and were approached and shot at; but without effect. The boys were probably too anxious to shoot well, and so failed to kill anything. We found the road a good one, and travelled along a valley abounding in antelope until toward night, when camp was made at the foot of a high, bare Hogback, which runs north and south, a spur of the main range to the north. Near us were half half a dozen large alkali lake, on the waters of which floated great numbers of ducks and geese; while along the shore were numerous flocks of busy shore birds. Prominent among these were the beautiful avocets, striking objects from the contrasting black and white of their plumage; the noisy tattlers, the long-billed curlews, and the restless Baird's sandpipers. Many other species, which I have not space here to enumerate, were noticed. In the dead willows, which were scattered through the little copse in which our tents were pitched, W. discovered a dozen magpies nests, curious domestic structures; tenantless now, of course, but several showing signs of having been occupied this summer. From one point in the grove a dozen or twenty long-eared owls were started, which, after flying aimlessly about in the bright sunlight, pitched hopelessly back into the undergrowth, no other refuge being at hand.

In the afternoon I climbed the Hogback in order to ascertain what the prospects were for reaching the snowy range which lay some ten or fifteen miles to the west; but on reaching the summit, after a very hard pull, I discovered that the whole range was on fire. Of course it was useless to look for game there. I was well repaid for my scramble up the hill, however, for in the valley at my feet, stretching away to the west for seven or eight miles, and to the north and south for fifteen, lay the largest beaver meadow that I have ever seen. I presume that there were 500 dams in sight, most of them kept in good repair. The water set back by these dams flowed through a thousand little canals and ditches, and the whole from the height looked like a silver net spread over an enormous carpet of emerald velvet. Through my glass I could count hundreds of beaver houses, and could even distinguish the green willow leaves on the branches recently used in repairing the works. Beyond this meadow was a narrow strip of brown prairie, and then the green pine timber began, and with it the foothills of the Snowy Range. Deep dark gorges run up the mountain sides, and seemed to promise an easy ascent; but the columns and masses of thick white smoke, which moved steadily along from the south toward where I sat looking, told me too surely that in a day or two at furthest the fire would be sweeping over the whole range. Above the smoke I could see again the green timber, and above them the grim, grey rocks, bare of vegetation, and whitened a little higher up by patches of snow, pure and shining, when touched by the rays of the now sinking sun, but seeming grey and soiled when shaded by clouds. Turning to the eastward and looking out over the broad valley through which we had just come, the view was scarcely less impressive. From my eyrie I could count no less than twenty-two lakes of various sizes. Those furthest from me still gleamed in the sunlight like burnished silver, but the nearer ones, shaded by the towering peaks of the range, were dull and blue. With my glass I could just see upon the unruffled waters, little dots representing the water-fowl peacefully swimming hither and thither, and near the shores groups of antelope on their way from the water. Beyond the valley rose Independence Mountain, wooded to its summit, two-thirds of its height cold and hard in the shadow, but the summit still touched by the brilliant rays of the setting sun. A few moments and the light was gone. I turned for a last look at the snow capped mountains, and how changed was the scene! The hillsides were now indistinct and blurred; but in the south, where an hour ago I had seen the white smoke, rose tongues of flame that seemed almost to lick the heavens, and beneath them the mountain-side was a red furnace that caused the sky to glow and illumined the nearest snow-peaks with a roseate hue. The scene was one of beauty and grandeur, but its beauty was terrible and its grandeur filled me with awe. How long I stood gazing at this wonderful picture I do not know. I was recalled to myself by a furious storm of rain which began to fall, and picking up my rifle I slowly descended the mountain-side.

The Rifle.

AN OLD FASHIONED TARGET MATCH

[BY AN OCCASIONAL CORRESPONDENT.]

IN the early days of the war of the rebellion it was discovered that rifle shooting in New England had almost come to be numbered among the lost arts. A very large proportion of the men who enlisted as soldiers, particularly in Massachusetts, Rhode Island, and Connecticut had no practical knowledge of the use of fire arms, and very few indeed had ever used any more formidable weapon than a shot gun. It was not long before the superiority of the Southern sharpshooters began to make itself disagreeably manifest, and the New England men awoke to the fact that this branch of education had been shamefully neglected, and the punishment they were receiving for their ignorance spurred them to take immediate and active measures for relief. Rifle clubs were organized and went into active practice everywhere, and in many instances the men who had previously been looked upon as the idle vagabonds of the country villages because of their innate love of shooting, came to the front and proved most efficient instructors in the heretofore despised art. An interesting lesson in social science might be drawn from the fact that many a poor devil who had been regarded as the black sheep of his family before the war was developed by its influence into a useful and efficient man. Provided there was nothing radically false, mean or vicious about him, the fact that the very acquirement which had heretofore been looked upon with contempt were now in the ascendant, would suffice to inspire him with an ambition he had never before felt. His self-respect was developed by the novel sensation of finding himself respected by others, and once inspired by the stimulus of hope he was ready and willing to exert himself in the new field that was open to him.

But this is neither the time or place for moral lecture and the hint I have thus thrown out is at the service whoever feels inclined to enlarge upon it.

The only breech-loaders which had proved of any practical utility before the war, were Sharps and Maynard. The former had made a name for itself in the Kansas troubles, but was not deemed worthy of introduction into the military service of the United States. It used a paper cartridge and was altogether inferior to the excellent weapon now manufactured by the Sharps Company.

The invention of the Maynard rifle dates back to the time when Jefferson Davis was Secretary of War, and his early appreciation of its value was shown by its introduction at that time into the cavalry service, and later by circumstances in the history of the weapon which bear strong internal evidence of having emanated from him.

For a considerable time before the actual commencement of hostilities, Southern agents in the North were buying every Maynard rifle that could be had, and no sooner was war declared than the factory was burned.

We learned to our cost what became of those arms when our men were so fearfully cut to pieces while crossing the river at Ball's Bluff. The work was done by two of the Confederate regiments armed with Maynard rifles. In all the essential features on which its accuracy and force were dependent, the Maynard of that day was the same as is now manufactured; but breech-loaders of all kinds were then regarded with doubt and suspicion, and the small size and insignificant appearance of the Maynard afforded little evidence of its power.

The factory was speedily rebuilt, and the manufacture of the arms resumed with various improvements in the details of construction. I was then living in a country town in Massachusetts, and was carrying on a carefully conducted series of experiments with all the new patterns of rifles that appeared. I very soon satisfied myself of the superiority of the Maynard and urged its adoption by the club of which I was a member. My proposition was at first received with ominous shakes of the head and suppressed sneers; but time and repeated trials proved the truth of my assertions in regard to its powers, and in less than six months every member of the Club except two, had provided himself with a Maynard rifle. Forty rods was then the standard range for every club, and constant practice soon developed the powers of men and weapons, and inspired the feeling of confidence which can only come from familiar use.

In the next adjoining town, about six miles distant, was another rifle club comprising some twenty members, who adherred to the old muzzle-loading target rifle and affected to look with scorn upon our association, which they designated as the "pop-gun club." They never omitted an opportunity for good natured banter, and on two or three occasions, different members of our club were seriously remonstrated with upon the folly of using such playthings at a time when it was really a matter of public moment to encourage a love for the use of arms which could be turned to account. It was idle to attempt to convince them that they did not know what they were talking about, and our men were getting rather sore under the continued slurs, and longing for an opportunity to prove their metal. At last it came in the most acceptable form. A letter was received from the president of the rival club, informing us that they proposed to have a friendly match between individual members of their own club and as many of ours as were inclined to take part, for a silver cup of the value of $25. He hoped the proposition would be agreeable to us and that our club would be well represented, and "lest you should think that we have the advantage of you in using muzzle-loaders, we offer you the privilege of arranging all the terms of the match."

We replied through our President that we cheerfully acceded to the proposition, and would make our appearance in due time. But we wished for no favors. If our guns were not equal to any that could be produced we were anxious to find it out, that we might provide ourselves with the best. We begged them, therefore, to arrange the match to suit themselves, and let us know when they were ready. In a few days came the reply that the terms had been arranged as follows: Distance 220 yards (40 rods). The competitors to be seated and fire from a fixed muzzle and elbow rest. Any rifle might be used, but no telescope sights, and no telescope to be allowed on the field, and no signalling of shots, so that no man could correct his errors by learning where his previous shots had struck. Each man was to have his own target (designated by a number), the target being a sheet of book board 18 x 20 inches, with a bull's eye 8 inches in diameter. Each man to fire five shots.

Nothing was known in those days of the rules now in vogue, and it will be obvious that the above programme was intended to test the accuracy of the guns rather than the skill of the shooters. The day fixed upon was Oct. 22d. It proved as poor a day for shooting as could well be imagined. Very raw, cold and dark, with a fitful wind blowing in fierce gusts directly across the line of fire. Twenty competitors and a goodly number of spectators assembled on the ground, where our friends had provided a hospitable reception for us, and gave us a cordial welcome. It was so obviously out of the question to do any good shooting in such weather that many were anxious to postpone the match, but the difficulty of coming together again, and the fact that it was "as fair for one as for the other," determined us to go ahead.

Our opponents had rifles made by different men, whose names were then familiar to the ears of sportsmen. Some of them were target rifles, weighing twenty pounds. Others the common sporting rifles of those days, but none of them of large calibre, and all of them using a flat ended picket, which was inserted with a "starter" through the false muzzle, and then pushed gently down till it rested on the powder.

Our guns were all forty calibre Maynards, using a cylindrical bullet of much greater weight than any of those of our opponents, and this, of course, in such a wind was a point in our favor.

The judges—three in number—were posted where they could see the targets, but none else was allowed to go near them.

The names of competitors were called in alphabetical order, and each man in turn seated himself beside the solid oaken table, rested the muzzle of his gun in the notch prepared for it, his side and right elbow resting on the table, and delivered his shot. The roaring of the wind made it impossible to hear the bullet strike the targets, and there was no end to the guesses, speculations and bets that were made in regard to shots by different men who were well known for their skill. At the conclusion the targets were taken possession of by the judges, and carried to a tent which had been pitched for them, to which no one else was admitted till they were ready to announce their decision. The anxiety of those who were waiting was not long protracted. The decisions were made according to the numbers on the targets—the judges not knowing to whom the numbers pertained. The first announcement made was, that out of the whole number of twenty targets, only six had five bullet holes in each. Fourteen of the shooters, therefore, had missed the targets with one or more of their shots. Of the six who had put all their shots in the targets only one had used a muzzle loader, all the rest being members of our club and using Maynard rifles. Only three of the competitors had hit the bull's eye. One of these used a Maynard and had one bull's eye; one used a muzzle loader and made two bull's eyes, and the president of our club with his Maynard had put all his five shots into the bull's eye, and was declared the winner of the cup. It is needless to add that the satisfaction of our men could hardly be concealed, and it became uproarious when the president of the rival club told us at the conclusion of a little speech that there yet remained a ceremony to be performed, which had not been announced in the programmes, and which had been arranged as a joke upon us, but as it had turned upon themselves he thought the least they could do was to accept it in all humility. Whereupon he drew from under the table, and amid roars of laughter, presented to one of his own men, who had made the poorest shots of the day, a vessel, of a kind not usually appropriated to such uses, but which the recipient good naturedly declared would be far more serviceable than a silver cup.

PENETRATION OF RIFLE BALLS.—*Ronceverte, W. Va., Sept. 16th.*—In your last issue is a letter from Mr. Cleveland, of Chicago, speaking of a shot from a 40-calibre Maynard splitting a bear's head.

I saw Capt. Clay, of Wilcox, Pa., make a snap shot at a bear's head, as the brute looked over some briars, on the canal feeder between Drummond's Lake and the canal in the Dismal Swamp, while I was paddling him in a canoe. He fired with a Sharps cavalry carbine paper cartridge, such as were used during the war. He hit the bear between the eyes, but simply cut off a strip of skin as long and wide as one's finger. The bear got away in the canebrake. The bear's head was level, or nearly so.

The angle has much to do with it. I had a Winchester, model 1876, only 27 grains powder, but shot a bear in the right side, about half way down, and out through the left fore shoulder. Again, I have shot a deer running toward me in the breast, and the ball came out beside the back bone, just in front of the tail. Against this I may say I once shot an old buck who was raking the dogs with his horns in a thick laurel patch, with this same Winchester, at about twenty feet range, before he would come down. When an old buck is mad, hardly anything will knock him down.

C. CLAY.

NEW JERSEY—*Newark, Sept. 16th.*—The Frelinghuysen Rifle Association scored a second victory over the Sterling Rifle Association on Tuesday evening, Sept. 9th, on Bayers' range. It was a fine contest, the former winning by an exceedingly close score, that speaks well for both these admirable teams. The following is the score:—

FRELINGHUYSENS.		STERLINGS.	
J. K. Walsh	45	C. Meisel	43
George Zimmer	40	George Ripley	40
George Lytle	43	J. Dorner	41

F. H. GODERS, Sec'y Frelinghuysen R.A.

WASHINGTON, D. C.—On the return of its members from the fall meeting at Creedmoor, the Columbia Rifle Association resumed its weekly shoots for the Harkness gold badge on last Saturday, the 26th ult. Absenteeism brought down the number of contestants to three—"Wimbledon Cup Laird," Dr. Scott, and a young brother of the latter. So far as the light went the day was perfect, but a fish-tail breeze from six o'clock straightened out pennants along the range. Laird seemed in good trim, but carelessly dropped two points through hastily changed elevations during the 800 yards' stage, retiring with 73. The doctor was most unfortunate, three "mags" and a puffed-off "outer" dropping nine points on his tally. Walter Scott, misjudging the gusts, opened with a provoking blackbird, but retrieved his hard luck by pounding the bull for fourteen shots, to the end. At 900 yards all were unfortunate, the Doctor least so, with 71, including two flamingoes and a magpie. Laird's 69, with the red disc showing up only once on the second round, might just as well have been a 74, but a genuine "unaccountable" of the first water on his tenth shot, due perhaps to a defectively patched bullet, brought him to grief. At the 1,000 yards' distance, in the changing light and temperature of sunset, Laird and the Doctor made 73 apiece, rolling up twenty-seven bull's eyes between them. Mr. Laird's total of 215 comprised thirty-nine bull's eyes, five centres and a miss. The scores in detail are as follows:—

C. H. Laird	800	5 5 5 5 4 5 5 5 5 5 5 5 4 5 5—73	215
	900	5 4 5 5 5 5 5 5 5 5 0 5 5 5 5 3—69	
	1,000	5 5 5 5 5 5 5 5 4 5 4 5 5 5 5—73	
Dr. S. I. Scott	800	5 3 3 5 5 5 5 5 2 5 5 3 5 5 5—66	210
	900	5 5 5 4 5 5 5 5 5 5 4 5 5 3 5—71	
	1,000	5 5 5 5 5 5 5 5 5 5 3 5 5 5 5—73	
Walter Scott	800	2 5 5 5 5 5 5 5 5 5 5 5 5 5 5—72	201
	900	3 5 5 5 4 5 5 3 5 5 5 3 5 4 5—67	
	1,000	4 4 5 5 4 5 5 5 4 0 4 4 5 5 3—62

COMING FIXTURE.

Oct 15—Seawanhaka Y C Ocean Match, Center Cup.

STEAMSHIP CITY OF ALEXANDRIA.—Though iron shi building in this country dates back many years, it ca hardly be said to have developed into a national industr until Mr. John Roach put his shoulder to the wheel, an through tireless energy and consummate business ski brought his great yard at Chester to its present con manding position, second to none in the world in its c pacity for turning out complete work, from the smalle to the largest vessels that commerce or war may demand The latest evidence of the handsome work, superior i many respects to anything yet been built on the Clyd which the Chester yard can accomplish, is the recent ad dition to the Alexandre line of Mexican mail steamer The steamship *City of Alexandria*, launched July 9, 187 and just put on the line for active service between Ne York, Havanna and Mexican ports, is no less than 3,0 tons, and presents many features of a new and improve kind over the usual Atlantic mail steamers of the Engli type. She is 333 feet long, 38 feet 6 inches beam, and feet hold proper, or 33 feet deep from hurricane deck; h a "half-brig" rig, with a fair spread of canvas in case accident to her machinery, and a full complement of li boats, life rafts, and life preservers. As our laws a much more strict than the English, the Alexandre steam ships are far more completely fitted with safety app ances than trans-Atlantic vessels. The engines are co pound; cylinders 78 and 42½ inches by 54 inches strok Steam is supplied by four boilers 10 feet long, 14 feet inches diameter. The propeller is 16 feet 3 inches diam ter, and has 25 feet pitch. The engines are a marvel simple, compact and sound construction, the reversin and pumping gear being about the simplest and mo effective we have ever seen on so large a vessel. Stea capstan and windlass, cargo hoists and fire pumps a supplied in a liberal manner to render the handling a the safety of the vessel as perfect as possible. The engi hatch is enclosed by a high iron bulkhead, rising about feet clear of the hurricane deck, and rendering the floo ing of engine or boiler room below an impossibilit The vessel has also the usual number of water-tight com partments below the main deck. In model and wor manship throughout, this steamship has few equals a certainly no superiors. As a seagoing ship she will much more comfortable and economical than the Atlant steamers of British origin. The bows are fine, but wi enough body to rise to a sea, and the run is clear, allo ing a solid body of water to reach the propeller; t counter is of that peculiar and graceful shape characte istic of all the recent vessels built at Chester. But it in her cabin fittings that she excels most from the stan point likely to interest intending passengers. Built f tropical waters, all the staterooms and saloons ha been built on the spar deck, being protected by hi iron bulworks and a wooden waist with large ports abo this, reaching up to the hurricane deck, after the pl adopted in the Pacific mail steamers. This affords lig and ventilation to a degree not obtainable in cabi under deck, while the high sides of the steamer and h model as well, preclude the possibility of being board or washed fore and aft by a sea. The joiner work is William Rowland, and is exquisite in taste and perfe in execution. Such joiner work has never yet been p into anything afloat. The grand stairway, leading fro the saloon on the hurricane deck to the cabins on sp deck, throws the work on the *Bristol* and *Provide* even into the shade, and must be seen to be appreciate All the staterooms are upholstered and furnished in manner equal to a Fifth avenue residence, while t conveniences in the way of wash basins, hot and c water, electric bells, bath rooms, smoking rooms, et cannot be surpassed either in arrangement or in th furnishing. Smoking rooms, bridal chambers, ladi rooms, are all exceedingly large, light and airy, a therefore especially adapted to the trade the vessel w designed for. Second-class passengers are accommodat forward, and have neat staterooms, and no cause complaint as to want of light and air, as their quarte equal those of the first-cass in these respects. The *City of Alexandria* will be commanded by Captain Jo Deaken, the Commodore of the line, and long and fav ably known in the trade. Too much credit cannot given to the Messrs Alexandre for their enterprise making so fine an addition to the iron steamship fl of America, and all who desire to see the rapid resto tion of our flag at sea will find another proof in t *Alexandria* of our ability to build on the Delaware stea ships which surpass in sound construction and luxury appointments those built abroad. For this we m thank the energy and foresight of just such men as Messrs. Alexandre, of New York, and John Roach Son, of Chester. The *City of Alexandria* is now ly at Pier 3, N. R., and will sail next Saturday on her fi trip to Havanna, thence to Progreso, thence to Ca peachy, Frontera and Vera Cruz.

TO AMERICAN YACHTSMEN.—For complete records all yacht races in England, as well as for a great vari of other matter of interest, such as cruises and yacht tales, read *Hunt's Yachting Magazine*, established 18 Can be had of booksellers generally, or direct from H & Co., 119 Church Street, Edgware road, London, E England. Published monthly, one shilling sterling number.—[*Adv.*

ATLANTIC YACHT CLUB.

ANNUAL PENNANT MATCH, SEPTEMBER 17.

It is hard to say what were the reasons for the poor turn out made by the Atlantic Y. C. for their annual pennant race. It was certainly blowing hard from the N. W., and at times the wind came howling down in a spiteful way that raised white caps as far as the eye could reach. But it was an off-shore wind and its whistling went for naught, as with a weather shore over the greater part of the course, the sea amounted to nothing, and the wind was at best a close reef gale, requiring at times watchfulness and care rather more than during one of the customary midsummer drifts. Barring a good soaking from the nasty spray which our broad beamed spanking vessels raise in unmeasured quantity, there was no reason why the full entry should not have shown up at the start. It is not to be supposed that individually considered the members of the A. Y. C. are to be accused of lacking in courage, as we have seen it stated in some of the dailies, but we have an idea that yacht owners know full well the treacherous nature of the ships they sail, though it may be hard to have them acknowledge what is patent to disinterested observers, that our yachts are unfit to sail in a close reef breeze, even though there be no sea to trouble them; unfit not only in model, but in their light summer gear and fittings, and the all too common lack of preparation on board for anything like a trying blow. Had, for example, any of the sloops been caught in some of the puffs with no water to "luff out," with a shoal, a buoy or an adversary close aboard to windward, it would have fared hard with them, and their crews might have had to swim for life, while crockery, carpets and furniture would all have received a black eye to the tune of hundreds of dollars. With this in mind, the wary tars who love the briny and a gale, but whose craft will carry them safely only through the terrors of a June zephyr, did wisely in preferring a cruise below at anchor to the damp fate that might have overtaken them had they attempted to carry sail in an exciting match. On the whole, considering the weaknesses of our usual types of yachts, we cannot carp at the absence of the big fleet we had hoped to see in a fall wind with cabin trunks awash. The few that went over the course found no trouble, but having nothing to sail against, they eased up a trifle and took no more risks than absolutely necessary. A ten ton cutter, snugged down, would have made fine weather of it all day, excepting a wetting from the drift flying, but then a cutter is a different sort of ship from our sloop, and is not given to turning turtle without warning, or to running off her helm at every sea.

Of the four schooners entered *Peerless*, and *Agnes* only came to the scratch. The latter took the lead, after having hauled down a reef in her mainsail in most sailor like style, and was off with double reefed foresail and jib in addition. *Peerless* followed, looking snug with both topmasts housed, single reefed mainsail, whole foresail and jib. This reminds us that it was not many years ago when Mr. Robert Center was actually laughed at for housing topmast aboard the sloop *Bonita* in a blow in Newport harbor. "What is the sense in doing that thing?" "What a lot of extra gear and bother," and similar exclamations were all too common. But to the credit of yachtsmen be it said, that the vessels with standing topmasts are becoming fewer every year, and the fellow who can't get rid of an awkward and useless stick aloft when it has no business there, is rapidly loosing standing among the better class of sailors.

Among the first-class sloops, *Dolphin* was the sole representative for the honors of the day, and went by the judge's steamer, *Dassori*, with two reefs turned into her mainsail and one in the jib. *Lizzie L.* and *Genia* tried under double reefed mainsails, and that hideous and most lubberly expedient of all, a "bobbed jib." We presume the day will come when this clumsy substitute of the shiftless smackman for seamanship proper will disappear, as has his former antipathy to the housing topmast, and since yachtsmen too often take their cue from this class or fore-and-afters, improvements in the shape of handy headsail must await the pleasure of the heroes of the beech boats.

When the little cat boat *Wind* went across the line under whole sail, and a batch of bags to windward, there was a gentle whistle passed around among the spectators aboard the judge's boat, and dire consequences were predicted, which were not long in being fullfilled, for outside the narrows *Wind* capsized, following the example set by *Truant* while still inside Gowanus Basin. Of the race little is to be said beyond that those who went around experienced a most exhilarating sail. The start was flying; the courses, for classes A, B, C, from Bay Ridge around the Spit and lightship and home, class D rounding a stake-boat in Gedney's Channel, and classes E, F and G, returning direct from the Spit buoy. Club allowances, based on mean length, working sails, and cruising time, whatever that may mean. *Peerless* gradually overhauled *Agnes*, and the latter, always most spiritedly sailed, was obliged to come about below the Hospital Ship and make for home, having sprung her foremast, an accident to which our craft with standing head booms and unseaworthy head rig seem especially liable to. So *Peerless* went her way rejoicing, rounded the outer mark, and with the exception of a few boards to clear the *Romer* on the return, had lifted sheets nearly all the way, making the course of forty miles in five hours exactly, and adding another pennant to the hold full of prizes she already possesses. As one of her crew remarked to us: "No use talking, lead in the keel will count." *Dolphin* took one bad knock down, and barely came out of it, *Lizzie L.* shook *Genia*, who then gave up. All the yachts which made the course took champion penants; their times were as under:

SCHOONERS.

	MEAN LENGTH.	ACTUAL TIME. H.	M.	S.
Peerless, J. Roger Neatwell	70 ft. 2½ in	5	00	00

SLOOPS—CLASS C.

Dolphin, J. W. Cooper	49 ft. 1½ in	5	33	42

SLOOPS—CLASS D.

Lizzie, L., J. G. Johnson	43 ft. 9½ in	4	22	50

Orion went out with a spitfire at bowsprit end, about the worst place for it, but probably necessary on account of having her mast way in the eyes. The only small sloop about was the *Elephant*, who, under snug canvas, made fair weather of it even in the worst, showing that so far as the wind was concerned, all hands might have turned out for the race. The *Elephant* cruised about all day, with Mr. C. M. Cordell, Secretary Buffalo Y. C., on board as a guest, and who takes home with him the most favorable impressions concerning her.

EASTERN YACHT CLUB.

The Eastern Yacht Club tried for the third time to sail their handicap race, and for the second time to sail their autumn race in first class, at Swampscott, Sept. 15th. Wind light and variable at start, fading away to a calm at Half-way Rock, followed by moderate easterly wind; course around Half-way and Hardings, 29 miles.

Starters in the autumn race: *Halcyon*, *Latona*, *Foam*, *Fearless*, *Phantom* and *Madcap*; in handicap, same, except *Phantom*. *Intrepid* and *Addie V.* did not start; *Foam* and *Fearless* gave up.

The yachts returned home as follows, the time being up at 5.15: *Halcyon*, 5.35.10; *Phantom*, 5.47; *Latona*, 5.51.9, and *Madcap*, 5.51.50. No race again. If it had been a race, *Halcyon*, *Latona* and *Madcap* would have taken prizes in autumn race, and *Latona*, first, and *Madcap*, second, in handicap.

Another attempt was made on the 16th; course reverse of that sailed previous day. Autumn race; only open to *Foam*, *Halcyon*, *Phantom*, *Madcap* and *Latona*; handicap open to *Latona*, *Madcap*, *Halcyon* and *Foam*.

The club certainly seems to have got the worst luck ever heard of, for at 11 A.M. the wind was blowing hard S. E., accompanied by rain and quite a heavy sea running in; so that it certainly looked like a race this day. *Halcyon* had hauled up for the season, and *Madcap* did not appear.

By agreement a flying start was made as follows: *Phantom*, 11.25.40; *Foam*, 11.27.3; *Latona*, 11.28.50. It was a long leg and a short one to the Graves, and then down to the Hardings. In the sea-way *Foam* held on much better than *Phantom*, and rounded the Graves first, *Phantom* second and *Latona* a good third. Here the wind played its usual trick and died out suddenly and completely, and a dense fog immediately shut out the boats. After an hour or more a light N. E. breeze sprang up, making the long stretch from Hardings to Half-way—which ought to have been free—a dead beat. *Foam* rounded Hardings first, then *Phantom* and *Latona*; but they were out of sight of the judges for a long time, till they appeared off Pig Rocks, *Phantom* a little ahead of *Foam*, which was closely followed by *Latona*. Here they also appeared again in the fog. The judges waited at the finishing point till the time was up, and then left. *Phantom* came in about one hour after the time allotted. The others put into Beverly, knowing it was no use finishing. The feature of these unlucky races has been the fine sailing of *Latona*, which has greatly improved of late, and has beaten *Fearless* every time in real sailing. *Halcyon*, too, has upheld her old reputation. REEF POINT.

THAT STEAM CATAMARAN.—Messrs. Ward & Stanton, of Newburgh, have informed us that they had nothing to do with the construction of the engines for the catamaran recently tried at Poughkeepsie; that they never would countenance any such questionable undertaking. It was not necessary that this firm should deny any responsibility in the matter, for their reputation as able engineers is world-wide, and it was not to be supposed they would be caught by any such a catch-penny affair as a steam catamaran. In our recent criticism upon the same we were particular to state that "we will not for a moment suppose that Messrs. Ward & Stanton, of Newburgh, who are *said* to be furnishing the engines for this new prodigy, take any stock in the affair, other than the precautions necessary to secure payment for their share of the work. It is hardly likely that the talent of a draughting office can be found to be abetting such a questionable piece of engineering." With these words we placed ourselves squarely upon record as absolving Messrs. Ward & Stanton from any responsibility in the matter, and as doubting even whether such able engineers would countenance the scheme at all by building the engines, as we did not have faith in the reports to that effect, and were particular to use the words, "said to be building." We learn with pleasure, therefore, that this firm did not build the engines in question, and that Mr. Stanton refused to have anything to do with the affair from the outset, thereby confirming the high estimate we always had for this firm's engineering ability. It is rather strange that anyone should have construed our very plain language as a reflection upon them, when exactly the contrary meaning was to be conveyed.

A NEW MOTOR.—A private trial of Prof. Wm. P. Trowbridge's new engine and boiler took place near New Haven, September 21st. Since machinery of the ordinary type has been brought to such a pitch of refinement and lightness in the Thorneycroft's and other boats with engines modelled after them, it would seem that there is but little room for still further advance in the way of high piston speed and lightness of structure. In consequence, we believe that attention paid to the boiler will be apt to meet with more encouraging results, and so far as we know, the experiments made by Prof. Trowbridge, formerly of West Point, and now of Columbia College, seem to have verified this assertion. He has reduced the weight of boiler by adopting something of the coil pattern, though an improved form upon the Herreshoff coils, which are open to serious objections on account of their liability to burn out and leak. With so much saved in the way of displacement, explosions impossible, and a very high pressure attainable, with an ample supply of steam, new possibilities in the way of steam propulsion are certain to result, as it was mainly the limit to boiler capacity which has so far set a limit to the speed attainainable. Recent exhaustive experiments on screw propellers made by Thorneycroft in England tend to show that at excessive speeds the resistance no longer increases with the cube of speed, but materially abates, leaving room to hope for yet higher speed than that of 24.3 miles obtained from the fastest torpedo launch built so far, and we await with interest further developments of Prof. Trowbridge's experiments.

LONG ISLAND YACHT CLUB.—The fall races of the club were sailed in New York harbor Sept. 23d. One class for jib and mainsails, and one for cats. Course from a stake-boat off Frank Bates' pier to Robbin's Reef buoy, thence to Fort Lafayette and home. Sail twice over. The *Deane* got away first, but had to resign the lead to the *Saunders*, with *Excelsior* a good third. The tides were worked skilfully on the run to the fort, and she still further increased her lead. With the second round the wind freshened from the N. W., and a close race was made up to the finish. *Saunders*, *Excelsior* and *Deane* were the entries in the first class, *Buttercup* and *Rosy H.* in the second. *Buttercup* gave up. Summary as under:—

	Length.	Actual Time. H. M. S.	Corrected Time. H. M. S.
J. Saunders	21 ft. 10 in.	4 16 00	4 15 42½
Excelsior	21 ft. 10 in.	4 16 30	4 16 30
George B. Deane	21 ft. 10 in.	4 17 35	4 17 50½
Buttercup	14 ft.	" " "	" " "
Rosy H.	18 ft.	1 34 00	1 34 00

Saunders wins in first class; and *Rosy H.*, which only went around the course once, wins in second class.

YONKERS YACHT CLUB.—The first annual regatta of this new yacht club, of Yonkers on the Hudson, was sailed September 20th. Course, from Yonkers to Irvington and return—18 miles; for third class, only to Hastings and return. Starters, sloops *Scud*, A. J. Prime, and *Nellie*, C. A. Gould; cats, *Minnie*, H. L. Garrison; *Excelsior*, Chas. Pearsall; *Gracie*, A. Gould; all of the first class, and *Pinafore*, J. Nesbitt; *Garrison*, Thos. Fearing, of the second class. The third class consisted of skiffs, the *Winema* winning. *Scud* and *Nellie C* were ruled out, and the prize and pennant went to *Minnie* in the first class. The prize in second class went to the *Garrison*.

DORCHESTER YACHT CLUB.—The fifty-third race of this club was sailed Sept. 20th in Dorchester Bay. Wind moderate from E. Open to all yacht clubs. First class, over thirty feet; second class, twenty-five to thirty feet; third class, twenty to twenty-five feet; fourth class, under twenty feet. Courses, seventeen miles for first class, nine and one-half miles for second and third; seven miles for fourth. Flying start, with 5m. grace. *Saxon* led off at gun-fire, followed by *Siren*, *Lillie*, *Enterprise* and *Viking* in the first class, the other classes making close starts all in a bunch. The times made are appended. The race was an excellent one, but devoid of much spirit for want of wind during the earlier part:—

FIRST CLASS.

Name.	Owner	Length. Ft. In.	Actual Time. H. M. S.	Corrected Time. H. M. S.
Viking	S. P. Freeman	36 02	3 05 05	2 25 45
Siren	L. H. Keitty	33 08	3 02 09	2 27 32

Mamie	F. Harlow	27 06	1 54 34	1 25 32
Wait	King & Clark	29 07½	1 55 45	1 29 35

SECOND CLASS KEELS.

Annie	George Martin	25 08	1 57 47	1 30 48
Enel	W. McCormick	28 10	1 58 55	1 32 05
Empress	Blaney & Bailey	26 06	2 03 37	1 34 38

THIRD CLASS CENTRE BOARDS.

Muriel	C. G. Weld	22 06	1 50 17	1 16 56
Fancy	R. Grant, jr.	20 07½	2 02 45	1 27 06
Elf	W. P. Barker	20 04	2 03 40	1 27 39
Queen Mab	D. Wilkins	22 05	2 03 37	1 30 15
Shamrock	Driscoll	21 01	2 06 12	1 31 11

THIRD CLASS KEELS.

Veronica	S. Chamberlin	21 11	1 59 49	1 25 05
Volante	George S. Rice	22 09	2 04 59	1 32 01
Dictator	R. W. Bibber	24 10	2 03 56	1 33 18
Violetta	J. G. Lunding	22 08	2 13 50	1 40 46
Lydia Adams	H. Davenport	23 01½	2 10 51	1 44 29

FOURTH CLASS.

Rocket	B. F. Bass	16 07	1 36 45	1 05 53
Nattie	W. H. Nicholson	16 10	1 38 41	1 06 08
Helen	W. P. Hunt	18 09	1 40 12	1 13 41
Rita	W. B. Richardson	19 08	1 39 03	1 11 49
Wildfire	H. A. Keith	18 02	1 40 50	1 11 55
Dream	C. Bernard	19 03	1 39 45	1 12 08
Unique	J. Stewart, jr.	19 10	1 44 36	1 17 02
Spray	W. C. Taft	17 10	1 58 27	1 29 09

There were two prizes in each class and three in the fourth, all cash, ranging from $15 to $5. *Siren* protested *Viking* on the ground that she had not crossed within her 5m. limit, and consequently should be ruled out. The protest was sustained, and we see no reason why it should not have been. Rules are made to be observed, and if an owner takes it in his own hands to break them he must risk the consequences, and not complain. As we understand the start, five minutes was the limit for the yachts to cross in, and a very reasonable rule it is, which debars others crossing later from being considered in the race. The customary rule allowing yachts to cross when they please, and counting their time, nevertheless, from the expiration of a certain period, is not nearly so productive of a smart and live start as the Dorchester rule, which throws out all not crossing within the specified time. It is well to have a grievance before complaining. But all these troubles about rules, protests and complaints should be done away with by the formation of a Yacht Racing Association, whose word would be authority, and whose code of rules would be uniformly observed at all ports and at all matches. *Bannerette* was smuggled in on a wrong measurement, and was promptly ruled out.

QUINCY YACHT CLUB.—The race for Vice-Com. Nicholson's pennant for third class yachts of the club was sailed Sept. 22d off Hough's Neck. Course, six miles. The result was as under:—

Yacht.	Owner.	Actual Time. H.	M.	S.	Corrected Time. H.	M.	S.
Nattie	W. H. Nicholson	1	25	11	0	58	49
Imp	Geo. C. Adams	1	26	4	0	59	53
Elmer	P. Chubbuck	1	26	20	1	00	47
Dandelion	J. Q. Adams	1	27	06	1	01	34
Dolly Varden	A. B. Cleverly	1	28	20	1	01	58

SOUTH BOSTON YACHT CLUB.—The annual clam bake and union regatta took place September 18th, off the club house. The bake was a success, as a matter of course, and for the racing the club was favored with a young gale from the S. S. W. Courses were the regular club courses, as previously published. *Fearless* carried away her traveller aft: *Banneret* fouled a buoy and lost bowsprit: *Unknown* carried away gaff; *Eugenia* lost topmast: *Annie* got in a mess with her canvas, and *Eva* split her jib, while *Lena* went away with *Startles* bow-

sprit and head gear; *Unique* capsized, and her skipper had a narrow escape from drowning. The rescuing yacht, *Whitewing*, damaging *Unique* in her praiseworthy attempt. The summary is appended :—

FIRST CLASS.

Boat and Owner.	Length. Ft. In.	Actual Time. H. M. S.	Corrected Time. H. M. S.
Lilly, c. b., W. C. Dillingham	30 0	1 20 45	1 17 4
Annie, k., George Martin	28 0	2 45 45	2 16 43
Eva, c. b., B. F. Lambert	26 0	Disabled.	

SECOND CLASS.

Banneret, k., Frank A. Daniels	22 3	.. .. ..	1 12 34
Lena, k., F. T. Clayton	24 0	.. .. ..	1 13 48
Allie, c. b., A. S. Wattles	21 6	1 45 57	1 09 38
Shamrock, c. b., M. J. Driscoll	20 2	.. .. ..	1 11 50
Posy, c. b., H. J. McKee	21 1	.. .. ..	1 12 56
Dictator, k., R. W. Bibber	25 8½	1 48 00	1 14 25
Empress, k., F. H. Blaney	25 6	1 49 00	1 17 28

Whitewing, k., Charcock Bros	25 3	Stopped to rescue.	

THIRD CLASS—CENTRE-BOARDS.

Peri, George Lee	18 6	.. ..	1 2 45
Gipsey, W. E. Kent	18 6	.. ..	1 5 45
Wave Crest, W. R. Prior	18 10	.. ..	1 10 48
Herald, W. B. Smith	19 5	.. ..	1 14 43
Unique, J. Stuart, Jr	19 10	Capsized.	

First prizes in cash go to *Lilly*, *Annie*, *Banneret*, *Allie*, *Peri*, and second prizes to *Lena*, *Shamrock*, *Topsy*, in the shape of useful articles. Judges of the race were: Commodore J. M. Charnock, William Morris, Wm. Reid, Thomas Christian, James Reagan, L. S. Pond, C. T. Haley.

HAVERHILL YACHT CLUB.—The race for the club's champion flag was sailed September 13 on the Merrimack course, from Haverhill bridge to Groveland bridge and return. The result was as appended :—

Name.	Owner.	Cor. Time. H.	M.	S.
Empress	C. Paul	1	4	39
Linnie Mag	A. L. Reed	1	6	53
Abbie M	F. Harris	1	6	55
No Name	J. Heath	1	10	31
Twilight	J. Meadowcraft	1	13	47

The flag was awarded to *Empress*, a protest of *Twilight* not being entertained.

SALEM YACHT CLUB.—The third and deciding race of the championship series of this club was sailed September 13th, and resulted as under, after a fine match in a good breeze from S. E.

FIRST CLASS CENTRE-BOARDS.

Boat.	Owner.	Actual Time. H.	M.	S.	Corrected Time. H.	M.	S.
Leona	Dr. White	3	04	50	1	34	50
Mignon	Dodge & Wallis	2	09	10	1	37	33

SECOND CLASS.

Aurora	Joshua Brown	1	49	50	1	20	15
Oma	A. Liebsch	1	52	05	1	23	34

The prizes were awarded to the *Leona*, first class centreboard, and *Aurora*, second class keel. The other prizes have been taken by the *Dolphin*, *Coquette* and *Tulip*, in their respective classes.

NEW BEDFORD YACHT CLUB.—The second race for the Commodore Haines Cup was sailed in New Bedford harbor September 18th, in a stiff S. W. wind. Course 16 miles. Won by *Metric* in 2 h. 57 m. 2 s.

BEVERLY YACHT CLUB.—The 51st regatta of the club was sailed Sept 13th off Nahant. A champion pennant to the first yachts, without time allowance in second and third classes, and a second prize if more than two boats start. In the second class *Hoiden* and *Fancy* had each won a race for the champion pennant, and *Psyche* and *Nora* in the third class. Start was a flying one; course from judges' yacht, leaving Whistling buoy, off the Graves, on the starboard hand, Red buoy No. 2, off Winthrop Head, on the starboard, and back to judges' yacht. For second and third classes, to buoy No. 2, off Winthrop Head, and return. The result was as under :—

FIRST CLASS.

Name.	Owner.	Length. Ft In.	Corrected Time. H. M. S.
Eva	W. T. Lambert	25 04	2 01 43
Muriel	C. G. Weld	21 05	2 01 57

SECOND CLASS.

Peri	George Lee	18 06	1	23	31
Fancy	P. Grant, Jr	19 01	1	29	12
Ida	F. F. Emery, jr	18 02	1	34	54
Josie	C. H. Minot, Jr	17 07	1	37	39

Rita	H. B. Richardson	18 09	Not taken		

THIRD CLASS.

Bessie	G. P. Upham, jr	16 09	1	34	43
Psyche	R. D. Sears, Jr	17 00	1	37	21
Bluebell	W. L. Jeffries	16 06	1	40	28
Mirage	H. F. Sears	17 00	1	44	10
Nora	R. P. Snelling	16 04	Not taken		
Avis	E. M. Harpell	16 07	Not taken		

RACING AT SALISBURY POINT.—The union regatta at Salisbury Point, Newburyport, Mass., was sailed Sept. 20th. Three classes; course, eight miles. *Blanche*, L. A. Horton, won in first class. Second and third classes were for rowboats and skiffs.

THE CATBOAT CHAMPIONSHIP.—A match, open to all catboats twenty feet and under in Boston waters, was sailed Sept. 19th, with seven entries, for a sweepstakes of $5 a boat, to decide the claims to being considered the fastest Boston yacht of her class. Course was No. 1 of South Boston Y. C.; wind light from N.N.W. at first, but stiffened up after, going round to S. E. Working sails only, and fixed ballast. The *Herald* got away first, *Seamew* next, followed by *Rita*, *Peri*, *Fancy*, *Wave Crest* and *Rocket*. *Fancy* put in some fine sailing, for she overhauled boat after boat, and took the lead, finishing first. The purse, however, went to *Rocket* on time allowance. Judges, Messrs. J. Winniatt and Frank Bibber; referee, William L. Jefferies. The times were as follows :—

Boat.	Owner.	Corrected time. H.	M.	S.
Fancy	P. Grant	2	31	54
Herald	W. B. Smith	2	32	02
Rocket	B. F. Bass	2	30	06
Wave Crest	H. Hutchings	2	36	10
Pere	George Lee	2	37	04
Rata	Richardson	2	38	40
Seamew		2	40	09

THE OLD STORY.—The fall regatta of the Chicago Y. C., set down for Sept. 13th, came to naught in spite of an ample list of entries. It was blowing stiff off shore W. S. W., and none of the craft came to time, all hands proferring the congenial neighborhood of the club houses to a little dusting. The race was postponed, and the jolly fresh-water tars felt relieved in consequence.

YACHTS DESIGNED.—As will be seen from our advertising columns, Mr. Philip Elsworth proposes to model and design yachts for the public generally. It is hardly necessary to point to his well-known achievements in the *Comet*, *Elephant* and other fast craft, for evidence of his capacities in this direction, as the speed of his vessels is well known wherever races are sailed. Parties desiring fast and able yachts can do no better than apply to him.

VOYAGING SOUTH.—Dr. C. A. Neide, of Duanesburgh, N. Y., who, in his 13-feet boat *Mohawk*, left Schenectady, N. Y., on the 13th inst., bound for Southern waters *via* Hudson River, Delaware and Raritan Canal, etc., arrived in this city on Saturday A. M., where he will spend a few days, and then proceed to Rockaway, L. I., for a short visit before starting for Philadelphia. The Doctor was accompanied as far as this city by Mr. Wm. E. Johnson, of Union College, in his canvas canoe *Grace*.

CLEVELAND (OHIO) YACHTING ASSOCIATION.—The annual regatta of this flourishing club was sailed September 10th, at Cleveland in a strong gaff-topsail breeze from N. W. Course from line drawn from judge's boat to East Pier, to stake boat off Wilson Avenue, thence to stake boat five miles off the piers, thence around "Crib," and home; fifteen miles. Fying start with fifteen minutes grace. One hand to every five feet of length; no shifting of ballast, and no restriction to sails. Six prizes were offered, as many local boats were expected to enter. Com. Gardner and Vice-Com. Merchant were aboard the judge's yacht *Rosaline*, and started the race promptly on time. The whole fleet made an excellent start in the following order: *Unique*, *Lady Ida*, *Humming Bird*, *Camilla*, *Ida*, *Nettie*, *Vixen*, *Silver Spray*, and *Kittie Walsh*. *Vixen* took the lead around the first mark, with *Ida* second and the *Bird* third, after a four mile beat to windward. With a quartering wind the fleet made for the second mark, about four miles distance. It was a case of kites with the big ones, but the rest had all they wanted under lower sails. *Vixen* rounded first, with *Ida* second and *Bird* close aboard. Out to the Crib it was a hot fight between the leaders, who by this time had parted company with the ruck. *Vixen* still held her lead, and was away first on the home stretch; *Ida* second. The finish was reached as under :—

	H.	M.	S.
Vixen (first prize)	2	33	48
Ida, of Put-in Bay, (second prize)	2	36	21
Humming Bird (third prize)	2	35	50
Unique (fourth prize)	2	46	57
Lady Ida (fifth prize)	2	57	25
Silver Spray (sixth prize)	2	57	05
Camilla	Distanced.		
Kitty Walsh	Distanced.		
Nettie	Distanced.		

Unique carried away gaff-topsail sheets and bobstays, and *Camilla*, a fine cruising schooner of thirty-five feet, entered to make up the lists and was not driven. The winner was sailed by Captain H. C. Rettger in a manner that left no room for criticism, and it was due to some extent to her management that she held her own so well with the larger craft. It will be noticed that the Association has adopted three very sensible sailing rules, as mentioned above, and with discernment enough to abolish sand bags, sail mixed rig races, and no limit to sails, but limit to live ballast in the shape of crew, the Association ought to prosper fast and become one of the most popular on the lakes. The *Ida*, of Put-in-Bay, now holds the champion pennant of Lake Erie, having won from *Restless*, of Sandusky, the former holder.

SOUTHERN YACHT CLUB.—A match race was sailed September 8th between *Zoe* and *La Belle*, both cabin yachts. Wind light; course twice around the triangular club course; distance ten miles. *Zoe* took the lead, but when on the wind *La Belle* went to the fore, only to be repassed during second round by Com. O'Brien, who sailed the *Zoe*. The race went to the latter. Time, 2h. 17m. 20s.

The regular regatta of the Southern Yacht Club for the Challenge Cup, which was won in spring by *Albertina*, was sailed September 11th. Wind blowing fresh. Course, three times around triangular club course—fifteen miles. Three starters came to the line—*Albertina*, *Cydnus* and *Limnas*—all of the first-class. *Cydnus*, sailed by E. Harris, her owner, took the lead, and was never headed. Our correspondent ascribes this to the alterations recently made in her model and rig, which are greatly to the credit of her owner. The victory was rather a surprise to all concerned, as *Albertina* (the old *Susie S.*, ex-*Bella*) was considered about invincible; but as she dropped some of her sand bags to windward she capsized, and her crew followed the sand bags into Lake Pantchartrain. *Limnas* took a bad knock down on the second round, and came to anchor to bail out. The *Cydnus* was built in New Orleans by O. Bocage, a colored pupil of J. Mahoney, a builder of considerable local repute.

ROYAL NOVA SCOTIA YACHT SQUADRON.—While the would-be spectators at the Smith-Ross sculling race were grumbling on Saturday, Aug. 30th, at the strong wind blowing from the North, the yachtsmen were rejoicing at the prospect of a good day's sail for the prize presented by the Honorary Secretary. Mr. J. E. Butler, on board his sloop *Hebe*, officiated as officer of the day. The wind was strong from North, and it was a dead run to Mar's Rock, thence a free reach to Thrum Cap, and a dead beat back. The entries were :—

Name.	Rig.	Tonnage.	Owner.
Arnona	Sloop	3	Rev. R. Morrison.
Psyche	Sloop	7	W. H. Brookfield.
Seafoam	Schooner	27	Lt. C. C. Carter, R. E.
Muta	Sloop	5	Lt. A. L. M. Dunlop, R. A.
Ina	Sloop	3	F. S. West.
Osprey	Schooner	8	Capt. Cantley, 97th Regt
Phantom	Sloop	7	W. H. Troop.
Kate	Sloop	8	W. B. McSweeney.
Lily	Sloop	5	W. H. Weeks, M. D.
Isabel	Sloop	6	Capt. W. E. Welch.

All started except *Kate* and *Isabel*. The most noticeable feature of the day was the fine sailing of *Psyche*, which went quite in her old form, making a capital start and leading all the way round. *Seafoam* sailed well, though not up to what she can do. She reached along fast between Mar's and Thrum, and on the beat back, when the heaviest burst of the day came down on the fleet, she launched away from *Phantom* and company hand over fist, closing the gap between herself and *Psyche*, wind softened again, and the little clipper drew steadily in the smoother water. *Phantom* led *S* as far as Thrum, and got the schooner under her first board, but in the weight of wind and rain rushed down, had to lower topsail, drop the peak mainsail and finally lower the sail itself, and conse got left hopelessly astern, though she maintained of her own division and came in third boat. *Ma* with a chapter of accidents; her topsail would n or come down; then jib sheets carried away, bloc all, and the sail flapped wildly about. Off Point I the tiller broke short off. This let *Lily* up a lon and by the time a walking-stick had been trans into a jury tiller, the Dartmouth five tonner ha lished a commanding lead. *Lily*, however, in her place by standing too far to the eastward MacNab's, and crossed just thirty seconds ahead after the prettiest bit of racing of the day.

The gun was fired at 1.50 p. m., and the time yachts as given below :

	Start. H. M. S.	Finish. H. M. S.		Start. H. M. S.
Psyche	1 50 30	4 30 20	Phantom	1 53 32
Arnona	1 50 32	——	Muta	1 54 15
Ina	1 52 00	5 12 45	Lily	1 56 00
Seafoam	1 53 00	4 43 30	Osprey	1 57 00

Psyche took first prize without allowance; took second, and *Lily* third by 1m. 15s. off *Muta*.

TORONTO REGATTA.—During the visit of the G General and Princess Louise to Toronto, a series ing races were held September 13th, in addition yacht matches previously reported in our column first race was for four-oared shells. The Toronto start, leaving the race to the Peterboroughs, Lea Hamilton, and Argonauts of Toronto, the latte very heavy boat. Leanders took the lead, but Union Station were passed by the Argonauts. mer turned first, then both were driven out course by a steamer. The Leanders crossed the winning in 6. 16. 30; Argonauts, 6. 17. 18. th boroughs being a good third. The races for si double sculls were postponed owing to the late brilliant reception was tendered the visitors du day, and large crowds were in attendance, th being out in full force to witness the rowing race

HONEY BEES.—We call the especial attentio readers to the advertisement of Mrs. Cotton in column under this head. Mrs. Cotton is one of successful Bee-keepers.—*Adv.*

Oct. 13-14—Hamilton.—Gentlemen of Ireland vs. Hamil
Oct. 15-16—Guelph.—Gentlemen of Ireland vs. Guelph.
Oct. 18-20—Coburg.—Gentlemen of Ireland vs. Coburg.
Oct. 22-23—Detroit.—Gentlemen of Ireland vs. Peninsu

GENTLEMAN OF IRELAND vs. EIGHTEEN OF S LAND.—The great international match between team and the Staten Islanders was played on I Saturday last at Staten Island; and again th Erin swept all before them, winning by eleven they played twelve men. The club's comm neglected nothing to put the grounds in perf and in consequence, the hundreds of spectators the stand and benches were as cheerful and as co as they could be. The arrangements were e marque being provided for ladies, who were free, and a special place under the eaves of house was set aside for the associates of the large tent occupied by one of New York's bes was erected on the south end of the ground, thing was systematically done to make the ma cess. The weather was delightful on both day wicket which Lane, the club's excellent profes prepared with great care, played well from star "There is not in the entire world," said one o team, "another cricket ground like this. W attractions such ar I have never even dreamed nection with athletic sports;" and this truly story. The new grand stand which is built race, back of the lawn tenis courts, and to th the ladies archery grounds, commands one of marine views in the world; and when looking the field below, framed in a quadrangle of e spectators, bordered by the boundary flags, gay colors, the turf dotted with cricketers in flannel suits, the scene isreally exquisitely beauti hilarating. We, ourselves, even felt the cha we stretched out our legs, we looked back to our youth, and remembered once having been for sitting on the wicket.

The game was begun at 12 M.; the home t won the toss, went to the bat, against the Exham and Hamilton. Both breathed destruc was the inning's total. At 2.50 P. M., the Ge Ireland commenced what turned out to be, inning. Although it yilded 135, it must be s fielding of the home team did not support th ling the Irishmen had to play against. A the batting of the visitors was brilliant, the being particularly well timed and strong, b then a disposition to swipe would crop out, ba bably by the presence of several Rip Van W were stationed, as Mr. Dickens would say, in t attitude," and who only woke up to "jump as the ball whistled through their legs.

On Saturday the game was not resumed The Islanders then began a very different i their first. Harvey and Adams doing good their side, the former gentleman obtained 32 a fine big hit, and some rattling drives; an playing in splendid form; 102 was gained be of the last wicket, thus saving defeat by one ru

These were quickly obtained, however, and the was over. The full score is given below :—

GENTLEMEN OF IRELAND VS. EIGHTEEN OF CENTRAL NEW YORK.—The second match of the Irish team's tour was played at Newell Park, Syracuse, N. Y., on September 16th, and resulted in a one innings' victory for the visitors. We call special attention to the wonderful bowling of Hamilton in the first innings; 12 wickets for 2 runs is seldom recorded, even against poor players; and it is well known that many on the side of New York have really good bats. —The match at Staten Island, to-morrow, promises to be one of the finest games ever played in the vicinity of New York.

THE SIX DAYS' WALK.

THE thirteen competitors in the six days' go-as-you-please match for the Astley belt, $6,500 stake money and $39,000 gate money, were, with the exception of Jackson, all more or less known to the pedestrian public. The fame of Weston, the father of American pedestrianism, has made its way—go-as-you-please—over the world, and will in all probability find its way into the encyclopedias. His greatest alleged performance was in the last London Astley belt walk, where he was credited with a score of 550 miles in 142 hours. Rowell, the "plucky little Englishman," as the reporters have delighted to call him, won the belt in the contest for it in this city, last March, making 500 miles in the six days. John Ennis has been known as a pedestrian since 1875, and was second in the March race, with 475 miles. Hazael, the English runner, was third in the London walk, with 473 miles. Guyon is well known at the West. He won the walk last May for the championship of the United States, square heel and toe, 480 miles in 142h. 14m. 5s. Panchot made 480 miles and one lap, last April, and Krohne 455 in the same race, afterwards in the May walk, scoring 461 miles. Merritt is credited with 400 miles in six days. Federmeyer is the "Wheelbarrow Man" who trundled a wheelbarrow across the continent in 216 days. Hart, a negro, has made 425 miles in six days. Norman Taylor, known as the "Pie-eater," is famous as a 20-mile runner. Dutcher, who dropped out of the walk at 10 o'clock, Monday morning, is said to have scored 412 miles in a similar walk.

The most remarkable feature of the walk last week was the number of men who accomplished the task of making the requisite number of miles to insure them a share of the receipts, namely 450. The sudden advance of pedestrianism is in no other wise better demonstrated than by this sudden coming forward of eight men who demonstrated their power to walk within 142 hours, from 450 to 530 miles. These trials of speed and endurance have an interest for the student of physical man, for they are showing us possibilities which have not before been dreamed of. To be sure all this is rather late in the world's history. Had our forefathers, before the days of railroads and steamboats, encouraged long-distance pedestrian trials, the resulting discipline might have been of some practical utility in travel. But nowadays if a man wishes to go 530 miles in a week, he takes a railroad train or a steamboat, unless he is going out of all civilization; in that case he selects an Indian guide and a mule. While, then, these long distance pedestrians serve a useful purpose, perhaps, just as a circus acrobat does in his way, they are unfortunately born out of due time; they should have lived 500 years ago; they are like a fire company puffing up after the fire is all over; like a politician mounting the rostrum after the people have all gone home.

The various modes of locomotion afforded a curious study. Rowell caught up with the belt on a jog, or dog trot; Merritt's walk was a slouchy swing, which he varied by fleet, short-distance runs; Hazael "humped;" Hart ably sustained the "cake walk" fame of his race, by showing the most graceful carriage of any competitor on the track; Guyon, the fifth man, at first won much applause for his step, but toward the end he was too badly used up to exhibit much of anything but pain; Weston went in every way, walk, run, and monkey-shine; Ennis has always been admired for his erect, easy walk, and Dutcher, while he did walk, was a model of easy graceful carriage.

The walk was not free from the disgraceful and brutalizing features which we dwelt upon in these columns, at the time of the other contests of a like nature. The scenes at the garden were such as to disgust decent people.

And we are promised another dose of it next week. Nor will that be the last. If our readers do not fully understand "why they do it," these financial figures will explain all about it: Receipts, $73,923; disbursements, percentage to managers, etc., $34,923; left for division, $39,000. This was apportioned as follows: Rowell, $19,500; Merritt, $7,312.50; Hazael, $4,192.50; Hart, $2,730; Guyon, $1,950; Weston, $1,365; Ennis, 1,072.50; Krohne, $577.50.

ARCHERY.

EASTERN ARCHERY ASSOCIATION.

The first annual meeting of the Eastern Archery Association was successfully inaugurated at Beacon Park, Boston, Sept. 25th and 26th. The sport was witnessed by a fairly large attendance of spectators, including numerous representatives of the fair sex. There were several fine equipages on the grounds, and their occupants, as well as the other ladies and gentlemen present, manifested great interest in the novel exhibition. The time assigned for beginning the sport was 10 o'clock A. M., but it was quite an hour and a half later before the bell was rung for the contestants to appear in the first matches. The scene, at the moment the contestants were called to the shooting points, was a particularly attractive one, the gaily painted targets, appearance of bustle and activity to those about to participate in the matches, the vari-colored uniform of the lady competitors, and bright toilets of their sisters in the grand stand and the carriages about the enclosure, forming a pleasing spectacle. The competition for association medals was first on the card, and consisting of a match for gentlemen and another for ladies, had "for contestants members of the following clubs; Brooklyn Archery Club, Brooklyn, N. Y., cardinal and white; Pequosset Archers, Watertown, Mass., royal purple; Waltham Archery Club, Waltham, Mass., gold; West Newton Archers, West Newton, Mass., cardinal; Toxophilites, Lewiston, Maine, green; Cedarwoods, Poughkeepsie, N. Y., green and blue; Ellenville Archery Club, Ellenville, N. Y., blue; Robin Hood Archery Club, Nyack, N. Y, colors not learned; Oritani Archers, Hackensack, N. J.

In the competition for association medals, Mr. E. R. Dwight of the Pequosset Archers, carried off the honors, the prize consisting of a fine gold badge, with the word "Champion," engraved on a ground work, representing a target with three arrows crossed upon it, and the monogram, "E. A. A.," suspended from it; also one dozen Maurice Thompson finest snakewood footed club arrows, presented by E. J. Horsman. The second prize, consisting of a fine pair of gold-plated acme club skates, was won by Mr. H. Ennis, of the Cedarwood Club, Poughkeepsie. Third prize, consisting of a Horsman bow, pheasant and lance-wood, was taken by Mr. J. O. Blake, of the Brooklyn Archey Club. The fourth was won by Mr. J. C. Johnston, also of the Brooklyn Club, and consisted of a fine clock. The fifth and sixth prizes were won by Mr. Holberton and Mr. Dudley, respectively, and consisted of a Horsman Leminwood bow and a half-dozen bow strings. Mr. Holbertan used one of the Conroy, Bissett and Malleson split bamboo bows.

The next match in order was the Gentleman's Handicap match, consisting of thirty arrows, at thirty yards, and Ladies Handicap match, consisting of thirty arrows at twenty yards. In the gentleman's match, the honors were carried off by Mr. J. O. Blake, with a score of 202; and in the ladies match, by Miss M. D. Clark, with the score of 168.

The team matches were considered the principal feature of the occasion. Protests were entered against the Oritani Archers shooting as a team, as it was generally thought that their team consisted of gentlemen not regularly connected with the club, inasmuch as the five gentleman representing the same, lived at such great distances from each other, one of the gentleman residing in Pennsylvania, another in Flushing, another at Peekskill, another at Sing Sing, and but one at Hackensack, N. J., where the club is supposed to be located. The protest will be acted upon at a meeting of the Association, where their rights to shoot as a team will be discussed and settled. In the team match, the Brooklyn team took first prize, consisting of four Horsman Bufwood, backed with lance bows; second prize, consisting of four half-dozen Horsman's club arrows, was won by the Cedarwoods of Poughkeepsie. The third and fourth prizes of regulation targets, were won respectively, by the Watertown and Hackensack clubs, while the Lewiston Club won the club score book. Two teams of ladies only competed for the prizes in the Ladies Team matches, the Watertown Club winning the first prize, consisting of three fine "prize" bows, presented by Conroy, Bissett & Malleson, New York; and the West Newton Club the second, consisting of one and a half dozen finest footed arrows, also from Conroy, Bissett & Malleson. The Championess medal was won by Mrs. Silsbee, of Watertown, Mass., who also received one dozen Horsman finest snakewood footed arrows. The ladies' medal is of just the same design as the gentleman's, the word "Championess" being substituted. The second prize was won by Miss Allen, of West Newton, a pair of gold plated skates; Miss Walker carrying away with a prize bow; Mrs. Shackford, same residence, the fourth, with a pair of vases; Miss Plimpton obtaining a bow; Miss Clark a score book, and Miss Keith, all of West Newton, an Archers hand book.

Great credit is due Mr. A. S. Brownell, President of the Association, for the satisfactory manner in which the meeting was conducted; he personally attended to all the details, and spared no pains or expense to make it a success.

Below we give the official scores of the two days:

Association Match for Gentlemen (Double American Round).

GENTLEMEN'S HANDICAP MATCH, 30 ARROWS AT 30 YARDS.—The handicap matches followed the association medal competitions, and had numerous entries. Archers having made the six highest scores in the competition for the medals, were handicapped as follows: Highest score 30 per cent; second, 25; third, 20; fourth, 15; fifth, 10; and sixth, 5. The conditions for the gentlemen's match were 30 arrows at 30 yards, and the three leading winners were Messrs. Blake, Brandreth, and Dudley, in the order named. The prizes were two prize bows, two quivers of arrows, and a book of instructions in archery. The result :—

Mrs. J. Shackford	22	90	15	77
Miss B. Keith	12	50	None.	50

CONSOLATION AND EXTRA MATCHES.—The Consolation and Gentlemen's extra matches were next shot off, those in the first being for non-winners alone, excepting for base making most misses. The score made by Miss Banks, of Waltham, was 122, and by Miss Keith, of West Newton, 83. The distance was 30 yards, with 24 arrows, and the prizes were a piece of silverware and self lancewood bow respectively.

The gentlemen shot 30 arrows, at 30 yards, and a bow was won by Mr. Kingsbury, a half-dozen arrows by Mr. Mower, and a cribbage board by Mr. Davidson. Mr. Mower scored 28 hits; Coffin, 21; Hayward and Shackford, 19; Dickey, 16; Chase, 20; Allen, 21; Reade, 18; Constable, 23; Davidson, 28; Eager, 24; Worcester, 16; Horr, 17; Beecher, 26; Kingsbury, 24.

The extra match was with 48 arrows at 80 yards, and a bow was won by Lawrence, by a score of 5 hits and 25 value, receiving a prize bow. Brownell came next with a score of 4—18, and enjoyed an imperial bow as his booty. Woodbury followed with 5—15 and a regulation target, and Johnston and Brandreth followed, each receiving archery literature.

In the first match of the meet prizes were given for most "golds," "reds," etc., and they have been awarded as follows :—

Gentlemen's score—Johnston, 8 gold: Holberton, 19 red; Johnston, 31 blue; Brandreth, 26 black; S. P. Abbott, 23 white; Sprague, 92 misses. Ennis was nearly tied with Holberton.

Ladies' Score—Miss Allen, 8 gold; Miss Walker, 17 red; Mrs. Silsbee, 26 blue; Miss Allen, 18 black and 20 white; and Miss Keith, 70 misses.

AN ARCHERY CLUB FOR NEW YORK CITY.—In view of the success of the Boston meeting of the Eastern Archery Association, we would invite all resident New Yorkers who are desirous of forming a club this fall, in this city, to forward their names and addresses to FOREST AND STREAM, so that a meeting may be called and steps taken to organize. Several practical archers have already signified their intention of joining such a club, but all interested are invited to come in.

OHIO TOURNAMENT.—The Ohio State Archery Association's annual meeting is held at the Zoological Garden, Cincinnati, to-day and to-morrow. We shall publish the scores next week.

HIGHLAND PARK VS. BUFFALO.—The second 60-yards' range, telegraphic match, between the teams of the Highland Park Archers and Buffalo Toxophilites was shot on the 16th inst. by the former, and on the 19th inst. by the latter. The first match was won by Highland Park, 1,437 to 1,330. In the present match, Mr. John B. Sage acted as umpire for Buffalo; Mr. George Smith for Highland Park. Score :—

BESTOR'S COCKER SPANIEL KENNEL

Owing to contemplated changes (involving possible inconvenience in keeping them) I offer my ENTIRE KENNEL OF COCKER SPANIELS FOR SALE, separately or together. They are believed to be the finest specimens in America, and have been largely profitable and their ownership pleasurable to me. The stock is well known and properly vouched for by leading sportsmen and the press. The kennel comprises:

1st. The imported dog Snip, whelped May, 1873; famed in the stud, on the bench and the field; retrieves; price, $100.

2d. The bitch Fairy, she by imported Snip, out of imported Juliette; whelped May 25th, 1877; partially broke; price, $75.

3d. The bitch Roxy, whelped Aug. 1st, 1873; by imported Snip, out of Fairy; not broke to field, but very intelligent, very handsome, and bound to make a reputation in the kennel; price, $50.

4th. The dog pup Sonico, whelped July 20, 1879; out of Fairy, by imported Snip; price, $50.

5th. The bitch Sally, whelped July 20, 1879; out of Fairy, by imported Snip; price, $25.

Or to one purchaser, together with good will and all future demands which might come to me, $275. Terms cash.

In good hands and well advertised, the orders in a single season will more than refund costs.

These fine specimens are nearly alike in color (liver and white), are beautifully marked, very affectionate disposition, and are in fine health.

Circulars on application, and dogs may be seen any day.

S. J. BESTOR.
Oct.—e.o.t. Hartford, Conn.

BEAGLES.—A few superior puppies for sale, bred from imported stock. Bitches served by prize beagle, Rambler. Address MONTCLAIR HUNT, Montclair, N. J. Oct 2,1t

A box of 50 sent on receipt of 75 cents by mail

THE CARVER TARGET BALL.
[CAVEAT FILED.]
GREENVILLE, PA., May 26, 1879.

DEAR SIR:—We take pleasure in notifying all admirers of Target and Ball Shooting that we have introduced a COMPOSITION TARGET BALL for Trap Shooting that is perfect in every particular. It has been thoroughly tested by many of the leading Sportsmen, and pronounced by all as the only perfect and unobjectionable Target Ball in existence. This Ball is very uniform in weight and standard size, and when broken leaves no *debris*, but will EVAPORATE in five days and acts as a FERTILIZER. They can be used on Lawns, Gardens, Fields or Parks, thereby doing away with the danger and annoyance consequent in using Glass Balls. We are now prepared to fill orders. Drafts or P. O. Order must accompany all orders. Organized clubs are invited to send for Sample Box, (25 balls) and Circular free. J. H. WAUGH, Inventor
PRICE LIST—Per thousand, $12. No charge for packages. Address

POOLER & JONES'

Patent Boss

CARTRIDGE HOLDERS AND BELTS.

This Holder is for carrying Paper Shells, crimped or end turned down.

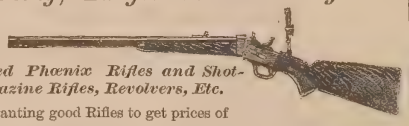
This Holder is for carrying Brass or Paper Shells without being crimped. Has side cut away, showing Wad Supporter.

The only practica. cartridge holder in use. Will carry brass cartridges, and positively prevent wads from starting on shot. Suitable for either paper or brass shells. These cartridge holders can be easily attached to any hunting vest or coat front. It is impossible to lose any cartridges from the Holders. Splendid Water-Proof Patent Vests, with 40 Cartridge Holders attached to front, $6.00. The belts can be perfectly adjusted to fit either a slim or large man. Will deliver to any address, and prepay postage on belts or any number of loose holders on receipt of the following prices: Spring brass cartridge holders, per dozen, $1.25; adjustable belts with 30 spring brass holders, complete, $4. Elegant nickel-plated holders and buckles, the gayest and nicest belt in use, $5. We are now manufacturing a Superior Brass Rifle Cartridge Holder and Belt. The belt has 50 to 60 Holders attached, and will carry any sized Rifle Cartridge from 40 to 45 calibre. Adjustable Russett Leather Belts, with 50 Rifle Holders attached, complete, $4. Loose Rifle Cartridge Holders, per dozen, $1. We solicit correspondence from dealers. All our belts are made of the finest Russet leather. Cash must accompany orders. Send money by registered letter on Serena, Ill., or P. O. money order on Ottawa, Ill. Send 10 cents stamp for sample holder.

Address all orders to POOLER & JONES, SERENA, LaSALLE CO., ILL.

MAYNARD RIFLES AND SHOT GUNS.

Our New Off-Hand Rifle.



For Hunting and Target Practice at all ranges the "Maynard" more completely supplies the wants of hunters and sportsmen generally, than any other rifle in the world, as many barrels can be used on one stock, and for ACCURACY, CONVENIENCE and Durability is not excelled. The following are some of the scores recently made at Walnut Hill by members of the Mass. Rifle Asso.:—J. N. Frye, President, in all-comers match; 15 shots; 200 yards; without cleaning: 5 4 5 4 5 5 5 5 5 5 4 4 5 5—71. L. L. Hubbard, Executive Officer, 200 yards; off hand: 4 5 5 5 5 5 5 5 5—49. O. M. Jewell, 300 yards: off hand: 5 4 5 5 5 5—34. O. M. Jewell, 300 yds.: off hand: 5 5 5 5 5 5—35.

WHITNEY ARMS COMPANY, NEW HAVEN.

Thread-Wound, Long-Range Cartridge Shot Cases.

(S. WHITE PAINE PATENTS,)

For Muzzle-Loading and Breech-Loading Cylindrical and Choke-Bore Shot Guns.

Any desired closeness of pattern made at 50, 70 and 90 yards, with penetration superior to that made by the best choke-bores at 40 yards.

INDISPENSIBLE TO HUNTERS OF ALMOST EVERY KIND OF GAME.

Ten and Twelve Gauge now ready.

This Cartridge consists of two semi-cylindrical cases, wound with thread, containing one ounce of shot, heavy in front and light in rear, to keep it from turning. When the thread is all unwound by the friction of the air, the cases fly apart, and the shot scatters.

Price, $5 00 per Hundred. 20 sent post-paid for $1 00. Address

THE PARKER GUN.

PARKER BROS., Meriden, Conn. New York Show Rooms, 97 CHAMBERS ST.

The Parker Gun Again Victorious!

In the Tournament just closed at the St. Paul Driving Park, 30 prizes in the regular shoots and the sweeps following them were won by sportsmen using the Parker Gun.

The Rochester (N. Y.) *Democrat and Chronicle*, of recent date, in referring to the remarkable execution of these guns at their tournament, in which the Parker Gun won the Gold Medal for the Best Average, says: "The Parker Gun is one of the finest ever admired by a true sportsman, and of late years it has been generally used where before nothing but those of European make would be thought of. This company has successfully succeeded in making their own steel barrels, which, together with other novel and important improvements, make their guns the finest yet introduced among lovers of field and forest sports. Dr. Carver, the celebrated American marksman, used his gun in his late exhibition before the Prince of Wales, and recommends it highly as a fowling piece, as do also Ira Paine and other noted shots.

Sportsmen's Routes.

"THE FISHING LINE."
TAKE THE
Grand Rapids & Indiana R.R.
Mackinaw, Grand Rapids and Cincinnati Short Line
FOR THE
Trout, Grayling, and Black Bass Fisheries,
AND THE
FAMOUS SUMMER RESORTS AND LAKES
OF
NORTHERN MICHIGAN.
The waters of the
Grand Traverse Region
and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.
BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.
The TROUT season begins May 1 and ends Sept. 1.
The GRAYLING Season opens June 1 and ends Nov. 1.
BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.
The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.
TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with
Hay Fever and Asthma Affections.
The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.
During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.
Dogs, Guns and Fishing Tackle Carried Free at owner's risk.
It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. B. LEET,
Gen'l Pass. Agent, Grand Rapids, Mich.

GUNPOWDER.

DUPONT'S

RIFLE, SPORTING and BLASTING POWDER.

The Most Popular Powder in Use.

DUPONT'S GUNPOWDER MILLS, established in 1801, have maintained their great reputation for seventy-eight years. Manufacture the following celebrated brands of Powder:

DUPONT'S DIAMOND GRAIN,

Nos. 1 (coarse) to 4 (fine), unequaled in strength, quickness, and cleanliness; adapted for Glass Ball and Pigeon Shooting.

DUPONT'S EAGLE DUCKING,

Nos. 1 (coarse) to 3 (fine), burning slowly, strong, and clean; great penetration; adapted for Glass Ball, Pigeon, Duck, and other shooting.

DUPONT'S EAGLE RIFLE,

A quick, strong, and clean Powder, of very fine grain for pistol shooting.

DUPONT'S RIFLE, FG, "SEA SHOOTING," FFG and FFFG. The FG for long range rifle shooting, the FFG and FFFG for general use, burning strong and moist.

SPORTING, MINING, SHIPPING, and BLASTING POWDERS of all sizes and descriptions. Special grades for export. Cartridge, Musket, Cannon, Mortar, and Mammoth Powder, U. S. Government standard. Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 70 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. *only.*

Hazard's "American Sporting."

Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and 6½ lb. kegs. A fine grain, quick and clean, for upland and prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6½ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration.* For field, forest, or water shooting, it ranks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6¼ lbs. and cans of 6 lbs. FFFG is also packed in 1 and 5 lb. canisters. Burns strong and *moist.* The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office,

A GOOD PLAN

The most profitable way of dealing in stocks is by combining many orders and co-operating them as a whole, dividing profits *pro rata* among shareholders, according to the market, monthly. Each customer thus secures all the advantages of immense capital and experienced skill, and can use any amount, from $10 to $10,000, or more, with equal proportionate success. "New York Stock Reporter" and new circular mailed free. Full information for any one to opperate successfully. Lawrence & Co., 57 Exchange Place, N. Y.

Miscellaneous Advertisements.

ENGLAND AND AMERICA.

COLT & WEBLEY.

The two GIANTS in gun-making at the present time, are P. WEBLEY & SONS, Birmingham, England, and the COLT FIRE ARMS CO., Hartford, Conn. Both owe their marvelous success to the same two causes. First, that they learned just what constituted PERFECT GUNS. Second, that they applied labor-saving machinery to their production. The result is, THE BEST GUNS IN THE WORLD, AT VERY SMALL COST. You can now buy a COLT or a WEBLEY gun, which it is a pleasure to use, for no more than is commonly paid for guns bearing unknown or fictitious names.

Of WEBLEY'S GUNS we have the TREBLE WEDGE GUNS—every gun having beautiful Damascus or laminated steel Barrels, Rebounding Bar Locks, Pistol Grip, Lever For part, Double Bolt, and Extended Rib.

DOUBLE BOLT GUNS (Top and Side Lever). | WEBLEY-LANG SELF-COCKERS.
SINGLE BOLT GUNS (Top and Side Lever). | EXPOSITION GUNS (various styles).

The last four styles named above constitute a **JOB LOT**, which we are selling off at about half their real value. These guns are in NO WAY inferior to the Treble Wedge guns as regards quality of materials or EXCELLENCE in shooting, and are the CHEAPEST lot of guns we have ever seen.

Of COLT GUNS, we have all the regular grades, and, in addition, THE CLUB GUN. This gun is made for US, with selected barrels and the very finest materials, and is designed especially for Glass Ball and Pigeon Trap Shooting. Gentlemen who indulge in these contests will be obliged to either shoot the COLT CLUB GUN, or lose the prize.

Every one of these guns has an elegant heel plate, with the Rampant Colt in a circle, and the words "The Club Gun," beautifully embossed upon it. *Any* Colt gun not answering to the above description is *not* the Club Gun.

Besides the Webley and Colt DOUBLE guns, FOREHAND & WADSWORTH, of Worcester, Mass., make for us a SINGLE barrel breech-loader with Scott pattern Top Lever. These guns are very light and handy, and just the thing for BOYS or men who cannot afford to buy Double Guns. They cost but a mere trifle. We are happy to announce that we are the principal distributing agents at New York city for all three of the above-named manufacturers.

P. O. Box 4,309. H. & D. FOLSOM, 30 Warren street, New York.

PAINE'S

Feather Filled Glass Ball.

THE ONLY SUBSTITUTE EVER INVENTED FOR A LIVING BIRD.

Ask your gunmaker for the FEATHER FILLED AND TAKE NO OTHER. SPECIAL NOTICE TO DEALERS.—Owing to the great demand for the FEATHER FILLED BALL, we will from this date pay strict attention to our factory and the careful production of the ball only, and have appointed the well-known house of HAGERTY BROS. & CO., 10 Platt Street, New York, as our authorized agents, to whom all orders and communications may be addressed.

ALSO MANUFACTURERS OF THE BEST PLAIN BALL IN THE MARKET.

THE CARVER TARGET BALL.

[CAVEAT FILED.]

GREENVILLE, PA., May 26, 1879.

DEAR SIR:—We take pleasure in notifying all admirers of Target and Ball Shooting that we have introduced a COMPOSITION TARGET BALL for Trap Shooting that is perfect in every particular. It has been thoroughly tested by many of the leading Sportsmen, and pronounced by all as the only perfect and unobjectionable Target Ball in existence. This Ball is very uniform in weight and standard size, and when broken leaves no *debris*, but will EVAPORATE in five days and acts as a FERTILIZER. They can be used on Lawns, Gardens, Fields or Parks, thereby doing away with the danger and annoyance consequent in using Glass Balls. We are now prepared to fill orders. Drafts or P. O. Order must accompany all orders. Organized clubs are invited to send for Sample Box, (25 balls) and Circular free. J. H. WAUGH, Inventor

PRICE LIST—Per thousand, $12. No charge for packages. Address,

CARVER TARGET BALL CO., Greenville, Mercer Co., Pa.

IVORY BILLIARD BALLS, BAGATELLE BALLS, FARO AND POKER CHECKS. ORDERS BY MAIL PROMPTLY ATTENDED TO. F. GROTE & CO., TURNERS AND DEALERS, 114 East Fourteenth Street, New York.

TEN PIN BALLS AND TEN PINS.

NEW CROP VIRGINIA

The new crop of tobacco from which VANITY FAIR and FRAGRANT VANITY FAIR TOBACCO and CIGARETTES are being manufactured, is without doubt the finest that has been grown in a long time, and possesses a rare fragrance and a mildness so much sought after by connoisseurs. The above are now put up by us and sold under the brand EXCELSIOR, throughout Great Britain and Europe. Try our Fragrant "HALVES"—Rare Old Perique and Virginia.

SIX FIRST PRIZE MEDALS. WM. S. KIMBALL & CO., Rochester, N. Y.

TRADE—"BEATS THE WORLD."—MARK.

Old Judge Smoking Tobacco.

The Only Tobacco Ever Manufactured that does not Bite the Tongue.

"Old Judge" Cigarettes.

MANUFACTURED under Letters Patent granted Charles G. Emery, March 5, 1878, by which the rice paper used as wrappers is so prepared that the unpleasant odor and injurious effects of the OIL OF CREOSOTE thrown off when burning is completely neutralized or destroyed, and the paper made saliva proof to prevent its breaking or melting in the mouth. The great advantage and importance of this invention will at once be recognized by all smokers, and its truth demonstrated by the first "Old Judge" Cigarettes they smoke. Neither will they require a printed certificate from any eminent Professor of Chemistry to convince them they have heretofore, in smoking Cigarettes made of PURE RICE PAPER, been inhaling one of the deadliest poisons known.

FOR SALE BY ALL DEALERS.

GOODWIN & CO., Manufacturers, 207 and 209 Water st., NEW YORK.

WESTON-ROWELL-ENE.

THE ATHLETE'S LOTION.

A Refreshing Unguent for the Bath.

A preparation used by all who are training for feats requiring great powers of endurance. Strengthens the limbs, hardens the flesh, tones the nerves, and invigorates the entire muscular system. Is useful in cases of muscular debility, nervousness, rheumatism, neuralgia, fevers, skin diseases. Cures sore eyes, mouth, nose and ears; also toothache.

ENDORSED BY ALL FIRST CLASS PHYSICIANS.

For Sale at all Respectable Drug Stores.

Price, 10c., 25c., 50c. and $1. Depot 381 Sixth Avenue, New York. Can be sent by mail to any address.

Ammunition.

GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or elegantly Stained Window. It is easily applied to the glass in Windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented,* and not a single agency has as yet been established.

ONE GOOD MAN in each State wanted, to whom exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of $1.00.

Agents Apply to L. Lum Smith, 717 SANSOM ST., PHILADELPHIA, Pa. Patentee & M'f'r. Sole Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald*:

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to even the most remote section of the country *free* of express or freight charges."

AGENTS' HERALD

The Largest, Spiciest, and only REPRESENTATIVE PAPER OF ITS KIND.

ACTIVE AGENTS GIVEN GOOD EMPLOYMENT EVERYWHERE

by over 200 responsible advertisers in this month's issue of the *Agents' Herald.* Grand outfit, including circulars, terms, and a beautiful 10x14 engraving of the *Smithograph,* sample card and full particulars of the AGENTS' DIRECTORY and sample copies of last month's *Agents' Herald,* all for 10 cents. Yearly Subscription, $1.00. One cent stamps taken. We cannot afford to give the paper away, so don't ask us. Address in haste,

NEW YORK, THURSDAY, OCTOBER 9, 1879.

Volume 13—No. 10. No. 111 Fulton Street, New York.

LET IT PASS.

Be not swift to take offense;
Let it pass!
Anger is a foe to sense;
Let it pass!
Brood not darkly o'er a wrong
Which will disappear ere long;
Rather sing this cheery song—
Let it pass!
Let it pass!

Strife corrodes the purest mind;
Let it pass!
As the unreguarded wind,
Let it pass!
Any vulgar souls that live
May condemn without reprieve:
'Tis the noble who forgive.
Let it pass!
Let it pass!

Echo not an angry word;
Let it pass!
Think how often you have erred;
Let it pass!
Since our joys must pass away,
Like the dewdrops on the spray,
Wherefore should our sorrows stay?
Let it pass!
Let it pass!

If for good you've taken ill,
Let it pass!
Oh! be kind and gentle still;
Let it pass!
Time at last makes all things straight;
Let us not resent, but wait
And our triumph shall be great;
Let it pass!
Let it pass!

Bid your anger to depart;
Let it pass!
Lay these homely words to heart,
"Let it pass!"
Follow not the giddy throng;
Better to be wronged than wrong;
Therefore sing the cherry song,
Let it pass!
Let it pass!

All The Year Round.

A Winter in East Florida.

(Third Paper.)

INDIAN RIVER.

SOON after leaving Titusville we entered the broadest portion of the river, called by the boatmen "Bay o' Biscay," a fine stretch of water five miles in width and of about the same length; its southern extremity marked by a group of tall pines, apparently separated from Merritt's Island, is known as Pine Island. The wind being abaft the beam, we kept the main channel, which varies from a half to a mile from the western shore. The water of the channel for a distance of fifty miles or more is from six to ten feet in depth. I soon discovered that the *Blue Wing* was a most admirable working boat, and "the boys"—as I had unconsciously begun to designate my party—were becoming more accustomed to their new experience. Their distrust of the boat, which at first seemed but a cockle shell in the wide waste of waters, began to give way as they saw her dash through the waves "like a thing of life." The splashing of the spray over her bows had ceased to cause them any uneasiness, and her occasional listing to leeward in the freshening breeze was no longer a source of alarm. They really began to enjoy the situation, and were watching the gulls and gannets skimming to and fro, and the flocks of scaup ducks or "blue bills" that made way for us as we went bounding along. Frank soon had out his gun and was popping away at anything within two hundred yards of the boat. He occasionally knocked down a blue bill, which necessitated my picking it up, and gave me an opportunity to explain to the boys some of the principles of sailing. I endeavored at the same time to instruct them in the meaning of a few nautical terms. We had passed Pine Island and were soon abreast of Jones' Point, on the mainland, ten miles below Titusville. In the bight just beyond are the residences of Dr. Holmes and several others, and five miles farther on is City Point, where there is a store and post-office. Colonel Spratt's orange grove, the best on the river, is just below City Point, and a mile or two farther on is Mrs. Dixon's grove. Opposite, on Merritt's Island, is the clearing of Mr. Martin and R. D. Hoke. We next passed Russell Point, and a half mile below it we ran in and cast anchor. It was just noon. In three hours we had made the run of twenty miles from Titusville to

ROCK LEDGE.

I had anchored close to the shore, and cast out a stern line, by which the stern could be hauled in near enough to the rocks to enable us to jump ashore. We were not long in getting out all necessary articles, and soon had both tents pitched in the shade of some magnificent live oaks and cabbage trees, while the smoke from a cheerful light-wood fire was soon curling upward through the broad fronds of the palmettoes. On the way down I had divided the party into three teams of cooks and camp-keepers, and it now devolved upon team "number one," composed of Marion and Ed., to prepare our dinner; but as this was our first camp we all lent a hand, stimulated by that peculiar sensation indigenous to this region, which we had heard of, but until now had not experienced—an "Indian River appetite." Frank's ducks, which had been dressed and pickled on board, were now cut up, and, with the addition of some white bacon, were soon simmering away, and exhaling the savory odor of a "hunter's stew." Dinner was ready in an hour, and the boys being sharp set, pronounced it good. After dinner we gathered the long Spanish moss that hung in graceful festoons from the water oaks, and made our beds. Team "number two," Ben and Henry, started down through the settlement, while "number one" washed the dishes and put things to rights. After a smoke, team "number three," Frank and myself, shouldered our guns and struck out to provide "meat for the pot." We went through an orange grove, and in the hedge on the further side "Queen" soon discovered a bevy of quail, out of which we got two. We marked them down in the scrub, when we found another covey, and soon had five more. In the same length of time in Kentucky we would have bagged at least a dozen out of the two covies. But I noticed then what subsequent experience confirmed—that the quail of Florida make very short flights when flushed; that they at first rise up very quickly a few feet above the scrub, and then by a somewhat less rapid flight they fly in a direct line to a point on the ground from twenty to a hundred yards, according to the nature of the covey; that their line of flight, consequently, is steadily downward, and the gunner is very apt to overshoot until he remarks this peculiarity. Going through the pines we came to a small pond screened by a thick fringe of bushes. Approaching cautiously, we observed a small flock of mallards, or, as they are called in Florida, "English" ducks. We knocked down three as they rose, which Queen found for us in the thick scrub. We then started back to camp, bagging four grey squirrels on the way. We found Marion practising with a cast-net under the tuition of a settler. The cast-net is a *sine qua non* in Florida. It is a circular net from eight to twelve feet in diameter, with the lead-line running around the circumference and loaded with ten or twelve pounds of lead, equally distributed. In the centre is fastened a ring, generally a section of a cow's horn. Tucking lines are attached at regular intervals to the lead-line, and are united to the hand line which passes through this ring. It is cast by means of both hands and the teeth in a manner that must be seen to be understood. It should be spread evenly on the water, when the lead line is carried rapidly to the bottom, and by pulling on the hand line the net is drawn into a purse, which encloses the fish. It is used for catching mullet (*Mugil lineatus*), a fine fat fish, which literally swarms in countless millions in the shallow, brackish waters of Florida. It is the common food alike of man, beast, bird, reptile and fish. It is used as a bait for all other fish; the size of the fish to be caught will determine the size of the bait, for it can be taken from an inch in length up to four or five pounds in weight. It is of good flavor when broiled, and fried mullet roe is a dish fit for an epicure. Ed. was scaling and cleaning mullet for supper. Ben and Henry came in shortly, the former with several walking canes in the rough, and Henry with a sack of oranges, each still true to his bent. Frank and myself cleaned our guns, anointed them with "vaseline," and put them away. I will state here that we found vaseline and "elbow grease" effective preventives to rust during our winter's sojourn on the Florida coast; but it required constant care and extreme watchfulness to keep the guns bright. A number of settlers came into camp that night, and spent a few hours with us around the cheerful fire of pine logs. They brought us a generous supply of oranges, lemons and sweet potatoes.

Rock Ledge hammock is the best settlement for orange culture in East Florida. Its soil, which seems peculiarly adapted, and exceedingly rich in all the elements conducive to the growth of the citron family, is a dark, grayish compound of sand, humus and disintegrated shells. The hummock extends some four miles along the river front, and is underlaid by a bold ledge of coquina rock, with a good depth of water close up to its rocky shore. The river bank is skirted by a border of cabbage-palmettoes, live-oaks, oleanders and Spanish bayonets, through which can be obtained glimpses of the white-washed cottages of the settlers, giving to the whole a picturesque and tropical appearance. The northern extremity of the ledge terminates in a small snow-white beach, crescentic in shape, which, running well out into the river, forms Russell Point. The settlers are mostly from Georgia and Alabama, and are exceptionally intelligent and enterprising. The names of some that I remember are Mrs. Delano, Gardner Hardee, Captain Bob Hardee, Allan Hardee, H. S. Williams, E. T. Hatch, C. Magruder, and Quincy Stewart. All of them have fine groves, some bearing abundantly, particularly that of Gardner Hardee, which is the oldest. There is a good store, a post-office, a nursery, and a good school. They were soon to erect a church edifice near Russell Point in a grove of gigantic live-oaks that have withstood the shock of the countless storms of centuries, and whose crooked and scarred arms stretch out over the glistening white beach beneath; it is truly a most romantic spot. On some quiet, dreamy Sunday morn, when the white sails drift lazily by, and the air is heavy with the incense of orange blossoms, and quivering with the mocking-bird's song, the *Gloria in Excelsis* will be born aloft through those grand old trees: "Glory to God on high; and on earth peace, good-will towards men;" while the whisper of the rustling leaves, the purl of the rippling waves, and the murmur of the distant sea will catch up the strain of the *Benedicite*: "O ye winds of God—O ye seas and floods—praise Him, and magnify Him forever!"

While Ben and Henry were preparing breakfast the next morning, Ed. and Marion were getting their fishing tackle ready. Ed. was quite anxious to try his shark-hook, but I persuaded him to use cod-fish hooks instead. They rigged up several hand lines with heavy sinkers, about the same as used for cod-fishing. After baiting with mullet I showed them where to cast, and advised them to tie the shore ends to the projecting limbs of trees near the shore. While eating breakfast Ed's eye was attracted by the swaying of the limb to which the line was tied. He dropped his coffee and rushed to the fray. He ran against a Spanish bayonet in his hurry, which caused a howl of anguish. "Oh, Moses! I'm snake-bit!" The sword-like leaves of this plant terminate in strong and sharp needle points, which pierce through the clothing and into the flesh upon the slightest provocation; and one who has been "horned" by the spiny fin of a cat-fish will appreciate the sensation exactly. When Ed. discovered the source of his suffering he did some "cussing," and began to step high and "walk Spanish." But another tug on the branch and he forgot his misery, seized his line and began hauling in. Then it stopped short. "It's caught on a ro-*ock!*"

What caused Ed. to split the rock into two syllables just then, was a violent jerk on the line which nearly threw him down. "Put your line over your shoulder and walk away with him!" said I; which Ed. proceeded to do, and hauled out an immense red-fish or channel bass weighing upward of forty pounds. "Ge-whillikens! What a snolligoster!" shouted Ed.—and so it was—the largest we caught in Florida. In a half hour Ed. and Marion had landed six red-fish, the smallest weighing twenty pounds. The surplusage was distributed among the settlers, who seemed quite surprised to know that such fish could be caught there—but then they did their fishing with a cast net, and seldom used a hook. The red-fish or channel bass (*Sciænops ocellatus*) is exceedingly common on the coast of Florida. It belongs to the same family as the king-fish and whiting. It is a pretty fair table fish, though much inferior to some others in the same waters. It is of a beautiful golden red color on the back and sides, while the belly is silvery; it is very brilliant and iridescent when first out of the water. It has a large black spot on each side near the tail, whith gives it its specific name. The scales are quite large and firm, and are much used in Florida for making jewelry and artificial leaves and flowers.

Our stay at Rock Ledge was prolonged several days, in order that the boys might become somewhat accustomed to camp life before proceeding farther. The weather was delightful, the days warm, balmy, and hazy, and the nights cool enough to allow a thorough enjoyment of the camp fire. The boys began to improve rapidly in health, and to use their own expression, "felt bully." Their appetites were becoming ravenous, and in consequence they began to pick up in flesh, and as Sam Weller said of the fat boy, "began to swell wisibly before my wery heyes."

At length, one fair day, with a fair wind, we bid farewell to Rock Ledge. Five miles below, behind a long point and in a rocky cove, we passed the saw-mill which furnishes most of the lumber for Indian River. Opposite, on Merritt's Island, on quite an eminence, is the quaint cottage of Dr. Whitfeldt, the pioneer settler of this sec-

tion. Just ahead of us I descried a school of porpoises, rolling, tumbling, and basking in the sunshine. I headed directly for them to give the boys a better view of them. "Great Cæsar!" shouted Ed, "what's that?" "Porpoises," I replied. "What'a poor-pusses? Doc, you can't fool me, they're whales! There, see 'em spout, hear 'em blow! Doc, don't go any nearer, or I'll get out!" I saw that Ed was really frightened, so I bore away to leeward, while Frank gave them a parting salute with his shot gun. The boys had it on Ed, then, bad. Passing Otter Creek, we were soon abreast of Horse Creek. The west shore or mainland, is now a high sandy bluff, clothed with forests of pine. The water is quite shallow for a long distance from shore, so we kept the middle of the river. Opposite here, on Merritt's Island, is the hammock of Bethel Stewart, and on the mainland the shanties of the settlers are scattered along, and we soon arrived at Eau Gallie.

This place is twenty miles from Russell Point and forty from Titusville. There is a store and post office, and a fine building composed of Coquina rock, built for the State Agricultural College, but never used as such, I believe. It was the job of a "ring," who laid out and built a fine city here, with broad avenues, parks, schools, churches, and hotels, on paper. There was to have been a canal, eight miles in length, connecting Indian River with the St. John's, via Elbow Creek and Lake Washington. But the ring lost its influence with the State officers, its hold on the State money bags slipped, it dropped the bubble, and it "busted." Nothing remains but the nucleus of the scheme; the "College," as it is called. The site is a beautiful one, and the location advantageous. It is opposite the foot of Merritt's Island, and the confluence of the Banana and Indian rivers. There is a good depth of water close up to the rocky shore at all times. Should the contemplated railroad from Jacksonville via St. Augustine to Indian River be built, a charter for which was obtained last winter, Eau Gallie will become an important point, and in my opinion will supersede Titusville.

We spent a few days in the vicinity of Eau Gallie very pleasantly. There was plenty of ducks, snipe and plover up Banana River, and excellent black bass fishing in Horse Creek, Elbow Creek and Crane Creek, all within three miles of Eau Gallie; while red fish, sheepshead and mullet were abundant in Indian River. In the scrub about the head of Elbow Creek, also within three miles, the sportsman will find deer and turkies, though the latter are becoming scarce. With a good dog quail can be found anywhere in the settlement. In short, there was no difficulty in keeping the "pot boiling," for we always had enough and to spare. There is a certain little fresh water pond near the foot of the island, where the ducks come in from the large waters to drink, and where I went several times with my gun and twenty-five cartridges, my pipe and tobacco, and rubber wading boots. After making myself comfortable in a snug blind, I would light my pipe and await further developments. Pretty soon they came, two or three at a time, sometimes half a dozen—mallards and blue bills. After shooting both barrels I would wade out and retrieve them, one or two, as the case might be, or the alligators would have saved me the trouble. Then I would resume my pipe, and my waiting and watching, and so on *ad infinitum*. As soon as I had bagged a dozen I would return to camp, but it would be no extraordinary thing for one to bag a hundred in a day, for they are coming and going all day long. This pond is not known to many, and the sportsman must find it as I did, by his own judgment and observation, and his knowledge of the habits of the game.

J. A. HENSHALL.

ONE NIGHT ON MANSFIELD MOUNTAIN.

IN 1872, I visited Mansfield Mountain, and passed three days at the Summit House which is situated close under the nose of the two mile long giant face from which the mountain takes its name. It was a wonderful spot, with charming views, and I enjoyed every moment of my visit with the exception of one night.

I was exploring the southern or "forehead" end, and had been absent from the hotel all day long. In fact, it was fairly dusk before I thought of retracing my steps, and then for the first time I realized that a full mile of thick forest lay between me and my supper, with no trail to follow and only my knowledge of woodcraft to prevent me from passing the night among the whispering pines.

The prospect was not a pleasant one, as I was entirely unprepared for camping out, having no matches to light a fire even, and being ravenously hungry and very tired.

It was with much care, therefore, that I began my homeward journey, noting every "sign" about me and avoiding all detours that might deflect me from my true course. My progress, however, was necessarily slow, and those gloomy gnomes of the mountains, the black shadows, soon began to creep from the caves and the thickets where they had lain hidden all day long, and dog my footsteps, while the hoot of the lonely owl or the far away cry of some home going loon were the only sounds which broke the almost oppressive silence. With unpleasant freshness came to my mind stories which I had read of men who, lost in this wild section, had wandered for days until rescued by parties from without; and of others whose sad fate was only guessed at from the bits of clothing and bleaching bones found in some lonely ravine months after they themselves had been forgotten.

I am not easily frightened, but these sombre recollections added to the deepening darkness about me, and it was at last with a positive shiver that I noticed how short a distance I could see before me, and how rugged and unfamiliar seemed all the ground about me. Was I already lost?

With the horrible possibility which my mind now for the first time admitted, came a new danger: "I lost my head"; that is, fairly frightened, I forgot all rules of woodcraft and dashed wildly off in a new direction, running, stumbling, falling, bruising myself upon logs, roots and stones, crying, shouting and completely unnerved, until at length utterly exhausted I sank almost fainting upon the damp ground.

Now, indeed, I was lost!

For a time I lay motionless, slowly recovering breath and reason, for it was a momentary craziness that had attacked me; then at last I slowly arose and leaned against a neighboring tree.

"What utter folly!" I moaned; "all that was gained by care and prudence is now lost, and it only remains to pass the night in the forest. Fool that I am, my punishment is deserved!"

What were my equipments for camping out? I took a mental inventory. A light suit of cloths, rough shoes, a felt hat, a small knife and a revolver; no blanket, no no matches, no food. The sum total was seriously lacking.

"I cannot and will not freeze nor starve," here, said I aloud, "while my strength lasts"; and I shivered in the sharp, chill air. "At least, I can make the effort to find my way out of this wilderness at some point, and I will travel directly north."

So reasoning, having first examined several of the trees about me to decide which way my course lay, for forest trees always accumulate moss upon the northern exposure of their trunks. I resumed my laborsome journey, moving slowly and with great caution lest I lose my footing among the treacherous stones and roots or again mistake the direction in which I desired to travel.

And meanwhile upon leaden winged moments the time passed. It was very dark, there being no moon, and the thick pines and hemlocks hiding the feeble stars overhead. Occasionally as I crashed through some thicket or stumbled across a rocky spot a darker shadow would flit between the trees and the lonely hoot of a startled owl would ring out upon the night air; again, as I paused for breath the soft fall of padded feet came from the dim aisles about me, and once or twice a pair of gleaming eyes blazed through the darkness near me, then as I moved they would disappear and all would grow silent and black again.

I kept one hand upon my pistol, yet hoping that I might not be called upon to use it, for it was of too small calibre to do more than wound any animal that might attack me, and a wounded wild cat or panther would be far more dangerous than one with a whole skin.

At times I rested my weary body, trying to estimate the distance already travelled, and how much still remained. Then with fresh courage, although faint and feeble, I would renew my terrible journey.

For terrible indeed it had now grown. Rest as often as I might, and argue with myself as I would, the truth still remained; it was almost midnight, I had travelled many miles and must be entirely away from my hotel, and I was fast becoming exhausted. A few more weary steps, a few more staggering falls among the brush and logs, a few more desperate efforts, to rise and I should find my strength gone. Then, what then? I shuddered.

At last, having clambered over a great mass of rocks, my course began suddenly to descend, and I stopped, determined to have one more long rest and then to make a last effort to reach civilization. If unsuccessful, I must halt and try to sleep until morning. This passed through my mind as I sat upon the shelving side of a great rock, trying with distended eyes to pierce the darkness about me; my back aching and tired, and my feet bruised and bleeding.

As I continued to gaze into the night it seemed as though the mountain sloped sharply away before me and I felt that unexplainable dread which comes over one, when standing upon the brink of a precipice. Stronger and stronger this feeling grew, until with a shiver that began at my spine and crept all the way down to my toes, I drew myself slowly backward up the face of the great rock, fearful lest by some fatal step, I might hurl myself into the yawning gulf below.

In this way and with much care, I had nearly reached the top of the boulder, when an unexpected sound, a half grunt, half growl, which seemed to come from my very side, startled me, caused my blood to stagnate and my hair to rise upon my head; and with a shudder I felt every muscle in my body relax, my hands lose their grasp upon the rock, and with a shriek I slipped across its smooth surface and shot downward into the darkness!

How far I descended I knew not, but my outstretched arms and nervous fingers grasped at the bushes and branches which brushed by me as I rolled and tumbled down the mountain side, and with a wild energy born of despair, I clutched at last a great log, wound myself about it, and for the moment was safe!

Regaining my breath, I cautiously raised myself into a sitting position and peered into the night about me. Blackness of darkness covered everything, and no outline of either mountain or trees met my longing but baffled gaze. It might be a mile to the earth beneath me, for all that I knew.

From the slight trembling of my perch it was evident that it extended over some abyss, how deep I dared not imagine. Every motion produced the slight oscillations, and it was with an agony of fear that I attempted any change of position, for what if the log were insecurely fastened at the other end, or old and weak; what if it should break beneath my weight?

I bowed myself once more and wrapped my arms about it, so faint that I dared not sit upright, so filled with an intangible dread that my brain reeled. Was this to be the end? Was I to starve like a magpie upon a perch and here remain, a skeleton astride a log overhanging some wild cliff far up the lonely mountain side? I laughed wildly! Horrible!

How long consciousness remained I know not; my memory cannot bridge those fearful moments, and happily I have no recollection of what passed after I mounted the log, except that at some time or other sleep came and I wandered in a dreamland of demons who hurled me shrieking over stupendous precipices into unfathomable depths with yells of rage.

At its usual hour the morning sun crept slowly up the eastern horizon and peeped at the mountains. One brilliant ray, glancing shimmering from a little lake among the woods, struck me fairly in the face, and with a start I awoke, opened my tired eyes, rubbed my aching limbs and looked about me.

The long ridgepole of a log shanty extending far out beyond the building itself toward the shelving rocks of the mountain side, formed my seat, my feet dangled within twenty inches of the earth; four or five swine were rooting not far away, and the cheery whistle of the cowboy rang out on the morning air behind all. A dozen rods to the left stood the Summit House, the blue smoke of the breakfast fire curling upward from its wide-mouthed stone chimney.

I had passed the night astride the ridge pole of the pig pen of my own hotel!

I have never been lost since. F. E. HAMILTON.

Fish Culture.

THE FISH CULTURISTS' CONVENTION AT CHICAGO.

[FROM OUR SPECIAL CORRESPONDENT.]

October 2d.

Mr. Editor:—Have been attending Convention to-day, and enclose you report of proceedings for both days, so far as a general report can be given.

The attendance has been small. At this morning's meeting, until adjournment at 1 o'clock, twenty-eight persons were present. During the first meeting there were more present. But the Convention is composed of men who know what they are talking about. Their arguments are earnest, and to the point. The discussions were carried along fairly, and without any dogmatism; each conceeding another's views as equal to his own, and all tending to one grand point: "The preservation of our inland fisheries."

The paper read by Geo. H. Jerome, on "The Fish Farm and its Appropriations," was well received by the Convention. The paper by Mr. Shaw, of Iowa, was a carefully-written statement of what a few men can do toward keeping up the natural supply of the streams and creeks running into the Mississippi. This paper was received with great favor, and ordered published. Its statements are so clear and forcible, that it shows Mr. Shaw to be an enthusiast in preserving fish, and not a fish-breeder for dollars and cents. Here I would remark The impression Mr. Shaw leaves on the mind is, that he is one of the leading spirits of the Convention. He is evidently a ready thinker, and sound in his ideas in any point under discussion. Though not a graceful speaker, his opinions carry weight with them. He is a wide-awake, go-ahead Western man.

Mr. Booth, of Chicago, was present, and gave some valuable information and statistics regarding the wholesale destruction of whitefish. An interesting discussion followed. One gentleman gave an outline of the nets used for catching whitefish. Opinions differed somewhat as to the best means to prevent the annihilation of these fine fish, but all agreed that the lakes are being exhausted, and some means must be devised and Congress memorialized to pass a law to protect these fish.

All the gentlemen taking part in the discussion are alive to the fact that the whitefish are surely being fished out, but how to overcome the opposition of those who have invested hundreds and thousands of dollars in fishing outfits is the all-important question.

Some other papers were read in the afternoon session, but the time was too short to admit of any discussion. The Convention adjourned to meet again in Chicago, subject to the call of the President. D.

Among other papers read before the meeting was one written by Dr. Theodore Garlick, of Bedford, O., and read by Mr. Fred. Mather, on "The Birth of Fish Culture in America;" "Brook Trout Culture," by Mr. F. H. Douseman, of Chicago; "The Uses of Coal Tar in Fish Culture," by Mr. Fred. Mather. A talk was given by Col. McDonald, of Virginia, on "The Virginia System of Fish-Ways;" and Mr. E. B. Paxton had a discussion of "The Detroit River Fisheries." Among the papers which could not be read for lack of time, was one by Prof. G. Brown Good, entitled "A Biography of the Menhaden."

This inaugural meeting will we hope bear excellent fruit. The new Association has started strong, and with a display of wisdom. In seeking Congressional action a difficult task has been instituted, but the meeting went about it in a way which seems to promise excellent results.

We shall publish an abtract of all the papers next week. Since the meeting we have received personal visits from some of the Fish Commissioners who were present, and they seem to feel as if good would come on't.

E. A. BRACKETT to LIVINGSTON STONE.

WINCHESTER, Mass., October 3, 1873.

Mr. Editor:—In your issue of the 2d is another card from my friend, Livingston Stone, in regard to California salmon dying after spawning, and calling upon the writer of the Massachusetts Fish Commissioners' Report of 1872-3 to retract his statement and "rescue him from the imputation of giving utterance to such an utterly stupid and senseless speech."

As author of said report I should be happy were it in my power to relieve Mr. Stone from the unfortunate dilemma in which he is placed from making what he is pleased to call "an utterly stupid and senseless speech," and still more from the folly of appearing to deny statements made over his own signature and printed in the United States Fish Commissioners' Report; but I can only do so by assuming that the articles in Baird's report signed Livingston Stone were written by some other person. As I promptly answered his first card, will you be kind enough to reprint my letter of May 29th, or forward a copy to him.

Yours truly, E. A. BRACKETT,
Massachusetts Commissioner of Inland Fisheries.

THE NEW YORK ARCHERY CLUB.—The movement tending toward the organization of an archery club in New York City is making rapid progress, and a number of good names have already been sent in to our office. A meeting of those interested will be held at the Metropolitan Hotel on Saturday evening next at 8 P. M., when preliminaries will be arranged. We understand that a suitable and convenient out-door range has been secured, and that negotiations for in-door practice during the winter months are pending.

—Our readers' attention is called to the advertisement of Messrs. Cassell, Petter, Galpin & Co., who are now publishing in monthly parts the best work extant on the subject of "Dairy Farming."

Natural History.

SINGULAR CASE OF A HIBERNATING PIG

At one of our great copper mines lately opened at a place called Little Bay, a remarkable instance occurred of a pig passing the whole of last winter in a state of hibernation, without food of any kind, and at length coming forth alive, but in a most attenuated and woebegone condition. I may state that the following narrative of the case is perfectly reliable, as I had the facts from Mr. Eblershausen, one of the proprietors of the mine, who was at Little Bay when the event occurred, and saw the pig after its incarceration. A wooden house for an office was built on sloping ground and supported on "shores," so that there was a considerable vacant space underneath the floor. Just before this space was finally boarded in, a pig had crept in and coiled himself in a quantity of shavings and fallen fast asleep. The carpenter who was employed on the job did not see the animal when closing the foundation. The office was not immediately occupied, so that the noise made by the pig on awaking and his struggles to get out were unheard. Finding himself in durance vile, the pig, like a true philosopher, resolved to accommodate himself to circumstances, and wisely determined to submit to the inevitable. He wrapped himself in the shavings, turned his back on an ungrateful and troublesome world, and went to sleep for the winter. In the northern part of the island the cold is very intense, and soon the temperature reduced poor piggy to the comatose condition in which certain animals pass the winter, altogether unconscious. His mysterious disappearance was mourned and commented on, but it was supposed that, being of a truant, roving disposition, he had lost his way in the woods. When he thus retired from active life he was a remarkably plump animal and a credit to his owner, who intended to turn him into bacon about Christmas; and fortunately for himself he carried a *viaticum* in his own fat which kept up the animal heat and sustained life during the long winter. The apartment in which he lay was closed in on the 22d of November, 1878, and on that day piggy was "lost to sight." The office was occupied, but the tramp of feet and the "pother o'er his head" disturbed him not. He slept as sound as one of the Pharaohs in his sarcophagus all through the following four months, utterly indifferent to the Afghanistan campaign or the disaster at Isandula. But at length the genial warmth of April suns began to thaw the frozen ground, and his vital energies returned; his provisions were exhausted; he rubbed his eyes, turned over and managed to utter some feeble grunts, which astonished and alarmed the occupants of the office in no small degree. At first they were inclined to attribute the mysterious noises to a supernatural origin, but as piggy's sense of hunger became keener his grunts and knockings for release became more imperative. A board or two was at length removed and poor piggy was drawn out, "the ghost of his former self"—a perfect skeleton. His appearance was described to me by one who saw him as most extraordinary, pathetic and yet highly ludicrous. The ribs on each side seemed to have met; the hams had vanished and only the hip-joints stood up, gaunt and angular; the vertebrae could be counted, and the ears, which had resisted the disintegrating process best, hung from the disproportionately large skull in a most ridiculous manner. The eyes looked out of deep bony sockets with a profoundly melancholy expression, as if their owner had been in the other world and had found there specially hard times. For a time no one recognized him, but at length the woman who owned him declared, with tears in her eyes, that she knew him by a peculiar turn in his tail. He had a singularly graceful curl in this appendage—the only æsthetic point about him—and this had survived the destruction of all his tissues. The poor woman's joy over the recovery of her lost pet was quite touching. The news spread rapidly. The miners gathered from all quarters to view the wonderful pig who had lived for 142 days without food or drink. One of them, more book-learned than the rest, remarked that "it reminded him of the seven sleepers of Ephesus;" but his observation was profanely scoffed at by the others, as it was felt to be unwarrantable attempt to disparage the performance of their own wonderful pig, of which they had all reason to be proud. Piggy's fortune was made. Presents flowed in upon the "craythur." Delicacies unheard of in the dietary of pighood were liberally supplied to nourish him during his invalid condition. Warm compounds of oatmeal and biscuit, flavored with delicious scraps and tit-bits from kindly housewives, soon began to tell on his condition and swell out his lean flanks. His story went the round of the mines, and everywhere awoke sympathy and enthusiasm. He is now as plump as ever, and the curl in his tail is even more strongly pronounced than before. He is observed to shun carefully the scene of his imprisonment. Whether hibernating in this way, in the case of a pig, is a new fact in natural history, I am unable to determine.

M. HARVEY.

How Fish Hear.—In connection with the apparently inexplicable action of the Upper Soda Springs (Cal.) trout), recently narrated in our columns, and growing out of the investigation of that subject, Commissioner B. B. Redding sends us the following communication, which contains, in the discovery of the true hearing of fishes, one of the most interesting scientific facts of the times. The long mooted question of the hearing of fishes is now satisfactorily settled. Our correspondent writes:

SAN FRANCISCO, *Sept. 19th*, 1879.

Editor Forest and Stream:—

In Forest and Stream of Sept. 11th you publish the fact, reported by me, that the trout confined in a pond at Upper Soda Springs, Siskiyou County, Cal., would jump up into the flume which supplied the pond with water, swim through the flume to a certain point, four feet below which, on the ground, an independent stream of water was passing at a right angle. When the trout reached this point they would leap out of the flume into the rivulet, and so escape to the river from which they had originally been taken.

You ask, as many others have asked, now did the fish know, when they reached this point in the flume, that an independent stream was flowing beneath them?

The attention of Prof. E. D. Cope, the eminent naturalist, having been called to the above facts, he has given me an explanation which seems entirely satisfactory. He tells me that at the base of every scale of the trout, at a point where the scale is united with the skin, is a nerve; that all these nerves, from the base of every scale, lead to a large ganglion situated on the centre of the forehead of the fish below the eyes; and that nerves from this ganglion communicate to the internal ear. These nerves, at the base of each scale, are formed to receive vibrations in water. Any vibration in water reaching the scales of the fish is thus communicated to the internal ear. If, as was the fact, one of the timbers that supported the flume rested in the running water on the ground, the vibrations of this running water on the ground would be carried by this timber to the flume and to the water in it, four feet above, and the ear of the fish would separate and take cognizance of the difference in the vibrations, as the human ear in the air distinguishes the difference between the voices of friends.

Prof. Cope's explanation was complete in scientific detail, and made clear by a drawing of the scale, ganglions and internal ear, and, while not attempting to quote his language, I think I have given the substance of his elucidation of what to me and others has heretofore been mysterious. R.

Habitat of Sharptailed Grouse—*Marietta, Ga., Sept.* 29th.—Your correspondent in the issue of Sept. 25th, writing of the sharptailed grouse, thinks that it has never been found south of latitude 43.

In 1840–45 this species was abundant in Southern Wisconsin and Northern Illinois as far south as Chicago (lat. 42), always frequenting the timber, which gave it the local name of burr-oak grouse. We used to consider its flesh of finer flavor than that of its congener, the prairie hen. S. C. C.

Abnormal Growth of a Parrot's Beak.—Our contemporary, the *London Field*, in a recent issue, publishes a wood-cut showing to what an extraordinary size the bill of a parrot may grow when it is not kept worn down by constant use. The *Field* says:—

The abnormal growth of an organ which, under natural conditions, should be worn away by use, is well known to naturalists, being in itself of very common occurrence. Not a season passes but we receive a number of heads of rats, rabbits and other rodents, with the incisor teeth enormously elongated from the want of exact opposition of the two jaws, arising generally from some accidental injury which has caused the displacement.

In the case of wild birds living in a state of nature a similar mal-formation will sometimes occur. A correspondent has kindly forwarded two heads of the common green Indian parrot, the most remarkable of which we engrave of the natural size. The following note accompanied the heads:

"At Haupper, near Meerut, Northwest Provinces, India, Lieut. E. D. H. Daly shot into a flock of the common green parrots, when the heads of two old parrots were found with the bills singularly deformed. He sent them to England, thinking some naturalist there might be interested in seeing these bills. Probably the parrots were shot in the month of May or April, 1879."

In both these skulls the under mandible appeared to be somewhat abnormal, wanting its sharp cutting edge, consequently the upper one, not being cut or worn away, grew until it attained the singular dimensions shown in the wood-cut."

The wood-cut shows the bill, in the specimen figured, to have grown downwards and backwards until it almost or quite reaches the bird's throat.

A Mistake Corrected.—We have received, under the above heading, and print without comment, the following note:—

In Forest and Stream of July 11th, 1878, Dr. James C. Merrill, U. S. A., records the capture by himself of a new accession to the avifauna of the United States, in the *Buteo albo-caudatus*. This was the first announcement made in print of this interesting discovery. Nevertheless in the August number of the *American Naturalist* Dr. Coues makes this statement:

"According to an editorial note, Dr. Merrill's additions to the United States fauna are twelve in number, including two also taken by Mr. Sennett, and first published by us as such, namely, the Mexican *Myiarchus* and *Buteo albo-caudatus*."

So far as the *Buteo* is concerned, this claim is wholly unfounded. Dr. Merrill was the first to make mention of his own discovery. See Forest and Stream, July 11th, 1878, page 443, column 2, line 18. More than this, in the number of the *Country* for July 13th, to which Dr. C. refers as his medium, the announcement of the discovery of this new species by Dr. Merrill was made by the undersigned. So that Dr. C. was not in advance of my statement, while Dr. M. was in advance of us both.

It is not a very material point to claim, even if it were well founded, as it is not. T. M. Brewer.

Whose Mistake?—*Cleveland, O., Sept. 26th*—In your article in issue of 18th inst., telling of capture of yellow rail (*P. novaboracensis*) in New Jersey, there is a misstatement in your saying it is confined to Eastern North America. I now have three specimens in my collection (have had five), all shot by my father in this locality with one exception, and that was caught by his dog, the little fellow refusing to fly. Besides these, I know of the taking of three others near here in the last seven years.

They are rare here, but their taking to wing so reluctantly makes them seem more so than they really are. My father is very confident that he saw a black rail (*P. Jamaicensis*) last spring; but a good two hours' hunt where he saw him alight failed to move him. He first arose so near him that he was afraid of shooting him to pieces, and he had a good chance to observe the bird.

H. E. Chubb.

We would suggest to our correspondent that Cleveland, O., is not so far west as to be excluded from Eastern North America. The yellow rail has been before reported from Ohio, and even from Illinois, and yet its habitat is given, by those who know must about it, as Eastern North America. We recommend our correspondent to look this matter up. Eastern North America does not necessarily mean the Atlantic seaboard.

Wild Rice.—Mr. Richard Valentine, a prominent citizen of Janesville, Wis., has conferred many obligations upon sportsmen by assisting them in procuring wild rice for sowing around private ponds and preserves. Of course he expects to be paid the incidental expenses of procuring the same from the Indians; he asks nothing more. He has just now advised us that he has procured 100 bushels of this season's crop (which he had to engage a year in advance), and offers it for sale. Those wishing to buy should apply at once, as the kernels should be sown before they become hard.

The Kennel.

In Memoriam.—Frank—than whom a more devoted and faithful friend never lived—is dead! To the many who never knew him, it is of no moment whatever. To some who knew him, but to whom he refused that attentive friendship which he gave to others, his death is but an idle tale, of momentary interest only. But to his master, friend, and to the children whom he loved as they loved him, it is a different matter.

Why is it, that as the story of this dog's death when first repeated, brought hot tears to the eyes of his playmates, so each rehearsal of the touching scene opens these salty fountains afresh? He "died in his harness." His years were not few. Of patrician blood and a pedigree which crossed the water, now a long time since, he honored his strain both in his life and in his death. The natural characteristics of his canine nature were such as his master oft noted with profit. Unusually gifted with intelligence, modest, affectionate to a degree seldom seen, absolutely devoted to the presence, whose hand and voice he loved, and never so happy as when that hand and voice commanded or caressed, active, stanch, and always faithful, he was an example to many who boast a higher intelligence and nature.

His education had been thorough, and the innocent pride which he manifested in demonstrating how much and how well he knew, was fairly pathetic.

When he saw the gun taken down from the rack, or detected those first preliminary steps toward a day's sport, his eye brightened and his pulse quickened until he fairly renewed his youth, and became as active as the youngest. We shall not soon forget that joyful voice which assured us again and again that the day's work and interest was to be in common.

Mindful of his age, we had not allowed him to fret during these hot days, while looking up our friend *Philopela minor*, but had taken his fellow-worker, Cush, leaving him at home to welcome us upon our return. His reproachful look, however, decided us a few days since, to take our faithful friend along for a day's work and fun, especially for him. And so we started one fine September morning, with the old fellow never so cheerful, bright, and active. Once in the field, how well the ground is covered! As we leave the open cornfield and approach the cover, knowledge that comes of instinct, education, and experience, shows itself in every movement, and the delight of the hour is evident. Ah! Poor Frank! Enjoy each minute to the full! Thine hours are numbered! In the full pursuit of what was given to be thy work, shalt thou shortly cross to the "happy hunting grounds" beyond!

And so the morning passes, working slowly as may be, in his favor, until speaking to him, commanding him to "seek dead," we suddenly notice a hesitancy new to him, and as we look in growing doubt if he hears us at all, he turns to the brook, laps a few drops of water, turns his head toward his master, who loved him, and whom he loved, lifts one foot, as though to cross the boundary, and falls, never to "seek dead" again—never to answer to any call more!

His work is done. To him who never knew a dog's faithful affection, this story is empty. To the "band of brothers," who each know and watch the friendship of some such humble friend, this story of an empty kennel will have its interest and moral.—[*Communicated.*

ANOTHER DOG STORY.

Editor Forest and Stream:—

Having read "A Good Dog Story" in a recent issue, and thinking the author will expect some one to try to "beat it if he can," I furnish the following:—

We were all seated around the old fashioned wood stove that graces the bar room of the Porter's Lake House, enjoying our pipes, relating our experiences of the day, and discussing the relative merits of our dogs. All of us were in the finest humor, for we had good shooting that day, having bagged, I think, thirty-eight birds (ruffed grouse).

Sir Wes. Drake, as we always called him, was very tired, having tramped over more ground, and shot two more birds than the best one in our party, and sat only as a listener. After all had told their stories, Sir Wes. said he wanted to tell of his pointer, Fanny. "You know, sir, that Fanny was the best pointer I ever owned. I could trust her anywhere, and with anything. Why, sir, she used to stand on her game, and then creep softly up, put her foot on it, and return to the house." No money could purchase Fanny, but I was obliged to part with her after all. One day she crossed the stream on the ice, to hunt in a meadow opposite, and returned as far as the middle of the stream, when the ice gave way and Fanny was drowned. Poor dog! I mourned for her a long time, sir, I did, and would have no other dog; in fact I needed no other."

Here Sir Wes. stopped to light his pipe, and one of the party knowing he was a lover of a good dog, asked him how this was. "Well, sir, I will tell you. I wanted something to remind me of Fanny, and as I found her the next day, I took her hide, had it nicely tanned and made

into a vest. Just where the last buttom of the vest came, was the end of Fanny's nose, and, sir, every time I came where there was game, that nose would turn to windward and point, sir, in as good style as Fanny herself did."

P. HULSIZER.

Bloomsbury, N. J., Sept. 20th.

REMARKABLE CASE OF MATERNAL INSTINCT.—*Brenham, Texas, Sept. 25th.—Editor Forest and Stream:*—An article in last week's FOREST AND STREAM calls to mind the following: In 1870 I raised a fine pointer bitch whose first season of heat came on so that it would have interfered with her training in the field. She was confined and kept from the dog. At the end of the ordinary period of gestation, Flirt (by name) became very restless and made several beds under the house apparently making preparation to drop her imaginary pups. It happened about this time that I brought two orphan lambs to the house to try and raise them by hand. Flirt hearing the pitiful cries of the little things, came up to them and began licking and caressing them with sighs of pity and sorrow. Soon the little fellows began to suck her, she submitting to these attempts very patiently. In a day or two I noticed that she was giving milk, and that the lambs refused to be fed by hand. In short, she became their foster-mother and raised them; she permitted no one and nothing to approach them, not even my wife and little children, without showing distress and anger. As they grew older it was a truly beautiful sight to see them gamboling and frisking about the yard, Flirt joining in their games with great zest and maternal pride. When the lambs were old enough to be taken from her she showed her grief in many ways. I have not embellished this, or told half of many interesting things about it.

WAL.

BLOODHOUNDS.—A South Carolina gentleman has brought a pack of bloodhounds to New York, to exhibit their method of working. He proposes to give exhibitions of this kind of chase at Jerome Park next Friday.

—Mr. James N. Nelson claims the name Clicquot, for a red Irish setter, whelped April 20th, 1879, by champion Elcho, out of Rose.

—Mr. Max Wenzel, of Hoboken, N. J., claims the name Chief, for an all red Irish setter puppy out of Duck, by Berkley; purchased of Mr. T. Fottler, of the Boston Kennel Club.

—Mr. Jno. H. Meyer, of New York, has bred his black pointer bitch, Rena, (Pete-Mab) to Mr. Fisher Howe's Rex, (Grafton's Jim-Whisky).

National Pastimes.

THE GAME OF CRICKET.

FIXTURES.

Oct. 9—Newark.—Newark vs. Paterson.
Oct. 10-11-13—Nicetown.—English eleven vs. Philadelphia fifteen.
Oct. 13-14—Hamilton.—Gentlemen of Ireland vs. Hamilton.
Oct. 15-16—Stenton.—English Eleven vs. Young America Club.
Oct. 15-16—Hoboken.—Columbia College vs. St. Georges.
Oct. 18—Chestnut Hill.—Belmont vs. Chestnut Hill.
Oct. 21-22—Staten Island.—England vs. Ireland.

ALL PHILADELPHIA TEAM.—The following players have been selected to represent the Philadelphia fifteen who are to contest against Dafts English Team, on the 10th, 11th and 13th, at Nicetown: George, Charles, Dan, and Robert Newhall, Van Rensalaer, George and Clark, of the Young America; Brewster, Brown, Caldwell, John and Robert Hargreave, Germantown; Law and Thayer, Merion; and Butcher, Chestnut Hill.

ALL-PHILADELPHIA VS. GENTLEMEN OF IRELAND.—The finest game ever played in this country, was commenced on the Germantown Grounds, at Nicetown, near Philadelphia, on Friday, September 25th, and finished on the next day. Three days had been set aside for this grand intercontinental contest, but the splendid playing of the All-Philadelphia Eleven rendered but three innings necessary, and to the astonishment of everyone, the game was finished at the close of the second days' play. Both teams were thoroughly representative, and the first victory in the annals of international cricket was scored by the Americans of the Quaker City. The day was magnificent, perhaps a little cool, with the wind blowing from the northwest. The grounds never looked to better advantage, the turf being in splendid order. The wicket on which so many goodly international contests have taken place, was pronounced by Giles, the St. George's professional, who had gone over to umpire for Philadelphia, the best he had ever seen there, in fact, "a grand wicket." Early in the day, the grand stand, capable of holding one thousand persons, began to fill with the *élite* of Philadelphia. Every seat was reserved, and had been sold many days before the match. The club house was rich with flags, and to the right of it the willow still waved, over which Smith, of Wilshires team, made his famous leg-hit. This, and other old land marks are always pointed out as each international match comes round. The trains came out from Philadelphia struggling with their heavy loads, and from every car window appeared the beaming faces of an excited and expectant throng. From the number of small boys, one would judge that education in Philadelphia had for a time been discontinued, for they hung in bunches from the platforms, while others cooly roosted on the engine's cow-catcher. As train after train emptied its living freight, the long grassy meadow to the west of the ground was filled by long strings of visitors, who, in single file, wended their way to the entrance gate; while a more anxious crowd would indulge in a go-as-you-please race, from the station to the ground. Even Philadelphia felt the contagion. It was ablaze with colored posters, depicting a terrific batsman, in the act of slashing away, at what seemed a No. 4 bomb; a lone, and apparently unconscious fielder, producing a perspective, while a squatting wicket-keeper appeared behind the stumps, ready to receive the shot; an illustration of Faith, Hope, and Charity. The effect was immense. Before the arrival of the Irish team, there was a deep ring of spectators around the ground. The Philadelphians were all on hand, and a fresh and cleanly shaven looking lot they were, from the Captain down. They indulged in a little practice, while one of the patrons of the game fielded the ball with a new silk hat. The little boys looked on. Presently the grand stand was filled to the brim, and here and there, among the handsome toilets, was the typical daughter of Penn; bonneted as if to shut out all side communication with the outer world, and to concentrate the gaze of her critical eyes upon the doings of her townsmen. A yell from the small boys announces the approach of the Irish team, and a moment later their captain has won the toss, and elected to go to the bat. A huge dinner bell is rung, and the ground is cleared for the affray.

At 12:15, D. Trotter and N. Hone went to the wickets, against the bowling of Walter Clark (fast round) and Dan. Newhall (everything). Clark began from the lower end, and Trotter cut him for a single. N. Hone followed with a leg hit for 1, and placed the last ball of Dan. Newhall's first over to mid on for 2. Chas. Newhall (fast round) relieved Clark, and three maidens followed. In C. Newhall's first over, Trotter was well caught by Large at point 4—1—1. Sir George Colthurst joined N. Hone, and after running 2 on a leg bye, settled down to careful batting, the bowling being excellent and well supported in the field. After each batsman had scored a single off D. Newhall, three more maidens were put down. Colthurst then got D. Newhall to leg for 1, and in the next over, C. Newhall to the same place, for the like amount. He then cut D. Newhall for 1, the ball being finely fielded. Another maiden for C. Newhall. N. Hone drove D. Newhall for 1, and Colthurst hit him to leg for a double. N. Hone drew C. Newhall for 2, and D. Newhall scored a maiden. N. Hone in the next over, cut C. Newhall through the slips for 1, and Colthurst drove him finely on the on for 3. D. Newhall sent down a lob to Colthurst which he placed to mid on for a single, and then slipped C. Newhall for 1. Colthurst, who had the bowling to himself, hit D. Newhall in the next over to square leg for 1, and C. Newhall bowled a maiden. In D. Neyhall's twelfth over, he got N. Hone's off stump with a slow one, 24—3—9. W. Hone, jr. came next, and C. Newhall bowled Colthurst with a bailer—24—3—12. Brougham joined W. Hone, jr., and after three maidens D. Newhall got the latter's middle stump with another slow one—24—4—0. Three wickets had now fallen without the score being increased, and it certainly appeared as if a funk had been established. Nunn partnered Brougham, and after driving D. Newhall for a single, was cleaned bowled on the first ball of the next over, from C. Newhall—25—5—0. G. Hone secured a single, and retired on a slow "Yorker" from D. Newhall—26—6—1. Miller joined Brougham, who hit C. Newhall to leg for 4 under the ropes. The former after being missed by Hargreave at the wickets off C. Newhall, snicked him to leg for a single. Brougham then got him to leg for 3, and he retaliated by bowling Miller—35—7—1. Casey joined Brougham, and after each bowler had contributed two maidens, the latter was bowled by D. Newhall—35—8—7. Hamilton, the next man, began by driving D. Newhall to the on for 1, Casey followed with a fine off drive for a couple, and then ran a leg bye, Hamilton pulling the last ball of the over to the on for a single. In the next over, Hamilton hit C. Newhall finely to leg for 3, and Casey hit him to same place for 5, a bad overthrow by Law assisting with 4. D. Newhall contributed two maidens. Hamilton drove C. Newhall over his head for 2, and in his next over to the off for 3. Casey then snicked a high one off the same bowler, over R. Newhall, at long slip for a double. In D. Newhall's twenty-second over, Hamilton's off stump was lowered by a slow round—55—9—10. Exham, the last man, drew D. Newhall for 1, and in C. Newhall's next over, ran two byes; the following ball he hit into Caldwell's hands at cover point. The side was out at 2 P.M. The tins showing—58—10—1.

The most enthusiastic cheering followed this result, and the rising generation of cricketers yelled to their heart's delight. An hour was devoted to an excellent luncheon, and at 3 P.M. Brewster and J. Hargreaves went to the bat against the bowling of Exham (slow round), Club House end, and Hamilton (very fast round). Brewster at once drove Exham to the on for 2, and Hargreave snicked Hamilton to leg for a single. When 5 runs had been hit and a bye run, Brewster was thrown out by Hamilton—6—1—2. John Large joined Hargreave, and cut the fast bowler for a single. Hargreaves followed with 1 to leg, and Large scored a single. Hargreaves was then stumped by Brougham off Hamilton—9—2—4. R. Newhall succeeded, and hit Hamilton to leg for 3. In Exham's next R. Newhall got him to mid on under the ropes for 4, and the next ball to long on for 2. Splendid cricket followed, R. Newhall hitting hard and clean, and good fielding supporting the fair bowling, Casey stopping several hot ones at cover point. After six overs from Exhare, he was relieved by Nunn (fast round). In Hamilton's seventh R. Newhall got him to long off for 3, and Large to leg for 4. The bowlers then changed ends, but both batsmen continued to score freely. In Hamilton's eleventh, the first ball clean bowled R. Newhall for a splendid free, all round innings of 30, in which was three 4s, three 2s, two 2s and single—54—3—30. Caldwell joined Large and hit Nunn to long off for 3. They ran a bye, and Caldwell cut Hamilton for 3. This tied the Irish score, and cheer after cheer went up from the multitude of spectators. The scene was one of great excitement. Nunn's eighth was a splendid over, almost bowling Large, and after a bye had been run, having Caldwell stumped. Large continued to play both bowlers with ease, and Exham relieved Nunn. In his first over, Large hit him to point, and Nunn held it finely; his score of 13 was worthy of all praise. It was made up of two 4s, three 2s and single—65—4—13. Dan Newhall, the next man, was almost caught and bowled first ball. Caldwell, after contributing a good 9, was stumped by Brougham off Exham—68—5—9. Thayer followed, and Nunn put down three maidens, Dan Newhall hitting him later to long on for 4, and long off for 3. In Nunn's thirteenth Dan Newhall cut him for 3. The next over from Exham was well played by Thayer, who by bad judgment ran himself out —84—6—2. Clarke filled the vacancy. Hamilton went on again at Nunn's end, and Dan Newhall cut him well for 3; he was then finely caught by Trotter at long on. His score of 17 was compiled with one 4, two 3s, two 2s and single—86—7—17. George Newhall partnered Clark, and in Hamilton's seventeenth over was missed at long leg by Miller, who made a splendid try for it with a sore hand. Exham's next over was badly punished by both batsmen, 9 runs being secured off it. Clark got him to the ropes past mid on for 4 and a 2. A bye followed, and G. Newhall cut the last for a single, but an overthrow increased the hit to 3. As 100 was put up it was the signal for deafening applause. The small boys were in their glory. Exham handed the ball to Casey (slow over hand), and his first ball was hit, hard and clean, to leg by G. Newhall for 3, and Clark succumbed to his fourth. Clark's score of 8 was marked by one 4 and two 2s—106—8—8. Chas. Newhall partnered his brother, who contributed 9 more runs in three hits before stumps were drawn at 5 P.M.—115 for 8. The wicket-keeping of Brougham was remarkably fine at times, and the fielding of W. Hone, jr., deserves mention. There were thousands of spectators, which shows that the Philadelphia public is being educated up to the enjoyment of the fine points of the game.

A beautiful warm day welcomed the continuation of this grand match, and at 11.50 A.M. an immense but very orderly crowd encircled the ground. It was estimated that the number present was much larger than that of the previous day.

G. Newhall and C. Newhall, the two "not outs," began at once a partnership of great merit, the bowling of Casey and Hamilton being first-class and well supported. The latter, however, was not nearly up to his New York speed. G. Newhall, after making several fine cuts off Casey and adding 8 to his score of the previous day, was magnificently caught by Nunn at mid off, off Exham, who had followed Casey. His score of 28 was a fine exhibiton, with one exception, of safe cricket. It was made up of four 3s, six 2s and singles—125—9—28. Law joined C. Newhall. Exham's next was badly punished by both batsmen, yielding 8 runs. Nunn relieved him. Steady play then became the order of the day, C. Newhall playing Hamilton, who was bowling finely, with good judgment. Nine successive maidens were then bowled. Law, in Nunn's following over, got him to leg for a single, and in his next cut him for 1. After Hamilton had bowled eight maidens Miller (medium round) was put on at his end; he was at once placed in the slips by Law for 2, Casey again relieving Nunn, and in the next over Chas. Newhall was run out. His 13 was composed of one 3, four 2s and singles. Law carried his bat for a good 7. Total 149, of which the Newhall quartette had contributed 88, the play of the last two batsmen being most excellent.

At 1.15 P.M. Sir George Colthurst and W. Hone, jr., appeared at the wicket, and Chas. Newhall opened fire from the lower end. Colthurst got him to leg for a double and a single, the last ball of the over injuring W. Hone, jr. In D. Newhall's over, Colthurst was given out l. b. w.—3—1—3. Nunn followed, and after scoring 5 was bowled by Dan Newhall—a fine piece of work—13—2—5. Brougham joined W. Hone, jr., the latter driving C. Newhall for 2, and in attempting a "stupendous smite" broke his bat in half, and with his new one played the last ball of the over on his wicket—13—3—5. Trotter came next, and scored a 3 to cover point off C. Newhall. Brougham in the next over was sharply run out by D. Newhall—20—5—3. Miller, the next man, partnered N. Hone, while he made 6 off both bowlers. In C. Newhall's next he played 1 on his wicket—26—6—6. Intermission was then had for lunch. At 3 P.M. the game was resumed, and Casey, who had filled the captain's place, began to wake up the field by some sharp running. Both batsmen now increased the score to 50, when the nimble Casey ran himself out as usual—50—7—7. G. Hone succeeded, and Miller placed the ball in D. Newhall's hands at mid off, off C. Newhall. His 16, top score of his side, was well obtained—51—8—16. Hamilton filled his place, and at once began "letting out" at both bowlers; he was, however, had by D. Newhall for 5—68—9—5. As Exham joined G. Hone, nothing could prevent a one-innings defeat was now felt by both sides; but the score was run up to 82 before C. Newhall spread Exham's stumps. He had made his 11 in three hits—one of which, a 4 to leg, off C. Newhall, was much applauded. G. Hone carried out his bat for a good 15—82—10—15, Philadelphia winning by an innings and 9 runs. Umpires—Rylott for Gentlemen of Ireland; Giles for All-Philadelphia. Score:—

When it is remembered that the Irish Gentlemen defeated the strong eleven of the Marylebone Club of London this season, the victory for the Philadelphians is doubly commendable. It must be said, however, that the very hard condition of the wicket had much to do with their bad defeat; the visitors are accustomed to play at home on very dead ground, which often early in the season is partly covered with water. The grounds of the Young America at Stenton would suit them much better. Special mention should be made of the proficiency of the Match Committee, which consisted of the following-named gentlemen: A. A. Outerbridge, Esq.; C. Stuart Paterson, Esq.; Thomas McKean, Esq.; F. C. Newhall, Esq., and John Simms, Esq.

GENTLEMEN OF IRELAND vs. UNITED NEW YORK.—The fifth match in the tour of the Irish visitors, was played at Hoboken, New Jersey, on Sept. 23d and 23d. The New York fifteen was not representative, and in many respects it was a weak one. The score will show that the Irishmen won by 213 runs. The feature of the match was the heavy batting of W. Hone, Jr., in his second inning:—

ENGLAND vs. IRELAND.—Capt. Daft received a telegram from Capt. Hone, of the Gentlemen of Ireland, yesterday morning, accepting the former's challenge to play a two days' match before their departure. This game, the only one that will be played in this country, will take place at Staten Island on the 21st and 22d insts. It is needless to say that it will be the finest exhibition that ever took place on the Western continent.

PATERSON vs. ST. GEORGES.—Played at Haildon, near Paterson, N. J., on Sept. 10th, and won by the home club by four wickets. Score:—

G. R. Burge, run out	70		

[V. K. Royle played with Lord Harris' team early in the season at Hoboken, N. J.]

Milo, Mich., Sept. 29th.—Saturday afternoon the Young America Cricket Club again demonstrated that it required something more than weight of years to play cricket. The lads have carried everything before them during the entire season, and have at times played against serious difficulties. The occasion was the return game between above club and the Bay View. Messrs. Hooley and Scherer played a particularly good game. Umpires—C. Dickens and H. Delliner. Appended is full score:—

YOUNG AMERICA.

CRICKET AT TRENTON, N. J.—Two clubs have been formed at the capital this season. The Trenton Cricket Club, and the Americus Cricket Club. Mr. Richard Stevens, Jr., son of Mr. Stevens who used to play for the Philadelphia and St. George Clubs, is secretary of the latter.

HAVERFORD COLLEGE vs. UNIVERSITY OF PENN.—The second annual game between these colleges was played on the Merion Club grounds, at Ardmore, Pa., on Sept. 17th and 18th, when Haverford won by 8 wickets. This is one of the most popular local matches of the season in Philadelphia, and it does much to increase a healthy interest in the American game:—

Mr. E. Kearney has just returned from a visit to New York; while here he had the opportunity of seeing the first Irish match. Mr. Kearney played two seasons ago for the St. George, and will probably visit us again next year, when he will join the Staten Island. Besides being a first-class cricketer, he is a very good fellow, and we regret that he could not wait over to see the Daft match.

TWENTY YEARS AFTER.—It is rather a singular coincidence, that the dates on which Daft's team contested against New York, and are to play Philadelphia, are exactly the same as those on which the first International matches were played by Parr's All-England Eleven, in 1859. We wish the cricketers in both cities successful anniversaries. Cricket is a glorious elixir; and we trust that the last year of this century will still see them pegging away with nothing but fresh laurels added to their score.

ARCHERY.

TOXOPHILITES vs. CRESCENTS.—The closing archery contest between the Toxophilites and Crescent teams was shot at the Driving Park on Monday afternoon, Sept. 23d, in which the Toxophilites were again victorious. This is the fourth match in which the Crescents have been defeated by the former team, which will no doubt settle the question for this season. Below is last score:—

CALIFORNIA STATE ARCHERY TOURNAMENT—*Sacramento, Sept. 25th.—Mr. Editor:*—I send you the winning scores of the archery tournament given by the clubs of Sacramento during State Fair week, at East Park, on Sept. 11th and 12th. It was the most successful meeting

ever held on the Pacific coast. Archery bids fair to be the leading attraction here next summer, and I believe California can soon bring out a team that will beat any team east of the Rocky Mountains. We have already one (F. C. Havens) who has beaten the highest score on record made at the American Round, and some of our Sacramento ladies are experts in the use of the bow. There is to be a tournament in Oakland in two or three weeks, given by the San Francisco and Oakland Archery Clubs.

First Day—Club shooting by teams of five gentlemen; open to all; entries, Pacific Archery Club, of San Francisco; Red Cloud Archers, of Sacramento; Eureka Archery Club, of Sacramento; Capitol Bow Club, of Sacramento. The Red Cloud Archers team not being complete could not contest in this match. Each archer 30 arrows at each range:—

	40 Yds.	50 Yds.	60 Yds.	60 Yds. Total.
F. C. Havens	201	181	145	527

Second prize, won by Mrs. H. N. Rogers (both of the R. C. A.)	29	169	23	99	14	38	—	306
Third prize, won by Mrs. Leftwich	29	120	26	130	15	37	—	296
Frth prize, won by Mrs. R. O. Cravens (both of the C. B. C.)	28	140	24	100	21	53	—	295

An extra prize given, open to all ladies, for the best score with 30 arrows at 30 yards. Won by Mrs. Inwall, scoring 28 hits 136 points. ARCHER.

BINGHAMTON ARCHERS.—Binghamton, N. Y., has an archery club, which contests weekly badges for the lady and gentlemen members.

—The National Medal of Great Britain was won on the 6th and 7th of August by Mr. R. Walters with a score of 729. This is the lowest score, with one exception, by which the medal has been won for thirty-five years—the exception being 1877, when Mr. Rimington won with 703. Some fine scoring, however, was done at the Crystal Palace meeting and the Grand Western. At the first-named meeting C. E. Nesham scored 160 with twenty-four arrows at 60 yards.

TOXOPHILITES VS. FRANKLINS.—The Toxophilites, of Woodside, N. J., a club organized this season, met the Franklin Archery Club in a friendly match on the grounds of the former on the 25th inst. The teams consisted of four ladies and five gentlemen from each club. The ladies shot 30 arrows at 30 yards, and the gentlemen the same number at 40 yards:—

FRANKLIN ARCHERY CLUB.	Hits.	Score.	TOXOPHILITE ARCHERY CLUB.	Hits.	Score.

Mr. Gilkeson	5	9	3	1	—	18	120—	446	72
Grand total								741	133

The three highest scores ever made by any members of the club are 119 points with fifteen arrows at twenty yards by Mr. Gilkeson; 115 by Mr. H. Pierce, and 111 by Dr. Ivins. POUTAXAT.

Milwaukee, Sept. 29th.—The archery fever is indeed upon us. With the exception of a few enthusiasts who practised occasionally last season, Milwaukee has known but little of the archery fever. This summer, however, it has become epidemic, and club after club has been organized—some to continue their interest in the health-giving game, and others more for lack of time than enthusiasm, discontinuing. Dealers in sporting goods have carried large and expensive stocks of implements, and inform your correspondent that the demand has been over the supply. Young and old either attach themselves to an organization for practice and competition or with home-made butt twang away in their back yards and on their lawns for a few hours daily. The principal organizations, however, are the Sherwoods and Milwaukees. The Lookseys, a formation promising to take front rank, abandoned the field at an early stage of the excitement and have not since been heard from.

The Sherwood Archers, captained by Mr. John Campbell, muster the following bowmen and bow-misses:—Messrs. J. F. Pierce, W. J. Conway, Wm. Temple, C. E. Lyman, Charley Norris, C. H. Austin, Jas. R. Bradford, R. H. Bradford, P. D. Hoyt, and W. R. Rogers. The Misses Wells, Tesch, Mower, Lyman, Brockway, Woods, A. Jervis, L. Jervis, Mrs. W. P. Rogers. The members of the other clubs have failed to furnish your correspondent their names. Several interesting matches have already taken place at the private grounds of a wealthy Milwaukee gentleman, at which a large attendance has ever been noticeable. The most attractive feature of this year's work occurred at the Sherwood's grounds Tuesday, Thursday and Saturday afternoons, when the members indulged in a competitive prize shoot. In this Miss Lyman, for the ladies, took the lead, and also a beautiful silver-tipped snakewood bow, which she may well be proud of. Mrs. Rogers captured the second prize, a very handsome shooting hat; Miss Woods, third, quiver; Miss Hustis, the fourth. R. C. Bradford took first gentlemen's prize, a silver medal; W. P. Rogers, second, an arrow box and arrows, and third, quiver, P. D. Hoyt. The scores for the three days were as follows:—

LADIES.

	Mon. H.	Mon. P.	Wed. H.	Wed. P.	Fri. H.	Fri. P.	Total H.	Total P.
Miss Hustis	7	35	12	60	13	59	32	154
Miss Lyman	27	157	28	129	28	132	83	409
Mrs. Rogers	21	83	18	74	19	77	58	244
Miss Woods	20	76	19	81	18	86	57	243

GENTLEMEN.

C. H. Anson	17	83	13	74	21	75	46	202
J. R. Bradford	19	81	19	68	20	60	45	209

L. ECLAIRE.

—The following is the score of Sept 24th:—

WAHASE MERRY BOWMEN—AMERICAN ROUND.

	40 Yds. Hits.	40 Yds. Score.	50 Yds. Hits.	50 Yds. Score.	60 Yds. Hits.	60 Yds. Score.	Total. Hits.	Total. Score.
John A. Booe	30—102		27—131		26—122		83—445	
Theo. McMechan	30—132		24—110		28—133		83—425	
Maurice Thompson	30—244		28—154		26—132		84—530	
Will H. Thompson	30—204		30—184		29—177		89—565	
	120—822		109—579		110—564		339—1965	

The 40 yards score of Mr. Maurice Thompson is certainly a wonderful piece of shooting at that range. The details of the score are as follows:—997, 795, 999, 979, 977, 777, 997, 999, 779, 999—344. Eighteen golds, eleven reds, one blue.

—On the 25th September Mr. Will H. Thompson, Mr. John A. Booe and Theo. McMechan shot 144 arrows at 60 yards, with the following result:—

	1st 24.	2d 24.	3d 24.	4th 24.	5th 24.	6th 24.	Total.
John A. Booe	20—90	22—102	18—76	23—111	19—91	20—94	122—564
Theo. McMechan	16—68	23—115	20—84	22—104	21—83	22—96	124—548
W. H. Thompson	24—142	23—133	24—156	23—137	24—146	21—138	142—852

This round of 144 arrows at 60 yards is a favorite with the English, and we find that the best shooting at that round last season was on the 9th day of May, when ten of the best shots of the Royal Toxophilites shot the round, and the three highest scores were:—

	Hits.	Score
H. Walrond	139	777
G. E. S. Fryer	128	624
C. J. Longman	123	508

This shows our American archers in a fair comparison with the finest English shots.

MICHIGAN ARCHERY ASSOCIATION.—The Michigan Archery Association was organized at Charlotte, Michigan, last week, with the following clubs as members: The Crescent Bowmen, of Charlotte; Hastings Archers, of Hastings; Golden Star Bowmen, of Jackson; Toxophilites, of Detroit; Robin Hoods, of Detroit; Battle Creek Archers and the Robin Hood team, of Flint. The constitution adopted is, in a modified form, that of the National Archery Association, and the officers are as follows; President, W. T. Brown, of Hastings; Vice-President, John N. Ostrom, of Detroit; Corresponding Secretary, Dr. Wm. H. Dorrance, of Jackson; Recording Secretary, P. S. Degraff, of Charlotte; Executive Committee, the President, ex-officio; E. T. Church, of Charlotte; Louis P. Campau, of Detroit; E. M. Converse, of Battle Creek, and one member yet to be appointed by the Robin Hood team, of Flint.

The first tournament will be held in Detroit next June. Any information in relation thereto may be had upon addressing L. P. Campau, Secretary and Treasurer of the Toxopholites, of Detroit.

—On the 26th of September a match was shot between Mr. John Wilkinson, of the North Side Archers of Chicago, and Mr. Will H. Thompson, of the Wabash Merry Bowmen, of Crawfordsville, Indiana, upon the following terms: Mr. Thompson to shoot 60 yards against Mr. Wilkinson's 40 yards, 70 yards against Wilkinson's 50 yards; and 80 yards against Wilkinson's 60 yards; 30 arrows at each distance; Mr. Wilkinson being thus given the odds of twenty yards distance at each range. The result was as follows:—

	40 Yds. Hits.	40 Yds. Score.	50 Yds. Hits.	50 Yds. Score.	60 Yds. Hits.	60 Yds. Score.	Total. Hits.	Total. Score.
John Wilkinson	28	148	29	112	15	63	69	323
	60 Yds. Hits.	60 Yds. Score.	70 Yds. Hits.	70 Yds. Score.	80 Yds. Hits.	80 Yds. Score.	Total. Hits.	Total. Score.
Will H. Thompson	23	166	29	127	24	96	81	389

Mr. Thompson's 29 hits out of 30 shots at 70 yards is certainly very fine for match shooting.

THE ORITANI ARCHERS AT THE EASTERN ASSOCIATION TOURNAMENT.—The Oritani Archers, who were so fortunate in winning so many prizes at the first meeting of the Eastern Archery Association, represent one of the oldest clubs in the East. It has a large number of lady and gentlemen members residing in Hackensack, New York, Brooklyn, and Philadelphia. Mr. Holberton, who has been President of the club since it was organized, won the 2d prize (most reds) on the first day's shooting, a 5th on the total score. Mr. Lawrence won 1st prize at 80 yards. Both the above gentlemen shot the Malleson patent split-bamboo bow. Mr. Brandreth and Mr. Kingsbury, also, won prizes; besides which, the members won five sweepstakes on the first day, and the fourth place on the team match.

WHAT SORT OF AN ARROW SHOULD BE USED?—Most archers who are in any degree experimentalists, have found to their surprise that with a fifty pound bow they could shoot a five shilling arrow farther than one of only four shillings weight when elevating forty-five degrees for a flight shot, while in shooting at sixty yards the 4.0 arrow maintained a much flatter trajectory than the 5.0 did. So they came hastily to the conclusion that the 4.0 or light arrow was the best for long range practice because of its lower flight. If they had studied a little more carefully the laws governing projectiles they would have found that light projectiles have a far greater initial velocity, but lose it more rapidly in their flight than heavy ones do. Thus if a shot gun be loaded with a mixed charge of ½ ounce of No. 12 shot, and ½ ounce of No. 4 shot, and be discharged, the No. 12 shot will start with a vastly greatly initial velocity than the No. 4's, but will be overtaken by the 4's by the time a distance of forty yards is reached. The heavy shot will then pass away from the smaller shot, and continue their flight to a much greater distance. This is precisely the case with arrows. The light arrow for about the distance of sixty, possibly seventy yards, will fly with greater speed and consequently have a flatter trajectory than its heavier rival; but at about sixty yards the resistance of the atmosphere overcomes the energy of the light shaft to such an extent as to place it on equal terms with the heavy one, and after this the rivalry ceases, the bulky fellow having the advantage in momentum. The above facts being accepted, for they are beyond controversy true, the question remains, what arrow is best?

We put in our plea for the big fellow. The best archer who ever drew a cord, from the creation to the present day, Mr. H. A. Ford, used a 5.0 arrow, with rather large feathers, on the ground that such an arrow had great solidity of flight. He used the true expression. Whoever has used light and heavy arrows for a long time, patiently experimenting as the writer has, will have noticed the evenness of his scoring with the heavy arrows and the erratic scoring with the light ones. While he may have made some high scores with the light arrows, there was an irregularity in his shooting which was very annoying. The little fellows seem to have a chaffy, flippant style about them which does not comport with the idea of great accuracy, while the more sluggish and solid flight of the heavy arrow gives confidence to the mind, of its reliability. One defect common to light arrows, is the liability to spring when shot. In archer parlance they do not stand in a bow. This springing is often not so great as to be perceptible to the archer, but the result is disastrous. Of course after one has long used light arrows and turns to heavy ones, his shooting will not be so good at first, but the improvement will be rapid and the result much more satisfactory. The first passion of the young archer is for a strong bow and light arrow in order that he may reach the through level; but the wise old archer has long ago

changed his seventy pound bow and 4.0 arrows for a forty-six pound bow and 5.0 arrows, and having perfect control of his bow he sends his arrows smoothly and evenly over their long parabola to the mark, a hundred yards away, and his scoring is a wonder to the eyes of his rival who draws his mighty bow with a jerk, and sends his light arrows away with a swallow-like darting flight, neither beautiful or reliable. A forty-eight pound bow is heavy enough for an athlete for target use at 60, 80, and 100 yards, and 5.0 arrows are light enough.

WILL H. THOMPSON.

WHAT IS THE UTMOST FLIGHT OF AN ARROW?—Taking it for granted that no archer gives any credence to those preposterous tales, which everyone has read, of the phenominal archers of ancient days, who could send an arrow all the way from 600 yards to the same number of miles, it still is a question with many as to how far a first class bow will send a good flight arrow. The English archers have made many experiments within the last forty years, and Mr. H. A. Ford, who was a leading spirit in these experiments, came to the conclusion that 300 yards is about the limit of the flight of an arrow, and cites but *one* instance in which 300 yards was passed by the arrow of any shooter, and that was shot from a Turkish horn bow in the hands of Peter Muir, the oldest archer now living. Mr. Ford himself, who was a "very tall and exceedingly powerful man," only succeeded in covering 289 yards. This was with an Italian Self yew bow of 63 pounds weight. The writer of this paper has lately made many experiments with bows and arrows of different makers, and of various weights, and has been greatly surprised at the small difference of distance gained by five or ten pounds additional power of draw. A very trifling difference was found also in the use of light or heavy arrows. Using various bows of from 44 to 70 pounds, the ranges of flight varied from 194 yards to 287 yards.

The most satisfactory test gave the following average ranges (ten arrows being shot each time), for the flight of certain weight arrows from different bows:—

44 POUND ROSE AND HICKORY (HORSMAN).

Arrow.	*Maker.*	*Yards.*
4 0	Highfield	196 4

5 0	Aldred	195 2
5 0	Horsman	194 8
5 6	Highfield	194 1

50 POUND SPANISH SELF YEW (ALDRED).

4 0	Highfield	221 6
4 0	Horsman	227 4
4 3	Horsman	227 8
4 6	Horsman	224 0
4 6	Highfield	221 0
5 0	Aldred	233 7
5 0	Horsman	228 0
5 6	Highfield	212 8

54 POUND SNAKE, BACKED WITH LEMON (HORSMAN).

4 0*	Horsman	233 3
4 0	Highfield	244 8
5 0	Horsman	278 2
5 0	Aldred	284 6
5 3	Horsman	283 6
5 6	Highfield	284 3

70 POUND SELF SNAKE (HIGHFIELD).

4 6	Horsman	240 0
4 6	Highfield	238 7
5 0	Aldred	251 9
5 0	Horsman	263 3
5 3	Horsman	267 8
5 6	Highfield	275 9

†62 POUND SPLIT BAMBOO (MALLESON).

5 0	Horsman	282 8
5 0	Aldred	280 8
5 3	Horsman	284 9
5 6	Highfield	277 6

Of course, the above would be only a partial test of the value of any one of the bows or arrows for flight shooting, but it very clearly demonstrated the utter uselessness of very light arrows or very heavy bows for flight shooting. With the 54 pound bow the 4.6 arrows of Highfield were beaten 40 yards by the 5.6 arrows of the same maker.

With the same bow Mr. Horsman's 5.3 arrows outstripped his 4.6 arrows 32 yards.

With the 70 pounder the 4.6's of Highfield were beaten by his 5.6's 37 yards, while Mr. Horsman's 5.3's gained 37 yards over his 4.6 arrows.

With the 50 pound yew the 5.0 arrows of both Aldred and Horsman seemed best suited, beating the lighter and heavier arrows in distance. With the light rosewood bow there seemed very little difference in the value of the arrows for flight purposes. In a few instances the average of certain of the tens shot may have been cut down one or two yards by an arrow being badly loosed or aimed a trifle too low, but the extreme flight of each weight of arrow, with each bow, was closely approximated.

From the above and many similar experiments I come to the conclusion that 300 yards is possibly, but not probably attainable.

That a bow of 55 pounds is as heavy as one can loose smoothly so as to get its greatest flight, and, consequently, while in theory a heavier bow will shoot farther, in practice it will not.

That an arrow of 5.0 weight, made of hard, rigid and heavy wood, so as to be small in cross section, with very narrow feathers set on straight, will shoot farther than any other weight. The lighter arrows have a far higher initial velocity, but do not retain it so long as the heavier ones. They will thus have a flatter trajectory for 80 yards than heavy ones, but lose more rapidly in the latter part of their flight. Such a 5.0 arrow as I have described, and a quick backed-bow of 55 pounds will give from 275 to 300 yards flight in fair weather, and with a quick, smooth loose. Of course, the elevation must be 45 degrees, and the string must not touch the arm-guard.

WILL H. THOMPSON.

*I tried the 4.0 arrow2, but they would not stand the powerful recoil of the bow, even the 4.6 springing a little.

†This bow when made drew 57 pounds, and is so marked, but has grown five pounds, and none of the arrows lighter than 5.0 will stand in it.

RESULTS OF ARCHERY.—The returns from the Female Archery Clubs of America for the season of 1879 are now all in. We gather from them the following interesting statistics, which indicate that this branch of industry is in a flourishing condition: The target was hit during the season three times out of a possible score of 84,000,000. The rumor that these three times were accidents is without foundation; 2,874 of the archers have become hopefully engaged to the young gentlemen who were so kind as to teach them how to aim; 8,940 other girls are sure they would also have become engaged had it not been for these 2,874. The 8,940 do not hesitate to assert that the 2,874 took unfair advantages and were unbecomingly forward. The matter is to be brought to the notice of the next National Convention of the Archers. During the year, 184,948 barn doors were well hit. Of this number, 92,474 appertained to barns situated less than a mile to the right of the target; 92,474 to barns situate less than that distance to the left of the target. The casualities of the year are immaterial, and considerable less in number and severity than those of the season of 1878. It appears from the returns that only 280 cows, 18 horses, 7 goats, 5 pigs, 83 small boys, and 23,720 peddlers of a new map of Palestine were either killed or wounded during the season, and that in every instance the blame was with the animal hit. The archers to a girl have filed affidavits from which it appears that each one of those cows, horses, goats, pigs, and boys were recklessly exposing their lives by standing within 5,280 feet of the respective targets at the time the accidents occurred.—*Albany Journal.*

ILLINOIS—*Highland Park, Sept. 20th.—Editor Forest and Stream:*—The discussion relative to the merits of different bows and bow-makers continues to interest many correspondents of the FOREST AND STREAM. As all the letters on the subject are written with perfect disinterestedness and succeed in advertising some one, perhaps we shall do the same. But we assure you we are not the agent or paid correspondent of any manufacturer.

"Truth" writes a letter from Chicago, published in your last issue, to which we wish to call a little attention. He refers to two members of our club. He speaks of Mr. Hall's Aldred yew having been broken at the Chicago tournament. It did slightly crack near the handle, but Mr. Spalding's skilful bow-maker repaired it so perfectly that it shoots as well as ever. "Truth" says, "although Mr. Carver had an Aldred Spanish yew, costing $125, he did not shoot with it, and that he endorses American made bows in high terms." The above is truth; but if "Truth" had told the whole truth, he would have said, "Mr. Carver shot a high priced Aldred Spanish yew at the tournament, but did not shoot his $125 bow, as he preferred one pulling less pounds." His endorsing American make bows did not prevent his using an Aldred yew. Nor did the extravagant praise given American made bows by Mr. Will H. Thompson prevent his using an Aldred yew and Aldred arrows. That Aldred's bows, as well as all others, will break, no one questions. And no one questions the fact that there are good American made bows, and that next year there will be better ones. But Aldred bows and arrows give such perfect satisfaction that we want all archers to know it. We are now using an Aldred yew which we did not get for "writing him up," but bought it. Besides our team and reserve, who own from one to three Aldred bows each, there are four Aldred yews and two lance bows owned by members of the Highland Park Archers, and there will soon be several more. N. K. D.

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We make no charge for answering inquiries in this column.*

E. B. B., Vail, Ia.—See our archery department this week.

J. H. E.—When does quail season open in Virginia? Ans. Oct. 15th.

F. R., New York.—Take the Long Island Railroad to Good Ground.

THISBEE.—You can buy an excellent map of the Thousand Islands from Geo. Rockwell, of Fulton, New York.

J. C. S., White Plains.—State where the Phœnix single barrel breech-loading guns are made? Ans. Whitney Arms Co., New Haven, Conn.

W. B., Walkerton, Canada.—Referee's decision is final; as the traps were properly placed, you are entitled to the money or the forfeit.

W. C. B., Bridgeport, Conn.—You cannot make a standing hop from both feet. One foot must be lifted from the ground or it is a jump.

D. L., Brooklyn.—In what points were the game laws of New York changed by the last Legislature? Ans. See our issue of July 3d, 1879.

E. C. S., Harrisburg—We cannot verify the pedigree, as you do not say whether the dog is a setter, pointer or spaniel, or when imported.

J. K. T., City.—Will you be so kind as to inform me where I can procure black bass to stock a pond? Ans. Address Milton Peirce, 604 Jayne street, Philadelphia.

YOUNG BEGINNER, Philadelphia.—Some guns are like mules, always will kick. Try a smaller charge. Hold the gun firmly to your shoulder. John Krider will tell you where to go for squirrels.

M. D., Hartford, Conn.—One drachm avoidupois is 1-16 of 437½ grains, or a little less than 27½ grains. One drachm apothecary is ⅛ of 480 grains, or 60 grains. A drachm of gunpowder is 27½ grains.

GREEN, Washington, D.C.—Please inform me where I can purchase a light and effective revolver for pocket use. Ans. Smith & Wesson, of several calibres, and many other excellent makers, at new or second hand, at any gun dealer's.

C. C. W., St. George, N. B.—Please tell me the probable cost of altering a muzzle-loading rifle to a breech-loader, and where it can be done? Ans. From $50 to $75. Clark & Snider, Baltimore, have an excellent reputation.

A. C., Boston.—1. What is the pedigree of Horace Smith's liver and white pointer bitch Blossom? 2. Also Colburn's Belle (pointer)? Ans. 1. Do not know. Write to H. Smith, 33 Park Row, this city. 2. By Bevo's Rollo out of his Belle.

J. H. C., Philadelphia.—1. Pike County, Pa., is full of game, deer, squirrels, rabbits, ducks, woodcock, grouse, and other birds. The fishing is for bass, trout, perch, pickerel, catfish, etc. 2. The pattern is a good one. 3. The guns can be bored as desired.

CONSTANT READER.—Painesville, Ohio.—Your description points more nearly to the king rail (*Rallus elegans*) than to any other bird that we can think of, though in some points it differs widely from this bird. Can you send us a specimen, or a head, leg, and wing of one?

W. C. W., Monroe, N. C.—Georgetown County, South Carolina, is an excellent region for duck shooting. The wild fowl are attracted by the extensive rice fields near the coast. Make George town your headquarters. You will find no difficulty in there obtaining direction to the right places.

G., West Durham.—We don't know anything about raffles. Must refer you to some church fair committee for this. In the case you state, where A threw 42, B and C 40 each, and E, F and G 39 each, we should think that A takes first, and B and C throw again for second and third prizes.

JARED, City.—The law exempts from duty animals imported for breeding purposes, of superior stock, adapted to improving the breed in the United States, but they must be accompanied by a certificate from the United States Consul at port of shipment that they are but for such purpose.

ASTHMA, Boston.—In reply to "Asthma, Boston," go either to Pensacola, Fla., or Norcross, Ga. I spent last winter in the former place; climate simply perfect. No trouble with asthma there. Norcross, Ga., is said to be equally as good and a cheap place. For full information in regard to Norcross, address Col. D. U. Sloan, of Norcross.—J. C. H., Oconomowoc, Wisconsin.

Nemo, Philadelphia—The trouble of which you complain in your dog is merely puppyishness, and may not disappear until he is over two years old. Large dogs are sometimes slow in maturing, and cannot be called fully developed until they have reached the above age, at which time, if the characteristics mentioned have not entirely disappeared, we should breed him.

G. F. G.—To go on record, matches must be held under such conditions that correct timing, scoring, &c., may be insured and the results vouched for by competent witnesses. In general, matches which are held in public with proper scoring and judging are considered records. We do not know what is the best score ever made by eight men from one club, Card's rotating trap, eighteen yards, possible 200.

McL., Lodi, O.—Can you furnish me a standard work on taxidermy? Please state the price. Ans. The two best general taxidermist's guides are "Field Ornithology" ($3), by Dr. Elliott Coues, and Maynard's "Naturalist's Guide" ($1.50); both for sale at the Naturalists' Agency, Salem, Mass. J. H. Batty's "Taxidermy," for sale by the author at Parkville, Long Island, N. Y. (price $1.50), is an excellent book; and so is Brown's "Taxidermist's Manual" ($1), for sale by the Orange Judd Publication Co., New York.

H. E. R., Harrison, O.—Please tell through your valuable sheet who makes the best shooting boots or shoes for hunting over rough ground—boots that fit, and don't knock spots out of your feet. Ans. Nothing better than the pattern of the broad-soled, broad-heeled army shoe, unless it be a moose hide moccasin, with parfleche sole sewed on. Parfleche is dressed cowhide soaked in alkali, stretched on a frame, and dried while green. It becomes as hard as iron. Some one in the Indian country will make them for you.

C. C. F., Frederick, Md.—1. Some time ago I wrote to you for a cure for the mange, which my Gordon had very bad. I used the petroleum and arsenic, and it dried it up. It broke out again, and I cured him by the same application. It has broken out again in several places. Can you give me something that will cure him permanently? 2. Have you known anything of the Samuel Buckley guns, London make? Ans. 1. The breaking out of the mange is due to uncleanliness or wrong diet. Try the remedy again and feed more vegetables. 2. No.

A. M. T., Nottawa, Mich.—1. Are English bulldogs usually good tempered in the family, and will the St. Bernards make good watchdogs; also, whether (on account of their size) the St. Bernards are more expensive keepers than others. 2. Does your pamphlet, compiled from Stonehenge, include descriptions of all kinds of dogs known in this country? Ans. 1. Yes, if properly brought up. The St. Bernard would be the best dog for you, and would cost no more to keep than any other. 2. Yes, and can be sent from this office on receipt of price, 50 cents.

W. B. R., Welland, Ont.—There was something wrong with your dog's kidneys or bladder; probably he had taken cold. If it had continued the treatment would have been sulphate of magnesia, one ounce; nitre, fifteen grains; water, enough to dissolve; to be mixed and given twice a week. If you are now using this remedy for the discharge and without effect, try two capsules of balsam of capaiba every day, unless you are satisfied that the discharge is from the sheath alone, in which case use only a wash of sulphate of zinc, fifteen grains to one ounce of water.

W. P. T., Village Green, Pa.—What kind of deer shooting can there be found in Atlantic county, New Jersey? Ans. No good deer shooting. Would a double-barreled breech-loading shot gun be suitable for shooting them? Ans. Yes, if loaded with buckshot. What would be the prospect for grouse and partridge shooting? Ans. Very good. Our correspondent will do well to bear in mind the non-resident game laws of New Jersey, and the fact that several counties are under the especial jurisdiction and protection of the Central and West Jersey Game Protective Associations.

S. E. K., Syracuse, N. Y.—A and B make a bet September 20th of $500 on the walking match just closed in New York. A bets $500 that Weston will take first money; B that he will not. A puts his money into my hands; B says, I have but $250 by me, but will put up the balance to-morrow. A consents to the arrangement, and B puts up his $250. Have not seen either of them since until to-day, and no farther arrangement has been made. B comes to me this morning and claims the stakes in my hands. I decline to give it up. I would like to know what to do in the premises. What is my duty as a stake-holder? Ans. B wins. It was A's business to see either that the full amount of money was up before the walk took place, or reduce his stake to B's pile, or to withdraw the bet altogether. It was a case of credit, like any business transaction.

S. B., Cleveland, Ohio.—My friend claims that crows, rooks and jackdaws are all one. I claim that a crow is a carnivorous bird, and a rook a bird that feeds on insects, worms and grain, and that a jackdaw is a bird that frequents churches and old castles, and is only about half the size of a rook. 2. Could you please explain the cause of my Shelton auxiliary rifle shooting so much to the right? At seventy-five yards it shoots so much to the right that it is very difficult to make allowance enough. Ans. 1. You are quite right, and your friend is wrong. The crow of Europe is *Corvus corone*; that of America, *Corvus americanus*; the rook is *Corvus frugelegus*; and the jackdaw *C. monedula*. Rook pie is a dainty dish, but crows and jackdaws are never eaten, we think, except as an experiment. The rook, as its Latin name implies, feeds mainly on grain and vegetable food. 2. In double-barrel shot gun there is a slight defection of the bore of each barrel, which, while not appreciable when shot is used, becomes very marked in shooting ball. To remedy it you must shoot at a mark, regulating your rear sight until it is properly adjusted

FOREST AND STREAM
ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY.

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

*** Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, OCTOBER 9, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remitted to us is lost.

☞ Trade supplied by American News Company.

KUKHSIN.—A correspondent, who owns a stock ranch away up in the Blackfeet country, in the Northwest Territory—not the safest place in the world for his line of business, we should say—sends us a handful of what the Indians call Kukhsin. Kukhsin is an ingredient which the Reds mix with tobacco, and smoke. It is almost universal with the mountain Indians. Botanists call it *Uva ursa*, we believe. The leaf is ovate, small and shiny, and very much resembles the common box used for garden borders. It adds much pungency and flavor to the tobacco, and is even more enjoyable than Kinnick-kinnick, which has been in use among the aborigines for so many centuries, not so much as a substitute for tobacco, as to give it piquancy. Kinnick-kinnick is the inner bark of the osier, or red willow. It is prepared by shaving up little laminals of bark all around a stick of the willow, and then drying them over a fire and stripping off with the palm of the hand.

A DISASTROUS PARAGRAPH.—The *Scientific American* originated this paragraph:—

The Pittsburgh *Telegraph* tells how a restaurant keeper got rid of the flies that infested his place. The doors and windows were closed and a train of very fine gunpowder was laid in narrow strips over the floor, and the spaces between the strips were carefully painted with molasses. In an incredibly short time all the flies in the room seemed to be on the floor enjoying the luxurious repast so temptingly placed before them. It was but the work of an instant to fire the train. The result, when carefully weighed, was two pounds three ounces of dead flies. How many ounces of gunpowder were used is not stated.

Since the publication of the highly combustible item, about five hundred young gentlemen of a practical turn of mind have been experimenting to determine just how many ounces of gunpowder spread over the floor are required to destroy the flies of five hundred parlors, dining-rooms and kitchens. It has also been discovered that the successful destruction of these insect pests had a marked and uniform influence upon the rates of fire insurance, and that such advance in rates was confined to those sections of the country where the aforesaid paper most does circulate. It is moreover a nice question for the courts to decide whether or not the owners of these five hundred burned houses can recover damages from the publishers of the incendiary item. We can see no escape for the gentlemen unless they can prove, as in libel suits, that the publication was in good faith and not malicious.

—The joys of the present earth are but transitory; but in the "Happy Hunting Grounds" beyond the skies, the Indian summer, such as we have enjoyed for the past fortnight, is perpetual. The resplendent forest tints of our autumn are true photographs of the glories of the heaven beyond. "The world is indeed beautiful, and He who made it must be beautiful."

THE UTE EMEUTE.

LAST September the following reply to an inquirer was given in our correspondents' column:—

BRITISHER.—"Would hardly recommend the Rocky Mountains now for hunting, as the Utes are on the rampage, which renders hunting risky."

Recent developments indicate the significance of this caution. It may be well to say here that the editors of FOREST AND STREAM are in constant communication with all the frontier army posts of the country. There is hardly one of these posts, if any, which our paper does not reach, and we are proud to claim many of the army officers as the most fruitful and entertaining among our correspondents, especially upon matters of physical geography and natural history. So also are we in constant rapport with sportsmen from abroad as well as at home, who ask us to designate guides and furnish letters of introduction to reliable parties among the Mountains. In sending our friends into the wilderness we voluntarily assume a responsibility which we would not dare to do did we not place implicit confidence in our connections and our sources of information, as well as our personal acquaintance and knowledge of the hunting-grounds which have now become such a popular resort for both English and American sportsmen. One of our editorial staff returned only a month ago from this very locality, where the "bucks" (both red and Indian-tanned) are now running, and we feel some satisfaction in knowing that we were the humble means of dissuading several gentlemen from going there.

The Utes have been the friends of the white man for thirty years. We have taken Chiefs Ou-ra and Billy by the hand, and have heard their friendly converse. We know their grievances, and that they are hard to bear. That these grievances will be abated soon, but never removed, we feel certain. There is no use of fighting against fate; and we trust that the head men of the tribe will make up their minds that this is the fact, and counsel their young men to be discreet, and, if necessary, to suffer and endure. For long years the Utes and whites have made common cause against the predatory Indians. Trappers have wintered in the Ute camps, and they and the whites have divided their last ear of corn between themselves. These are old compagneros, whom circumstances have so recently made foes; who have lifted hair together for many a year, and saved for each other many a goodly scalp. Their boys have grown up together, and learned to call each other by name. It is a misfortune that these old friends of the cache, the camp, and the corral, are now pitted against each other. There are extraneous causes for the situation, but the direct cause is shown by the recent letters of our staff correspondent in Colorado, in one of which he says:—

"The rapidity with which our western country is settling up, impresses me more and more each year. Just as soon as any section becomes safe, *the Indians having been driven off*, the cattle-men begin to drive their herds into it, and before long one hears complaints that there are too many cattle there. The older settlers complain that the newer comers are "crowding" them, and soon the most energetic commence to move off in quest of fresh fields and pastures new."

If these things are done in the green tree, what shall be done in the dry? If the white usurpers are restive for elbow room, what shall we say of the temper of the native occupants of the land? The New York *Herald* of last Sunday stated the case perhaps even more succinctly, when it said of these Indian wars:—

"They are, in simple fact, the consequence of the growth of the country. There was peace west of the Mississippi a generation since, because then the white man and the Indian were not in each other's way. Since then the Indian has swarmed out that way; he has built cities and railroads, he runs stages, hunts the buffalo, raises corn, and distils whiskey, and there is contact and friction between the races. The country west of the Mississippi Valley is in the same condition in this respect that the Atlantic coast region was in two hundred years ago."

We trust the wise men of the Utes will determine that it is the best policy to bury the hatchet. They are not savages; they are sensible men. When at trading posts, and not on the hunt, they dress in the garb of civilization, just as the whites do; in buckskin and leggings when they take to the timber and the plains. But whatever the determination of the issue may be, of one thing we are positive, and that is, that the lives of the best Utes that ever lived, no matter how often they have tramped by our side, and taken meat at our camp fire, are not worth, man for man, the lives of our gallant soldiers who are so often sacrificed to the disturbances which the logic of events force to the surface. Moreover, the army posts are so scattered, and the soldiers of the frontier army numerically so very few, that the few companies and detachments we have are kept constantly at forced marches and short rations; compelled to fight big odds of superior forces, and altogether suffer an extreme of arduous duty, really pitiable to consider. There should be soldiers enough in the field to afford full protection to settlers. One of these days the people out there will take care of themselves, but for ten or twenty years to come the government must protect them. The standing force should be large enough to quell at once any disturbance, and ensure against its repetition in any part of the Indian country.

GAME PROTECTION.

—We have received from the Michigan State Sportsmen's Association the Transactions of the Fourth Annual Session. This publication is unique, and, we may believe, serves a very useful purpose. It contains among other things the game laws of the State.

POSTED LANDS IN CALIFORNIA.—The land proprietors in the quail country of California have taken a good stand against the pot-hunters. According to the *Pacific Life*, "'no shooting allowed on these premises' stares the the hunter in the face on every side, and even on remote hillsides, where he hopes to blaze away to his heart's content, that same grim warning confronts him. So, if he does not want to be 'prosecuted according to law,' as the legend expresses it, he turns sadly homeward, or better still, endeavors to negotiate with the proprietors of the forbidden grounds. Marin, Contra Costa, Alameda and Napa Counties, all excellent quail grounds, are strictly preserved, and posted according to the Legislative Act of March, 1872, which forbids persons entering enclosed lands without the permission of the owners. The shooting in those counties, Marin especially, is very fine, but at the same time jealously guarded. To those who are not 'on the inside' with the owners of the quail grounds, the southern counties offer the strongest inducements and the best possibilities for making a big bag. In San Benito, San Bernardino, San Buenaventura and Los Angeles Counties the birds are numerous and early, and the 'no-shooting-allowed' notices infrequent. The country, or a great portion of it, is so open that the sportsman may shoot away all day and never have his right to wholesale slaughter questioned. But the 'no-shooting' notices in the first-named counties are intended for the market-hunters, those ruthless destroyers, who will massacre a whole bevy of quail at a single shot, if they can stalk them, and depopulate a good cover in a day. Gentlemen, as a rule, can obtain permission from the owners or lessees of the lands to shoot, but the pot-hunters are invited to stand off. In fact, the farmers, their sons and employees like to keep the sport to themselves.

MOOSE BUTCHERY IN MAINE.—*Boston, Mass., Sept. 26th—Editor Forest and Stream*:—The article on New Brunswick Game Laws prompts me to write you of the butchery of moose last spring at the head-waters of the Aroostook in Maine. Andrew Taylor, of the International Steamship Line, told me last spring on my way to New Brunswick that he knew a man who had seen thirteen dead moose left as they were shot in "crust time," and the man said he had no doubt a hundred were so butchered last spring; and I have a correspondent in Rockahema, Aroostook County, who writes me he knew of fifteen being thus killed. Now it is well known that the law prohibits killing at all till Oct. 1st, 1880, and only in season then. Now, if you consider these statements of Taylor and James H. Swett reliable, would it not just suit you to ventilate the matter by at least calling on those in authority to state what they have heard about it.

Perhaps we cannot better bring this to the attention of the proper authorities than by simply publishing our informant's letter without comment.

SPORTSMEN AT LOGGERHEADS.—The Toledo *Commercial*, of late date, contains a long account of some serious altercations which have occurred between gentlemen sportsmen of Toledo, who have been in the habit of ducking on the Bay Point Marshes, and an Association known as the Bay Point Shooting Association, who claim exclusive right to the marshes. These shooting grounds consist of several thousand acres of submerged bottom, in the State of Michigan, about eight miles from Toledo, and are really a part of Lake Erie. According to the published reports, the Toledo men have been handled with brutal violence by the assumed proprietors. The difficulties have got into the Courts, where, we hope, with the *Commercial*, the question of the proprietorship of the Bay Point Marshes will be definitely decided.

TAYLOE—NOT TAYLOR.—In the sketch of Colonel William Washington, printed in FOREST AND STREAM of September 18th, the name of Colonel John Tayloe, of Mt. Airy, was spelt Taylor. Also, Dr. Valentine Peyton's celebrated place, Tosculum, which was the grandest estate of its day in Virginia, was printed Inselum. But what do printers of the present generation know of these time-honored names?

—Mr. James F. Fulton, jr., the proprietor of the International Hotel at Niagara Falls, who died last week, after returning from a health-seeking trip to Minnesota, was well known to the sportsmen of the country. It was at the International Hotel that the National Sportsmen's Association was organized.

—As a light, mild beverage, agreeable to the most delicate digestive organs, the Cocoa preparations of Walter Baker & Co. are recommended to invalids and convalescents as well as to those in full health.—*Adv.*

☞—Health is often impaired by the excessive use of tea or coffee. The strengthening qualities of Broma or Cocoa are known to the student, the invalid, and to the hard worker, the world over. To secure such in its greatest purity, ask your grocer for Walter Baker & Co.'s. This house has the highest reputation for its goods, dating back to 1780.—*Adv.*

—George C. Henning, Washington, D. C., has an immense variety of corduroys, beaverteens and velveteens, samples of which he will mail to any one enclosing a letter stamp.—*Adv.*

A TRIP TO NORTH PARK.

(SIXTH PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

VERY regretfully we turned our backs upon the Snowy Range and marched southeasterly toward the Platte River. The long stretch of rolling sage plain looked gray and gloomy under the heavy fog which hung low over the land, and which sometimes changed for a little while into a pouring rain, or again lighted up as though the sun were really trying his best to make things cheerful.

To the old campaigner it makes but little difference whether the march is through rain or sunshine. If it rains he protects himself as well as possible, and goes on his way as cheerfully as he can, consoled for his temporary discomfort by a certain philosophy which comes to all who are accustomed to life in the open air. If the sun is clear and bright, on the other hand, he is correspondingly happy. Men who have not had experience in life on the mountains are apt to be depressed by a march through the rain. One becomes more or less wet, of course, and it really seems very hard not to have a house to go into to dry oneself. The tents, if such conveniences are at hand, have to be pitched on the wet ground, the blankets are damp, the evening meal is cold and wet, and in all probability there is but little of it; so that upon the whole, for a man who is not used to camp life a rainy day is a veritable misfortune. A low-lying mist produces a curious effect upon objects at a little distance. Antelope seen through the fog look as large as horses, and coyotes might easily be taken for gray wolves. The large size and hence apparent proximity of such living objects proved too great a temptation for our young men to withstand, and they indulged in a brisk fusilade at numerous antelope, none of which seemed any the worse for the firing. The fog seems somewhat to confuse game, at times. I had ridden ahead alone to pick out a road for the wagon, and was loping up to the top of a low hill, when there appeared just over the ridge two antelopes cantering briskly toward me. They did not seem to notice me until I was within a hundred yards of them, and then, instead of turning and running off, they put on a burst of speed and started to run directly by me, passing about thirty yards to my right. Just before they passed me I shouted at them, and one of the two turned and ran directly across my path so close to my horse that I thought I should run over him. I shouted at him again, just as he was in front of me, and he turned sharp to the left and darted by me, going like the wind. I could have struck him with a whip if I had had one, and had my rope been free would have thrown it over his head.

Before noon the willowy bottom of the Platte was in sight, and an hour's ride brought me to it, the wagon being far behind. The valley was plentifully dotted with feeding antelope, and I determined to try to kill one. The herd, which I attempted to approach, was a large one and much scattered, so that I was somewhat doubtful of my ability to get within range; but after a little careful manœuvering I found myself on the creek bottom with about fifty yards of level grass land to cross before I could reach the willows, under cover of which I could approach the herd. A single old doe was in sight and was staring at me very intently, but as the animals were already beginning to feed toward the bluffs I could not wait for her to move out of sight; and so dropping on my hands and knees I crept toward the willows. For the whole distance I was in plain sight of the doe, and my only hope was that she might take me for some animal feeding in the bottom. There were numbers of cattle along the creek, and as I have elsewhere remarked, antelope in a range where there are cattle or buffalo are much less easily startled by the sight of a moving object than where such large animals are unknown. My expectation in this case was justified by the event, and when I reached the willows I saw that the doe had recommenced feeding. How it happened I do not know, but after creeping to within easy range of a big buck I fired, and shot about four inches too high, thus failing to get him. I was much chagrined, for although we did not need the meat, having killed some antelope since leaving Independence Mountain, it was humiliating to miss such a shot.

We camped at this point, and occupied the afternoon in collecting some natural history specimens. In company with W., I started out, equipped with insect net and poison bottles, to collect some flies, while my companion, who was armed with a shot gun, was looking for ornithological specimens. A bed of gorgeous, sweet-smelling flowers gave me occupation for some time, which W. utilized in the pursuit, unsuccessful, I regret to say, of some avocets. While sauntering along the bluffs overlooking the river bottom, we came upon a little slough, in and about which were several species of water birds, and among others a female greenwing teal and eight tiny young. As soon as the old mother saw us she started out of the pool and ran off into the grass, with the eight little ones strung out in a line behind her. The scene was a touching one, and we refrained from disturbing the little group. At this camp we were troubled by a phantom duck, which would appear on the river about a hundred yards below camp, swimming about in plain sight, but disappearing in some mysterious fashion whenever anyone went after it. Several members of the party watched for it, and tried in various ways to approach it, but no one succeeded in getting near enough to shoot at it.

The next morning we crossed the Platte, and taking an easterly course, reached the crossing of the Michigan about two o'clock. The day was a memorable one to W., for during the morning he killed his first antelope. He and I were riding together, and on reaching the summit of a low ridge came upon a number of antelope, which were feeding within rifle range. W. dismounted, and when he fired I saw the last of the band, a fine buck, give way behind and then very slowly hobble off. W., who was naturally in a high state of excitement, followed on foot, shooting at the buck about as often as he could load and fire, and after four or five shots killed it. During the chase he kept his eyes so closely fixed on his game that he tripped over a spreading sage and fell down, losing both hat and gun. The antelope brought to bag, it took but a few minutes to transfer his dainty head to my companion's saddle, and we moved on, leaving the meat, which was too badly shot to carry along.

From the crossing of the Michigan we took a hunter's road into the mountains, which led us through dense pine forests alternating with pretty park-like openings, about fifteen miles nearer to the main range, where we camped on some little springs which flowed into the Canadian. Antelope were extraordinarily abundant here and quite tame, so that had we been disposed to indulge in reckless killing, we might have done so. Of other game we saw but little; although a few deer were found in the timber. Dusky grouse and the pine, or "snow-shoe" rabbit (*Lepus campestris*—var. *bairdi*—Hayden), were also very plenty in the timber. The day after our arrival at this camp, three of us rode over to the Michigan to see a trapper who was camped on that stream in order to make inquiries as to the best trail to be followed in going up to the top of the range. On the way we killed a couple of antelope, one of which had two extra horns. These had no bony core, and were not attached to the skull, being thus merely dermal outgrowths. They were about three inches long, and as thick as a man's thumb.

The timber on the Michigan was burning in several places, but the fires had been partially extinguished by the rains of the last few days, so that at present only a few smouldering logs sent up their pillars of smoke. After a short period of dry weather, however, the fires will spring up again, and then thousands of acres of splendid timber must go. In some places the fire had run down the mountains out on to the plain, and even across the creek bottom, killing the willows by which it is everywhere covered. Just before riding down the bluffs into the brush we saw a large wild-cat, or bay lynx, run out from the bushes and eye us with looks of suspicion; but before any of us had time to catch sight on the creature it bounded back into the willows and was not seen again.

The bottom of the Michigan, where it debouches from the mountain, is wide and level, and is full of old beaver ponds and ditches. It is therefore extremely difficult to cross, and we spent two hours and a half in trying to reach the opposite bank, distant about half a mile. The willows grow everywhere so thickly that it is with the greatest difficulty that a horse can be forced through them; and every few steps one meets with mud holes, the remains of old beaver ponds, which it is necessary to head. These beaver meadows are the worst places in the world to have to ride through; and if one's horse gets mired in a beaver slough, the chances that you can ever get him out again are extremely small. Having safely crossed the meadow, we rode briskly along toward the mountains and about noon reached a little grove of pines in which we found the trapper's camp. This was rather picturesque in its appointments and surroundings, and extremely dirty. A light spring wagon containing most of the owner's baggage stood between two trees, and over the wheels hung saddles, bridles, ropes, and saddle blankets; near by was a smoking heap of ashes surmounted by a black and greasy pot; and not far from the fire sat Kosier, skinning a beaver, while his partner was pegging out a fresh antelope hide. The trees about the fire were garnished with the circular pelts of the beaver, and from two of them depended the black and drying carcasses of a couple of antelope. We were hospitably received, and our inquiries answered very cheerfully, and the visit resulted in our engaging Kosier to go with us for fifteen days. He informed us that the best trail to the top of the Range followed up the Michigan, and we decided to bring the wagon across from our camp near the Canadian, and leave it at Kosier's, whence we would start with pack animals for our climb into the hills. Following the directions of our new friend, we spent less time in the creek bottom that we had earlier in the day, and only stopping to pick up the meat and heads of the antelope killed in the morning, we reached camp some time before dark. We still had time to prepare our antelope heads, skin some birds, and collect a few insects.

The next morning we were off in good time, and although we had some trouble in getting the wagon across the Michigan, we reached Kosier's shortly after noon. As we had but two pack animals, every luxury was left in camp, and nothing but the necessary provisions and bedding were to be taken. My short double-barrel I wrapped in my blankets, with a few cartridges, as there seemed to be a likelihood that we would see, on the summit, some white-tailed ptarmigan. Rifle ammunition, toilet conveniences, and so on, were wrapped in blankets or stowed away in saddle-bags or pockets.

The trail, which in many places was so faintly marked as to be easily lost, leads the rider alongthe northern bank of the Michigan, and for almost the entire distance from the plain to timber line winds through the heavy pine forests. The air is redolent with the terebinthine odors of spruce, pine and balsam fir, mingled with the richer and more varied perfume of the many wild flowers that brighten with red, blue and yellow the shadowy gloom of the dense woods. The pine rabbit, startled at our approach, hops far enough from the track to avoid the horses' feet, and sitting on his haunches, with his monstrous ears erect, contemplates the procession that passes before him with a curiously meditative air. The gray jays (*Perisoreus canadensis* var. *capitalis*) are out in force, and flit along among the branches above our heads, descending, half a dozen at a time, to pick up the crumbs which fall at our feet when we halt for lunch. Curious birds these certainly are: crushingly impudent, and that with a calmness and unconcern that compels your admiration while it arouses your wrath. They are not favorites with the hunter, for in winter they tear his skins, steal his meat and his bait, and annoy his sore-backed animals; but for myself, I must confess to a sneaking admiration for this bird. His "cheek" exceeds that of the proverbial lightning-rod man. Though often entirely silent, there are times when the grey jay is as noisy as his blue cousin in the East; but this is usually when he sees a hunter cautiously stealing up to some game which the latter is anxious to secure. Then, especially if the hunter is hungry, and out of "grub," does our grey friend make the timber re-echo with his doleful notes. It shall not be through any negligence on his part if the light-heeled deer or watchful elk is too nearly approached by his two-legged enemy.

The eternal—I had almost written infernal—chattering of the red or pine squirrel is another sound that salutes the ear of him who journeys through the forests of these mountains. These animals here feed entirely on the seeds of the pine, and one frequently comes on great heaps of the green cones, collected at the foot of some tall tree, from which every seed has been removed. The resinous sap with which the cones are filled collects on the fur of the squirrels' face in considerable masses, and must cause them no little inconvenience. Another curious voice of the mountains, and one which always puzzles those new to the country, is the cry of the mountain woodchuck (*Arctomys flaviventer*). This species abounds anywhere in the high mountains, and lives in holes or in crannies in the rocks. They are fond of selecting high bare points of granite, where they sit in the sun, and if they see anything unusual they utter a short, sharp cry, which is not exactly a shriek nor a whistle, but a compound of both—rather more like what you would expect to hear from a very young but extremely vigorous steam engine than anything else that I think of at this moment. The owner of the voice bears a general resemblance to the Eastern woodchuck, but is slightly larger, and its pelage is yellowish in color. Dusky grouse are quite abundant in the timber bordering the valley of the stream which we are following, and several broods were started from the ground, all of which flew at once into the trees, the old hens clucking loudly, like a startled domestic fowl.

We camped the first night in a beautiful opening, surrounded by giant spruces and firs, where the rich grass stood waist high, and the steep sides of the mountains rose almost vertically from the narrow valley. I took a jaunt up the hillside in search of game, but found none, although I came very near seeing a bear. I ran upon his bed and heard him spring into some thick evergreen bush, I could not, however, find him again. On the way back to camp I saw in the stream bed one of those curious little birds known as dippers (*Cinclus mexicanus*). They are odd little slate-colored birds, somewhat less in size than the robin—to which, by the way, they are allied, and pass their lives on the mountain streams, from the bottoms of which they derive their food. They are most active little creatures, continually in motion, and when not flying here and there or diving in the water, are always either walking briskly about on the rocks or else making the peculiar dipping movement, from which perhaps their name, dipper, has been given them. This movement is not at all like the bow of the sand-piper, nor, according to my observation, does it resemble the tail-jerking of the wrens, to which it has been compared by some writers. It is more like a sudden and very quick crouching down, followed by an equally rapid recovery. The legs are bent both at the knee and the tibio-tarsal joint. The dippers are tame, confiding little birds, and one may approach them quite closely without alarming them. It is very curious to see them walk deliberately down a sloping stone into the water, until they disappear beneath its surface, and then to see them emerge

some feet further down the stream, and flying back, dive from the wing again. Such of my readers as are interested in the habits of this odd little thrush should read the charming account of the European dipper, given in "Audubon" by Mr. William MacGillivray. It is a gem.

Summit of the Rocky Mountains. Yo.

The Rifle.

NEW YORK RIFLEMEN.—The New York Schuetzen Corps, Captain David G. Yuengling, will hold their annual fall shooting at Mauch Chunk, Pa., Oct. 16th. A special train will take the party—shooters, ladies, and all—to this most beautiful rural district of Pennsylvania. A fine dinner at the Mansion House will be had. The shooting will then begin and last until sundown. In the evening a grand ball will be held at the hotel. For the next morning an excursion to Mount Pisgah, on the Switch Back, has been laid out. In the evening the return will be made by special train. Excursion tickets for the railroad, including two days' board in Mansion House and a trip to Mount Pisgah and back, only to cost $7.

NEW YORK—*Conlin's Gallery.*—The third of the series of contests for marksmen's badges took place Sept. 15th. The large increase over the number of entries in the two previous competitions proves the popularity of the plan of the contests. The leading scores were remarkably close, three of the competitors making 33 out of a possible 35 at 300 yards; target reduced for the range; but according to the rules governing the competitions A. J. Howlett was declared the winner, his shots being the closest. He won the Marksman's Badge and made a good showing for the Champion Badge, which will be won by the best aggregate score made in the ten competitions. Below we give the names and scores made by the leading competitors:—

A. J. Howlett	33	Jas. H. Roche	29
Dr. S. T. G. Dudley	33	H. D. Blydenburgh	28
J. B. Blydenburgh	32	Paul J. Cullinan	28
D. S. Banks	32	J. B. Stanton	27
S. H. Hubbard	32	S. T. Martin	27
G. J. Seabury	31	R. J. Covell	26
J. W. Naughton	31	L. D. Hearn	25
T. Fitz	30		

CONLIN'S PRIZE SHOOT.—The fifth of the series of ten weekly contests for marksmen's badges, took place Monday evening, Sept. 29th, and was well attended. After a spirited contest, Mr. T. Fritz proved the winner with the excellent score or 33, possible 35. The following with the excellent score or 33, possible 35. The following is a list of ten of the best scores made; possible 35; 300 yard target reduced for the range:—

T. Fitz	33	E. T. Davis	29
D. S. Banks	32	*Wilson MacDonald	28
G. J. Seabury	32	J. B. Stanton	28
John G. Byrne	30	T. F. Brown	25
W. T. Morgan	29	Paul J. Cullinan	26

*At the word.

THE LONG RANGE TOURNAMENT.—The directors received another lesson, that there are others who can manage their own business better than it is at present conducted, in the contest of the Long Range Tournament which took place at Creedmoor, Sept. 22d, 23d and 24th. The conditions of the match have been given in our columns. 33 marksmen entered for the work in hand, and some very fine work indeed was done. The first day opened with a chilly atmosphere, but the light was good and the wind was fairly steady, and for the first ten ranges scores ran up to good figures. But at the last there was a falling away under the changing light and wind. The score ran:—

	800	900	1,000	*Tot'l.*		800	900	1,000	*Tot'l.*
S. I. Scott	72	71	67	210	E. H. Sandford	73	66	65	204
W. M. Farrow	71	71	67	209	J. F. Brown	74	66	64	204
J. S. Sumner	73	71	66	210	F. Hyde	71	71	62	204
N. Washburn	72	69	67	208	W. Gerrish	70	71	62	203
W. H. Jackson	70	68	68	206	L. L. Allen	72	68	62	202
F. W. Partis	72	74	63	206	W. W. Deforest	70	74	61	202
R. Rathbone	71	69	65	205	C. H. Laird	72	66	62	200
J. W. Shurter	70	69	64	197	F. Wessel	68	64	56	188
H. F. Rockwell	70	67	59	196	G. L. Morse	64	63	59	184
W. Poland	68	67	60	195	S. T. G. Dudley	70	63	50	183
E. E. Pray	65	64	55	194	W. Parker	67	64	58	189
J. P. Waters	66	66	62	194	F. H. Gray	65	63	52	180
A. A. Adee	61	68	64	190	S. Wilder	63	66	46	175
H. Fisher	71	64	55	190	E. Reader	60	62	44	162
E. A. Perry	65	61	62	188	G. F. Ferris	48	50	62	160

The second day was a warm and pleasant one. The wind which had been from 12 to 2 on the previous day now blew gently down the range from 7. The shooting of the day was really magnificent, 19 of the 20 men competing, getting 200 points or over, as follows:

	800	900	1,000	*Tot'l*		800	900	1,000	*Tot'l*
J. F. Brown	72	73	68	213	N. Washburn	69	65	72	206
W. H. Jackson	71	74	68	213	W. Gerrish	70	66	70	206
F. Hyde	71	71	69	211	S. Wilder	70	66	68	204
J. S. Sumner	72	66	72	210	C. H. Laird	69	70	64	203
W. M. Farrow	73	66	70	209	W. W. DeForest	69	67	67	203
E. A. Perry	73	69	66	208	E. H. Sandford	71	69	70	201
S. I. Scott	71	66	70	207	R. Rathburn	69	65	67	201

The other scores were:—

	800	900	1,000	*Tot'l.*		800	900	1,000	*Tot'l.*
E. E. Pray	66	71	64	201	F. W. Partis	67	64	67	198
G. L. Morse	64	68	68	200	L. L. Allen	63	68	65	196
H. Fisher	70	63	67	200	W. Poland	68	63	64	195
S. T. G. Dudley	69	65	66	200	L. L. Hepburn	63	67	65	195
J. W. Shurter	69	66	64	199	W. Parker	67	57	65	189
F. Ferris	66	66	67	199	E. Reader	58	65	65	188
T. H. Gray	72	66	65	199	A. A. Adee	59	65	61	185
J. P. Waters	68	69	62	199					

The twenty-one men who came down on the last day of the tournament found a very good shooting day awaiting them, but unfortunately at the second range a rain storm compelled the men to leave the firing points. The great trouble in the scores will make the period of this interruption. The scores stood:—

	800	900	1,000	*Tot'l*		800	900	1,000	*Tot'l*
W. H. Jackson	73	69	72	214	J. S. Sumner	71	65	74	210
Frank Hyde	72	67	72	211	S. I. Scott	70	69	69	208

The other scores were:—

	800	900	1,000	*Tot'l*		800	900	1,000	*Tot'l*
L. L. Allen	74	66	68	208	J. P. Waters	66	62	68	196
J. F. Brown	74	68	66	208	W. M. Farrow	65	66	66	197
E. E. Pray	70	72	66	208	F. W. Partis	72	58	65	195
R. Rathbone	68	66	72	206	F. H. Gray	72	63	59	194
W. Gerrish	66	64	72	202	H. Fisher	72	67	54	193
C. H. Laird	65	70	67	202	E. A. Perry	64	64	64	192
E. H. Sanford	67	61	73	201	G. W. Morse	64	54	64	182
W. W. De Forest	70	65	64	199	S. Wilder	57	54	56	181
N. Washburn	72	67	59	198	J. W. Shurter	51	58	48	157

An object of the tournament was to institute some tests and comparisons of rifles and methods of loading. What the principal marksmen used and how they used it, can be seen in the following. The highest score gives the man's best record at any time:—

J. S. Sumner, Massachusetts—Highest score, 221 points: Sharps rifle; 110 grains powder; 500 grains lead; bullet, Hyde base, pointed; uses wads; loads at breech; shell, 2.4-10 inches.

W. H. Jackson, Massachusetts—Highest score, 220; Sharps rifle; 106 grains powder (Laflin & Rand); 550 grains lead, pointed bullet, composed of fourteen parts lead to one of tin; shell, 2.4-10 inches; uses wads; loads at breech.

Frank Hyde, New York—Highest score, 219; Sharps rifle; 109 grains powder (Laflin & Rand); 550 grains lead, pointed bullet; shell, 2.4-10 inches; uses wads; loads at breech.

Wm. Gerrish, Massachusetts — Highest score, 218; Sharps rifle; 115 grains powder; 550 grains lead (fourteen parts lead to one of tin); uses wads; loads at breech.

J. F. Brown, Massachusetts—Highest score, 215; Sharps rifle; 110 grains powder to 550 lead (fourteen parts lead to one of tin); uses wads; loads at breech.

S. I. Scott, Maryland—Highest score, 214; Remington Creedmoor rifle; 110 grains powder to 550 lead (fifteen parts lead to one of tin); Hepburn pointed bullet; uses no wads; loads at muzzle; shell, 2.7-16 inches.

I. L. Allen, New York—Highest score, 213; Sharps rifle; 107 grains powder (Hazard's) to 550 lead (eleven parts lead to one of tin); uses no wads; loads at muzzle; shell, 2.4-10 inches.

H. F. Rockwell, Massachusetts—Highest score, 211; Remington Creedmoor rifle; 16 grains powder to 555 lead; loads at breech; Remington special bullet; shell, 2.7-10 inches.

C. H. Laird, Washington—Highest score, 210; Remington Creedmoor rifle; 110 grains powder (Hazard's) to 550 lead; Hepburn bullet; loads at muzzle; shell, 2.7-16 inches.

W. M. Farrow, New York—Highest score, 209; Ballard rifle; 100 grains of powder to 550 grains lead; straight shell; uses wads; loads at muzzle.

THE CREEDMOOR MATCHES.—The following matches will be called on the range at Creedmoor during the rest of the present month:—

Saturday, Oct. 11th.—"Ballard Rifle Match"; open to all comers; winners to be handicaped one point for each time won; 100 and 200 yards; weapon, any rifle; rounds, seven at each distance.

Same Day—The "Alford Match"; open to members of N. R. A. and to members N. G. S. N. Y., in uniform; 200 yards; any military rifle; rounds, ten.

Wednesday, Oct. 15th—The "Remington Shot Gun Match"; open to all members of the N. R. A.; rifle and position, any; 800, 900, and 1,000 yards; rounds, fifteen at each distance.

Saturday, Oct. 18th.—"Champion Marksman's Badge of 1879"; open to all members of N. R. A. and all members of the N. G. S. N. Y. in uniform; 200 and 500 yards; five shots at each; Remington rifle, New York State model.

Wednesday, Oct. 22d.—"Secretary's Match"; 200 and 500 yards; position, standing at 200; at 500 yards, any without artificial rest (as allowed in N. R. A. regulations, governing "position" in "any rifle" competitions); weapon, any military rifle (excluding specials); rounds, five at each distance.

Same Day—"'We Will' Match"; open only to members of the National Guard of any State; 300 and 600 yards; seven shots at each; weapon, the authorized military rifle in use by the organization of which the competitor is a member.

Saturday, Oct. 25th.—The "Remington Shot Gun Match."

Same Day—"Cowperthwaite Match"; open to all members of N. R. A. and N. G. S. N. Y.; 400 yards; position, standing and kneeling; rounds, ten for competitors using military rifles; nine for all others. Handicap—Winners of any first prize or place in any monthly or other match of the N. R. A. shot at Creedmoor; two points.

Wednesday, Oct. 29th.—"Alford Match."

The practice of the affiliated clubs has been fixed as follows:—

Empire Rifle Club—Wednesday, 1st.—*Spirit of the Times* Match; 200 and 300 yards; ten shots each distance, off-hand. Wednesday, 8th.—"Daly Trophy" Match; 300 and 500 yards; ten shots each distance, off-hand. Wednesday, 15th, at 1 P.M.—Competition for N. R. A. bronze medal; 800, 900, and 1,000 yards; ten shots each distance. Wednesday, 22d, at 1 P.M.—"All-Comers' Class Match"; 200 yards; ten shots; military rules allowed three points; entrance fee, fifty cents; re-entries, twenty-five cents, unlimited.

Seventh Regiment Rifle Club—Saturday, 11th, at 3 P.M.—Competition for the "Shells"; 500 yards; five shots; open to the regiment. Saturday, 18th, at 3 P.M.—Competition for the "Rifles"; 200 yards; seven shots; open to club. Saturday, 25th.—The "1879 Match"; 200 and 500 yards; seven shots at each distance; open to club.

NEW YORK, *Aug. 30th.*

Editor Forest and Stream:—

Will you please correct the mistake in the account of the Champion's Match in your last issue, where I am credited with using both "Ballard" and "Sharps" rifles. So many of my friends have asked for the particulars, I wish to say to them all, I use no other rifle but the Ballard in all the matches I shoot, excepting those confined to military rifles. Very truly yours,

W. MILTON FARROW.

The error originated in a blunder of the officer at the firing point, who entered the rifles as printed in FOREST AND STREAM.

Morrisania Schuetzen Park, Sept. 28th.—Team shooting between teams of eight men each from New York City Schuetzen corps and the Seppenfeld's Club, at 200 yards, at 25-inch ring targets; 10 shots each, possible 250:—

THE NEW JERSEY STATE RIFLE ASSOCIATION.—The fall prize meeting opened at Brinton, on Tuesday, Sept. 30th, with a very good attendance. The meeting was well managed, and the State Government, by liberal appropriations, has brought Brinton Range almost to an equal standing with Creedmoor. The prizes were liberal, and nearly every rifle club in the vicinity of New York sent its quota to compete in the matches. The first match was the short-range match, open to all; 200 yards; any rifle; 10 rounds. The best scores were as follows: E. M. Squier, 44; A. McInnis, 44; J. K. Gorham, 44; G. J. Seabury, 43; J. W. Todd, 43; G. Joiner, 43; W. M. Farrow, 42; A. W. Gibbs, 42; D. S. Banks, 42; E. E. Lewis, 42; T. H. Holton, 41; E. T. Davis, 41; T. J. Conroy, 40; H. F. Farrell, 38. The second match was the military short-range match, open to all; 200 yards; any military rifle; seven rounds. The best scores: W. M. Farrow, 32; 32; W. Robertson, 32; B. F. Davids, 31; Capt. W. P. Wood, 30; Capt. T. W. Griffith, 29; Lieut. L. H. Grere, 29; H. W. Gowley, 29; Peter Bonnett, 28; J. R. Byrd, 28; B. P. Holmes, 28; Col. J. E. P. Howard, 27; E. E. Lewis, 26; Col. D. Lodor, 25; James Hatry, 25; H. F. Farrell, 25; T. J. Rache, 23; J. R. Beck, 22, and P. Coulin, 22. The other match which was shot during the day was at long range, open to all; 1,000 yards; any rifle; position, any; 10 rounds. The best scores were as follows: Major R. Rathburn, 48; F. H. Holton, 46; J. P. Waters, 43; A. McInnis, 41; J. W. Todd, 36.

The second day was taken up with the military team match, open to teams of 12 from each regiment in the State at the 200 and 500 yards range; 40 rounds at each range per man. The scores made were as follows:—

	200 Yards.	*500 Yards.*	*Total.*
Ninth Regiment	453	377	830
Fourth Regiment	413	325	738
Fifth Regiment	409	300	709
Seventh Regiment	404	270	674
Third Regiment	393	253	646
First Regiment	358	139	497

The Ninth Regiment won this match last year. The best score made by any member of any team was that of Capt. T W. Griffiths, of the winning team. At 200 yards he made 43 out of a possible 50; and at 500 yards 48, or 91 out of a possible 100.

On the third day the short-range teams competed seven in all of four men each. The conditions were: 200 yards; 15 shots off-hand. Empire Club No. 1, Sergt. N. D. Ward, Captain, took the first prize on the score of 260 out of a possible 300 points. The second prize went to the Zettler Rifle Club, on the score of 249. The military championship gold badge, offered for competiton by members of the First Brigade, New Jersey National Guard, was won by Capt. T. W. Griffith, on the score of 41 out of a possible 50 points.

The New Jersey National Guard was well represented at Brinton on the fourth day. The first contest, which was open to teams of twelve, began at 10 o'clock. The conditions were: Distances, 200 and 500 yards; five shots per man at each range. There were four teams entered. The winning scores were as follows, the highest attainable score being 600 points: Ninth Regiment, 418; Seventh Regiment, 363. The Fourth Regiment scored 359, and the Fifth Regiment made 345, in the same match. The State prize for company teams was contested at 2 o'clock P.M. The conditions were: Open to teams of four from any company in the New Jersey National Guard; distances, 200 and 500 yards; five shots per man at each range; highest possible score, 200 points. The trophy, a pair of silk guidons, was won by Company F. Ninth Regiment, upon the score of 144. The other scores made were as follows: Company A, Fourth Regiment, 120; Company B, Seventh Regiment, 123; and Company D, Ninth Regiment, 119. A military long-range match was shot at 800, 1,000 and 1,200 yards, five shots at each range, with military rifles, for a gold medal, given by Gov. McClellan, on behalf of the State. The trophy was won by Sergeant Isaac R. Benman, on the score of 38 out of a possible 75 points. The State guns are only sighted as high as 1,000 yards, consequently the contest at 1,200 yards was altogether a matter of guess-work. Capt. T. W. Griffith won the Mott badge at 200 and 500 yards, with a military gun, on the score of 44 out of a possible 50 points.

The meeting closed on Saturday with the contest for the Directors' gold badge, by the directors and honorary directors of the Association, and the completion of three matches which began on the first day of the tournament, and were continued during the week. The Directors' match was shot at 200 yards, five shots, off-hand. Dr. J. M. Dart made 21 out of a possible 25 points, and took the medal for one year. In the Short-range Match, with any rifle, the winner of the first prize was W. M. Farrow, with a score of 49 out of a possible 50 points. Other leading scores were: S. W. Sibley, 48; W. H. Jackson, 48; J. B. Osborn, 47; A. H. Cobb, 47; and F. Fitz, 47. The leading prize in the Military Short-range Match was won by F. J. Donaldson on the score of 35 out of a possible 35 points. The first and second prizes in the Long Range Match were divided between Frank Hyde and I. L. Allen, each of whom scored 49 out of a possible 50 points. The latter also won the aggregate prize on the three scores of 48, 49 and 49. The meeting was a complete success in every way.

COLUMBIA RIFLE RANGE.—*West End, N. J., Oct. 4th.*—Two subscription matches were shot to-day. The first one at 100 yards was won by J. C. Mallery, on the score of 42 out of a possible 50 points, and the second at 200 yards, was won by John Cavanagh, on the score of 33 out of a possible 35 points.

VERMONT—*Brattleboro, Sept. 18th.*—The fall meeting of the Fort Dummer Rifle Club was held at their range to-day, a goodly number of riflemen and visitors being present. A more perfect day for lovers of this sport could not be desired, and the following excellent scores attest the way they improved it. The first match was for the "Hooker medal," won by Ed. Hawley. We append some of the leading scores, possible 150 :—

	400 *Yards.*	500 *Yards.*	600 *Yards.*	*Total.*
Hawley	50	45	49	144
Bishop	48	48	48	144
Childs	47	48	47	142
Knight	49	49	44	142
Nichols	45	37	44	126
Lamb	40	45	38	123
Spear	39	46	37	122
Howe	43	44	34	121
French	38	42	39	119

Second match was for "club medal," distance 200 yards ; ten shots, off-hand ; won by Mr. Bishop, of South Vernon ; score, 40.

Third match, all comers, distance 200 yards, seven shots ; possible 35 ; military guns allowed two points. The following are the winning scores, out of twenty-seven entries :—

	Score.	*Allow.*	*Total*		*Score.*	*Allow.*	*Total*

Medford, Sept. 26th.—There was a small attendance of shooters and spectators at the regular meeting of the Raymond Sportsman's Club, at Bellevue range, owing to the fact that the association had entered a team in the glass-ball tournament at Weymouth on the same day. Good shooting, however, was done by the few riflemen who participated in the handicap rifle match at 200 yards, Mr. Charles, in his ten shots at the distance, rolling up the magnificent score of 49 out of a possible 50 :—

W. Charles	5	5	5	5	5	4	5	5	5	5—49
H. Max	4	5	4	4	4	4	4	4	4	4—41

Medford, Sept. 27th.—The regular meeting of the Raymond Shooting Club occurred to-day. There was a slim attendance, but some good scores were made, W. Charles leading with a score of 49 out of 50 :—

W. Charles	5	5	5	5	5	4	5	5	5	5—49
Re-entry	4	5	4	5	5	5	5	4	4	5—46
H. Max	4	5	4	4	4	4	4	4	4	4—41

—The regular weekly shoot of the Medford Rifle Association took place at the Bellevue range on the 1st. The weather was extremely favorable to fine shooting and was improved by the marksmen, as will be seen by the following scores :—

H. Kimball	5	5	4	5	4	5	5	5	5	5—48
H. H. D. Cushing	4	5	5	5	4	5	4	4	5	5—46
F. Hollis	5	5	4	4	4	5	5	3	4	5—44
E. Whittier	4	5	4	3	4	4	4	5	4	5—42
H. A. Pickering	4	4	4	4	4	5	5	4	4	4—42
J. W. Vining	4	5	4	5	4	3	4	4	5	4—42
A. B. Archer	4	4	4	5	4	4	4	4	4	4—41
N. P. Ames	4	3	4	4	3	3	4	4	5	5—49
W. A. Weber	4	3	4	4	4	4	4	3	4	3—38

Boston, Sept. 27th.—A large number of spectators witnessed the shooting at Walnut Hill to-day, the event being the competition in the 200 yards stage of the "silver-ware" match. The weather was favorable. There were thirty-nine competitors, Mr. W. Charles distinguishing himself by getting a clean score. During the afternoon a team from the Roxbury City Guards was on the range, practising at 300, 400 and 500 yards, in preparation for their match with the "regulars" at Fort Independence. The leading scores were :—

W. Charles	5 5 5 5 5 5—35	C. M. Meigs	4 5 4 4 5 4 4—30
E. F. Brooks	4 4 5 4 5 5—32	N. J. Stephens	3 4 4 4 5 5 4—29
J. Nichols	3 5 4 5 5 4—32	H. Roscoe	3 3 4 4 4 5 4—27
E. B. Souther	4 5 4 5 4 4 5—31		

Boston, Oct. 4th.—The riflemen had a pretty good day of it to-day at Walnut Hill, though the attendance was moderate. The weather was favorable for shooting. The result in the "amateur series," was as follows at 200 yards :—

E. F. Richardson	5 4 5 5 4 4 4 4 4	5—44	
E. R. Fredericks	4 5 5 4 4 3 4 5 5 4	4—42	

The "silverware" match had 23 entries at 200 and 300 yards. The best scores at each are appended :—

200 *Yards.*		200 *Yards.*	
E. W. McCall	4 5 5 4 4 3 4—29	H. Roscoe	4 4 3 3 4 4 2—24
300 *Yards.*		300 *Yards.*

Boston, Oct. 3d—Mammoth Rifle Gallery.—The regular monthly prize shoot for October has commenced with some very brilliant shooting. Mr. E. F. Richardson was nearly successful in getting the extra prize of $20 for eight consecutive bull's-eyes. The prize winners of last month's shoot were E. F. Richardson, with a fine score of 30 ; W. H. Harrison takes the second prize with 38, outranking Mr. U. A. Pollard, who takes the third prize with a fine 38 ; 150 feet ; rounds, 8 ; possible 40 :—

E. F. Richardson	5	4	5	5	5	5	5	5—39
U. A. Pollard	4	5	5	4	4	5	5	5—37
Geo. Estes	5	5	4	4	4	4	5	5—36
Isaac P. Gragg	4	5	4	4	5	5	5	4—36

MAMMOTH RIFE GALLERY.—*Boston, Sept, 27th.*—The monthly prize shoot is drawing to a closeand the competition is lively for leading places. Mr. E. F. Richardson was nearly successful in getting the extra prize of $20 for eight consecutive bull's eyes. The following is the score ; 150 feet ; rounds, 8 ; possible 40 :—

E. F. Richardson	5	5	5	5	4	5	5	5—39
U. A. Pollard	5	4	5	5	5	4	5	5—38
S. B. Braun	5	5	5	4	4	5	5	5—38
H. A. Pickering	5	4	5	5	5	5	4	5—38
George Lamb	4	4	5	4	5	5	5	5—37
E. Whittier	5	4	4	4	5	5	5	5—37
W. H. Harrison	5	5	4	4	4	5	5	5—37
C. E. Woodbury	4	5	5	5	4	4	5	5—37
C. Edwards	4	5	5	5	5	4	4	5—37
C. Eastwood	5	5	5	4	4	5	4	4—37

Brookfield, Oct. 3d.—Match at glass balls :—

C. H. Griffin	7	H. L. Butterworth	4
S. L. Moulton	8	Albert Shepard	8
H. D. Mathewson	7	H. Richards	2
H. E. Capen	4	H. Heredeen	8
J. P. Crosby	3	J. Middagh	3
H. P. Gerald	8		

Heredeen won the shoot off with 11 out of 14.

Hopkinton, Sept. 13th.—The Hopkinton Rifle Club held a shoot at their range at Claflin's Grove this afternoon. The weather conditions were not favorable, as there was an unusually high wind, strong 9 o'clock. At one time seven points of windage were allowed. The following are the best scores recorded ; distance 500 yards ; rounds 10 :—

P. W. Smith	5	5	3	5	4	5	4	5	5	5—46
O. C. White	4	3	3	4	3	4	5	5	5	5—41
J. Wadsworth	5	5	2	4	3	5	3	3	4	3—37
W. B. Claflin	3	0	5	4	4	3	3	5	5	5—37

Distance 800 yards ; rounds 10 :—

O. C. White	5	3	4	5	3	0	5	5	5	3—38
P. W. Smith	5	4	3	5	0	5	5	3	5	0—35
J. Wadsworth	3	0	3	0	3	0	5	4	3	0—21

Mr. Wadsworth's shooting was done with a mid-range rifle, with near sight on the grip of the gun.

Hopkinton, Sept, 25th.—The Rifle Club held a shoot at their range at Claflin's Grove last week, with the following results, the conditions being favorable—Mr. Jewell using a mid-range rifle in his long-range shooting :—

C. A. Sumner	900	4	4	3	5	4	3	3	3	5—39
	800	4	4	4	5	5	4	5	5	5—42
N. Jewell	900	3	5	5	3	2	5	5	5	4—39
	800	5	3	5	3	5	5	0	3	4—38

Laubenstein	83	40	Laubenstein	91	42
Marks	93	41			

Bridgeport.—In a late issue you published a fine score made by H. Nichols at 200 yards with a Peabody rifle, State model, and a good score has been made at 500 yards, head to the target, with a Peabody rifle by one of the same team. On Saturday last some of the Fourth Regiment team went out to shoot over the range for practice with a team from Companies B and C, when S. C. Kingman, Regimental Inspector, made the following scores at 500 yards, allowing for two sighting shots :—

500 yards	5	5	5	5	5	5	5	5	4	5—49
	5	4	5	4	5	5	4	4	4	4—44

Total 93 out of a possible 100.

State ammunition was used, and no cleaning done. Quartermaster D. E. Marsh also at the same time made :

500 yards	3	4	5	0	4	5	4	4	2	4—35
	4	5	5	5	4	3	4	5	4	5—44
200 yards	4	4	5	4	5	4	6	5	4	4—44
	4	4	5	4	4	5	5	5	4	4—44

Bridgeport, Sept. 26th.—The Bridgeport Rifle Club held their regular semi-monthly shoot at Seaside range to-day. The weather conditions were good, the wind light and steady. The following being the best scores :—

Sharps rifle match ; 200 yards :—

Harry Nichols	47	S. H. Hubbard	42
G. W. Kerr	44	I. McCourt	42

Silverware match; 200 yards :—

Harry Nichols	33	S. V. Nichols	31
I. McCourt	32	J. Statcher	29

Nichols gold badge ; 200 yards :—

I. McCourt	31	D. E. Marsh	30

Sharps rifle match ; 500 yards ; handicap ; carton target ; long range, allowing mid-range 3 points and military 5 :—

Name.	*Rifle.*	*Score*	*Allowance.*	*Total.*

W. W. Tucker, Hartford	65	C. Raible, Hartford	56
Andrew Reit, Hartford	65		

H. Andrus also took a prize of $3 for making the most bull's-eyes during the day. Thirty-eight bull's-eye shots were paid to the different marksmen with a prize of fifty cents each. H. B. Moore received $1 for making the first and E. P. Whitney $2 for making the last bull's-eye.

WISCONSIN—*Milwaukee, Sept. 19th.*—This forenoon the members of the Milwaukee Rifle Club assembled at their ranges on the National Home Grounds to engage in their annual prize competition. There was but one prize, a donation by the Sharps Rifle Company—a hammerless, mid-range rifle, an arm of handsome proportions. Each of the members had 15 shots at each of the ranges of 800, 900 and 1,000 yards, and when the rounds closed, late in the afternoon, the scores were as follows :—

	800 *Yards.*	900 *Yards.*	1,000 *Yards.*	*Total.*
Johnston	69	69	67	205
Bangs	65	63	58	186
Fielding	59	58	55	172
Wolfes	69	59	44	172
Hill	70	55	45	170
Markham	67	62	40	169
Drake	66	55	24	145
Meunier	61	49	41	151
Yale	55	53	36	144

Milwaukee, Sept. 26th.—At the annual competion of the Milwaukee German Sharpshooters, the following scores were made :—

Union Target.—Rings ⅛ of an inch., three shots : Conrad Stein, 67 ; Joseph A. Sieler, 62 ; August Engel, 60 ; Adolph Fienhold, 58; Stephen Meunier, 57 ; Moritz Cohn, 57; John Meunier, 56; Herman Wesle, 56; Fred Stollberg, 55 ; David Cohn, 54 ; Charles Roediger, 51 ; M. Hefti, 50.

Small Target.—Rings ¼ inch., 10 shots : John Meunier, 174 ; Stephen Meunier. 154 ; Oscar Altpeter, 141 ; August Engel, 141.

Turn Target.—August Engel, 36 bull's-eyes ; John Meunier, 23 ; Herman Wesle, 21 ; Stephen Meunier, 19; Moritz Cohn, 18 ; Conrad Stein, 15.

Premiuns for first 12 bull's-eyes—Stephan Meunier, August Engel, Moritz Cohn, John Meunier, Herman Wesle, and Conrad Stein.

Premiums for the largest number of bull's-eyes.—August Engel, John Meunier and Herman Wesle.

Milwaukee, Sept. 27th.—The leading members of the Rifle Club were in the field to-day to win the elegant Sharps rifle redonated by John Johnson. The competition was at the range of 900 yards, and the conditions were the highest aggregate on two meetings. Though the weather was all they could desire, the riflemen scarcely reached their average. The fact is, the "boys" got to "fooling" and having a good time, and made more magpies than bull's eyes :—

Fielding	4	3	4	3	4	5	5	3	4	5—59
[illegible]	4	5	5	5	3	4	3	4	5	3—59
[illegible]	3	5	5	5	4	4	3	0	3	5—50
[illegible]	3	3	3	3	4	4	5	5	3	3—57

PENETRATION OF RIFLE BALLS.—*Philadelphia, Oct. 3d.—Mr. Editor :*—I see you published my remarks about sundry rifle shots made in a letter to you. What I wished to show was, that the position of the game affected the penetration and result of shot made with the same gun. The heavy ball from the Sharps carbine, did not break one bear's head while in another case an old model Winchester, 27 grs. powder, went clear through a bear diagonally.

On one occasion the latter gun drove a ball from end to end of a deer, while at another time it required four or five shots at twenty paces to tumble over an enraged buck. Any of the shots would have proved fatal.

In the remarks printed you or I omitted to say that I fired at the buck, "four or five times." C. CLAY.

FORT CARLETON—*Northwest Territory.*—The trading posts or "forts" which have been in use by the great fur companies of the Northwest for nearly three-quarters of a century, and are even now numerously scattered over a vast area of territory, notwithstanding their mercantile scops has been so much abridged of late, are not necessarily fortified structures, though the largest and most important of them invariably are. Any independent trader's house, or post. is known as a fort, whether it be a substantial log structure or a miserable "lean-to." The most important of the Hudson's Bay Company's forts at present is Fort Carleton, on the river Saskatchewan, and is thus described by a correspondent :—

The stores and store-houses of the Company are enclosed within a stockade between sixteen and twenty feet high, and 250 feet square. At each corner are look-out towers, and within are posts about three feet from the stockade, with stretchers connecting them with it, upon which planks can be placed for the men defending the fort, from which they can see over it. All the forts that we have seen are thus stockaded, but none so high or so complete as this one. The object of these fortifications was not to defend the Company's employées from attack, but, in this case, it was built as a place of refuge for the Cree Indians, when attacked by the Blackfeet, between which tribes wars were very frequent.

ZETTLER RIFLE CLUB.—The yearly fall shooting of the rifle club took place the 7th and 8th of October, at Schuetze Park, Union Hill, New Jersey. Scores next week.

DARTMOUTH ATHLETIC ASSOCIATION.—*Fall Meeting, Oct. 1st and 2d.*—Throwing heavy hammer, J. F. Merriam, '81, 67 ft. 4in ; best three jumps, J. F. Merriam, '81, 37ft. 3 in.; standing high jump, C. Fefield, '82, 4 ft.; putting shot, J. F. Merriam, '81, 26 ft. 6¼in.; half mile run, H. H. Parker, '82, 2m. 12⅘s.; one hundred yard dash backward, N. D. Cram, '81, 10⅘.; three mile run, H. H. Parker, '82, 17m. 46⅘s.; pole vaulting, F. G. Humiston, '81, 7 ft. 6 in.; 220 yards handicap, U. P. Snow, '81, C. S. D., 25⅘s.; running long jump, C. R. Webster, '82, 14 ft. 8¼ in.; standing long jump, N. D. Cram, '81, 8 ft. 10⅘ in.; one-quarter mile run, H. H. Parker, '82, 58⅘s.; running high jump, T. Flint, jr., '80, 4 ft. 10 in.; sack race, E. H. Trowbridge, '81, 38⅘ s.; three legged race, Danforth and Cogswell, '80, 12⅘s.; throwing base ball, E. L. Gulick, '83, 378 ft. 9½ in.; potato race, W. P. Snow, '81, C. S. D., 5m. 46⅘s.; 220 yards dash, E. B. Condon, '83, 27⅘s.; hop, skip, and jump, S. A. Barrett, '83, 36 ft. 5 in.; two mile walk, C. H. Brown, '83, 19m. 46s.; one mile run, H. H. Parker, '82, 5m. 14⅘.; 100 yards dash, C. S. Sloane, '80, C. S. D., 11s.; one mile walk, L. E. Brown, '83, C. S. D., 7m. 54s.; hurdle race, N. D. Cram, 81, 17⅘s.; consolation race, F. L. Coombs, '83, 6m. 2s.

Game Bag and Gun.

GAME IN SEASON FOR OCTOBER.

Moose, *Alces Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorus.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chicken, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*

☞ This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

PERSONAL.—Messrs. W. A. Wheatley and W. A. Williams, both residents of Memphis, Tenn., who have fortunately been able to absent themselves from the plague stricken city during its last affliction, were in Chicago last week, having just returned from a two months' shooting trip on the Western prairies. They have been in Iowa, Minnesota, and Dakotah since August 1st, and at last accounts were about to depart for Marquette, Wisconsin, to pay their respects to the canvas backs and red head ducks. For refugees their lines seem to have fallen in pleasant places. Thousands of sportsmen might envy their apparent good fortune.

RAIL SHOOTING IN NEW JERSEY.—*Philadelphia, Pa., October 1st.*—There is a charm in all shooting, but especially about that of rail shooting, that is particularly agreeable to one whose business subjects him to rather close confinement in a busy city, as is the case of the writer. The sense of freedom, the pure air, watching the cloud effects, and the mere fact of being out on the marsh, are enjoyments of themselves, as one stands in his little gunning skiff with his lightest gun in hand, with a trusty pusher on the stern, to whose muscle and keen sight in marking birds much is due for a successful shoot. But when to this is added the springiug of birds, as the skiff starts them, and the sharp cry of your pusher of "Mark, right! Mark, left!" as the case may be; followed by the crack of your trusty gun, which, if you do not miss, tells of another "dead bird." Truly, this is sport indeed.

Having just returned from a successful trip of the kind to a marsh on which I have been in the habit of shooting for several years, on one of the creeks of Southern New Jersey, and of many acres in extent—I write feeliugly. We had good tides, which are very necessary for good shooting, and quite a plenty of birds which were in good order; so the sport was good, and I returned to the city with some 125 birds, and feeling that it was a good thing to have a day or two relaxation from business with one's gun.

Although rail are an easy bird to kill, their flight, without it is blowing hard, being somewhat sluggish, they offer such a variety of shots that, when birds are springing lively, the practice is very good. With a light gun, and cartridges loaded with 3 drachms of powder and 1-ounce No. 9 shot, it is pleasant sport. B. J. P.

NOTES FROM ILLINOIS.—*Rockford, Ill., Sept. 30th.*—This may seem a distant locality to the people of your vicinity—veritably "The West"—but to us who now have to go some distance further west to get our shooting, we appear to live in the centre. The law, regulating the shooting of pinnated grouse, was more nearly observed and obeyed this season, so far as I know, than ever before. One reason was that the law was changed from September 1st to August 15th—but a more potent reason, because there have been several gun clubs formed, the members of which are not only willing themselves to obey the law, but to see that it is not infringed by others.

There are some favorite localities within a radius of twenty miles of this city where "chicken" may be found in considerable numbers, as you may be assured by the subjoined score of some of our most successful hunters, the 15th and 16th of August the present season: Mr. Ed. Lyman brought in 57, as the result of his individual effort; Messrs. Keeney and Lake reported over 30; Robinson and Smith, 23; besides a few ducks and snipe; Collins and McToggort bagged about 50; others did not meet with great success. The gentlemen named are all expert shots, and know just where to look for game. Of course those who get such good shooting must be promptly on the ground, before the birds are hunted and thinned out. These men met with very different success on subsequent trips. The Robinson brothers and Alderman Haines and son report a pleasant and successful expedition to Newell, Iowa. They found good shooting, bagging from thirty to sixty chickens a day. Messrs. Harvey Sears (well known as the proprietor of the Chicago Gun and Cutlery Store), A. D. Forbes, a leading manufacturer; M. V. Doyle, a retired manufacturer; together with a few others of Chicago, have just returned from a delightful trip to the Michigan woods, near Escanaba, where they found deer, partridges, and brook trout in abundance. They are conscientious gentlemen, and would not kill more than they could make use of, and were too far from the railroad to supply their friends. Mr. J. G. Hitchcock leaves next week for Grass Lake, McHenry Co., for his annual duck hunt.

We are only about fifty miles from Koshkonong, Wis., the great resort for duck shooting in the early spring and late fall. Several of our hunters will repair there when the flight begins.

There have been a number of friendly contests in glass ball and pigeon shooting during the summer. We have several men who break twenty-five or thirty-balls in succession. There is a match to-day on the Fair grounds between a gentleman from Florida—Senator somebody—and Ed. Lyman; the latter, the greatest hunter in this section.

Dr. De Puy, of this city, a retired physician and an enthusiastic sportsman, died last July while visiting Freeport. The Doctor was a genial, warm-hearted man, and a "gentleman sportsman" in the strictest sense of the term. Some of his intimate friends received presents of handsome guns before he died. He had the finest outfit I ever knew one man to own. His pride was a "Scott Premium," 10-bore. His duck gun was a Nichols, with two sets of barrels, one 8, one 10. His snipe gun was a Scott No. 16-bore, to which he had fitted a Shelton auxiliary rifle barrel. He had also a fine Maynard rifle. These were all bestowed in gifts to his hunting companions.

Those who delight in fishing, and their name is legion in this city, have had their usual amount of sport during the season. The encampments of the Waltonians and Nippersink Clubs at Twin Lakes, Wis., were more enjoyable than usual this summer. I know both parties had grand good times, for I was a guest and know whereof I affirm.

The "'76 Club" were delighted with this year's sojourn at Delavan Lake, Wis. I was there, too. Hundreds of members and guests each year avail themselves of this most rational means of rest and recreation. Could you but visit these clubs, while encamped at their beautiful resorts, breathe the exhilarating air that is constantly in circulation; enter into the sports of camp, and capture such strings of black bass as are often brought in as the reward of a few hours' work, you would urge the formation of many similar clubs, and show your readers the great advantages over the crowded fashionable summer resorts. NIMROD.

A GOOD PLAN.—Some distance above Michigan Centre, on Wolf Island, in Grand River, Mich., a hunter's lodge has been erected by the sportsmen of the Commercial Hotel. The structure is 12x14 feet, has a good roof and floor, and inside is the legend: "Welcome to all; but do not deface or destroy." It is designed as a refuge for the sporting fraternity during unpropitious weather, and its latch-string will always be out to all comers.

MICHIGAN.—Deer shooting is reported excellent in Alpena County.

CEDAR HILL GUN CLUB.—The roll of gun clubs and game protective societies is constantly increasing. Pennsylvania has added to her long list the Cedar Hill Gun Club, of Cedar Hill, Montgomery Co.

CHILLED SHOT.—*Rockland, Me., Sept. 27th.*—I see in your last paper that J. H. P., of Williamsport, Pa., wanted to know why it is that chilled shot carries together. I have had the same trouble. If he will use felt wads and not pasteboard, I think he will find that they work all right. I found it so. R. A. C.

NEW YORK—*Shelter Island, Oct. 1st.*—Sea fowl are just now making their appearance, and quantities of coots are collecting in Gardiner's Bay; but they cannot make much shooting before the middle of October. I have seen several very large flocks of black ducks flying over, high in air, bound for the South and West; but they make no stop by the way. McL.

MISSISSIPPI—*Vicksburg, Oct. 1st.*—We have rare sport here now, between sunset and dark, shooting "bull-bats." The right kind of a man, behind the right sort of a gun, properly loaded, can get into his bag about fifteen birds in twenty-five minutes. It is quick work, and requires an expert to make a score of one to three shots fired. I would be glad if you would tell me what a "bull-bat" is? what family he belongs to? and whether or not he is considered a game bird? He is good to eat "all the same," but the ladies object on account of the name. Can't you give us a sweeter name for him? though I don't know that that would make him taste any sweeter.

Our correspondent may be pleased with the name of night-hawk as a substitute for "bull-bat." It is known to ornithologists as *Chordeiles popetue*, and belongs to the family *Caprimulgidæ*, or goat suckers. It is not accounted a game bird, yet it affords excellent sport.

MASSACHUSETTS—*Ashfield, Sept. 29th*—Ruffed grouse are quite plenty, though thinned out some in this vicinity by shooting. There are a good many broods this year, consequently they have not separated as early as usual. I have found no ticks on them yet. Woodcock are scarce. RUFF.

LONG ISLAND.—Saturday, August 16th, found Fred. G. Moore, Chas. H. Davis, and yours truly, all members of the Bergen Point Amateur Gun Club, bound for Centre Moriches for a week's stay. We "put up" at the house of Mr. David Robinson, a gentleman whose qualities as a genial and generous host are only exceeded by his rotundity, he weighing four hundred and forty avoirdupois—("May his shadow never grow less").

Snipe were the order of the day; and during our stay we brought to bag some three hundred, with innumerable wild doves. Our guide, Mr. John Bishop, probably known to many of your readers, we found a most thorough and competent man. He he has a staunch boat with which to convey parties across the bay, and is a crack shot, being able to boast of having taken his fifteen woodcock "straight."

We laid aside a day for woodcocking. After an eight mile drive over exceedingly rough roads, during which our sylph-like host, who sat on the front seat, dozed, much to our anxiety, we arrived at the reputed "good grounds." The grounds may have been very good, but woodcock were too "seldom;" in fact, I have not seen less woodcock "since Hicks was hung." We turned toward home, after beating over a good stretch of swamp, and arrived there hungry, tired, and, if not better, wiser boys. Of woodcook shooting we have had enough; but, as for the gay and festives nipe, we hope sometime in the near future to tackle them again, to sit at the substantial board of our more than substantial friend, Mr. Robinson, and to "measure" guns with John Bishop.

TIM. BERDOODLE.

WISCONSIN—*Milwaukee, Sept. 29th.*—Ducks have opened up in Wisconsin waters with but little of their old-time vigor. A good day's shooting is hard to obtain, and the bags are mostly blue-bills and teal.

Mallards and canvas-back have been reported at several of the lakes surrounding this county, but the actual showing up is weak. The season will either be late, or ducks will be scarce. Snipe are plenty, and plover sufficiently so to make good sport. The largest flock of ducks I have seen this year was on Okonchee Lake, and at least half a mile from shore in open water. Partridges are almost obsolete in this immediate vicinity, where they were once plentiful. I bagged one solitary "Bob" on a high piece of ground lately, and he must have been a veritable hermit, for not another has been seen this season up to present writing. Game is being pushed back year by year, and soon the home of the game bird will not be Wisconsin. L'ECLAIR.

NEW JERSEY STATE SPORTSMEN'S ASSOCIATION.—This much looked for event will take place from Oct. 21st to 24th, inclusive, at the West Side Driving Park, Marion, New Jersey. Trains run from Jersey City and Newark every half-hour. The meeting of delegates occurs on the first day at Ostom's Hotel, Jersey City Heights, 596 Newark avenue. The programme for the succeeding days is as follows:

Second Day—Tuesday.—Meeting of Committee at West Side Driving Park at 8 A. M. to perfect arrangements, and receive further applications for membership of State Association.

Shoot No. 1, at 10 A. M. 10 single rises, 21 yards; entrance fee, $5 and the birds; open to all amateurs; first prize, $100; second prize, $75; third prize, $50; fourth prize, $25.

Shoot No. 2, at 2 P. M. Open to members of the State Association only; 10 single rises, 21 yards; entrance fee, $5 and the birds. First prize, an extra fine breech-loading shot gun donated by Parker Bros., Meriden Conn; value, $125. Second prize, a split bamboo salmon rod, 17 ft. 8 in. long; weight, 32 ozs.; German silver mountings, solid reel plate, etc., donated by Boston Split Bamboo Fishing Rod Co., and 2,000 Winchester shells, donated by Winchester Repeating Arms Co. value together, $70. Third prize, an extra fine sole leather gun case donated by Thomson & Son's, sportsmen's goods, 301 Broadway, and four kegs Hazard powder, donated by Hazard Powder Co., 88 Wall street; value together, $50. Fourth prize, third gun; Dittmar diamond grain powder, donated by Dittmar Powder Co., No. 24 Park Place; value, $25.

Third Day—Wednesday.—Shoot No. 3, 10 A. M. Open to members of State Association only; double bird shoot; 5 double rises, 18 yards rise; entrance fee, $5 and the birds. First prize, an extra fine Scott breech-loader, donated by Messrs. Schuyler, Hartley & Graham, 19 Maiden Lane, New York; value, $150. Second prize, extra fine Fox breech-loader, donated by E. S. Harris, 179 Broadway, New York; value, $75. Third prize, 2,000 Standard shells, donated by Messrs. Schoverling, Daly & Gales, 84 and 86 Chambers street, New York; 500 Bogardus' and 500 Paine's feather filled glass balls; donated by Hagerty Bro's. & Co., 10 Platt Street, New York; value, $40. Fourth prize, a collection of game cards, especially prepared and donated by J. H. Batty, Sportsmen's Taxidermist, Parkville, L. I.; value, 25.

Shoot No. 4, at 2 P. M. Open to all amateurs; 10 single rises, 26 yards; use of both barrels; first barrel must be fired when the bird is in the air; second barrel can be fired anywhere; entrance fee, $5 and the birds; first prize, $125; second prize, $75; third prize, $50.

Fourth Day—Thursday.—Commences at 9 A. M. Shoot No. 5; 10 single birds, 21 yards rise; entrance fee, $15 and the birds; for the State Association cup to be held each year by the winning club in trust, to be accounted for to the State Association; to be shot for by teams of three members of any club belonging to the Association; said winner to receive the entrance fees at the next annual contest. To the club making the next highest score, 500 lbs. chilled shot, donated by Tatham Bros., New York. To the club making third highest score, 250 lbs. tin-coated shot, donated by Lacey & Co., New York. For the fourth highest score, a case with Monogram of Eaton's Rust Preventer, donated by Geo. B. Eaton, Jersey City Hights, N. J.

Shoot No. 6 at 3 P. M. 10 single birds, 26 yards rise; open to all amateurs; entrance fee, $5 and the birds; first prize, 40 per cent. of entrance fees; second prize, 30 per cent.; third prize, 20 per cent.; fourth prize, 10 per cent.

Fifth Day—Friday.—Shoot No. 7 at 9 A. M. Single bird shoot for the championship badge of the State of New Jersey; 15 birds, 21 yards rise; open to members belonging to the State Association only; to be held by the winner each year in trust, to be accounted for to the association; said winner to receive the entrance fee from next annual contest; entrance fee, $5 and the birds. To shooter making second best score, 4 kegs Dupont's powder, donated by Dupont Powder Co., New York, and 2,000 Delaware shells, donated by J. P. Moore's Son's, Broadway, New York; value, $75.

Shoot No. 8 at 2 A. M. Open to all amateurs; 15 single rises, 21 yards rise; entrance fee, $10 and the birds. First prize, 50 per cent. of entrance fee; second prize, 30 per cent.; third prize, 20 per cent.

SPECIAL PRIZES.

For best average score in shoots Nos. 2, 3 and 8, a fine setter dog (thoroughly broken), donated by E. M. Quimby, Morristown, N. J., value, $100.

For best average score in shoots Nos. 3, 6 and 7, an elegant gold badge, presented by FOREST AND STREAM Publishing Co., No. 111 Fulton street, New York; value, $50.

For best average score of all shoots combined except shoot No. 5, a Fleming & Son new model extension rib pigeon gun, 32 in. No. 10 gauge. 10 lbs.; donated by A. Alford, No. 283 Broadway, New York; value, $125.

AN OPEN ENCOUNTER WITH AN ALLIGATOR.—*Editor Forest and Stream:*—Before I became thoroughly acquainted with the alligator of the Florida swamps I thought him a ferocious and formidable creature. I never pulled up my pants to wade after a bird or to fish without soul-stirring apprehensions of being attacked and gobbled up, for well I knew the 'gator was the strongest of animals. I have seen one not four feet long wrest a stick from the hand of a strong man as nothing. The 'gator, to "play himself" must be in shoal water—mud rather than hard bottom. They will fight when aggravated with a stick, if hemmed. It is dangerous for one to attempt to hold to the end of a pole when a 'gator has the opposite end in his mouth. In the dry season it is a favorite amusement for the boys to hunt their holes and aggravate them with a long pole until they become so mad as to clutch the pole and allow themselves to be pulled out and their throats cut, never loosening their hold on the pole. In this way I have seen the alligator killed with a very small pocket-knife. But the story I am to tell is of one I met on the highway, not tremendously large, but good size—nine feet or thereabouts. It was where the road crossed a small drain which ran from a lake into the bay that I heard the roar which told of his anger, for he had just been disturbed by a lady and her children. I had nothing but a pocket-knife, so I provided myself with a stick large as my wrist and about three feet long. This would do to kill him with, but I wanted to save his head perfect; therefore my knife (a small one, three-inch blade) was all I had. Had I found him before he became mad I would have had less trouble; but on my approach he showed fight. I knew just how to proceed, and cautiously I approached so as to avoid a blow from his tail, and aimed a blow just over the eyes which caused him to close them and to be quiet just a moment, whereupon I drove the knife just behind his fore-leg. This woke him up, as it is a tender place. Another lick over the head and half a dozen stabs and he was too far gone to object to having his throat cut. Notwithstanding I had dealt with the 'gator on several previous occasions, this time I was fooled, for in half an hour, when I returned from my business further on, I found him nearly as good as ever. I then repeated the former treatment until I was able to take his head without more resistance than I could physically foil. In severing the muscles of the neck convulsions of the muscles of the whole body would take place. This made the 'gator appear alive. He would move off, throw his tail and roll over and over, yet there was no absolute danger. So the reader can see how large alligators are killed with small pocket-knives.

WM. P. NEELD.

Pinellas, Hillsboro' Co., Fla., July, 1879.

Sea and River Fishing.

FISH IN SEASON IN OCTOBER.

FRESH WATER.

Black Bass, *Micropterus salmoides*; *M. nigricans.*
Muskalonge, *Esox nobilior.*
Pike or Pickerel, *Esox lucius.*
Yellow Perch, *Perca flavescens.*

SALT WATER.

Sea Bass, *Sctenops ocellatus.*
Striped Bass, *Roccus lineatus.*
White Perch, *Morone americana.*
Weakfish, *Cynoscion regalis.*
Bluefish, *Pomatomus saltatrix.*
Spanish Mackerel, *Cybium maculatum.*
Cero, *Cybium regale.*
Bonito, *Sarda pelamys.*
Kingfish, *Menticirrus nebulosus.*

EXPORTING SALMON TO ENGLAND.—The business of freezing fresh salmon for home consumption and for export to the United States has been in operation in Canada for a dozen years at least; but it is only within the present year, we believe, that Canadian salmon have been exported to Europe. Several cargoes have already gone from Newfoundland, and there is a 150-ton vessel now loading at Campbellton, New Brunswick, with Restigouche fish. The latter are very large and fine, and have been a favorite in the United States markets for four years past.

—Montreal papers say that the Labrador catch of herring has proved almost a complete failure the past season. Holders are asking $6 per barrel, to arrive.

SALMON SCORE OF THE GRAND CASCAPEDIAC FOR 1879.—In our last issue we referred incidentally to the large catch of salmon in the Grand Cascapediac river the past season. The Grand Cascapediac is a Canadian river empting into the Bay Chaleur. The following is the score of the Hon. Charles Ellis, Mr. L. Iveson, and Captain G. A. Percy, from June 9th to Aug. 15th inclusive, to which are added those of Capt. Fane and Capt. Drummond, R. N., who joined the party toward the end of the season, and enjoyed five days' fishing. The average of the whole was five fish, weighing 12¼lbs., to each rod, for each day's fishing, the total being as follows:—

	Days.	*Fish.*	*Weight, lbs.*	*30lb. & Up.*
Hon. C. Ellis	44	269	6,714	53
Mr. L. Iveson	46	213	5,483	48
Capt. G. A. Percy	30	137	3,451	27
Capt. Fane, R. N.	5	12	305	4
Capt. Drummond, R.N.	5	13	335	3
Total	130	647	16,238	135

—Anglers who study economy, and wish to provide tackle for next season, will bear in mind that orders given now can be more cheaply filled by manufacturers during the winter months than in the busy spring, when the time of the manufacturers is fully occupied. Mr. Chas. F. Orvis, of Manchester, Vermont, wishes us to say that he will furnish excellent bamboo rods at exceptionally low prices if they are ordered this fall and winter; also, that he has on hand a fine stock of first class trout flies, than which no better are manufactured anywhere. His flies always give fullest satisfaction.

—The editor of a rural journal thanks a young fisherman for a "mess of eels," and says he is so successful in taking fish that the finny inhabitants of Clear Creek butt each other to death in their efforts to escape his killing hooks. The editor is paving the way for another "mess of eels."

"OLD SALT'S" SCORE.—*Marietta, Ga., Sept. 29th.*—The editorial remarks in issue of Sept. 25th on "The best haul ever known," were much to the point. In the same paper was recorded another "haul," said to be by Gov. Alford, who caught over 5,000 bass, pickerel, etc., during his summer vacation. The writer omitted to state the length of the vacation, but supposing it to have lasted three months, and that the Governor fished three times a week, his captures must have amounted to 128 per day. On his best day, when he killed 333, he would have to kill thirty-three fish per hour, for ten hours, and they with the fly! The bass must have been small, or the day very long. S. C. C.

NEW YORK—*Shelter Island, Oct. 1st.*—Bunker fishing on the eastern coast of Long Island since the 1st of August has been quite unsuccessful, much inferior to that of former years. The months of August and September have usually been fortunate seasons. For the last four weeks fishing has not been a paying business for sailing craft, and many of them have been hauled up for the season. The steamers usually go out to sea, or into Long Island Sound, and some fortunate ones have taken 200,000 in a week. The sharks have been very numerous and have injured the seines badly.

For some unexplained reason the fish are scattered all over the waters of bay and ocean in small schools, which is quite unusual at this time of year. It is probably owing to the great number of steamers that pursue them incessantly, far into the ocean, and so break them up.

Gardiner's Bay, that has always been considered the best fishing ground, is now nearly destitute of fish. Long Island Sound, and off the south shore of the Island in the Atlantic, are vast numbers of fish, but in small schools, so that not more than some six or eight thousand can be taken at a haul. Still, new factories are being constructed and the present ones are enlarging their capacities for carrying on the business. But the steamers seem to increase in number as the fish diminish. In addition to the large number of steamers belonging to this region, large numbers of them have been in those waters this season, from other seaboard states.

For the last few weeks the two large factories on this Island have averaged weekly only about 300,000 to 400,000. It would almost seem as if the best days for bunker fishing were over; and this would be very disastrous for the hundreds of vessels and steamers and the thousands of men employed in the business, as there is a good demand for the oil and scraps. McL.

A PENNSYLVANIA HAUL.—*Pottsville, Pa., Oct. 1st.—Editor Forest and Stream:*—Tumbling Run Dams, two in number, are walled in by mountains on either side, and are about one mile in length by about one eighth in width, and from five to forty feet in depth, of pure spring water. During protracted dry summer seasons they feed the Schuylkill Navigation Co.'s canal, on which occasions they are drawn off very low. About six years ago one of our prominent fishermen commenced stocking these waters with the insignificant number of six small black bass, and since then, through the efforts of our representatives, the State Fishery Commission have put in about 6,000 bass and trout. By request of our sportsmen, the Philadelphia and Reading R. R. Co., who are the lessees of the dams, placed around on the shores notices that "improper fishing would be punished." Last summer a year, a few coal and iron policemen were stationed at the dams to make arrests of any caught in the act of fishing, but they themselves exercised an unlawful liberty in the sport. The past season was the first opportunity extended to any and everybody to try his luck with hook and line, and many large bass and trout were caught. I had the pleasure of taking some bass from two to five pounds, and by another season any quantity of large fish could have been caught. But our fondest hopes have left us through the maliciousness of a few officials of the S. N. Co., at Schuylkill Haven, two miles below. Last Sunday night, one named Jones, another named Cartright, and Sullivan, screened the pipes, broke the padlocks, raised the wickets, and in a short time drained the dams, being quite low at the time, and thousands of small fry passed through the screens and died in the channel below, and the rapid current carrying as many into the head of the sulphurate waters of the Schuylkill River, which being pumpings from the coal mines above, is as black as tar. No fish can live in it. Thousands of small fry, and bushels of fair specimens lay in the bleaching sun on the beds of the dams, dead and dying; the scoundrels carried away several tubs full of the largest fish, liberally distributing them with their friends on their way home, and their only reason, as far as we can learn, for it was, "to get ahead of the policemen." The company's attorney here has advised President F. B. Gowen of the circumstances, and if we can have these miscreants properly punished, we mean to do it. DOM PEDRO.

MISSOURI—*St. Louis, Oct. 2d.*—Have made three or four trips to Murdock Lake Club House, and as usual came off high line in catching black bass. More and larger ones have been taken in our lake this fall than ever before. I have hardly missed capturing some weighing four to five pounds each at every visit. Several have been taken weighing six pounds. D. L. D.

CALIFORNIA—*San Francisco, Sept. 19th.*—We are having very good grilse fishing now in what we call the lagoons. All our small rivers emptying on the coast have sand bars at their mouths in the summer time which form lagoons behind them of brackish water; these are torn open by the first heavy rains of the winter when the salmon enter and go up to the sources of the streams and spawn, and immediately return to the ocean. When the young salmon are hatched and have arrived at about the weight of from six to ten ounces, they descend these streams seeking their way to the ocean, but are stopped by the sand bars, and remain in these brackish waters until the heavy rains of winter tear open a passage to the sea. All of these lagoons are now full of these young salmon; the water is brackish, and they feed ravenously and take the fly with avidity. It is the prettiest and cleanest fly fishing you can imagine; a clean sand bank; no willows or trees, and an open pond of brackish water. Three of us took over a hundred with red hackle the other morning in an hour at the mouth of the Carmel River near Monterey.

I read the FOREST AND STREAM regularly, and am astonished that people should go way to Canada and spend so much money in catching a few salmon; when if they would come here in July or August and go to the head waters of the McCloud River, they would find that the salmon would bite so ravenously as to become a nuisance to trout fishermen. It will give you an idea how thick they are in the McCloud River in July and August, when I state that a few weeks since, Mr. Livingston Stone's men at one haul of the seine, in a pool at the U. S. Fishery, took over two thousand. In addition to the natural product we hatch and turn in two-and-a-half millions of salmon every year. By this process we are beating the fishermen, the canners, and the sea-lions.

B. B. REDDING.

THE SALMON SUPPLY OF THE SEASON.—The supply of salmon during the season now at its close has fluctuated so considerably that it may be of interest to compare the present year with its predecessors. We have therefore compiled the following figures from the weekly returns published in our columns of the number of boxes (containing 150 pounds each) received in the London market during the last five seasons, from the three divisions of the United Kingdom, during the seven months from February to August, inclusive:—

	1875.	1876.	1877.	1878.	1879.
Scotland	18,328	21,412	23,700	23,809	13,524
Ireland	4,835	6,001	5,573	3,815	5,042
England and Wales	1,276	1,806	1,681	1,170	1,340
Total	24,439	29,222	30,954	28,854	19,906

London Field, Sept. 6th.

We note the return to the United States, this week, of S. Nugent Townsend, Esq., the American correspondent of the London *Field*. Previous to his departure for England, a year ago, he had spent three years in Texas, writing up the resources of that State, and encouraging immigration from abroad. The information which he then collected has been embodied in a book recently published.

Yachting and Boating.

HIGH WATER FOR THE WEEK.

DATE.	BOSTON.	NEW YORK.	CHARLESTON.
	h. m.	h. m.	h. m.
Oct. 9	5 59	2 45	1 58
Oct. 10	6 40	3 46	2 59
Oct. 11	7 57	4 43	3 56
Oct. 12	8 52	5 38	4 51
Oct. 13	9 46	6 32	5 45
Oct. 14	10 39	7 25	6 38
Oct. 15	11 30	9 16	7 29

HONOR TO WHOM HONOR IS DUE.—*Editor Forest and Stream:*—Your notice of our boat club move in this city gratefully received, but the distinction you accord me is not mine to keep, wherein you say: "Owing mainly to the exertions of Mr. A. H. Siegfried," etc. The idea of a club, originated in my absence on the high Mississippi, and the splendid list of men we have, is almost entirely owing to the personal persistent work of our Vice-President, Mr. L. A. Dunham, seconded by a few other gentlemen, of whom I was not one until well toward the close of the work. A. H. SIEGFRIED.

Louisville, Ky., Sept. 20th.

BEVERLY YACHT CLUB.—The fifty-second race, to sail off tie in the third class, took place off Nahant, September 22d. Course, round Winthrop buoy and return; wind strong, easterly; heavy sea; judges' yacht, *Loxen;* judges, R. D. Seasr, A. Johnson.

The boats got in a line, and all got off at 4.35. *Psyche* had the best of it, but had to work hard to get ahead of *Bessie*. Return: *Psyche*, 6.26.45; *Bessie*, 6.30.17; *Nova*, 6.33.20. *Psyche* wins the championship.

PROTESTS DECIDED.—In the fiftieth regatta, the Open Race at Swampscott of August 23d, two protests were made. The first, that of *Josephine*, was mentioned in FOREST AND STREAM in the account of the race. This was not allowed; the judges deciding they could not reverse their award to correct the mistake made by *Josephine* herself. The second case was a protest by *Empress*, J. Y. C., against *Dictator*, S. B. Y. C.; the claim being that *Dictator* was longer than the length she entered at. *Dictator* made a counter protest against *Empress*, and the judges decided to measure both boats, which belong to the second class keels, in which first money was taken by *Veronica*, S. B. Y. C., second money, $15, being the amount in dispute. After much trouble and delay, both boats were measured as follows:—

	Length.	*Actual Time.*	*Corrected Time.*
Empress, J. C.	25 11¼	2 34 18	1 50 54
Dictator, S. B. Y. C.	25 9¼	2 37 48	1 50 55

Empress, winning by one second.

ROYAL NOVA SCOTIA YACHT SQUADRON.—Two races were sailed on the 13th of September by the yachts of the squadron. The first was for yachts exceeding fifteen tons, and for this were entered:—

Name.	*Rig.*	*Tons.*	*Owner.*
Seafoam	Schooner	27	Lieut. C. C. Carter, R. E.
Petrel	Sloop	20	A. C. Edwards.

The breeze had died away altogether, but, just before the start, came up from S. W., making a beat to first mark, Mar's Rock Buoy, a certainty. The second-class yachts entered were:—

Name.	*Rig.*	*Tonnage.*	*Owner.*
Psyche	Sloop	7	W. H. Brookfield.
Phantom	Sloop	7	W. H. Troop.
Kate	Sloop	8	W. B. McSweeney
Volante	Schooner	9	F. Rudolf.

Psyche made a very late start. *Kate* did not appear at the line till nearly eighteen minutes after the word "go." This delay on her part probably cost her a prize, for she sailed well. *Phantom*, which led her class a long way out, was killed by the lop she met outside, and went in for pickaxe drill in the most disheartening manner. *Psyche* was the wonder of the day. Starting last of her class, six minutes and a half behind *Phantom* and eight minutes ten seconds behind *Petrel* in first class, she sailed so fast and worked the western shore so judiciously that she actually led the fleet around Mar's Rock, and raced *Petrel* very close across to Thrum Cap. As for *Petrel*, the old favorite sailed quite up to her form, finally coming in ahead by a long piece, and landing the Flag Officers' Prize without difficulty.

The starting gun was fired at 1.30 P.M., and the yachts were timed as follows:—

	H. M. S.		*H. M. S.*
Petrel	1 31 40	Seafoam	1 35 40
Phantom	1 33 15	Psyche	1 30 50
Volante	1 34 20	Kate	1 47 10

Petrel carried gafftopsail and flying jib; *Phantom*, gafftopsail; *Volante*, maingafftopsail; *Seafoam*, the same and flying jib; *Psyche* and *Kate*, gafftopsails. The wind was moderate from S. W. All the yachts made a long board on starboard tack toward's McNab's Island, except *Psyche*, which, away behind, went about short for the western shore and hugged it all the way down. *Volante* succeeded in weathering *Phantom*, but next tack was repaid in kind. *Petrel* was now closing up to the first mark; but *Psyche*, going like a steamer, was there ahead of her, rounded the mark in quick time, checking sheets for the reach to Thrum, on the way to which *Petrel* passed and dropped her, steadily increasing her lead to the finish. *Phantom* led *Volante* round the buoy, but her balloon jib unfortunately got into the water instead of in the air, and the little schooner went past like a flash and away for next mark, on rounding which she smartly set a large square-sail on her foremast, and with everything drawing foamed homewards, *Phantom* hunting her close in hopes of saving her time; but it was not to be, and Mr. Rudolf pulled off his maiden prize by 29 seconds from his opponent.

The time at the finish was:—

	H. M. S.		*H. M. S.*
Petrel	3 53 37	Phantom	4 06 45
Psyche	3 59 45	Seafoam	4 17 29
Volante	4 06 10	Kate	4 22 20

Petrel winning Flag Officers' Prize for first class boats, and *Psyche* and *Volante* first and second prizes respectively in second class. Both were steered by their owners.

The five-tonners had a race to themselves over a new harbor course, which is likely to prove a favorite, as it is free from the disadvantages of that hitherto sailed. They started from the Lumber Yard, and went round Dart-

mouth Ferry buoy, Point Pleasant buoy, Ives Knoll buoy, past Lumber Yard, round Dartmouth Ferry buoy, and finish at Lumber Yard. Four yachts had entered, but of these only two made their number at the line, namely :—

Name.	Rig.	Tonnage.	Owner.
Ina	C. b. sloop	3	F. S. West.
Muta	Sloop	5	Lt. Dunlop, R. A

Ina is a new yacht and raced for the second time. She shows extraordinary speed off the wind, but is not as good to windward. The start was very pretty, *Ina* going off like a flash and setting spinnaker to port. *Muta*, whose crew is "up to a thing or two," was smarter in making sail, and had spinnaker set and drawing in a trice. *Ina* led to first mark. After rounding, *Muta* took to sagging to leeward for a time, as she passed the Leopard, but, waking up to her business, began weathering out on *Ina* as only *Muta* can. Still the little one had clear water, and as soon as she got round the next mark, mast-headed her spinnaker. After rounding Ives, *Ina* set spinnaker on bowsprit and went clear away from *Muta*, though the latter set her spinnaker to port and tried to overhaul the leader. Both yachts were steered by their owners. The starting gun was fired at 2 P.M., and the yachts passed :—

	H. M. S.		H. M. S.
Ina	2 0 45	Muta	2 2 35

Their sailing times are annexed :—

	Start. H. M. S.	Finish. H. M. S.		Start. H. M. S.	Finish. H. M. S.
Ina	2 0 46	4 22 6	Muta	2 2 38	4 23 15

Ina therefore takes first and *Muta* second prize. The officers of the R. A. and R. E. have offered a prize to be sailed for by the yachts of the squadron at the close of the season.

ALBANY YACHT CLUB.—The sixth annual regatta of club was sailed on the Hudson Sept. 18th. The steamer *Golden Gate* went over the course with the yachts, Com. Cogswell in charge. The course was seven miles down the river and return to the city. Three classes, irrespective of rig. Wind moderate from N. N. W. The run down, with booms to port, was smooth work, the mark being fetched first by *Dodger* and *Coquette* close aboard, the rest of the fleet in a bunch. The wind picked up a bit, and *Dodger* soaked away from the rest, *Coquette*, *Sans Souci* and *Albani* making up a trio hunting each other close. The fickle breeze fell light, and *Startle* closed up on the rest, but before long a crisp wind from N. W. again changed matters, and brought the ships again to their work. *Albani* looked high, and went into second place. Off Van Wick's Point *Dodger* burst her bobstay, and ran alongside a tow to repair damages. *Sans Souci* and *Coquette* made a hot fight of it, outwinding the rest, the former finally landing the prize. The yachts of all classes finished a fine race as under :—

FIRST CLASS.

Name.	Owner.	Ft.	In.	Length.	Actual Time. H. M. S.	Corrected Time. H. M. S.
Sans Souci	S. Y. C.	27	00	4	16 22	4 16 22
Startle	Hulger	23	00	4	23 40	4 22 25
Breeze	H. A. Glassford	24	00	4	43 19	5 30 54
Artful Dodger	A. J. Stone	23	03		....	....

SECOND CLASS.

Coquette	H. F. Cogswell	22	00	4	31 45	4 31 45
Albani	J. D. Brooks	21	00	4	39 10	4 38 10

THIRD CLASS.

Aggie	J. D. McEvoy	16	00	4	44 35	4 44 35
Addie	Aug. Denisard	15	00	4	59 13	4 58 13
Annie	S. D. Tucker	15	00	5	31 45	5 30 45
Nettie	S. N. Stiles	18	00		....	....
Maggie	J. Mesick	15	00		....	....

Sans Souci, *Coquette* and *Aggie* take first prizes—very sensible presents in the shape of lights, barometers, etc.; *Startle*, *Albani* and *Addie* take second prizes. Special prize to yacht making best corrected time, a handsome whip pennant, presented by G. Stoneman & Son, goes to *Sans Souci*, and the "C. P. W." prize for last boat in, goes to *Annie*. *Nettie* and *Maggie* gave up. Regatta Committee ; Messrs. M. F. Cogswell, R. D. Evans, W. W. Grey and W. T. Meyer. The club is in a flourishing condition, and reports the interest in yachting as spreading fast in and about Albany.

RACING ON THE DELAWARE.—A race for sweepstakes of $100 was sailed Sept. 23d between yachts of Southwark and Philadelphia Yacht Clubs. Entries from S. Y. C. : *Ledyard*, *Boyle*, *Douglass*, *Campbell*, *Sullivan*. Entries from P. Y. C. : *Schuyler*, *Crawford*, *Disston*, *Rust* and *Moore*. Wind nearly a gale from N. E. *Ledyard* made a poor start, but an allowance was given her by the judges ; though we know not in accordance with what rule. The *Moore* capsized off Gloucester, the *Schuyler* filled, and the *Campbell* rounded the lower mark first, with *Douglass* second, and *Rust* third. The *Ledyard* worked out to windward of the lot on the beat up, and took the purse ; *Disston* a good second. The P. Y. C. has issued a challenge to the S. Y. C. to match two of their yachts against any two of the other club for $100 to $400 each boat.

BAY OF QUINTE YACHT CLUB.—*Editor Forest and Stream* :—The annual autumn regatta of the Bay of Quinte Yacht Club, which was held on Marrassaga Bay Sept. 23d, was favored with remarkably fine weather, and proved to be the most successful which the club has yet held. Prizes were offered as follows : Yachts of ten tons and under, first, $100 ; second, $70 ; third, $60 ; fourth, $20. In addition, Commodore Robertson presented to the club a silver cup, and the win was also one score in the series of three wins required to obtain permanent possession of a flag presented by Mr. Cole, of Ottawa. To the second club boat Treasurer Jellett presented a mariner's compass. The prizes for yachts of five tons and under were : First, $35 ; second, $20 ; third, $10 ; fourth, $5. No entrance fee ; ten per cent. deducted from winners. Although these prizes were larger in the aggregate, and the amounts going to winners very much greater than were offered in the great regatta of the Beverly Yacht Club, yet the reputation of our local fleet is such that strangers are not eager to face them. However, eight splendid craft entered in the ten-ton class. There were the *Kathleen*, *Gracie*, *Katie Gray* and *Sylvia*, of Belleville ; *Surprise*, of Trenton ; *Judge Jellett*, of Picton, a new craft built by an amateur named C. Atkin of that place, and which sailed her maiden race on the occasion ; *Emma*, of Kingston, which led the fleet at Toronto so lively a dance ; and *Una* (formerly *Charm*), of the same city, and which was built at Powers' shipyard there. The entries for the third class included the *Wideawake*, *Mabel*, *Amorette* and *Pinafore* (formerly *Ailsa Craig*), of Belleville ; *Mystery*, of Kingston ; *Little Giant*, of Stone Mills ; *Magic*, of Cobourg ; and *Victor*, of Nahanee. The only absentee was *Magic*. The breeze was light at south when the ten-ton craft were dispatched to a beautiful start, *Katie Gray* leading off, *Surprise* next, *Judge Jellett* third, *Una* fourth, *Gracie* fifth, *Kathleen* sixth, *Emma* seventh, and *Sylvia* last. With the wind abeam, the racers sped along with great rapidity, *Katie Gray* having a long lead at the first buoy, *Surprise* being next, and the others almost as they started, except *Sylvia*, which being a keel, found the wind too light for her. Just after rounding the first marks the sailing master of *Katie Gray* made an error which cost him the race, as, not seeing the next buoy, he stood away to the southward and eastward, followed by *Surprise* and some of the others ; but *Kathleen's* men had their eyes open, and standing just far enough to windward, and passing the word to *Surprise*, which was close by when they came about, made off for the buoy, leaving *Katie Gray* a good half mile out of her course, and third instead of leading boat. As the competing craft came to the starting point *Kathleen* led by four minutes actual time, *Surprise* leading *Katie* by twenty-five seconds only ; but here a slight bungle of *Surprise* cost her second place, *Katie Gray* slipping in between her and the buoy, and going on in sharp pursuit of the leader. Next came *Gracie* and *Emma* close together, less than a minute apart, and next *Judge Jellett* and *Una*, the latter of which passed the former soon after, *Sylvia* practically out of the race. *Katie Gray* gained slowly on *Kathleen* all around the course, and on the run before it from the south shore, which all except *Kathleen* made with balloon jibs and water sails added to the muslin which they had spread previously, caught her so rapidly that she was but a minute behind. Now, however, the wind died away rapidly, and *Kathleen* being in light ballast, while *Katie* had added seven hundred pounds to the three thousand pounds which she carries generally, skipped away from her, and won handsomely. *Emma* having captured *Gracie*, went for *Surprise*, and succeeded in beating her also. *Gracie* finished fifth, *Una* sixth, and *Sylvia* seventh, *Judge Jellett* having retired at completion of the second round. The time made by the different yachts was as follows :—

	Start. H. M. S.	Finish. H. M. S.	Elapsed Time. H. M. S.
Katie Gray	12 40 28	5 09 32	4 29 04
Surprise	12 40 39	5 23 30	4 42 51
Judge Jellett	12 40 45	Retired.	
Una	12 40 55	Not timed.	....
Gracie	12 41 00	Not timed.	....
Kathleen	12 41 14	5 02 20	4 21 06
Emma	12 41 50	5 18 40	4 36 50
Sylvia	12 45 49	Not timed.	

Kathleen thus wins first prize, *Katie Gray* third and *Surprise* fourth. The course was thought to be about twenty-five miles in length. It was not measured, but the landmarks are known pretty accurately.

The third class race, which, according to the same computation, would be about seventeen miles, was also very interesting. It resolved itself into a match between *Mystery* and *Wideawake*, which the latter would have won had the wind held, but *Mystery* is canvassed for light weather, and is, besides, a slippery customer. On the first round she led by thirty-one seconds, all of which, and more, was gained when under the shelter of the trees, while on the third round, when the wind died away, she had no difficulty in leaving her closest follower. The time in this race was as follows :—

	Start. H. M. S.	Finish. H. M. S.	Elapsed Time. H. M. S.
Amorette	1 10 33	4 54 05	3 43 32
Victor	1 10 06	4 49 50	3 38 42
Pinafore	1 11 14	Not timed.	
Little Giant	1 13 00	Not timed.	
Mabel	1 13 50	4 54 12	3 40 42
Wide Awake	1 13 55	4 39 00	3 25 05
Mystery	1 14 24	4 25 45	3 12 21

The *Victor* was protested against, and ruled out, being over seven tons. *Mystery* wins first prize, *Wideawake* second, *Mabel* third, and *Amorette* fourth. The result of this race was a great triumph for Cuthbert, whose models won all the prizes in the ten-ton class, and stood second in the five-ton class. PORT TACK.

Belleville, Ont., Sept. 23d.

SAN FRANCISCO YACHT FLEET.—The schooner yacht *Ariel*, formerly of the New York Yacht Club, and which was sent around Cape Horn for Capt. A. H. Wilcox, a member of the San Francisco Yacht Club, has again changed hands. Since she been in Pacific waters she has been kept most of the time in San Diego, some 500 miles south of San Francisco ; but Capt. Wilcox's health has become so bad that he is unable to use her, so sent her to the Bay City for sale. She has been purchased by Edgar Mills, Esq., and is having a false keel put on and being otherwise refitted. Mr. Mills is a member of the S.F.Y.C., and a brother of D. O. Mills, of the Bank of California. The yacht will hereafter be kept in San Francisco Bay.

The sloop yacht *Clara*, which was brought from New York on the deck of the clipper *Young America* to San Francisco for Jabez Howes, Esq., of the S. F. Y. C., has been sold by that gentleman to John Rae Hamilton, Esq., S. F. Y. C. The latter gentleman has been used to the rough waters of the English Channel, and in the recent ocean race of the club astonished all hands by the way he put the little *Clara* through the heavy seas of the bar. Mr. Hamilton is an accomplished yachtsman, has abundant means, and will keep the *Clara* to the front. Mr. Howes expects the New York sloop *Annie* on the deck of his ship the *Three Brothers* every day. Mr. Hyde P. Bowie, S. F. Y. C., is having a sloop yacht built by Capt. Turner. She is the same size as the *Clara*, and is designed specially to beat that craft.

SAN FRANCISCO YACHT CLUB.—An ocean race recently determined on by the San Francisco Yacht Club, across the bar to the fifteen-fathom buoy outside, some ten miles to the windward and return, took place on the 9th of September, the anniversary of the admission of California into the Union. Hurried arrangements and the fact that the bar had been breaking badly on the 8th, resulted in only eight yachts starting, others only going as far as the Golden Gate and laying on and off at Fort Point. The day was windy and the bar was rough, reef points being in demand. Ocean sailing on the mis-named Pacific, off San Francisco, is rough sport, and that day the weather "meant business." Mr. Gutte's new yacht won the first prize, beating the *Consuelo*, which carried away shrouds before reaching buoy, and had to return.

The small yachts had to turn tail on reaching the bar between the heads, and were glad enough to get back to to the Gate. The *Clara* beat the *Frolic* in second class, somewhat to the suprise of the other yachtsmen. Mr. Hamilton, the new owner of the *Clara*, is an old rough-water yachtsman of the Orkney Islands. He sailed his yacht himself, and although he frightened his crew badly, and gave those in the other yachts fears for his safety, carried his little boat through handsomely. The peak was lowered, and she pitched and rolled over the big seas, looking as if each downward heave was her last. The pilot-boats were all under short sail, plunging into it, and no one but a bold yachtsman would have ventured out in such weather in so small a yacht as the *Clara*. Mr. Guttle's yacht was sailed by Capt. Turner, her builder. The *Frolic* was sailed by the Commodore of the club, her owner, C. H. Harrison. Only the "grit" in carrying on of the *Clara's* captain beat her. After the race the yachts all came to at the club-house at Sancelito. The conclusion is, however, that rough water and wind are plentiful enough in the big bay without going outside for it in bad weather.

Mr. George H. Perkins, Governor-elect of the State of California, is a member of the S. F. Y. C., and is much liked by his club, to which he shows frequent courtesies in the matter of loaning his fine tug-boats for regattas or other special occasions. Gov. Pacheco, formerly Governor of the State, and just elected a member of Congress from California, is also a member of the club. He was one of the original owners of the *Consuelo*. He expects shortly to commence building a fine 60-foot yacht. He is an expert yachtsman, not afraid of "a little spray," and has the reputation of being a first-rate hand at the helm in any weather.

THE YACHT RACING ASSOCIATION.—Messrs. W. H. Dilworth, E. W. Ketcham and Theo. H. Rogers, of the New Jersey Yacht Club, were appointed a committee to initiate proceedings with the view to the organization of a body composed of delegates from the various yacht clubs in New York and vicinity. The committee has communicated with all the clubs of the country, and now asks that a call be issued bringing them together at as early a day as convenient. It has been decided to call together a convention at the Astor House, Monday, Nov. 10th, at 8 P.M. The objects of the committee are such as should meet with the support of all interested in bringing about reform and unity in yachting laws and customs, and we trust that clubs will take action upon the call, thereby giving it their indorsement. One of the principal objects sought to be attained is to issue a prospectus for a public Union Regatta to be sailed in New York Bay at least once a year.

THE NORTHUMBRIA.—This steam yacht—Earl of Lonsdale, owner—which recently put into Halifax, is bound on a long cruise. She left Southampton, July 18th, and sailed to Davis' Strait, Greenland, via Scotland ; thence she proceeded down the coast of Labrador to Newfoundland, arriving at St. John, Aug. 2. After a cruise about the island the course was laid for Halifax, after visiting Sydney and the Bras D'Or Lake in Cape Breton. It is proposed to extend the cruise to Bermuda and the Azores. The *Northumbria* is a fine ship, something after the style of Mr. Brassey's *Sunbeam* ; built of iron, 426 tons, 156 feet long, 25½ feet beam, 16 feet deep, 70 H. P. engines, and rigged as a three-masted topsail schooner. The Earl is accompanied by only one companion—Dr. Kingsley, brother of the late Charles Kingsley.

COLUMBIA YACHT CLUB.—The crew of the sloop *Peerless*, C. Y. C., will hold an informal reception at Lion Park, One hundred and Tenth street, Oct. 14th, from 8 to 12 P.M. We acknowledge receipt of complimentary tickets, and know the many friends of the crew will enjoy a royal time.

CLEVELAND YACHTING ASSOCIATION.—In the recent club regatta, Rear-Com. Wm. Shipman sailed *Vivex*, not as before reported. The Rear-Commodore is justly considered one of the best sailors on the Lakes.

THE OCEAN GEM.—Mr. W. P. Clyde arrived at Norfolk, Va., Oct. 4th, in his steam yacht *Ocean Gem*. The pretty craft excites the admiration of the citizens ; and well she may, for she is one of the handsomest of her class.

TO AMERICAN YACHTSMEN.—For complete records of all yacht races in England, as well as for a great variety of other matter of interest, such as cruises and yachting tales, read *Hunt's Yachting Magazine*, established 1852. Can be had of booksellers generally, or direct from Hunt & Co., 119 Church Street, Edgware road, London, E. C., England. Published monthly, one shilling sterling per number.—[*Adv.*

ANOTHER COMPLIMENT.—The Forest and Stream Club, of Bridgeport, Ohio, has been regularly organized, and officers elected as follows : Jas. D. Burtoft, President ; J. F. Sharp, Secretary ; Orville Coss, Treasurer. The President was ordered to purchase a rotating trap and a barrel of glass balls. A committee was appointed to select and rent suitable shooting grounds, and a glass ball match ordered for latter part of next week. We start out with a fair list of young men, and hope to merit the title of true sportsmen. J. F. SHARP, Secretary.

We accept with pleasure the compliment conveyed by our Buckeye friends, and trust they will enjoy the pleasures and benefits to be derived from such an association as they have formed. Success to them.

DURHAM SPORTSMEN'S CLUB.—The Durham Sportsmen's Club of Durham, N. C., was reorganized September 22d with Mr. E. J. Parrish, President, and Mr. S. W. Chamberlain, Secretary and Treasurer. The club will hold glass-ball shooting meetings, and give attention to the protection of game.

—E. & C. Von Culin, of Delaware City, Md., publish a 25c. per year "Poultry Guide."

NEW PUBLICATIONS.

—o—

SUMMER VACATIONS AT MOOSEHEAD LAKE AND VICINITY. By Lucius L. Hubbard. Boston: A. Williams & Co. Price $1.50.

This handy little volume is the result of Mr. Hubbard's repeated sojourns in the Maine woods. Having gone repeatedly over the canoe routes, camped out in the wilds, and thoroughly familiarized himself with the ways of the woods, the author appears to have happily set forth here precisely what will instruct others how to paddle their canoes, pitch their tents, catch their fish, and build their camp-fires on the same grounds. The photographic illustrations add much to the book, while the map is invaluable, showing, as it does, the roads, carries, etc. Previous to Mr. Hubbard's book we had not an adequate guide to this region; we are happy to state that the "Summer Vacations" entirely supplies this lack.

EHRICH'S FASHION QUARTERLY, published by Ehrich & Co., 237 Eighth avenue, New York, has assumed a very large form, and is an invaluable guide to lady purchasers. It is an illustrated catalogue of every article of ladies' and children's outfits, house furnishing articles, etc. We commend it to all lady readers of FOREST AND STREAM. The price is fifty cents a year, or fifteen cents a number.

A TIGHT SQUEEZE. By "STAATS." Boston: Lee & Shepard.

The tramp has been abused and denounced. "Staats" has found in him a subject for a very neat little romance. The "Tight Squeeze" was that of a gentleman, who, on a wager of $10,000, undertook to go from New York to New Orleans in three weeks, without money, as a professional tramp. The book is full of odd situations and the *denouement* is as startling as it is surprising.

—We have received from Lee & Shepard, Boston, Mass., "The Danbury News Man's" new book, "Mr. Phillips' Goneness." Just how Mr. Phillips was "gone," how badly he was "gone," and how, when, where and why he came to himself, we leave for the readers of the book themselves to determine.

MAGAZINES FOR OCTOBER.—*Scribner's* opens with a paper by Ernest Ingersoll on "Ups and Downs in Leadville," which contains much interesting gossip about that wonderful place, with a great deal of reliable information as well. The illustrated paper by Mr. Charles A. Zimmerman upon "Field Sports in Minnesota" is one of the best of the sporting series, and especially seasonable.

A COLORED EVANGELIST'S DOG. — The Rev. Calvin Williams, a colored evangelist, was brought before a Stonington justice the other day, charged with keeping an unlicensed dog. Upon being asked to plead, he replied that he would first open the Court with prayer, and immediately fell upon his knees and offered a fervent petition, remembering particulary those engaged in his prosecution. He then stated that the dog was the property of his wife, who belonged to the Indian tribe. Judgment was suspended for two weeks.—*New Haven Register.*

WEATHER MESSENGERS.— In the current number of *Nature* is a suggestion for using carrier pigeons as weather-messengers. The proposal is that outward bound vessels shall take with them carrier pigeons, to be sent back at such points as may be determined on, bearing with them the report of such observations likely to be useful at home. The storms in the altitude of England rarely attain a rate of thirty miles an hour, and sometimes do not exceed fifteen miles. On an average a storm center may be said to travel at about sixteen or seventeen miles an hour, and a good carrier pigeon would, therefore, easily outstrip all ordinary disturbances; and, even in the case of the most rapidly approaching storm centers, if encountered at any considerable distance out at sea, the bird would get home with an ample margin of time for the transmission of signals to the threatened districts. Scotland, it is pointed out, is especially unprotected; and if every vessel leaving Greenock for America took a carrier pigeon, very useful observations might be returned.

—o—

A short-sighted lover passes the object of his affections upon the street without saluting her, wherefore she takes him to task at their next meeting.

"What weight should I attach to your professions?" she says, severely; "yesterday I met you on the street and you passed on without ever looking at me."

"Madame," replies the offender gallantly, "if I had stopped to look at you I should never have passed on."

—o—

—The depth of the water in the gorge below Niagara Falls has just been measured for the first time. The swiftness of the stream had baffled all previous efforts, but a corps of Government engineers accomplished the feat. They embarked in a small boat not far below the Falls. An old guide accompanied the party. The depth just below the Falls was found to be 80 feet; a little further down, 100 feet, deepening to 192 feet. The deepest water found was 210 feet.

POVERTY AND POLITRY.—Warrants have been issued by the attorney of the Health Board for the arrest of a number of east side tenements housekeepers on a charge of violating the health code. Inspectors Brennan and Crow furnished the evidence upon which the warrants were granted. According to their testimony certain dwellers on the east side of the city are in the habit of keeping in their cramped apartments geese, ducks and hens, cooped up in cellars and under bedsteads. This state of affairs produced foul odors and bred contagious diseases. In a basement at No. 80 Chrystie street, 50 ducks and 200 hens were housed; at No. 99 Ridge street, a number of chickens and geese; No. 30 Essex street, 250 ducks; No. 118 Ridge street, 100 chickens and 50 ducks; No. 153 Ridge street, 100 chickens; No. 120 Ridge street, 180 chickens under the bed and 50 ducks in the yard, and No. 32 Essex street 200 ducks and geese in the cellar.

CAPE ANN CODFISHING. — Not many months ago a party of Boston gentlemen came to this city and went on a fishing party. Some of them got pretty jolly, one in particular, who seizing one of the codfish which they had caught, walked up the wharf. He soon espied a veteran fisherman who was sawing wood, and under the impulse of the moment fetched him a whack across the face with the codfish. In a moment he was sobered. The generous impulse of a noble heart throbbed in his bosom. He felt that he had done a mean, ungentlemanly act, and he meant to atone for it then and there. Taking out a ten dollar bill he proffered it to the veteran, saying: "Accept this and let it wipe out any recollections of the cowardly blow I struck you, as I did not mean to do it and am very sorry for it."

The verteran took the bill, his face beaming with mingled astonishment and delight, and making a bow, remarked: "See here stranger, you can wipe me over the face all day long with a codfish, at ten dollars a lick! I don't bear you a might of ill will, I don't. I rather like your style. When are you coming again?" And that settled it.—*Cape Ann Advertiser.*

MOON STRUCK.—A man has gone moon-blind in Boston. He applied at a police station for lodgings on Sunday evening, and being told that he must go to Hawkins Street Home, answered that he was moon-blind, and unable to find the way. In explanation, he said he was recently a member of the night gang at work on the new sewer in Dorchester. About a month ago the men took an hour's rest at midnight, and he fell into a doze while reclining on an enbankment. The moon was shining bright and clear. When he awoke at 1 o'clock and attempted to return to his work, he found that he could not see. In the day time and by the aid of artificial light, he can now see as well as ever, but after dusk and in the open air his sense of sight is wholly lost.

—The Mosquis Indians of Arizona, numbering 1,700, live in seven villages on the tops of three cliffs or headlands that rise more than 600 feet above the plains. Why they choose these unhandy places is a mystery. On reaching the villages, says a recent visitor, one finds one's self on a flat ledge of bare rock which extends out from the main table nearly half a mile in length, and from ten feet to perhaps three hundred feet in width. The sides are almost perpendicular. The most populous of these villages, Wal-la-pi, is on the extreme end of the rocks, where the width is not over one hundred feet. All the water for all purposes is carried in earthen vessels on the backs of men and women from a spring near the foot of the mountain, a distance of nearly a mile, while the wood is brought eight miles. Here these people have lived longer than they can tell, even from their traditions; and hitherto they have been averse to a change of location, notwithstanding the difficulty of obtaining their necessary supplies and the distance from their fields and herds.

—o—

—The city of Providence began, a year and a half ago, to dispense its charity on a new plan. Helpless paupers were kept in an almshouse, or aided at home, as before; but all able-bodied applicants for food or lodgings were put at work in a wood yard at fifty cents a day. Unworthy families, who had been assisted by the city for years, dropped out of the Charity Commissioner's sight, while begging decreased greatly. Tramps began to give the city a wide berth, for they had to pay for their lodgings and meals with work in the wood yard, and the station-house lodgers during the year numbered only 2,479 against 9,425 for the year preceding. The new system has also been one of economy, the expenditures for outdoor and indoor relief being $13,240, against $19,144 for outdoor relief alone during the preceding twelve months. The wood yard is self-sustaining.

PURE TIN-COATED AND BURNISHED
DROP AND BUCK SHOT.

American Standard--Eagle Brand.

CAPTAIN BOGARDUS ON TIN-COATED SHOT.

EDITOR FOREST AND STREAM:— NEW YORK, Jan. 13, 1879.

HAVING been asked by many of your readers as to the merits of TIN-COATED SOFT SHOT, I desire to say that I consider it the best shot I have ever used. I have given it a very severe test, having shot my 6,000 ball match Jan. 8 and 9 with it. In that match I used two sets of double barrels, one of 10 and the other 12-bore, and each single barrel was discharged 1,500 times without being once cleaned. The inner surface of the barrels is bright and free from scratches, although in shooting I used them until they became so hot that they would not bear handling. I cannot imagine any case of ordinary use which could so severely test the cleanliness and perfection of the tin-coating and its freedom from injury by any heat which could ever result from continuous discharges of the gun. A. H. BOGARDUS.

WHITNEY ARMS COMPANY, NEW HAVEN.

Thread-Wound, Long-Range Cartridge Shot Cases.

(S. WHITE PAINE PATENTS,)

For Muzzle-Loading and Breech-Loading Cylindrical and Choke-Bore Shot Guns.

Any desired closeness of pattern made at 50, 70 and 90 yards, with penetration superior to that made by the best choke-bores at 40 yards.

INDISPENSIBLE TO HUNTERS OF ALMOST EVERY KIND OF GAME.

Ten and Twelve Gauge now ready.

This Cartridge consists of two semi-cylindrical cases, wound with thread, containing one ounce of shot, heavy in front and light in rear, to keep it from turning. When the thread is all unwound by the friction of the air, the cases fly apart, and the shot scatters.

Price, $5 00 per Hundred. 20 sent post-paid for $1 00. Address

General Agents, SCHOVERLING, DALY & GALES, 84 Chambers st., N. Y.

THE PARKER GUN.

PARKER BROS., Meriden, Conn. New York Show Rooms, 97 CHAMBERS ST.

The Parker Gun Again Victorious!

In the Tournament just closed at the St. Paul Driving Park, **30 prizes** in the regular shoots and the sweeps following them were won by sportsmen using the Parker Gun.

The Rochester (N. Y.) *Democrat and Chronicle*, of recent date, in referring to the remarkable execution of these guns at their tournament, in which the Parker Gun won the **Gold Medal for the Best Average**, says: "The Parker Gun is one of the finest ever admired by a true sportsman, and of late years it has been generally used where before nothing but those of European make would be thought of. This company has successfully succeeded in making their own steel barrels, which, together with other novel and important improvements, make their guns the finest yet introduced among lovers of field and forest sports. Dr. Carver, the celebrated American marksman, used this gun in his late exhibition before the Prince of Wales, and recommends it highly as a fowling piece, as do also Ira Paine and other noted shots.

Attention, Sportsmen!

Kay's Improved and Perfected Ball for 1879.

[PATENTED OCTOBER 13, 1877.]

A SUBSTITUTE FOR GLASS.

HAVING succeeded in producing a Ball for professional and amateur use at the trap, we offer the same with the following recommendations, viz: In breakage, the equal and superior to any glass; Uniformity, being of an exact uniform thickness of 1-20th of an inch, is superior to any blown material; Durability, is not affected by their solubility; Residuum, can be used anywhere, and on finest lawns, leaving neither injurious or unsightly refuse. Packed in barrels by a device peculiar to us, we guarantee against breakage in shipment. For particulars see circulars. Price $2 per 100. All orders addressed to dealers, or A. B. KAY & CO., Newark, N. J., Manufacturers of Duck and Heavy Drop Shot, Cartridges for Long-Range, viz.: Deer, Duck, and Geese, $3 50 per 100 also, the Chip or Expansive Concentrator, $1 25 per 100. A box of 50 sent on receipt of 75 cents by mail

Sportsmen's Routes.

"THE FISHING LINE."

TAKE THE

Grand Rapids & Indiana R.R.

Mackinaw, Grand Rapids and Cincinnati Short Line

FOR THE

Trout, Grayling, and Black Bass Fisheries,

AND THE

FAMOUR SUMMER RESORTS AND LAKES

OF

NORTHERN MICHIGAN.

The waters of the

Grand Traverse Region

and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING Season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.

The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthma Affections.

The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. A. LEET, Gen'l Pass. Agent, Grand Rapids, Mich.

GUNPOWDER.

DUPONT'S
RIFLE, SPORTING and BLASTING POWDER.

The Most Popular Powder in Use.

DUPONT'S GUNPOWDER MILLS, established in 1801, have maintained their great reputation for seventy-eight years. Manufacture the following celebrated brands of Powder:

DUPONT'S DIAMOND GRAIN,

Nos. 1 (coarse) to 4 (fine), unequaled in strength, quickness, and cleanliness; adapted for Glass Ball and Pigeon Shooting.

DUPONT'S EAGLE DUCKING,

Nos. 1 (coarse) to 3 (fine), burning slowly, strong, and clean; great penetration; adapted for Glass Ball, Pigeon, Duck, and other shooting.

DUPONT'S EAGLE RIFLE,

A quick, strong, and clean Powder, of very fine grain for pistol shooting.

DUPONT'S RIFLE, FG, "SEA SHOOTING,"

FFG and FFFG. The FG for long range rifle shooting, the FFG and FFFG for general use, burning strong and moist.

SPORTING, MINING, SHIPPING, and BLASTING POWDERS of all sizes and descriptions. Special grades for export. Cartridge, Musket, Cannon, Mortar, and Mammoth Powder, U. S. Government standard. Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 70 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and ½ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6½ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration*. For field, forest, or water shooting, it ranks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6½ lbs. and cans of 5 lbs. FFFG is also packed in 1 and ¼ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office.

ENGLAND AND AMERICA.

COLT WEBLEY.

The two GIANTS in gun-making at the present time, are P. WEBLEY & SONS, Birmingham, England, and the COLT FIRE ARMS Co., Hartford, Conn. Both owe their marvelous success to the same two causes. First, that they learned just what constituted PERFECT GUNS. Second, that they applied labor-saving machinery to their production. The result is, THE BEST GUNS IN THE WORLD, AT VERY SMALL COST. You can now buy a COLT or a WEBLEY gun, which it is a pleasure to use, for no more than is commonly paid for guns bearing unknown or fictitious names.

OF WEBLEY'S GUNS we have the TREBLE WEDGE GUNS—every gun having beautiful Damascus or laminated steel Barrels, Rebounding Bar Locks, Pistol Grip, Lever For part, Double Bolt, and Extended Rib.

DOUBLE BOLT GUNS (Top and Side Lever). | WEBLEY-LANG SELF-COCKERS.
SINGLE BOLT GUNS (Top and Side Lever). | EXPOSITION GUNS (various styles).

The last four styles named above constitute a JOB LOT, which we are selling off at about half their real value. These guns are in NO WAY inferior to the Treble Wedge guns as regards quality of material or EXCELLENCE in shooting, and are the CHEAPEST lot of guns we have ever seen.

OF COLT GUNS, we have all the regular grades, and, in addition, THE CLUB GUN. This gun is made for US, with selected barrels and the very finest materials, and is designed especially for Glass Ball and Pigeon Trap Shooting. Gentlemen who indulge in these contests will be obliged to either shoot the COLT CLUB GUN, or lose the prizes.

Every one of these guns has an elegant heel plate, with the Rampant Colt in a circle, and the words "The Club Gun," beautifully embossed upon it. *Any* Colt gun not answering to the above description is *not* the Club Gun.

Besides the Webley and Colt DOUBLE guns, FOREHAND & WADSWORTH, of Worcester, Mass., make for us a SINGLE barrel breech-loader with Scott pattern Top Lever. These guns are very light and handy, and just the thing for BOYS or men who cannot afford to buy Double Guns. They cost but a mere trifle. We are happy to announce that we are the principal distributing agents at New York city for all three of the above-named manufacturers.

Old Judge Smoking Tobacco.

The Only Tobacco Ever Manufactured that does not Bite the Tongue.

"Old Judge" Cigarettes.

MANUFACTURED under Letters Patent granted Charles G. Emery, March 5, 1878, by which the rice paper used as wrappers so prepared that the unpleasant odor and injurious effects of the TAR OF CREOSOTE thrown off when burning is completely neutralized or destroyed, and the paper made saliva proof to prevent its breaking or melting in the mouth. The great advantage and importance of this invention will at once be recognized by all smokers, and its truth demonstrated by the first "Old Judge" Cigarette they smoke. Neither will they require a printed certificate from any eminent Professor of Chemistry to convince them they have heretofore, in smoking Cigarettes made of PURE RICE PAPER, been inhaling one of the deadliest poisons known.

GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or Elegantly Stained Window. It is easily applied to the glass in Windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented*, and not a single agency has as yet been established.

ONE GOOD MAN in each State wanting exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of $1.00.

Agents Apply to | L. Lum Smith, Patentee & M'f'r. 717 SANSOM ST., PHILADELPHIA, Pa. | Sole Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald*:

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to even the most remote section of the country *free* of express or freight charges."

AGENTS' HERALD

AFTER HARVEST DAY.

THE dahlias by the garden walks,
With gorgeous hues are flushing;
The grapes are purpling on the vine,
The salvia blooms are red;
The mountain brooks with leap and laugh
Through leafy glens are rushing,
By rocks where feathery fronds of fern
And tender lichens spread.

The chestnut burs upon the trees
Are full almost to breaking;
The hazel-bushes in the swamp,
The hickories on the hill
Are laden with the bursting pods,
To give a merry-making
To sun-browned boys and girls about
The school house and the mill.

The quail down in the buckwheat field
Pipes forth his cheery whistle,
The partridge on a hollow log
Is thrumming in the sun;
The apple trees are bent with fruit,
The down is on the thistle,
The fulness of the year has come,
The summer work is done.

The squirrel runs along the fence,
The rabbits through the stubble,
The turkey spreads his bronze-black wings
With wattles red with pride;
The springs upon the upland slope,
With limpid waters bubble
And flow with merry music
Down to the meadow-side.

Up from the ocean climbs the moon
In rich and mellow splendor,
The blue sea glimmers in her rays,
A flood of silver light;
O'er all the scene a quiet reigns,
A peace subdued and tender,
As if the earth and heaven kept
Their blissful nuptial night.

There is a wholesome lesson shown
In everything about us,
Where all in perfect unison,
Their separate parts fulfill;
The world will be as fresh and fair,
The sky as bright without us,
And were we dead the birds would sing,
The harvest ripen still.

Then let us gather to our souls
The wisdom nature teaches,
And so live that when autumn fulls
And reaper Death shall come,
He finds us like the ripened shock,
Which, when the sickle reaches,
Is ready for the garner
In the heavenly harvest home.

FRANKLIN W. FISH.

The Game and Fish of Alaska.

[FROM OUR SPECIAL CORRESPONDENT ON BOARD THE JAMESTOWN.]

SITKA, *September 8th.*

Editor Forest and Stream:—

AUGUST'S steamer brought me my long-delayed bundle of FOREST AND STREAMS, and you may rest assured that their perusal did much to while away the monotonous month, while like Oliver we waited for more, which came on the 6th inst.

The month has been monotonous, because our out-door sports have either ceased, or palled upon us. A few deluded ducks took advantage of a rather cool spell early in July and put in an appearance, and a few were bagged; and we fondly fancied that some generous flocks of canvas-backs and geese, which flew over us going North, were bound to the lakes up among the mountains in our rear, and that early any morning we would find them in the bay. But leg-wearying, clothes-ruining, skin-scratching climbs up the mountains, and through the wait-a-bits, met with no adequate reward; the birds had gone on as advance couriers of the *Jeanette*, perhaps, and in a few days the warm weather they were doubtless fleeing from, came upon us. And everything left us; even the little divers, about as big as robins; and the ungainly shags, who every evening had put the rocky islets in deep mourning with their sable plumage, as they gathered in hundreds for their nightly roost. Only one bird staid with us. Thermometer 95 degrees in the sun, made no more difference to him than would a freezing temperature. Well do the Indians dub this bird of ill-omen the raven—*Tillicum*; which, being interpreted, means friend, for they stay always with them; and, when a cremation is taking place, the attendance upon a neighboring post of one of these creatures is looked upon as a most excellent omen. They are about twice the size of an ordinary crow, and are tame and plentiful, and useful, too, for Sitka is not behind the rest of the world in her need of scavengers. They are the buzzards of this region. The Indians stopped bringing us grouse, and halibut and bass. All who had energy enough were engaged in capturing the salmon, with which the waters teemed. Hunters' cannery was kept busy enough.

One day I jumped in with Tom McCawley, one of the most experienced of salmon seiners, and got him to show me how it was done. Our boat, rowed by four untiring Indians, had already a ton at least of fish just taken, but there was room for another, and McCawley wanted it. We rowed slowly around the various islands for an hour with no success; the tide was high, the day too bright; none were jumping. We pulled in to a quiet, pleasant, little cove and lunched; the Indians preparing for us a good pot of coffee, of which they are very fond, when well sweetened. With plenty of it, hard bread and smoked salmon, they can work forever. As we lay on the grass with our pipes, an Indian called out "fish," and pointed to a spot in the channel but a short way off. Soon another leaped, and in a moment we were in and off. I saw the fish jump, and, after a little time another, or, as it seemed to me, the same one. I didn't think much of that school; but when I said so, the Indians answered "Tshugatahen" (plenty), and Tom said, "When one jumps, there's a hundred under him that don't;" and that was news to me, for I expected to see the whole school at once, as one does porpoises. Pulling for the shore, fifty yards to the left of them, one end of the seine was landed and held by the crew of one of the boats (there were two), while the other rapidly pulled around the apparently deserted spot; the hundred yards were soon placed, and "Haul in!" was the order. I tended boat, our crew having also landed, and made fast to the outer row of corks, and was drawn in with them, peering anxiously into the diminishing circle. Soon I saw bright streaks darting rapidly too and fro, and then a dozen in the air glistening in the sunshine. The pool diminished, and a solid mass of plunging fish became visible—not one leaped over the corks; they dove as they approached the wall of net, rising in the centre for convulsive leaps. In a few moments two tons of salmon, weighing five to twenty pounds each, were huddled together in a six-foot circle, and into this the Indians who were not holding the net, dashed blow after blow of short, stout gaff hooks, jerking out with every dash a salmon—they simply "fired at the flock," and never missed. A jerk over the gunwales, and the noble fish lay heaped up gasping and struggling.

This was in July; nearly all of the first were good, and according to McCawley there were five varieties in the catch. A few which had begun to "dog" were cast into the canoe of an old Indian who accompanied us, and who had gleaned quite a canoe load of such as are considered unsuitable for canning.

In August the fish were running up the creeks and river to spawn.

While on my occasional trout fishing jaunts I saw plenty of them, but not in such fabulous quantities as I had been led to believe I should. In the deep pools they had gathered, and swam restlessly around, reminding us of the "white whale" in his glass prison at the Aquarium, not only by their motions, but by their colors, for some of them were of a dirty yellow, and some but partially turned to that color. Our baited hooks presented no attraction to them, nor did they for that matter to any decent sized trout, which had either left the pools or were gorged on the spawn, whatever the reason, we got but fingerlings, and this in pools from which a month before I had scorned less than a half pound of fish.

On one occasion, up Saw Mill Creek, a singular thing occurred. A friend fishing near me felt a heavy bite, and his stout line was almost instantly bitten off near the hook; he feels sure that it was a salmon which thus robbed him; he could see one at the instant almost caught in the act, but will or does a salmon bite at this stage of its existance?

All my lore goes to make me believe the contrary. A Creole boy who was fishing in the same pool, was better outfitted than I with my pet Orvis. He had a great gaff hook on the end of the bean pole, with which he fished for trout, and when a restless salmon swam near, he gaffed him.

On our way down the creek that day, I saw that which has set me against salmon forever, or till I get very hungry. In shoal water, I saw a fish some two feet long feebly struggling as though he were trying to push himself ashore. I picked him up and landed him on the grass. A sicker fish never continued to wag its tail. His skin was yellow, picked out with green and blue spots (such as a good recoiler will leave on your arm after an all day shoot). Spots from the size of a bit to that of a dollar, and one about an inch wide and six long on his side, were raw as if gnawed out by mice. One eye was gone, one gill cover eaten through, and every fin and his tail were but ragged bristles, all integument between the rays having disappeared. No wonder the legend arose that all California salmon die immediately after spawning has arisen and been passed down, if this is a common effect upon them. It may be that this fellow had been wounded with a gaff and then sick and hlepless, devoured alive by small fish; but I haven't hankered for salmon since.

The Creoles and Indians catch daily great numbers of these sick fish with their gaffs, and they consider that they are better eating when dried then the healthy fish. I don't believe that you've ever seen a real good specimen of a "dog salmon," or you wouldn't be spending your time up the Provinces.

I'll give you a sketch of one drawn from life (Card No. 1).

There, consider that fellow painted green and yellow, as thin as a flounder set up on edge, and dub him "Lordly Salar" if you can.

I've got three species of trout in alcohol; first, specimens of the salmon trout, which I described in my June letter; next, *salmo fontinalis*, which while resembling to some extent those of the Adirondacks, differ widely in others. These have the crimson specks, red fins and flesh, square tails and general appearance of our trout, but they are inferior in every way. First as to sport; no fly will tempt them; nothing in fact but a chunk of nasty sticky spawn, which they will approach leisurely and feed on as daintily as, well a full fed kitten on a bit of meat. You must sink your weighted hook to the bottom, and keep up a series of little jerks as though you were bobbing for eels, and by and by you strike one; once hooked they are quite gamy, much more so than the salmon trout. My big one this season cost me half an hour's time and gave me considerable sport. I saw him once or twice and thought I had a four pounder, and when finally I landed him, he should have weighed at least that, for he was 21 inches long, and that length would weigh not less than 55 ounces at home; this one weighed but 2 pounds 10 ounces. And it has been so with all I have caught; they are lighter than our Eastern trout. One summer at Piseco I weighed and measured about 30 Adirondack trout, as close to 10 inches long as I could get them. They averaged 10 inches and weighed 6 ounces.

I have weighed here two specimens of nearly the same length, one salmon and one speckled. The speckled measured 10 inches exactly, and weighed 5 ounces and 106 grains; the salmon trout measured 10.3 inches, and weighed 5 ounces and 20 grains.

The third variety I have seen but one specimen of. It was caught a few days ago and is called by the Indians the "Mountain trout;" they say they are plentiful at the head waters. My specimen is just 10.1 inches, and weighs 7¼ ounces; the scales are nearly as large as those of a herring. I'm wrong; after writing that, going by impressions, I got out my bottle of Alaska herrings and compared; the trout's scales are not nearly so large, and I will change the dimensions to say about the size of those on a little creek chub, or about three or four times the size of those on a real trout. The body is spotted like a tiger's, with black spots, which are from one-sixteenth to one-eighth inch in diameter. These extend considerably below the medial line and cover the tail and the dorsal fins; the second dorsal is adipose, but slightly less so than that of a fontinalis, having a slight show of membrane on which there are four spots. The ventral and anal fins are yellowish in centre, bordered with red, the tail is square, the belly a dull white. See sketch. This trout differs from all the others we have taken, in that he was not slimey as all the others now are. I believe that both of the others spawn about this season. Several fontinalis which I caught a week ago were full of very ripe spawn.

As the salmon season closes, I reflect how baseless were my expectations, and how foundationless the lies of those who made me believe that salmon could be caught here by the barrel full, as one would catch cod off Cape Ann. Except by the natives, with their gaffs, there has not been a salmon caught on a hook here this summer, and flies of all kinds, spoons, and minnow gangs have been cast and trolled in the vain pursuit. So a summer in Alaska has not yielded me a salmon, for less than a bit, and I shouldn't come here fishing.

The Indians are again taking to sea fishing, and halibut are brought alongside daily, good and cheap. The hook by which these are taken—the whole apparatus, in fact—is worth describing. The hook (see sketch) is made of two pieces of tough wood each about eleven inches long, bevelled at the larger end, and seized together at such an angle that the opening, *b-d*, is about five inches. A sharp iron spike projects from the lower portion and forms a

barb, by which the bait of a moderate sized herring or perch is secured, and by which the halibut secures himself. Halibut hooks are always ornamented with more or less carving, and some of them are quite tasty; generally birds of different species are copied in their carvings, then next seal and sea otters.

I send you sketches of a couple of hooks. One is carved to represent some long necked duck, and the other I should suppose was two doves fighting for the same morsel.

The Indians ornament nearly all of their wood-work; even a club with which caught halibut are stunned, must be made to resemble a bird of some kind. The sketch I send you, is of one presented to me by Sitka Jack, who used it most trenchantly in a raid upon hoo-tche-noo stills, and that club is, I think, the pioneer in that sort of business. It smashed the first still, smashed in the first raid on record of Indians upon illicit distilleries. *Esta perpetua.*

The lines used for halibut fishing are laid up from the fibre of the roots of a species of the same material the women weave into baskets, hats, and fancy articles, among which are water-tight bottles and wicker covers to bottles of all kinds, put on as neatly as are those on cologne bottles.

Fishing for bass a few days since in a canoe with Dick and Suska for crew and company, I noticed something funny. Both men spit on their bait and chanted an incantation before throwing it over. Dick, who speaks good English, assures me that the bait moistening process is pure Indian. Now it puzzles me how to account for this coincidence in custom between the two so widely separated tribes of savages, the Kalorhes and the average American boy.

We have done but little shooting; there is undoubtedly plenty of game for those who care to go for it. One of our officers visiting a mine which is perhaps nearly 3,000 feet above the sea, struck lots of ptarmigan when fairly above the timber line, and shot all he and an Indian could carry; but trips to any less distance don't pay.

For several hundred feet (I don't know how many, but they are long ones,) above the sea, the mountains are devoid of life. We get grouse daily from the Indians; also most excellent venison. None of us have as yet got a deer. An attempt involves a ten or twelve mile sea trip, from which, if a southeaster springs up, one will probably get back with difficulty; and then a wait at some path. The Indians can wait; their time is of little value, and as they say, "Spose he no come to-day, he come to-morrow."

We are promised jack snipe and ducks in plenty very soon, but are beginning to doubt. I have had but one good day with my gun. I made a trip to Edgecomb, and on its rugged lava beach shot as fast as I could load and fire, and when my shells gave out, ceased firing; with a beautiful bag of snipe and plover of several varieties. I hope next month to report more favorably.

PISECO.

A WINTER IN EAST FLORIDA.

FOURTH PAPER—INDIAN RIVER.

LEAVING Eau Gallie we soon passed Elbow Creek, at the mouth of which lives Mr. Houston, one of the oldest settlers. Three miles below is Crane Creek, where reside Mr. Fish and several negro families, among whom is Peter Wright, who is known to a few Northern tourists as a good boatman and a sharp trader. Observing some porpoises ahead, Ed, with murderous intent and malice aforethought, got out the "alligator gun," a Spencer carbine. As the school went rolling and tumbling by, one more unfortunate than the rest ventured too near the boat in his gambols, when Ed let drive and the huge ball struck with an ominous thud. As it disappeared beneath the waves, leaving a crimson stain to mark the spot, Ed grinned a ghastly smile of triumph, mingled with remorse—"Thus the whirligig of time brings in his revenges."

TURKEY CREEK.

We were now abreast of Turkey Creek, ten miles from Eau Gallie, and entering the beautiful little harbor at its mouth we camped on a narrow spit of land at the entrance of the creek, or the farther side. The water here was quite deep, allowing our boat to lie close up to the sandy shore. The little land-locked bay is circular in form and about an eighth of a mile in extent. Its shores are well wooded, and in the northwest bight is a swift-running brook of clear, cold water. Its northern shore terminates in a bluff twenty feet or more in height, crowned with palmettoes, and running out into Indian River forms quite a prominent headland. On this bluff is the log-cabin of Charles Creech, in the edge of a once famous orange grove, but now unfortunately it is affected with the disease called "die-back," produced, as I was told, by plowing too deeply and cutting off the surface roots. There is, however, a thrifty young grove adjoining; and between our camp and the little brook, behind the skirt of cabbage trees and water-oaks, is a fine banana plantation. The view from our camp across the bay toward the bluff and out through its narrow mouth and across Indian River to the distant strip of verdure hiding old ocean from our gaze, is one of extreme loveliness and entrancing beauty.

While Ben and Henry were gathering moss and chopping wood, Ed and Marion had knocked down several ducks, while Frank and I had bagged several brace of quail in the old field near by. Marion also soon secured a "mess of mullet" with the cast net, while Ed, appropriating some for bait, caught several sea-trout and a large sergeant-fish. The sea-trout—*Cynoscion cardinensis* (Cuv. and Val.)—Gill—is one of the *Scienidæ*, and belongs to the same genus as the squeteague, or weak-fish, which it somewhat resembles. Its jaws are armed with very sharp and pointed teeth, and it has numerous dark spots on its back and sides. It is a very gamy fish, and when quite fresh is very palatable. The sergeant-fish—*Elacate canadus* (Linn.) Gill—belongs to the *Elacatidæ*, or crab-eaters. It is a handsome, silvery fish, with a jet-black stripe running along the lateral line from its head to its tail. It has an elongated head, with the lower jaw projecting and armed with long, sharp teeth, similar to the pike, which it much resembles in habits. As a table fish it is rather insipid. The one Ed caught weighed not less than twenty-five pounds.

After supper I lay upon the deck of the *Blue Wing*, smoking my pipe and idly contemplating the wreaths of blue smoke, as they gracefully drifted away in the deepening twilight, and listening to the sullen roar of the breakers beyond the distant line of trees. The silent stars began to peep out, one by one, through the hazy atmosphere above the sea, sparkling and scintillating like diamonds, with ever-varying tints of red, blue and green, like spangles from some dissolving rainbow. A dream-like quiet pervaded the scene, disturbed only by the leap of the mullet, the plaintive twitter of the coot, and the solemn hoot of the owl. Then, as the twilight faded out of the sky, the surface of the little bay began to gleam and glimmer with a pale and lambent light, while the water-oaks on shore, draped in funeral moss, assumed a wierd and ghostly aspect in the gloom of the lurking shadows. As the night grew darker the phosphorescent sheen became more luminous. The leap of the mullet produced coruscations of blazing jets and flashing drops, while the track of the redfish and the wake of the sea trout, in their eager rushes for their prey, formed dazzling lines and glittering furrows radiating in every direction upon the lustrous water. The scene, which had begun with the film and haze of the dim, uncertain twilight, had now burst forth into a refulgence of gorgeous splendor. But soon the full moon "unveil'd her peerless light" above the fringe of palms across the river, and chasing the shadows from the shore, "took up the wondrous tale." And now the piping of the frogs, and the hum of insects, and the complainings of the water fowl began to "fill the night with music," while the fire-flies, flitting across the bay, seemed to have borrowed their light from the water beneath. I was roused from my reverie by hearing the refrain:

"We will sing one song for my old Kentucky home,
For my old Kentucky home far away,"

which was lustily sung by the boys around the camp-fire. My pipe had gone out, so I joined the group and finished my smoke while listening to Frank relating an experience in fox hunting; how he had been sent upon an errand on a blonde mule, and how he met a pack of hounds in full cry after a red fox, followed by a score of hard-riding huntsmen, and how he and the mule "pooled their issues" and joined the chase, and how he threw the rider off of a ten-rail fence, which the mule then took at standing leap; and how, in taking a water-gap on the fly, the saddle-girth broke, and the mule threw *his* rider, and kept on after the hounds, while Frank took a flying leap into the icy water, and how he took up his saddle and struck a cold trail for home, where, instead of the "brush," he got a brushing. We then turned in, and I dreamed of riding a pale mule—a Pegasus with wings on his head, who took flying leaps over cabbage trees, and who finally threw me into a thicket of Spanish bayonets and cactus plants.

We lay at Turkey Creek a day or two longer waiting for a wind. Henry consumed during this time a hundred and fifty oranges by actual count, while Ben added several walking canes to his stock, the last one being made from the green stalk of a palmetto leaf. Marion had constructed a rude model of a sugar-cane mill for a settler up the creek, while Ed had fishing enough to satisfy his piscatorial greed, and Frank found steady employment in poking his gun at the pelicans, cormorants, ospreys and eagles that frequented the little bay. A half mile up the creek I enjoyed some fine fly-fishing for black bass. Frank brought me, one day, a bird for identification, which he called a fly-up-the-creek. "No," said I, "it is a small green heron, called by the crackers a 'poor-Joe,' though why poor, and why Joe, I can't tell you." Frank mused a while and then said, "A fat poor-Joe sat on a dead live-oak," and then suddenly disappeared into the hammock. While fishing up the creek one day, I shot a large yellow-bellied terrapin weighing upward of twenty pounds. He was in shallow water near the shore and poked up his head, which I cut in two with a ball from my pistol. He made a capital stew. Frank brought in a fine fat 'possum one day, which he baked with sweet-potatoes *a la Kentucky*. To dress and cook a 'possum in this mode, proceed as follows: Put a pot of water on the fire, and just before it boils stir in a few handfuls of ashes; dip in your possum a few seconds, when the hair can then be scraped off slick and clean. The 'possum now looks like a sucking pig, which it also resembles in taste. After cleaning and washing, stuff with the dressing of bread crumbs, a small onion cut fine, some sage, and a little salt and cayenne pepper. Heat a Dutch oven and place over some live coals, put the 'possum in, cover with the lid, on which place more live coals or, as they do in Florida, build a fire of light-wood splinters on top of the oven lid. When the 'possum begins to brown, pack sweet potatoes, previously scraped, all around it, and continue the baking until all are nicely browned and crisp. Place a lemon in the 'possum's month and serve. A 'possum thus prepared is good, especially if one has an "Indian River appetite. *Non possum quin.*

We left Turkey Creek on the afternoon of a warm day, with a moderate breeze, which soon veered round to the southeast, so that we had to sail close-hauled down the river. The settlers were now few and far between. There was one on the mainland, five miles below, and opposite, near the eastern shore, was moored the U. S. coast survey boat, the *Steadfast*, engaged in surveying the Indian River. We now approached "Grant's Farm," a narrow island half a mile in length, and covered with mangroves and a few water-oaks. A settler named Grant at one time moved on to this island with his family, but it became submerged after the heavy rains of summer, and he left it for a drier and more stable location. It is called Grant's Farm to this day, and is seven miles below Turkey Creek. Here the wind left us, and the setting poles came into requisition. From Turkey Creek the channel is well out from the west shore (a half mile), and then winding between the west shore and Grant's Farm. Just below is the hammock of Frank Smith and Mr. Parramore, from whence the channel runs close to the west shore for some three miles. There is a shoal running from the southern extremity of Grant's Farm down river for a mile or two. The boys whistled for a breeze in vain, and we took spells at "pulling," which is a style of navigation quite common on Indian River in the absence of a wind, when one is in a hurry. At length we reached the mouth of the

ST. SEBASTIAN RIVER,

twelve long miles below Turkey Creek, and some sixty-five miles from Titusville. This river must not be confounded with the small stream of the same name near St. Augustine; this duplication of names is not infrequent in Florida. It was quite dark when we entered the mouth of the river, but we proceeded a half mile up-stream by poling, being warned away from shoal places by the rushing and leaping of mullet, which are more numerous in very shallow water. I then deemed it advisable to anchor until the moon rose. Frank and I waded ashore, built a fire, and made some coffee. We could find no spot suitable for camping, the scrub being quite thick and the shores lined with mangroves. We carried the coffee back to the boat, when we eat our supper of cold duck, dried beef, hard tack and coffee. Just then a large owl on shore vociferated "Who cooks? Who cooks? Who cooks for yo-o-u?"

About ten o'clock the moon rose, and we poled around a point just ahead of us, when we heard some dogs barking. We soon discovered a house on the bluff on the north bank, which proved to be the cabin of Mr. Kane. We camped there for the night, and next morning proceeded up stream a half-mile further, and camped just above the mouth of the north fork of the river, on the edge of a magnificent pine woods. The water was of good depth, and the boat was moored close up to the shore, and near to a spring of good water, which issued from the bank. The St. Sebastian from its mouth to this point is from a fourth to a half mile in width and a mile long. Here it separates into the North, West and South Prongs. The main river abounds in fish of numerous varieties, and occasionally the manatee and the tarpum are seen, while immense alligators frequent this portion of the stream. It is likewise a favorite fishing ground for pelicans, cranes and herons. Frank said that the pelicans carried their fishing poles in front, while the cranes carried theirs behind, alluding to the positions of the bills of the former, and the long legs of the latter when flying. In the "piney-woods" around our camp were numerous holes of the land tortoise—*Testuda Carolina*—which burrow in the ground like a woodchuck, and are called "gophers" by the crackers, who esteem them as a great delicacy. They grow from fifteen to twenty inches long, and of an oblong form. The surface of the ground was also perforated with the holes of the "Salamanders." Black bass fishing was excellent in either of the prongs of the river, and quail were quite plentiful in the palmetto scrub, while the hammocks abounded with hares, squirrels, coons, and opossums. A few hours with rod and gun furnished us with a good supply of fur, fin and feather. Near by was the camp of Frank Strobhar and Habersham King, who were cutting a raft of pine logs for the saw-mill up Indian River. They were formerly of Savannah, Ga., and Mr. King will be remembered by the readers of FOREST AND STREAM in connection with a humorous darkey sermon on "Junius an' de Whale," as delivered by "Old Goater." They are located at Eau Gallie, are experienced boatmen and hunters, and tourists could not do better than secure either of them for an Indian River campaign.

The next day, being Sunday, we devoted to rest, as usual. A cracker settler, Tom Sellers, living at the head of the North Prong, came into camp and requested me to prescribe for a sick child. As it was but two miles through the woods to his cabin, I went with him, saw the child and left some medicine. I also borrowed his dogs, Troop and Trailer, for a deer hunt the next day. These dogs, like most other "deer dogs" in Florida, were mongrels, a mixture of our and hound, and trained to follow a warm trail very slowly. The style of hunting is similar to still hunting, except that the dog does the "tracking," while the hunter follows the dog. It would be impossible to track a deer in any other way through the thick palmetto scrub. Returning to camp I found that I had another "call" to see a patient down the stream, at Kane's. I went, and found a lad, who was beyond the aid of human skill, dying with marasmus.

Sitting around the blazing pine-logs that night, the time passed quickly while talking of hunting, fishing, and sailing, and it was 11 o'clock when we turned in. Ben, as was his usual custom, was asleep and snoring in five minutes—and such a snore! Ben was my case of nasal catarrh, but it was no "light catarrh" that he struck in his "beautiful snore;" but a compound of bassoon and bass-drum. Shakespeare says that—

"Weariness
Can snore upon the flint, when rusty sloth
Finds the downy pillow hard."

But Ben's snore was not produced by weariness; nor were his slumbers flint-locked; but his probascian music, proceeding from a stub-and-twist, full-choked, double-barrelled organ, was Wagnerian in pattern and wonderful in effect and penetration.

I heard Strobhar, who is hard of hearing, say to King in their tent a few rods away: "Hab! just listen to that bull alligator bellowing up the creek!" "It's one of the boys snoring," replied King. "Well, by the Great Horn Spoon! no need of a fog-horn in their boat!" A few minutes later I heard a peculiar rumbling and roaring sound proceeding from the eastward, which I at first thought to be the sea; but as it rapidly came nearer it became louder, and the ground began to tremble and roll, jarring the guns on the rack and producing a rattling among the pans outside. The heavy rumbling seemed to pass right under me with an oscillating and wavy motion, and disappeared in a westerly direction. I found myself rolling out of my mossy bed and became conscious that it was the shock of an earthquake or some internal convulsion; and was a prolonged shock, or rather a quick succession of two shocks lasting nearly a minute altogether. The boys were all now wide awake and discussing the matter. Strobhar said he heard it distinctly, but he thought it was Ben's snoring. This event occurred on the night of January 12th, at 11.30 o'clock. I learned afterwards that it was quite severe in some portions of the State. At Cape Canaveral light-house it threw oil out of the lamp on to the reflectors, and it shook the solid brick tower of Jupiter light from base to dome, while the keepers of both lights made the best time on record for a hundred feet downward.

J. A. HENSHALL.

Messrs. Schuyler, Hartley & Graham have just received a small invoice of the celebrated hammerless gun made by W. and C. Scott & Son's, Birmingham, England. Parties who fancy the coming gun of the age will have to apply early to secure one.

Fish Culture.

THE CENTRAL FISH CULTURAL ASSOCIATION.

WE publish herewith the first paper read before the Central Fish Cultural Association at Chicago, October 3d. The essay was by Mr. George H. Jerome, and was entitled

"SOMETHING ABOUT OUR FARM,"

The farm was limited by the author on the north by the Red River of the North, on the east by the Niagara, on the south by the Gulf, and on the west by the summits of the great stony ridge. After referring at some length to the pluck and industry of the Western farmer, and to the duties which devolved upon him in rescuing the country from a wilderness, the author said, on the subject of an appropriation, that it is well known that within the limits of the Western fish farm there are several lakes—quite a considerable chain of them, and the links composing this chain are full and broad. In the figurative vernacular of the day they are styled inland seas. They are too deep and too vast to be the property or under the control of any single State. They form a portion of the boundary of eight large and populous States. No State presumes to exercise jurisdiction over any one of them. They are the property of the nation. They are of national value and importance, and are clearly of the national jurisdiction.

Also equally well is it known that there coursest hrough the fish-farm of the West a very considerable river. Its sources approach very near to the regions of perpetual frost, while its mouth is fringed with the orange grove and the palm. Its arms stretch east and west, enfolding two-thirds of all the territory of the Union. Twenty of the largest of the States and four great Territories are watered by its floods and enriched by it. In the turgid period of our national jubilee days it has been entitled "The Patriarch of Streams." The designation is neither inapt nor undeserved. The great river recks not either State lines, or, indeed, whole sections of States, but sweeps on, unvexed and unobstructed, to the sea. No State has been so presumptuous as to lay claim to it, or to any portion of it, save alone Mississippi. But notwithstanding this modest little claim, the better and the exclusive title is in the national Union, Mississippi and other of the chivalrous States having lacked the prescience to make the reservation when they signed the great compact. So, if needing law, the great republic is the rightful law-giver. If, needing protection and guardianship, the nation is the appointed guardian and the invincible protector. Such, at all events, is the applied logic of history, and it is now quite too late to seek a reversal of currents.

Equally well, too, is it known that these lakes and this river, with its far outlying tributaries, have been through all the earlier periods of the republic's history most valuable sources of food supply. In no mean or diminutive sense have they been the nation's granary, from which have been bestowed with liberal hand to that army of the early settlers their needed means of support, while they were making ready with such haste as they might for the coming of the cereal yellow harvests. Indeed, their value to the early pioneers and settlers, bushwhacking their way to the *terra incognita* of their dreams, is almost outside the limit of computation. And to that great host of their followers who have paved, so to speak, the track of empire, they have proved sources of reliance and indispensible aids to their achievements. In the work of settlement, national expansion and growth, it is undeniably true that the lake and the river supply has been a large factor—a factor that has not had to be clothed or fed, and asking no dividends—it has in large degree contributed to those grand realizations in which every Western man claims a share, and of which each is so justly proud.

It is well known that these lakes and this river are in a large degree unfruitful and barren, as contrasted with their old-time fish supplies. Of the causes which have conspired to produce this lamentable condition of things, it is not now material to inquire. The mending processes, of whatever character they may be, whether of penal statutes or appropriations, or both, should be brought into requisition at once. The lakes and the great rivers are a part of the Western farm. Said the speaker :—

"I say we men of the West—fish-boys, if you choose to have it—are the very fellows to take this matter in charge—a duty which shall resolve itself into a pleasure, and, performed, will result in advantage to ourselves and profit to the country we love. So, then, let us move abreast in this thing, for it is by a united effort that we may hope to gain audience with those who vote the supplies and hold the keys of the exchequer. Let us not place ourselves in the attitude of mendicants, for the fish-men of the West are not in the alms-asking business ; nor will we go in any bullying or bulldozing *role* or spirit, for we hope to be thought gentlemen ; but let us go as citizens of a common country, law-abiding and true, and ask civilly, earnestly, of the powers that be that these great inland seas, and this, the Father of Rivers, receive at their hands a national recegnition, and are voted a becoming dowry.

"We ask nothing for the thousands of lakes that lie scattered all over this vast domain, or for the streams that murmur on every hand. These we are taking a good care of, and propose to continue our care of them, and solicit for them no aid from the central government. But as for the inland seas and the great river we do ask aid, and we believe it to be within the province and the duty of the Government to extend it. The granting of aid for such purpose is no new principle, nor does it lack for precedent. For many years a fund has been appropriated, and wisely, too, to help on the modern methods of fish-culture, in the hope and expectation of restoring the food supply of our lakes and rivers. But of this fund very little has found its way to the great lakes and to the waters of the broad valley. Nearly all of it has been spent in tide-water.

"Now, we want some of this money out West, or else a fund or appropriation, separate and independent of the salt-water one. We do not mean to be very particular or nice about it, so that we get the fund, and that it inures to to our use and behoof. It is the fund we are after, and it boots little in what way or by what route it comes, so that it be forthcoming, and I can see no impropriety in urging this matter upon the approaching Congress. I cannot, for the life of me, see why, year after year, the East should be provided with a very liberal fund for fish-farming needs and purposes, while the great West gets little or nothing for its unwatched lakes and rivers. If fish-farming or fish-husbandry is to be recognized as a national industry, aided and promoted by the money-bags of the Government—and such seems to be the fact—why, then, the West, as imperatively as any section, needs help, and should be a sharer in the remembrance of the Government, and in its schedule of appropriations there should be found an item reasonably adequate for the compassing of those great ends and purposes which, I have, in my brief paper but dimly outlined, but which, for their full consummation, the Western fish-farmer does, and will ever, most earnestly toil and pray."

SALMON EGGS FROM THE PACIFIC—*United States Fishery, Baird, Shasta County, Cal., Oct. 4th.*—We have been packing, loading and sending off salmon eggs for three days. They are taken in teams to our nearest railroad point—Redding. I send them from there to Chicago in an ice car, and from Chicago they are forwarded to their various destinations by express.

We took 7,000,000 eggs this year, of which upwards of 4,000,000 were used for distribution, the balance being left here to be hatched for the Sacramento River. The ice car containing the eggs for distribution leaves Redding Monday morning, Oct. 6th, and is due to arrive at Chicago Saturday, Oct. 11th.

LIVINGSTON STONE.

THE NATIONAL FISH COMMISSION.—Prof. Spencer F. Baird the other day gave to a Washington reporter the following summary of the work of the United States Fish Commission at Gloucester :—

The Commission have been carrying on the work of investigating the fisheries of the coast, ascertaining their character, productiveness of the present as compared with previous years, and endeavoring to calculate what the future is going to be; also, studying locations along the coast with reference to the establishment of stations for the artificial production of codfish, mackerel, and halibut, the three great staples of American fisheries. The work has not closed as yet. We occupied all last winter at Gloucester, on Cape Ann, in experimenting in artificial hatching of codfish, and met with great success. Ten or twelve million were hatched and turned into the water at Gloucester Harbor, which is now filled with young fish, the result of that experiment. Great results are anticipated from the systematic efforts in the direction of propagating the three kinds of fish named, and it is hoped that very valuable and extensive shore-fisheries can be developed and materially effect the future of American fisheries in relation to those of British America. Among the special results of the work of the commission has been the discovery of a new food fish of great economical value. It is a fish of a species allied to the English sole, to which it is considered by New York epicures as greatly superior. The largest individuals measure three feet in length, and weigh up to five pounds. It has been called the 'pole-flounder,' or *Glyptocephalus cynoglossus*. The pole-flounder will find a market corresponding to the turbot in Europe, in fishing for which many thousand vessels are occupied.

Another special point is the temperature of the ocean at different depths and latitudes, with the purpose of establishing the relations between this condition and the presence and absence of certain food fishes. A most remarkable phenomina of times of previous years has been the entire absence from the waters north of Long Island and Vineyard Sounds of the menhaden or porgy. This fish, as is well known, occurs on the coast of the United States during the summer season, in countless myriads, especially in mid-summer along the coast of Maine, where some fifty steamers are engaged, usually for several months, in catching them by seine or purse-nets, and taking them to factories, where they are converted into oil and guano. During the memory of man no failure of this fish to reach the coast of Maine during the summer season is on record, and yet, during the present year the entire fleet returned to winter quarters in Southern New-England and Long Island Sound without capturing a single fish.

It is more than probable that this remarkable state of things was caused by the cold currents coming down from the Labrador coast, and this is a supposition that is to some extent at least verified or substantiated by the observations of the Fish Commission. The variation in the numbers of mackerel on the Eastern coast is probably due to the same cause, so it becomes a matter of great importance to ascertain the laws or normal temperature of the ocean at the different depths, so as to have some means of anticipating, determining or estimating the probably abundance of these fish (menhaden and mackerel,) in sufficient season to warrant or prevent expenditures in special efforts in their pursuit.

The commission is provided with various apparatus for capturing marine animals and plants, and, besides securing representative series for the National Museum, has also collected during the summer, as in previous years large numbers of duplicate specimens for the principal educational institutions in the United States. These when properly indentified and labeled will be distributed to such institutions as are prepared to take necessary steps for permanent care and exhibition.

Natural History.

MIGRATORY QUAIL.—Where are the migratory quail? We have heard no note from them for some time. Who knows anything of the newly naturalized birds? The census is to be taken in 1880.

MIGRATORY QUAIL.—Mr. Francis Bacon, of the Waterloo, N. Y., Sportsmen's Club, writes to Mr. A. Elmendorf, Secretary Brooklyn Gun Club, the following intelligence of the migratory quail presented by the latter club to the former last spring :—

So far, success has been complete—far beyond our expectations. We now have at least a flock of two hundred strong birds, which will in time fill every thicket and field with a game bird which lies as close and flies as strong as any sportsman can desire. In their habits they are very like the American quail, except that they do not move far away from the locality where bred. We shall shoot none this fall, but intend trapping a few to keep over the winter. We shall watch them very closely now, so that we may know when they go south.

We take great pleasure in recording the success of our Waterloo friends.

THE LITERATURE OF DR. ELLIOT COUES.

BY WILLIAM HOSEA BALLOU.

THE profound acknowledgment by European scientists of the eminent services of Dr. Coues in the preparation of a universal bibliography of bird literature has but recently been made known through the secular press of the country. His connection with the Hayden survey, during which he has not only enriched its literature by his own contributions, but has rendered distinguished service as secretary and naturalist of the survey, is particularly gratifying as adding a lustre and brilliancy to the achievements of American scientists. America has been somewhat unfortunate in being indebted to foreign savants for the accomplishment of some of the most arduous investigations. That in many cases these savants have found in this country a field to immortalize themselves, is instanced in the labors of Agassiz, Lesquereux, Meek, and others. Whatever eminent services have been recorded of men purely American, are gratifying as reflecting credit to our own institutions and people. Dr. Coues is a representative of the latter class, and as such has attracted the attention of the most distinguished scientists of the Old World. Indeed,as is well known, a petition headed by such names as Tyndall, Huxley, and Spencer, has been presented him inviting him, to visit England and Europe in the further prosecution of his studies.

Within the last decade of years ornithology has assumed a popularity not known to any other branch of the natural sciences. Its progress is largely due to the earnest work of Dr. Coues. He is in fact so thoroughly identified with the science and that of mammals, that a sketch of his works just at this time is interesting, giving to quite an extent the history and advance of ornithology and mammology for some fifteen years.

In 1861 Dr. Coues seems to have first commenced his career as an ornithologist, in the publication of "Some Notes on the Ornithology of Labrador," which attracted attention at the time as pertaining to a region whose fauna was comparatively unknown. Following this pamphlet in the order in which they here appear, are the titles of such of the remainder of his works as have been obtained. It is freely confessed that after careful investigation in many of the great libraries in the east and west by the writer, something less than one hundred of the four hundred titles of Dr. Coues, were all that revealed themselves.* The great majority of these works were issued in pamphlet form, having generally appeared in some of the current publications of which the *American Naturalist*, Proceedings of academies of science, and the Bulletins of the Hayden Survey, were most prominent instances. Some, however, are bound works of great magnitude and of importance to American science.

The following is a list* of his works :—

1861. Notes on the Ornithology of Labrador.
1862. Synopsis of Columbidæ and Podicipidæ.
1863. Notes on the same.
1863. List of Birds of the District of Columbia, with the coöperation of Prentiss.
1865. Ornithology of a Prairie Journey.
1865. Notes on the Birds of Fort Whipple, Arizona.
1866. From Arizona to the Pacific.
1866. List of Birds of Fort Whipple, Arizona.
1866. Prodrome.
1867. Notes on a Collection of Mammals from Arizona.
1867. Birds of New England.
1868. List of Palmer's Birds of Southern Arizona.
1868. Catalogue of Birds of North America in the Essex Institute Museum.
1868. List of Birds of New England.
1867. The Quadrupeds of Arizona.
1868. Synopsis of Birds of South Carolina.
1869. Notice of a Cyclopean Pig.
1869. Observation on the Marsh Hare.
1870. Antero-Posterior Symmetry, with special reference to the Muscles of the limbs.
1870. Disposal of the Placenta of the Dog.
1870. Results of Exploration in the Northwest.
1871. Progress of American Ornithology.
1871. Natural History of Fort Macon, N. C.
1871. On the Myology of the Ornithorhynchus.
1872. The Osteology and Myology of Didelphys Virginiana.

1872. Key to North American Birds.†
This work is the most complete of the kind ever published. It aims at a simple method of identifying specimens of birds in hand, similar to Dr. Gray's system of naming flowers. The method perfected is his own, as is most of the nomenclature employed. As a work of high rank, it has achieved in a short time an extraordinary circulation for a scientific work. To the "Key" alone is due the rapidity with which the ornithology of America has approached a systematic completion. It is the leaven that has leavened the ornithological lump, for it has given such an impetus to investigation and publication of results in the science of which it treats, that around it as a centre have sprung vast numbers of useful and valuable works. Nor is it too much to say that around Elliott Coues, as a centre, have sprung an innumerable throng of ornithologists whose every work bears evidence of heavy draughts on his publications. In this work enter no fancies; nothing but solid facts, and facts are above criticism.
1871. Former Eastern Range of the Buffalo.
1872. Geographical Variation of *Bassaris astuta*.
1873. Check List of North American Birds.
1873. Two little known Birds of the United States.
1873. Maynard's New England Ornithology.
1873. Allen's Ornithology of the West.
1873. United States Birds new to Science, and other things Ornithological.
1873. Odontornithes.
1873. Color Variation Dependent on Climate.
1873-5. Report on the Pyrbilo vGlands.
1873. Prairie Wolf, or Coyote.
1873. Variation in Dentition.
1873. Late Local Lists.
1873. Specimens of Bird Architecture.
1874. Specimens of Cougar.
1874. Wanted: A Call for Specimens of *Autorius* Nigripes.
1874. The Mule-Deer.
1874. A Short Chapter on American Rabbits, or Hares.
1874. The Pine Mouse.
1874. Field Ornithology†.
This work formed the first effort of Dr. Coues to meet the popular desire. It is safe to say that it has successfully accomplished its mission. In it the Doctor relates in an off-hand manner the best methods of securing, skinning and stuffing specimens of natural history. So heartily the author enters into the work of relating his experiences, that one in reading seems to be passing through a delightful reality of loading the gun, caressing the dog and wandering in the fields. The work, however, neither professes to, nor represents anything of the art of taxidermy.
1874. *Avi-fauna* of Colorado and Wyoming.
1874. Recent Publications in Ornithology.
1874. Nesting of certain Hawks.
1874. Baird, Brewer and Ridgeway's work.
1874. Ridgeway's Birds of Illinois.
1874-77. Birds of the Northwest†.
This work has attracted much attention as a valuable contribution to historical ornithology. It discusses the oölogy, nidiology,** ornithology, geographical distribution, bibliography, etc., of the *avi-fauna* of the region drained by the Missouri River, in a thoroughly poetical manner. Dr. Coues theorizes somewhat in this work, which subjects him to considerable criticism. It is a work more generally quoted, doubtless, than any other of this author's publications.
1875. Chips from a Buffalo's Workshop.
1875. The Silvery Mole.
1875. On the Prairie Gopher.
1875. Description, History and Distribution of the Prairie Hare.
1875. Report on the Collection of Mammals made in portions of Arizona, Nevada, Utah, California, Colorado and New Mexico.
1875. Synopsis of the Reptiles and Batrachians of Arizona with Critical and Field Notes.
1875. Breeding of certain Birds of Montana.
1875. Brewster's Paper on West Virginia Birds.
1875. Brewer's Catalogue of New England Birds.
1875. (Fasti Ornithologiae Redivivi.)
This work unfortunately never met with much popular favor.
1875. The Cranial and Dental Characters of Mephitinae.
1876. Monographs of North American *Rodentia*.
This work, contributed in conjunction with Prof. J. A. Allen, is the largest of the author's bound works; its treatment of the gnawing mammals is very exhaustive. It is not put in popular language, nor is it in the least historically descriptive, since it has nothing to say concerning the habits of the animals of which it treats. As a work for the specialist it is invaluable.
1876. Reply to Allen's Availability of Bartramian Names
1876. Nesting of the Night Hawk and Towhee Bunting.
1876. Destruction of Birds by Telegraph Wires.
1876. Number of Primaries in Oscines.
1876. Gentry's Book about Birds.
1876. On Partridge, Quail, &c.
1876. The Zoological Results of the Expedition of Lewis and Clarke.
1876. Reversion of the Dog to the Feral State.
1876. History and Habits of the Wolverine.
1876. Fur-bearing Mammals of North America†.
Was issued as a specimen fasciculus of a work on mammals on which the author had long been engaged. It is a masterly effort, which enters in detail on the "life-histories" of the *mustelidæ* under consideration. The work is interesting, not only as instructive reading matter, but as furnishing data for commercial purposes. Its place among trappers, sportsmen, hunters, and dealers, has been recognized, while its value as a contribution to current mammological literature is inestimable.
1877. Minot's Birds of New England.
1877. Remarks on the Birds of the District of Columbia. By Coues & Prentiss.
1877. Precursory Notes on American Insect-ivorous Mammals.
1878. Field Notes on Birds Observed in Montana and Dakota.
1878. New Birds for the United States Fauna.
1878. Notes on the Natural History of Fort Macon, N. C. By Coues & Yarrow.
1878. Birds of Colorado Valley.
This last work contains a bibliography of North American birds as far as completed. To it is due the distinguished attention shown the author in the old world. So much has been said of this work by the secular press that further comment seems unnecessary.

The works of Dr. Coues have doubtless attracted more attention from the secular press than those of any other scientist who has written on natural history with the exception of Agassiz. The Chicago *Tribune* especially has devoted much attention to his works, the "Rodentia" receiving no less than a three-column review, and other works in proportion. Of late the New York press, led by the *Herald* and *Post*, have given much attention to the author himself. Three more works are in course of preparation—part second of "Birds of Colorado Valley," "The English Sparrow," and an extended work on North American mammals. The latter will doubtless not only be his most important work, but "the greatest effort of his life." Dr. Coues is yet comparatively young, and with his present immense success, has doubtless a farther interesting career.

*Should the writer be successful in procuring other titles they will be promptly forwarded to FOREST AND STREAM.

†The works thus marked are now published by Estes & Lauriat, Boston, but some of them were formerly of government print.

**Nidiology is a word "manufactured" by the writer to express bird architecture, from the latin word *nidus*, nest, and the greek, *logos*, account, found in all ologies. Though a "barbarism," coming from two languages, yet there seem to be too many precedents of so-called "barbarisms" in the English language, to object to it on that score.

CARRIER PIGEONS IN INDIAN WARFARE.—*Fort Johnston, N. C., Oct. 7th.—Editor Forest and Stream:*—Would it be possible to breed carrier pigeons at frontier stations, and utilize them from such commands as that of the unfortunate Major Thornburgh, or by General Merritt going to the relief? I cannot see that there should be any trouble to breed the pigeons at any post, or to transport them with a scouting party or a large command. Will some of your readers, posted upon such matters give information respecting the subject? S.

We see no possible reason why carrier pigeons should not be employed as very valuable agencies in our Indian campaigns. This use of the bird messengers is a very ancient one. Why it has never been practical in this country we do not know. The pigeons fly hundreds of miles. The suggestion of our correspondent is well worthy of consideration.

THE LEATHER-BACK TURTLE ON THE NEW ENGLAND COAST.—*New Bedford, Mass., Sept. 26th.*—In an article in the *American Naturalist* for October, by J. Ford, Esq., is an account of the capture of specimens of the "leather-back" turtle (*Sphargis coriacea*). This turtle, although not common, is by no means so scarce as the article in question would imply. Nearly every year for a considerable time specimens of this huge turtle have been seen or taken in the waters of Southern Massachusetts. In June, 1878, one weighing 740 pounds was killed by a sword fisherman near Block Island, brought here, and sent to the museum at Rochester, N. Y. Last week one was taken off Marion, in Buzzard's Bay, and taken alive to the county agricultural fair at Taunton. Its weight was 820 pounds; length, 7 feet 4 inches; width across the front from extremities of flippers, 7½ feet; color, sooty black. Another and larger one was seen this week in Vineyard Sound, but succeeded in escaping capture.
CONCHA.

HINT TO WESTERN FARMERS.—Mr. Hoffman, Chargé d'Affaires at St. Petersburg, in his despatch to the Department of State, dated Sept. 16th, sends copies of an official report on locusts. It appears that the grain locust of Russia generally deposits its eggs in the wheat fields, and that as soon as they are hatched the attack on the wheat commences. The use of ropes and machines to drive the locusts from the wheat fields is not advisable. It is better to plough the ground where the eggs are laid, as ten minutes' exposure to the sun kills the chrysalides. The prevalence of locusts in Southern Russia has been, by these latter means, greatly reduced, so that good crops of wheat may be expected in 1881. Possibly some lessons may be derived from Russian experiments and reports affecting American grasshoppers.

—The Universal Conservatory and Zoological Garden Company has been incorporated in New York, with a capital stock of $2,000,000. The plan is to combine a large place of amusement with a botanical and zoological garden. The company has purchased thirty-three acres of ground, bounded by Harlem River, St. Nicholas avenue, One Hundred and Fifty-fifth and One Hundred and Fifty-ninth streets, for which was paid $400,000. Five hundred laborers are to be employed in the work of preparing the ground and erecting the buildings.

ANIMALS RECEIVED AT CENTRAL PARK MENAGERIE FOR THE WEEK ENDING OCT. 4TH, 1879.—1 Persian sheep (*Ovis aries*), presented by Capt. Samuel F. North, steamship Scraps; 1 Geoffroy's marmoset (*Midas geoffroii*), hab. Columbia, presented by Mr. J. H. Harris, New York City; 40 canary birds (*Serinus canarius*), presented by Mrs. S. S. Stocking, Jamaica, L. I.; 1 rattlesnake (*Crotalus durissus*), presented by Mr. John H. Davis, New York City; 1 passerine parrakeet (*Psittacula passerina*), presented by Mrs. L. Baker, New York City.
W. H. CONKLIN, Director.

ARRIVALS AT THE ZOOLOGICAL GARDEN, CINCINNATI, UP TO OCT. 1ST, 1879.—1 young grizzly bear (*Ursus horribilis*), 1 blue-winged teal (*Querquedula discors*), 1 horned grebe (*Podiceps cornutus*), 2 rattlesnakes (*Crotalus durissus*)—all presented; 1 yak (*Bison grunniens*), 4 poodle pups (*Canis domesticus*), 3 spitz pups (*C. domesticus*)—all born in Garden; 2 passenger pigeons (*Ectopistes migratoria*), 3 undulated grass parrakeets (*Melopsittacus undulatus*)—all hatched in Garden; 2 moose (*Alce americanus*), 2 Canadian lynx *L. Canadensis*), 2 kit foxes (*Vulpes velox*), 1 yellow-fronted amazon (*Chrysotis ochrocephala*), 2 yellow-headed conures (*Conurus jendaya*), 3 golden-crowned conures (*C. aureus*)—all purchased.
FRANK J. THOMPSON, Superintendent

—Attorney-General Hardin, of Kentucky, has a son who on his fourteenth birthday measured six feet in height and weighed 152½ pounds.

The Kennel.

TREATMENT OF CLUMBER SPANIELS.

THE following article on the breeding, rearing and breaking of clumber spaniels was written by Mr. Wm. Brailsford, head keeper to the Duke of Westminster and breeder of Trimbush and other noted clumbers. Mr. Brailsford's long experience in breeding and handling these dogs qualifies him to write intelligently on the subject.

Breeding.—Clumbers being as a rule gross feeders, much care is requisite to guard against an accumulation of fat in both dogs and bitches, as the progeny from fat dogs are always deficient in bone and stamina.

Clumber bitches are not generally careful mothers, and frequently kill their puppies by lying upon them during the first few days after whelping; therefore it is desirable to have a bitch of any other breed to whelp at the same time to use as a foster mother. Breeding bitches, for three weeks before whelping, should have constant liberty and be fed entirely upon slops, and castor oil be given directly after whelping, and carefully kept from solid food for nine or ten days, until all danger of milk fever is past.

Breaking.—At about six months old young clumbers should be taught to carry if wished to do so in their future work, and this may be done by throwing a ball, glove, or stuffed skin frequently for them to gambol with, but if a skin, they should not be allowed to pull it to pieces. Also, it is well to accustom them to water and to swim for whatever may be thrown for them. They are, however, naturally fond of water and don't require much enticing to do this: moreover, if kept too much in water it has a tendency to bring on internal canker in the ear. At say eight months old a cord of six yards long should be put on them when exercised and their names called frequently, and by a check of the cord made to turn and come round as frequently as you wish; always receiving encouragement when they answer to the call of their name or to the words "come round." By using them to this practice in an open field constantly they will obey orders when put to work later on in brush work or thick covert. When, however, the temptation to chase newly flushed game comes they will show more eagerness and will not obey orders so readily, but a little perseverance and frequent slight checkings by the cord will soon bring about an understanding that orders must be obeyed.

If desirable to have them drop after shooting, this is easily done by using them to drop when told. When first the cord is introduced for the purpose of correction, if made to drop frequently at the word "charge," the order will soon be promptly obeyed. We as a rule don't use clumbers as retrievers, because we hunt six or eight together and have always trained retrievers out to recover dead or wounded game; but to use a brace of clumbers for general purposes they should do this, and it is easily taught and the habit agreeable.

In working a team of clumbers for our English system of shooting in line they are never more than say twelve yards from the man who hunts them and in the midst of the greatest temptations, will come round when spoken to or the whistle used; but in wilder shooting without beaters, clumbers may and will hunt and work as wild as wished for. But they are by far the most tractable and easily managed breed of spaniels extant, and when once accustomed to their work are always uniform in behaviour and more steady than other breeds. Clumbers are always subject to dew claws on the hind feet, and which are best removed when they are puppies, as otherwise the nail frequently curls round and grows into the pad, causing much pain to the dog if not frequently cut. When quite small, say just before puppies being taken from the bitch, the puppies should have about one inch twisted off the end of the tail—this should not be done by cutting, as it is requisite to draw out the small cord in order to prevent a propensity in some of a curl in the tail, and which is much against a good appearance and straight carriage of that appendage.

ST. LOUIS DOG SHOW.

[FROM OUR SPECIAL CORRESPONDENT.]

St. Louis, Oct. 9th.

TO have arrived at St. Louis on Tuesday last, was to have experienced practical purgatory. All the west and southwest had been suddenly spilled into the city limits, and began to clamor for place therein; place to eat, place to drink, place to "wash up;" place to see the Veiled Prophets, the Fair, the Fireworks, the Dog Show, and the Pigeon Match all at once. And under and beyond all this, a dull throb of anxiety about two things eight hours away—a ticket to the ball and a place to sleep. There were some, a favored few, who had all they desired, and the rest festooned themselves gracefully from cot to cot in hotel parlors and billiard rooms, or on the less plastic curb-stones till daylight and train time, and home and bacon and beatitude became objects within their reach. I would not willingly permit the FOREST AND STREAM to print an exaggeration—a glaring wild-eyed lie I wouldn't mind so much—but yet I dare to say that St. Louis has been for four days past the smallest city for her population on the face of the earth, and, given time enough, the Malthusian theory will prove itself here to a certainty.

I am bound to admit that a very large share of the people present did not come to see the Dog Show; nevertheless a goodly number did accept it's managers' valuation as a just one, and did pay their fifteen cents to have a look at it. They certainly got their money's worth, if

they only looked over the dogs of the St. Louis Kennel Club, on exhibition and not competing.

The dogs are at the Fair Grounds, and the accommodations provided for them are quite good in a rather contracted way. The boxes are well off the ground, well aired, clean, and properly cared for. The dogs seem contented, and a certain air of genial hospitality serves at least to cover up any want of good feeling which may exist among contestants for the various prizes. The judging took place in an open space at the rear of the building where the sun bent down upon man and beast in full fury. More room would have been an advantage, and more contestants in many of the classes would have added greatly to the interest. The awards were made with careful deliberation, and though not always satisfactory, were, in the main, fair, and certainly conscientious. It has been charged that the St. Louis Kennel Club got up dog shows only to win their own prizes, and make records for their own dogs and those of their special friends. I failed to observe any evidence of this, and think that fair minded men must acquit the judges. Messrs. P. H. Bryson, of Memphis, Tenn., and E. F. Stoddard, of Dayton, Mich., of anything approaching intentional unfairness. Opinions differ, and may properly enough be expressed without accusing honest men of dishonest motives. For instance, in class 19, Mr. Kaye's Nannie did not seem entitled to first as against Mr. Mansfield's Fannie. The distribution of black and white in former made her look like a coach dog, and though a very pretty animal in her way, she did not fill the eye as a type of her class. It will be, I think, difficult for those accustomed to admire the conventional English setter, to become enthusiastic over the odd looking native English dogs which attract attention here. Dr. J. S. Nivens' Blossom, though beaten out and out by the Toledo Kennel Club's Grouse, in the special class, did not seem to me to get the attention deserved in the open class 40, where the blue was awarded to the same club's Judge, to my eye, an inferior dog. Mr. H. Griffith, of Butler, Ill., (made celebrated by the dog story related in a recent number of FOREST AND STREAM,) who won first in the native Irish setter bitch class and sundry mentions in others, certainly made a mistake in entering his immature thirteen months old Barney in class 30, where he was beaten by older and better developed dogs. Nevertheless Barney is a noble beast, and looks at one out of his fine clear eyes as though he meant winning sometime or other.

In special class 11 the contest between Mr. Orgill's Rush and Mr. Holabird's Chips was close and severely taxed the patience of the judges. The gun went where it belonged, however, in the end.

In the special class 23 there was so hot a contest between Clip and Queen Mab that the judges, not being able to agree, asked assistance. The referee decided in favor of Clip, to which decision Mr. Arnold Burges took violent exception, and with some show of justice. He, however, created considerable mirth by casually remarking that "it was the first time he had ever 'kicked' at a judge's decision." "What are you givin' us?" said a profane person.

The Toledo Kennel Club's Grouse is a noble, a wonderful dog. His points are in some respects phenomenal, and it may be doubted if his get will ever show them to any marked degree.

Among the dogs on exhibition merely is Lofty, a lemon Belton, owned by the Kentucky Kennel Club, and the animal is certainly deserving of special mention as a nice specimen of the class.

Mr. John Fottler's Boston dog Berkley, winner in the champion Irish setter dog class, and also in the special class 34, where his only competitor was Mr. J. W. Scudder's Chance (Palmerston, jr., being withdrawn), is a fine animal, already too well known to call for special mention here.

On Friday afternoon—thanks to the kindness of Mr. Sterling—I had a nice view of the St. Louis Kennel Club pointers off the bench. They are certainly a fine lot of noble creatures, and judged from the Western standpoint, will prove formidable rivals wherever they may be exhibited. Bow and Faust are large—possibly too large—but possess grand bodies and surprisingly fine, free action. I fancy Faust as the cleaner animal of the two. Clytie is a Sensation bitch, and is claimed by the club as the very best of the strain. She certainly shows her Sensation blood in every point. The others are promising, to say the least—I mean of course the youngsters—and the organization has good reason to be proud of itself, as it unquestionably is.

On Thursday, after the awards had been made, some little fun was the order of the day. An extraordinary setter animal, with a remarkably hideous bifurcated nose, in the centre of which appeared a cyclopean tooth, was seen to be the centre of attraction, and about it gathered crowds of learned lookers on. This was finally explained by the fact that over its box had been tacked this inscription: "This beautiful pointer, owned and exhibited by Dr. Rowe, editor of the Chicago *Field*—a very rare and valuable specimen," The Doctor rushed in, and snatching the paper, tried to dispose of it. It finally fell into the writer's hands, and meantime some wag had added "full brother to Hallock's red pointer." The doctor then wrote in large letters the words "Purchased by P. H. Bryson, of Memphis, Tenn.," under which the quick-witted Tennesseean added "for Dr. Rowe, of the Chicago *Field*;" so the Doctor was finally saddled with the hero of two noses and one tooth. He swears the abortion shall rot in the express office or be sold to pay express charges. But I can't see why anybody who can't take a prize with a dog with one nose should object to trying a dog with two noses.

On the whole, the show was a success, and great credit is due to the managers—President Sterling, Secretary C. H. Turner, and Chas. Lincoln, Superintendent—for their exertions in this super-heated weather to make things go off pleasantly.

Among the notables present were:—Dr. Wm. Jarvis, of Clairmont, N. H.; Mr. John Fottler, jr., Mr. Jas. H. Morse, of Toledo Kennel Club; Mr. Waddell, of Topeka Kennel Club; Mr. C. K. Drane, owner of Lofty; Mr. Arnold Burges, the "non-kicker;" Mr. George Campbell, of Tennessee, with new native strain; Mr. W. Holabird, Major J. M. Taylor, of Lexington, Ky.; Messrs. P. H. and Davis Bryson, of Memphis, Tenn.; Mr. E. H. Stoddard, Dayton, O.; Mr. John E. Long, Detroit, Mich.; Mr. Ed Gillman, Detroit, Mich., and Mr. C. Whitman, of Leavenworth, Kansas.

It only remains to be said that the show in the non-sporting classes was a poor one, and Major Taylor would have saved himself much trouble and done himself great credit by cutting out most of the classes for utter want of merit. The total number of dogs entered was 375.

THE MAJOR.

LIST OF AWARDS:

POINTERS.—Over 55 pounds—Champions: Dogs, 1st—Irvin & Waddell, Sleaford; bitches, 1st—E. Orgill, Romp. Open Classes: Dogs, 1st—W. H. Holabird, Philip; 2d—Irvin & Waddell, King Philip; V. H. C.—C. Koch, Patrick; bitches, 1st—A. Daly, Nellie R.; 2d—W. W. Smith, Dream.

POINTERS.—Under 50 pounds—Champions: 1st—E. Orgill, Rush; no bitches. Open Classes: 1st, E. H. Gillman, Gumbo; 2d—W. H. Holabird, Caiser II.; bitches, 1st—Irvin & Waddell, Regent; 2d—E. Orgill, Belle; V. H. C.—Irvin & Waddell, Dolly Varden.

POINTER PUPPIES.—Dogs, 1st—John Pepenbrook, Santo; V. H. C.—C. L. James, Sawarow; H. C.—W. W. Smith, Honey Clay; bitches, 1st—A. Daly, Maggie G.; H. C.—L. Page, Musetta.

ENGLISH SETTERS.—(Imported) Champions: Dogs, 1st—L. H. Smith, Paris; bitches, 1st—Arnold Burges, Queen Mab. Open Classes: 1st—A. Burges, Druid; 2d—F. B. Fay, Coin; bitches, 1st—L. H. Smith, Clip; 2d—C. N. Whitman, Cubas; V. H. C.—A. Burges, Nilsson; H. C.—Irvin & Waddell, Livy. (Natives) Dogs, 1st—T. T. Sawyer, jr., Royal Ben; 2d—E. Trentier, Boy; V. H. C.—W. J. Greenwood, Vance; H. C.—Irvin & Waddell, Budge; C.—F. Pinke, Pipp Red Bivial. Open Classes: Dogs, 1st—A. W. Small, Echo; 2d—C. J. Paterson, Thorstein, IL; H. C.—W. H. Holabird, Palmerston, jr.; bitches, 1st—Dr. Wm. Jarvis, Rose; 2d—W. A. Wheatley, Lady Clare; H. C.—N. Griffith, Molly. (Natives) 1st—Lincoln & Hellyar, Arlington; 2d—J. W. Scudder, Chance; H. C.—C. E. Bicker, Patrick; C.—Emporia Kennel Club, Karl; bitches, 1st—H. Griffith, Kitty; 2d—W. H. Linn, Juno; C.—J. L. Duke, Kate. Puppies: Dogs, 1st—L. J. Sackett, Irish Ranger; bitches, 1st—C. Stiesmeier, Elsa; V. H. C.—H. Griffith, Venus; H. C.—Dr. N. Rowe, Hortense.

GORDON SETTERS.—Champions: Dogs, 1st—Toledo Kennel Club, Grouse; bitches, 1st—Nassau Kennel Club, Nell. Open Classes: Dogs, 1st—Toledo Kennel Club, Judge; 2d—J. S. Niven, Blossom; V. H. C.—E. E. Fargo, Abdarl; C.—C. Dorgzer, Feldman; bitches, 1st—Toledo Kennel Club, Bee; 2d—Same owner, Venus; V. H. C.—C. R. Scudder, Jet; H. C.—A. R. Train, Fan. Puppies (no award in the dog class); bitches, 1st—Toledo Kennel Club, Juniury; C.—Aldine Kennel, Jet.

CHESAPEAKE BAY DOGS.—1st—H. P. Wilson, Snyder; 2d—S. A. Kaye, Mermaid.

IRISH WATER SPANIELS.—1st and 2d—S. A. Kaye, Pat and Pat II

COCKER SPANIELS.—1st—J. H. Whitman, Carlo; V. H. C.—Irwin & Waddell, Belle.

SPANIELS OTHER THAN IRISH OR COCKERS.—1st—Toledo Kennel Club, Blondy.

FOX HOUNDS.—1st—A Mittleburg, Hunter; 2d—J. P. Schuete, Major.

BEAGLES.—Dogs, 1st—Dodge & Baker, Rattler; 2d—C. Rowett, Leo. Bitches, 1st—C. Rowett, Rosey; 2d—Do, Lilly, V. H. C.—Dodge & Baker, Roxy; H. C.—P. Dorsey, Venus; C.—Dodge & Baker, Fannie.

GREYHOUNDS.—1st—R. S. Henry, Punch; 2d—F. C. Hayden, Ponto; V. H. C.—J. Hennessey, Spring; H. C.—M. A. Walf, Belle.

DERBHOUNDS.—1st—Mrs. H. C. Ewing, Bruce.

FOX TERRIERS.—1st—R. Gibson, Topsey; 2d—J. L. Turner, Judy.

SPECIALS.—For best pointer dog, E. Orgill, Rush; for best pointer bitch, A. Ealy, Nellie R.; best brace of pointers, E. Orgill, Rush and Bell.

For best English setter dog, Arnold Burges, Druid; for best English setter bitch, L. H. Smith, Clip; for best brace of English setters, A. Burges, Druid and Queen Mab; for best native English setter dog or bitch, T. T. Sawyer, Royal Ben.

For best Irish setter dog, John Fottler, jr., Berkley; for best Irish setter bitch, Dr. Wm. Jarvis, Rose; for best brace of Irish setters, John Fottler, jr., Berkley and Duck; for best native Irish setter dog or bitch, J. W. Scudder, Chance.

For best Gordon setter dog, Toledo Kennel Club, Grouse; for best Gordon setter bitch, Toledo Kennel Club, Bee; for best brace of Gordon setters, Toledo Kennel Club, Grouse and Bee; for best native Gordon setter dog or bitch, Nassau Kennel Club, Nell.

For best brace of Cocker spaniels, Irwin & Waddell, Beau and Bell.

For best brace of Beagles, C. Rowett, Lee and Roscy.

RICHMOND DOG SHOW.—We would remind our readers that the entries for the Richmond Dog Show, which is to be held on October 28th, close on the 21st inst., and should be made to Wm. C. Knight, Secretary. The prizes are $10 in all classes, except puppies, in which certificates will be awarded to the winners. The judges are John S. Wise, Esq., Captain J. W. Foster, and Judge Theo. Garnett. Full information regarding the show can be had by addressing W. Russell Robinson, or John S. Wise, Esq., Richmond, Va.

FIELD TRIAL JUDGES.—The following gentlemen will act as judges at the approaching Field Trials of the National American Kennel Club: Theo. Morford, of Newton, N. J.; Captain Pat Henry, of Clarksville, Tenn., and E. F. Stoddard, of Dayton, O. An agent of the club is now out examining territory in Southern Illinois, and a location is expected to be selected within the next ten days.

ST. BERNARDS AT THE HOSPICE.—A recent visitor to the Hospice of St. Bernard was given an opportunity of examining the kennel of dogs at present in possession of the hospitable monks. He found them a very seedy looking lot—scarcely a healthy dog among them. One was blind of an eye; another was lame, and a third so fat he could hardly walk. Yet it is stated that eight of them have brought in no less than twenty persons from the snow this season.

DAMP, DIRT AND DISEASE.—Under the above heading we find the following trite remarks in the columns of an English exchange. They are particularly applicable now in view of the fact that a large proportion of the cases for which we are asked to prescribe at this season can be traced to one of these causes:—

"Dirt, it has been said, is matter out of place, and nowhere is it more out of place than in the kennel. The diseases dirt generates are numerous, and when damp is superadded, these are intensified and assume forms that are almost incurable. Cold, with subsequent inflammation of the eyes, with the danger—if not possibility—of ultimate blindness. A running at the nose, a husky cough, with phlegm filling the bronchial tubes, and ending in chronic asthma or inflammation of the lungs. Ears, first dirty, then scurvy, then the flaps hot and swollen, ending in suppuration and internal canker and deafness, are also among the results of damp and dirty kennels. Worst of all—at least more troublesome and loathsome, the most inveterate and obstinate forms of mange break out in the damp and dirty kennel, and make it a permanent home centre of dissemination. The man who has to build his kennels on a stiff wet clay soil is, as a breeder, handicapped to start with. Whatever the soil may be, let the drainage be thorough, and when naturally damp let the whole of the floor and yard be concrete, over a layer of rubble or cinders. If possible in damp weather let a fire of coke in a movable grate be daily burnt in the kennels whilst the inmates are out being exercised. Let the rules as to cleansing and disinfecting the kennels be simple, clear and emphatic, and let the master himself see that they are strictly carried out. Washing should not be resorted to in cold and damp weather except under absolute necessity. Grooming, however, should be regular and vigorous. Write up prominently in the kennel: 'Disease follows dirt and damp.'"

—The London *Live Stock Journal* criticises the prize list of the St. Louis Dog Show in the following language:

"We have received a prize list of the St. Louis Dog Show, which is fixed for Oct. 7th, 8th, 9th and 10th, and regret to find that our American cousins are persisting in their neglect of the non-sporting varieties. The prizes for and division of the sporting classes are excellent in every respect, but a single $10 prize in such classes as Newfoundlands, pugs, toy spaniels, bulldogs and terriers, combined with a total neglect of mastiffs and St. Bernards, makes us wonder where the "enterprise of the Americans" can have betaken itself. Once put on the right lines by competent judges we are profoundly of the belief that our English non-sporting dogs would before long be highly prized in the States. Their introduction into that country, however, will only be attained by sufficient inducements being held out to English owners to bring their dogs over. A *bond-fide* international show would be an achievement which it is quite within the power of American breeders to carry out if they seriously undertook it; and we are of the opinion that much good would come thereby."

—Mr. W. H. Pierce, Peekskill, N. Y., has sold his handsome thoroughbred English setter bitch Nellie to J. H. Young, of Albion, N. Y. Nellie is from first-class imported parents and is of superior field qualities.

—Mr. Robert Sewell's setter bitch Irish Fairy whelped, on the 6th October to Mr. C. H. Raymond's Montague, ten puppies—four dogs and six bitches; as pretty a litter of Irish setters as one could fancy.

—Mr. D. P. Bosworth, of New York, has bred his cocker spaniel bitch, Clare, (Nimrod-Gip,) to Mr. Wm. B. Goff's Dandy, imported.

—Mr. N. Elmore's (of Granby, Conn.) English hare beagle, Lucy, whelped September 30th, seven puppies, all but one (which is lemon and white,) white, black and tan and finely marked; sired by Victor.

—Mr. C. B. Haven, of Beverly Farms, Mass., claims the name Bramble, for a red Irish setter pup, out of Duck by Berkely, whelped August 25th; purchased of Mr. John Fottler, jr.

—Mr. James H. Goodsell, New York City, claims the name Gilroy for his pure Laverack chestnut and white setter dog, by Carlowitz out of True, whelped September 15th, 1878.

—H. B. Roney, of East Saginaw, Mich., secured a fine imported English bloodhound bitch last winter, through an advertisement in FOREST AND STREAM, and has now, in transit from England, a brace of Irish wolf hounds.

Millbury, Oct 7th.—Mr. John M. White started a fox today, and after an exciting chase shot him on Brigham Hill in Grafton. It was a beauty and weighed nine and three-quarter pounds.

Yachting and Boating.

THE CLEVELAND YACHTING ASSOCIATION.

For some time past it has been a matter of open comment among those who have visited the harbors of sister cities on the lakes, that Cleveland has fallen far astern of her neighbors in utilizing her waters for the enlivening sports of yachting, boating, and acquatics generally; but it was not until a boat's crew had returned from a cruise, laden with a remembrance of many courtesies extended while on their way, that the formation of an association to reciprocate and to build up a spirit of brotherhood among yachtsmen, was talked of. The undertaking was no light one. Not above two dozen craft, used for sailing, were to be found afloat, and these mostly hidden in obscure muddy slips, or beached when not in use, and generally rigged and manned in the most primitive fashion. The contestants themselves had to organize the race, and the trophy which had been the first prize ever won—a 4x6 flag of bunting, offered by a gun club, was carried away by the sloop *Unique*, of Cleveland harbor. Her owner desiring to have more sport with his prize, offered it as a local championship emblem, to be contested for under the rules below given, on Tuesday, September 10th, 1878, the anniversary of Perry's victory on Lake Erie. A committee was appointed to conduct the regatta, consisting of Mr. Frank Smead as Chairman, Chas. F. Smith, Secretary, and Samuel Law, Treasurer. A course was laid out nearly triangular in form, the starting point being abreast of the piers at the mouth of Cuyahoga River, the line running easterly until the shore was reached near the foot of Dodge Street, thence northwesterly to a stake-

boat set seaward about three miles from the starting point, and finally rounding the water works crib, finishing at the starting line, making a course of about eight miles in extent. The prizes were to be apportioned into four lots, the winner to get the championship flag and one-fourth of the entrance money; the second to get one-half the remaining entrance money; the third to get five-eighths, and the fourth three-eighths of the remaining quarter. In addition, a many handled tin cup was provided as a prize for the boat making the best record for slowness. Geo. E. Stewart, Dr. J. C. Cutler, and Geo. N. Glines were appointed judges, and the time set was 10 o'clock A.M. One schooner, the *Stranger*, Mr. S. Law, was entered, and twelve sloops, as mentioned; *Silver Spray*, S. Law; *Chimes*, W. P. Francis and others; *Unique*, Frank Smead; *Gipsy*, R. F. Bell and T. A. Russell; *Carrie*, S. Law; *Mastery Harry*, C. C. and H. C. Retzer; *Orphan Boy*, B. Lyman; *Trio*, *Topsy*, *Mora*, *Nomaid*, and two others.

The sailing rules were as follows: Each boat entering to pay an entrance fee of $2. All entries must be made before 6 P.M., on Monday, September, 9th, 1878. The signal to commence crossing the line to be given at 9:45 A.M., and any yacht not having crossed by 10 A.M., her time of starting will be taken from that time. After the signal for the start no throwing out or taking in or booming out of ballast. Yachts and boats were allowed sails as follows: Schooners: mainsail, foresail, flying jib, jib, jibtopsail, fore and main gaff topsails. Sloops: mainsail, jib, flying jib, jib topsail, and gaff topsail. Time allowance to be computed from time to time of passing home stake boat on the finish, as follows: Length on water-line, breadth of beam inside fender streak, depth of hold next to mast from underside of deck to upper side of planking. These dimensions added together, constitute gross measurement, on which one-half minute per foot will be allowed in case there is dispute. Yachts on the port tack must invariably give way to those on the starboard tack, and yachts running free must invariably give way to those by the wind on either tack. Yachts rounding stake-boats shall leave them on the port hand,

On the day set for the regatta all boats were started, but owing to a heavy squall were unable to make a finish, the outer stake-boat having been blown from its anchorage. Three yachts, the *Orphan Boy*, *Mora* and *Dolphin* went ashore during the gale that followed, and were entirely lost, while numerous minor accidents happened to others of the fleet. The race was declared off by the judges, and at a meeting of the contestants at Law's boat-house the same evening it was decided to hold the regatta on Thursday, Sept. 19th, and the owners of the wrecked boats were allowed the privilege of entering other boats in their stead. It was at this meeting that the need of concerted action among yacht owners and amateurs was recognized, and the idea of an association to further and promote aquatic sports began to take definite shape. A committee consisting of Messrs. F. H. Swead, W. P. Francis, H. G. Phelps, Bernard Lyman, Robert E. Patterson, R. F. Bell and Charles P. Smith were selected to carry the postponed regatta to a successful conclusion, and also to collect and furnish data which would tend to place the proposed association on a permanent basis. They were instructed to report their proceedings at a meeting to be held at Weckerling's Hall, Champlain street, on the Saturday following the regatta, at which time the prizes were to be awarded and protests heard, and all matters connected therewith brought to a final settlement.

The purse which was to be contended for Sept. 19th had been augmented by two new entries, and the addition of five dollars as a present by Mr. George E. Stewart, making a purse of $28, after deducting a few necessary expenses for stakeboats, &c. The *Nadine*, Robert Patterson, master, was kindly loaned for the use of the judges.

The following boats started in the regatta in the order named: *Trio*, *Alert*, *Topsy*, *Gipsy*, *Stranger*, *Silver Spray*, *Nomad*, *Unique* and *Chimes*. The wind was from the southwest, blowing just fresh enough to make the carrying of all sails possible. The first stakeboat opposite Dodge street was passed in nearly the order of starting, but after the turn the better sailors showed to the fore, and the lame ducks dropped out. The outer stakeboat, about the halfway point, was passed first by *Trio*, next *Unique*, then *Silver Spray*, *Stranger*, *Gipsy* and *Chimes* in close succession. Around the Water Works Crib they passed, and then came rushing down. They swept past the home stakeboat in the following order: *Unique*, *Chimes*, *Silver Spray*, *Stranger*, *Gipsy*, *Trio* and *Alert*, *Topsy* having been dismasted, and *Nomad* not finishing the course. The *Master Harry* met with an accident to her centerboard just before the race, and was unable to be on hand in time to sail.

At a meeting held after this match the prize money was awarded by the committee of arrangements as follows:—Champion pennant and first prize, $7, to *Unique*; second prize, $9, *Chimes*; third prize, $7, *Silver Spray*; fourth prize, $5, *Gipsy*; and the tin-cup emblem to *Alert*. An organization was perfected, and the following officers elected:—Commodore, Frank Smead; Vice-Commodore, W. P. Francis; Rear-Commodore, Henry Gerlach; Secretary, Charles P. Smith; Treasurer, H. G. Phelps; Measurer, R. F. Bell; Executive Committee: C. P. Smith, chairman; Robert E. Patterson, Bernard Lyman, Robert E. Gill, jr., and Samuel Law. Forty names were listed on the club rolls, including many prominent business men of Cleveland. Since then the association has prospered, and is now on the high road to success. A club book is issued annually. We append a list of the fleet:—

FIRST CLASS.

Rig.	Name.	Length. Ft.In.	Breadth. Ft.In.	Depth. Ft.In.	Owners.

Steam yacht	Rosaline, Geo. W. Gardner.				

EAST BOSTON YACHT CLUB.—The first union regatta of this club was sailed Sept. 26th, open to all yachts under forty feet; wind steady from S. E. In the first class *O. K.* protested *Anonyma* for foul start, and was awarded the prize. *Posy* carried away masthead and *Eugenia* fouled *Dictator*, resulting in a protest from the latter. *Dream* lost bowsprit. We annex a summary. The judges were Messrs. T. H. Stone, J. P. Morrison, R. Crosbie, E. A. Sweet and G. B. Atwood.

SPECIAL CLASS SCHOONERS.

Name.	Owner.	Length. Ft.In.	Corrected Time. H.M.S.

Herald	W. Smith	19 04	35 47
Dream	C. Barnard	18 00	39 27
Wildfire	H. A. Keith	17 03	45 53

First prizes go to *O. K.*, *Syren*, *Viking*, *Veronica*, *Eva*, *Water Witch* and *Nonpareil*. Second prizes go to *Lillie*, *Daisy*, *Dictator*, *Muriel* and *Peri*.

BEVERLY YACHT CLUB.—The fifty-third regatta of the club was sailed Oct. 1st at South Boston. It was a "sail off" for the club championship of second class. Open to *Hoiden*, *Fancy* and *Peri*. The first being hauled out for the winter, did not appear. The other two ran down before the wind almost bow and bow, but at the mark *Peri's* mast went by the board, and *Fancy* sailed home alone, taking the pennant in her class.

HAVERHILL YACHT CLUB.—The union regatta of this club sailed Sept. 26th, and brought out a long list of entries. Entries in first class: *Hornet*, *Twilight*, *Hattie*, *Empress*, *Elfie*, *Pianchette*, *Lizzie Warner* and *Emma L.* The *Warner* took first, and *Empress* second prize; the third not awarded, owing to some dispute. In second class the following came to the line: *Abbie M.*, *Josie J.*, *Pinafore*, *Startle*, *Linnie May*, *Magic* and *Eclipse*. First prize to *Abbie M.*, second to *Eclipse*, third to *Josie J.* In third class the entries were: *Ada L.*, *Julia J.*, *Vision*, *Two Brothers*, *Psyche*, *Keturah*, *Alatus*, *Idaletie*, *Dolphin*, *No Name*, *Edith M. Adelaide*, and *Brown*. First prize *Alatus*, second by *Psyche*, third by *Idalette*. Judges were Messrs. George Fenderson, O. M. West and Horace Fitts.

A MASTER'S CERTIFICATE.—Mr. Charles H. Whiting, owner of *Violet*, Dorchester Y. C. and Beverly Y. C., has obtained the British Board of Trade certificate of competency as master of his own yacht. The London *Field* adds that Mr. Whiting is the first American that has obtained a certificate. We are certain there are many Corinthians who could readily pass examination for a master's certificate before our own Boards, and we hope the fashion of studying for and obtaining such certificates will become a custom with us. Yachtsmen who have the privilege of decorating their cabins with certificates of competency would soon form an *elite* among seamen, whose example would be beneficial and influential.

TO AMERICAN YACHTSMEN.—For complete records of all yacht races in England, as well as for a great variety of other matter of interest, such as cruises and yachting tales, read *Hunt's Yachting Magazine*, established 1852. Can be had of booksellers generally, or direct from Hunt & Co., 119 Church Street, Edgware Road, London, E. C., England. Published monthly, one shilling sterling per number.—[*Adv.*

Sea and River Fishing.

FISH IN SEASON IN OCTOBER.

FRESH WATER.

Black Bass, *Micropterus salmoides*; *M. nigricans*.
Muskalonge, *Esox nobilior*.
Pike or Pickerel, *Esox lucius*.
Yellow Perch, *Perca flavescens*

SALT WATER.

Sea Bass, *Scia nops ocellatus*.
Striped Bass, *Roccus lineatus*.
White Perch, *Morone americana*.
Weakfish, *Cynoscion regalis*.
Bluefish, *Pomatomus saltatrix*.
Spanish Mackerel, *Cybium maculatum*.
Cero, *Cybium regale*.
Bonito, *Sarda pelamys*.
Kingfish, *Menticirrus nebulosus*.

—The following recipe for a chowder is given by the Portsmouth *Times*:—

To make a chowder—that delicious dish—
The first important thing is, catch your fish!
Then scale and slice it, put it in a pot,
In which is fried salt pork, just sizzling hot;
Add crackers, milk, a spoonful of sweet oil,
Pepper and salt, and then put on to boil.
A few sliced onions give it a toothsome relish
Though the fastidious think this flavor—horrible.

BLUEFISH.—There has been a fine run of from two to seven pound bluefish on the Long Island coast during the whole of October, and numerous fishing parties from Canarsie and other eligible points have taken advantage thereof and enjoyed good sport and abundant returns. There will probably be a run of large bluefish (twelve to sixteen pounds) before frost. As soon as frost comes they will disappear. Trolling and rod-fishing with reel are the approved modes.

RHODE ISLAND—*Newport, Oct. 9th.*—Bluefish and little mackerel are caught now in large quantities. The bluefish are in fine condition and bring a fair price. Blackfish (Newport's favorite chowder fish) are in fine condition, and are caught from the many points of rocks around our island. Captain Swan caught a fox or thropher shark while fishing for bluefish. Seldom seen, so near our harbor. OCCASIONAL.

—Merrick Goldthwaithe caught thirty-one pouts a few nights ago in Singletary Pond, the handsomest and largest pouts that probably ever were caught in this vicinity; several of them weighed over two pounds apiece and quite a number weighed one and a half pounds.

—An old gentleman crossing the Shenandoah River at Howellsville Ford recently, followed by a favorite shepherd dog, heard a great commotion behind him in the water. Turning around to see the cause, he found that his dog had been seized by the tail by a monstrous bass, and carried under three times before he could release himself from its almost fatal grip.

NEW YORK—*Eaton, Sept. 29th.*—Our "Kamping Klub" has just returned from the Erieville reservoir. We went into camp on the 10th. The reservoir was very low and in "bloom," although we did not know what was the matter with the water until the arrival of the FOREST AND STREAM of that week, containing the article from Seth Green on that subject. We can certify to the statement of Mr. Green, as the bass fishing has been excellent all summer, and a large number have been taken up to about the time we encamped there, and but few were caught during our stay. Last year during the first week in September, we caught a large number of black bass weighing from two to four and a quarter pounds, but this year only about a dozen were taken in the whole ten days. Game was also scarce this year, a few snipe and a couple of ducks being all that was shot; but for all that, we had a very pleasant time. J. B. TUCKERMAN.

CALIFORNIA FISHING.—Occasionally I have the pleasure to send you some few words relating to fishing on this coast, and especially that of the members of our Sportsman's Club of San Francisco. This now still flourishing association, succeeding better lately, on account of having enforced our game laws by convicting persons selling in the market quail out of season, and watching keenly our trout, salmon, and other sporting and commercial interests—this useful society, I say, possesses by lease at present only one large and splendid lake (Merced), stocked with young salmon and some large trout, which afforded the members and some friends much excellent recreation and amusement for about two months last spring, bait fishing, some fishermen catching as many as twenty-five each per day.

Through the kind courtesy of Mr. Howard, president of the Spring Valley Water Company, many respectable parties, lovers of the rod, as well as members of the Sportsman's Club, received permission gratis to fish in two of the company's lakes—San Andreas and Pilarcitos. In the first we had some good fishing with the fly, besides bait fishing, capturing numbers of silver trout, which, although small, afforded pleasant amusement—now and then a specimen being captured of from two to four pounds, products of a former planting some three years since. Lake Pilarcitos yielded about a similar recreation, only that the fish there are the genuine brook trout, and running nearly the same size as the San Andreas fish, but only the larger ones there are more numerous. The scenery surrounding this last lake is most beautiful and romantic, and is much embellished with hills and rocks covered with handsome vegetation—trees, shrubs and flowers.

As the season has advanced success with the fly and angling has much fallen off, as is usual, though a few fish still continue to be creeled in both of these lakes.

Our brook trout fishing has been quite partial this season, some of our streams furnishing fine sport, while others have yielded but little, compared with some years.

The McCloud and Sacramento river fishing, about Mount Shasta, toward the north, for both salmon and trout, never fail to afford all the satifaction as to numbers and size, at least, that visitors can desire, besides gratifying the lovers of the wildest and most striking natural scenery. The trip to this almost exceptionally magnificent fishing and scenery requires at least two weeks, while excursions to the lakes and brooks above mentioned may be accomplished in two or three days.

We have had very few young salmon running into or frequenting our bay in fall, winter or spring for these two last years, consequently our city anglers have missed the amusement which they enjoyed in capturing them from the Oakland long wharf and a few other points, several years previously. But we live in hope in the future, as we do in so many other things in this life and the next, concerning which most of us have much faith and trust. E. J. HOOPER.

WYOMING TERRITORY.—*Spokeane Falls, Stevens Co., Sept. 25th.*—I arrived here September 23d, after an uneventful and monotonous trip of five days through the bunch grass hills at Eastern Washington Territory. Made the journey in a private ox team from Walla Walla. This point is certainly the fisherman's paradise, and the number and size of the trout taken in this vicinity is astonishing. I took ten trout yesterday afternoon just below the falls that weighed in the aggregate a trifle over twenty pounds; one of them tipped the scales at three and a half pounds, and was twenty inches in length. They are caught in almost every manner known to the disciples of Walton; with kralling hooks, flies, grasshoppers, and traps; the latter, however, be it said, are used only by the Indians. Everybody goes fishing here, the young and old, great and small, natives and whites, and even the hogs take an unusual interest in it, as I found to my cost. They are very fond of the toothsome trout, and made way with a very nice one I had killed and laid under a willow on the bank. MULTNOMAH.

FISHING INDUSTRIES OF THE GULF COAST.

SARASOTA, *Fla., Sept. 18th.*

THE salt fishing industry on this coast has opened earlier and under better auspices this season than usual. The fish sought (mullet,) are plentier and much fatter than we usually find them before the month of October. Perhaps there are not as many fisheries started as some years, but those who are engaged are the largest and best fitted out forbusiness, and consequently a success. Last season there were some dozen in the vicinity of Charlotte's Harbor against three this year: but these each work from twenty-five to forty men. Those next to the northward are at Big Sarasota Pass. Here is the first ranche, run for the country trade, only some eight or ten hands, but to balance it, is the ranche of Capt. Joe Pretty, some thirty hands, well fitted up, and in the Cuban trade, like those of Charlotte's Harbor. They arrived during what may pass for the "Line Storm," so it is hoped a rough beginning will make a smooth ending. The next to the north and the last in the export trade is that of Messrs. Sweetzer & Thompson at Hunter's Point, on the main land some two miles from Long Boat Inlet. They work some twenty hands, but as the arrangements both for catching and curing of the fish are superior to any other ranche on the coast, they can cure as many as thirty are able to handle under the ordinary and old style of fit up. The method of preparing mullet for market, especially the Cuban market, is so different to that pursued with mackerel or any other fish put up in Northern waters, that I must reserve a description of it for some future letter.

Fish have been so plentiful at Hunter's Point, that Capt. Sweetzer has his first load ready and waiting the arrival of the vessel for shipment. While noting the large numbers of mullet which pass this point, coming both from Long Boat Inlet and from the entrance of Tampa Bay, I cannot help calling attention to the quantities of pompano and Spanish mackerel which might be taken here very early in the year, were there the only direct means of shipment on ice to New York. There is probably not a month in the year when Spanish mackerel cannot be found. The outside beach from Long Boat Inlet to Edmout Light is alive with the brightly colored little bivalve, known locally as the pompano shell, and the pompano themselves begin to come in schools early in February, which is fully two months and a half earlier than they are now placed on the market from other points. To those of your readers who have eaten pompano it is unnecessary for me to say a word as to its merits, while to those who have not, I must say they have a rich treat yet to experience, for the pompano is admitted to be the best flavored fish found in salt water. Indeed many would decide it to be better worth its dollar or more per pound than the salmon or brook trout, and all that is wanting to place this excellent fish early and abundantly in all the Northern cities, is a few miles of railroad. The men and the means for catching the fish are ready and on the spot.

The Hunter's Point fishery is the last of any importance. There are a number of small affairs scattered along the coast to the northward, all of which fish for the country trade. Some have small seines, but many depend upon the cast net for a supply of fish. Even when conducted on such a small scale as this, the business would pay if those who put up the fish would take more care in curing them; that is, would put them up neatly and so they will keep. The majority of fisherman have been satisfied if the fish kept long enough to be sold and off their hands, not caring how soon they might spoil in possession of the consumer; but the result has been to nearly break up the country trade until you reach Apalachicola, where a higher standard has been kept up, and as a natural consequence there is a good demand for fish from that point all through southern Georgia and Alabama.

MAJOR SARASOTA.

Furs and Trapping.

THE FUR-BEARING ANIMALS OF FLORIDA.—*Titusville, Brevard Co., Fla.*—The opportunities of the trapper in Florida are not, it seems to me, appreciated. The dense hummocks, the prairies and the salt marshes swarm with large and small fur-bearing animals. Of these the most numerous are the opposum and raccoon, next the otter, then comes the wild cat or bay lynx; next the black bear, and then the much dreaded panther (*Felis concolor*), called here the tiger, which often grows to a length of twelve or thirteen feet, tail and all. These are the principal fur animals.

The trapper will also get a small sprinkling of red and grey foxes, skunks, and down round Lake Okechobee and the great Kissimmee prairie he will find quite a number of the great grey wolf, which ends the list of fur.

The immense number of some of these animals is truly astonishing. One hundred and fifty raccoons have been poisoned in a month by a single planter, and of opposums there are no end. One well-known gentleman on Merritt's Island killed eight otters at one discharge of a large duck gun. Their slides in the sand on banks of creeks I frequently come across when surveying. Black bears are equally numerous. One hunter killed nine in six weeks on the east shore of Banana River.

The number of all these different animals that the skilled trapper could collect would astonish any one. One may almost say they are never trapped. Occasionally a boy or darkey will set a few dead-falls, but no systematic trapping by an experienced trapper has ever come to my knowledge. The planters poison large numbers to get rid of them, but never save the skins, deeming it beneath their dignity to bother with "varmint;" niggers' work, they call it, and leave it to them. I am speaking of the native Southron.

Of course it is well known that Southern skins are very poor in comparison with Northern skins of the same species, but they make up in quantity what is lacking in quality. There was a fur dealer in Titusville all last winter and spring, buying what skins he could get and paying cash. He advertised extensively, but found it almost impossible to get up any enthusiasm. The fact was, there was no experienced trapper in the country, and what few skins he was able to obtain were furnished mostly by boys and niggers, and were nearly all shot.

I have obtained his permission to copy the prices he paid, which are as follows:—

Bears	.50 a $3.00	Mink	.15 a .30
Cubs	.25 a 1.00	Otter	.75 a $2.00
Cat—Wild	.10 a .25	Opossum	.03 a .06
Black house	.08 a .20	Panther	.75 a 1.50
Common house	.05 a .08	Raccoon	.12 a .24
Deer skins, per lb.		Skunk—Black	.50 a .70
Winter	.10 a .13	Half striped	.50 a .40
Summer	.12 a .15	Striped	.12 a .20
Buck, Indian dressed	.55 a .60	White	.08 a .10
Fox Red	.50 a .75	Wolf	.50 a .80
Gray	.30 a .50		

Above prices were for prime No. 1 cased skins. Open skins, excepting bears, raccoons and wolf, 10 to 25 per cent. less.

Of course these prices will seem very low to the Northern trapper, but ease of capture and the abundance will make up. The raccoons, foxes and lynx are smaller than their cogeners at the North. The dealer informed me that no fox, mink or wolf were received. It is probable that the mink is only an occasional visitant to this State. The beaver is said to have occurred, but is now never seen. It may be found in the northern part of the State, as it is known to occur in Georgia.

Deer skins came in quite freely. Of skunks there are two species, the common skunk (*Mephitis mephitica*) and the little striped skunk (*Mephitis bicolar*), the last only found on the east coast between Indian River and the ocean. This locality is the only place west of the Mississippi River where this species is found. The Indians in the Great Cypress Swamps—the remnant of the Seminoles—tan the deer skins in a very fine manner. They are also tanned by a tanner in Titusville, who also tans the otter (summer skins) into a very durable and waterproof shoe leather.

Besides these animals there is found in Florida the manatee, with a skin an inch thick. It was made by the Indians into shields. Two species of rabbit occur—their skins are used for felt and bring fifteen to twenty-five cents per dozen. There are three species of squirrel. The pelts are used for linings, but have not much commercial value. The dealer can get up quite a trade in dry flint cow hides, and the hunter will find some of these cattle wild and unmarked, and such he can shoot with impunity. Wild hogs also abound in certain localities, and the old boars are the most dangerous animals in the State.

The naturalist may be interested to know that there are seven species of bats found in the State, and moles, shrews, salamanders, or] gophers, and numerous rats and mice.

There is a very remarkable difference in the bears' skins from Florida. Some have thick, long fur, while others have no more fur on them than a hog. The young bears and cubs have the best fur. Occasionally an old one is found, probably a traveler from the mountains of Northern Georgia, with a very valuable pelt, but the majority of old large bears have scratched off all their fur going through the sour palmetto and scratching fleas. The hides of such are made into leather and used by harness makers and saddlers.

AL. I. GATOR.

THE FUR TRADE.—Reports of the Leipsic fur sales now in progress have been received in this city, and are very disappointing. For muskrat there is no demand, and what stock was offered was promptly withdrawn, as holders would not accept anything like the slaughter prices bid. Skunk declined fully 30 per cent.—*Montreal Gazette, Sept. 27th.*

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We make no charge for answering inquiries in this column.*

H. C. Dryden., Troy, Mo.—See an article on wild rice elsewhere.

H. R., Mobile, Ala.—We must refer you to the advertising columns of this paper.

PELICAN CLUB, San Francisco.—We publish elsewhere directions for wild rice growing.

T. M. B., Mount Airy, N. C.—The remedies you used (milk, etc.), were the proper ones for the case.

BUCKEYE BOY, Youngstown, O.—You will find that glass ball shooting materially helps you for field work.

GLENCOE, Morston.—You can buy ferrets and ferret muzzles of C. Van Vechten, Victor, Ontario county N. Y.

H. S. H., Highland, Mich.—Your wild rice may appear next spring, but we are afraid not. Write to Valentine.

TAXIDERMIST, Norwalk, Conn.—Mr. Batty's new book on Taxidermy is now in press. We were in error in stating that it had yet been published.

E. G. AND SEVERAL YOUNG MEN.—For good shooting go to the Bay View House, Mr Williams, proprietor, Good Ground, L. I. Take Long Island R. R.

DEAD SHOT, Applebackville, Pa.—If you will send us your name and state more specifically what kind of game you are seeking information about, we shall be glad to help you.

A. P. L., Dunnellen, N. J.—To have your gun altered take it to H. C. Squires, No. 1, Cortlandt street, this city, or to any of the other gunsmiths who are to be found by reference to our advertising columns.

F. F., Augusta, Ga.—Will the grease from pink-edge wads put over powder, injure the powder, when shells are loaded without the grease proof wads, and laid by for nine or ten months? Ans. Not to any extent.

W. E. A., Morris, Minn.—What can I give my bitch to make her shed her coat? It is last year's; she looks very rough. Ans. Two capsules of tar every day for three or four days, or a raw egg night and morning for a week.

T. J. F., Jamestown, N. Y.—For information about Clay, Kanawha and McDowell counties, West Virginia, write to John Hawkins, or Thos. Beckley, Kanawha Falls, W. Va. There is good deer and wild turkey shooting generally in the counties you speak of.

CHILLED SHOT, Cambridge, Mass.—Colorado is an excellent country for stock-raising. The climate is fine and bracing. In different parts of the State you will find all kinds of large and small game, from pinnated grouse to elk. Read the letters in our current numbers.

SUBSCRIBER, Buffalo.—What constitutes an "avy" cocker spaniel? Also please give a brief general description of one, and how they rank with other cookers? Ans. Have never heard of the breed. For an exhaustive article on spaniels we must refer you to our issue No. 22 of Vol. II.

W. J. P., Hagersville.—Please tell me where I can get a book treating on rifles and rifle shooting? Ans. Hints to Riflemen, by H. W. S. Cleveland; Wingate's Rifle Manual; The Rifle, its Theory and Practice, by A. Walker; How to Become an Expert Shot. All the above for sale by the Orange Judd Co., 245 Broadway.

C. S. S., Cincinnati.—Would a seven-pound gun be perfectly safe, say twelve-gauge laminated steel barrels, twenty-eight-inches? Would such a gun be suitable for chickens, ducks, squirrels and grouse? Would such gun shoot as strong as a good muzzle-loader? Could I get such a gun of Colt make for $75 or $80? Ans. To all your questions, yes.

F. S., Connersville, Ind.—My pup's eyes have commenced running more or less every day; at times a skin seems to be drawn almost over one half of the eye ball, otherwise the pup is in perfect health; very lively and in aparently good condition? Ans. Bathe the eye with cold water and if the film continues blow on it a little powdered burnt alum.

JOHN W., New York.—Please advise me as to caliber, weight, length of barrel, etc., of a sporting rifle suitable for use during a trip to the North Woods for deer? I use a 7¼ pounds shot gun and desire as light a rifle that will be effective for game from deer to smaller game? Ans. A rifle weighing 8 to 8½ lbs., 26-inch bbl. and 44 calibre would answer your purpose.

F. F. M., Brooklyn, L. I.—Robins, goldens, woodpeckers, highholders and other insectivorous birds are not to be shot. The open season for game in New York State is as follows: Deer, Aug. 1st, to Nov. 30th; wild fowl, Sept. 1st to May 1st; quail, Nov. 1st to Jan 1st; hares, Nov. 1st to Jan. 1st; woodcock, Sept. 1st to Jan. 1st; ruffed and pinnated grouse, Sept. 1st to Jan. 1st.

YOUNG SPORTSMAN, Washington.—Directly in face of this standing notice, at head of Correspondents' Column, you send us *ten* varied questions! Do you expect us to answer them, under the circumstances? We do not hesitate at any painstaking to inform correspondents who respect our reasonable request, but will not put ourselves to the trouble to answer anonymous queries.

W. T. B., Baltimore.—Is there not a method of loading shells that will prevent a gun from scattering shot? I use 1 oz. shot and 2¼ drachms powder, 8's, and load the same for 6's and use 1¼ oz. shot; 3 drachms powder for No. 4 shot? Ans. You can make your gun shoot slightly closer by using a little more shot, but your best plan would be to have it moderately choked, which can be done at a slight expense.

J. D. D., Richmond, Va.—A party here has a setter, black and white; they are trying to pass him as Irish. I think he is of the Llewellyn stock. We have a small bet. Did you ever hear of an Irish setter other than red, or a red and white? How are the Scotch ones? Ans. The recognized color of the Irish setter is red; the Scotch or Gordon setter, black and tan. The dog is probably an English setter, certainly not an Irish one.

E. K., Leon, N. Y.—We cannot express opinions regarding the merits of guns made by different manufacturers. Those you mention are equal in merit of similar grades. There are a large number of issues of this paper containing articles on choke-bored guns. Your best plan would be to buy Mr. Greener's book, "Choke-Bore Guns and How to Load for all Kinds of Game." We can send it on receipt of price, $3.50.

W. H. R. DU B., Hoboken.—Will you inform me in your next issue where is a good place for shooting near by in New Jersey? what game is in season in October, and what are the laws regarding shooting? Ans. New Jersey is especially noted for its beach birds, ducks, snipe, quail and woodcock, all of which are in season in October. There are some ruffed grouse, and a very few deer. The law requires every resident and non-resident to pay a small annual license fee.

E. D., Salt Lake City.—As a subscriber I take the liberty of asking a question. Where can I find illustrated plates, colored, if they are to be had, of all kinds of flies, artificial, for fishing I mean; such that a novice can get some idea of the difference between a coachman and a palmer, or a Nicholson and a blue bottle? Ans. There are no colored plates of American flies. Hallock's "Sportsman's Gazetteer" describes the color, material and pattern of several dozen of the most common.

SUBSCRIBER, Austin, Nev.—In a game shooting match, eight men each side, one man was absent, making eight to seven. The judges, therefore, decided to throw out the score of the eighth man on the other side. Was that right? Ans. No, it does not seem fair, as the one thrown out might be the best or the worst shot. We should suggest as a solution that the side which was one man short be allowed a count equal to the average made, or else that the match be shot again.

E. R. W., City.—Your specimen is the common puffer or balloon fish, which belongs to the family *Gymnodontidæ*, distinguished not only for the faculty of blowing themselves up into a globular ball, but by horny beak like the snapping turtle. The skin is covered with slender prickles or stout spines, which serve admirably for defence. There are some sixty species in this family. Those with spines are usually found in tropical waters. The scientific name of your fish is *Tetraodon turgidus*.

ISAACS, Shelter Island.—Be kind enough to give me the correct name for the bony fish caught here in such numbers; is it mossbunker or mass-b anker? To what family does it belong? Ans. Family Clupeidæ. *Brevoortia Menhaden*. (Mitch. Gill.) Called menhaden in Vineyard Sound; munnawhatteaug by Narragansett Indians; pogy poghaden, on east coast of New England; mossbunker in New York; panbaden panhagen in New England; hard head and bony fish in Massachusetts Bay; skippaug, or bunker, on east end of Long Island; bony fish at Saybrook; whitefish from Saybrook to Milford, Conn.; fat back and yellow tail on coast of North Carolina; bug fish in the Carolinas. See report United States Fish Commission.

H. M. W., Hoosac Falls.—We have a Spanish poodle who seems in perfect health but whose breath is so offensive that it is impossible to have him near one. As he is fed with great care, only bread and milk, or potatoes, never meat, we are at a loss to ascertain the cause. Can you tell us? Also my Collie dogs (three of them) have had a dry sore on the top of their ears which is entirely destitute of hair and which attracts the flies, who draw the blood. What can I wash it with? Ans. The poodle's bad breath is owing either to defective teeth or to worms. Examine the teeth and see if they are decayed, and if so have the diseased ones extracted. If worms are suspected give areca nut. For the Collies' ears, wash them well with Spratt's or Castile soap and then anoint frequently with carbolic salve, to be had at any drug store If this is not effective, rub them frequently with crude petroleum.

FOREST AND STREAM
ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY.

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

**Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, OCTOBER 16, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remitted to us is lost.

☞ Trade supplied by American News Company.

"A GOVERNMENT KEY TO GEOGRAPHY."—Postmaster General Key has issued an edict requiring all letters to be superscribed with the full address of town, county and State, otherwise they will not be delivered. The enforcement of this unexpected and peremptory mandate has already done an incalculable amount of harm. Not only is the order preposterous, so far as concerning many hundreds of thousands of letter writers who have no means of learning the county locations of the towns to which they must write, but its absurdity is best shown when a man in New York City must address a letter to us, "FOREST AND STREAM Publishing Company, New York City, New York County, New York." Now let us add, "The United States of North America, Western Hemisphere"—yes, and "World," lest by any possibility the missive should stray to the Man in the Moon.

There is, doubtless, some cause for this strange regulation, but its strict enforcement will soon derange and obstruct the business of the country, causing untold delay, vexation and pecuniary loss. If it be the design of the Post Office Department to teach geography to the American people, let such an object be known, and provide some other service for the transportation of the mails. Every grown person and child should be required to know every town, county and State to which he writes, as a qualification for citizenship; that is, in the estimation of the wiseacres of the Post-Office Department.

WILD RICE.—The wild rice season has come again, and with it numerous letters from correspondents pour in upon us asking all about its culture. We mean to tell all we know about it now, and must ask all of our interested readers to look the article over before writing to us about the subject.

First—Wild rice may be obtained of Mr. A. M. Valentine, Janesville, Wis., who has secured one hundred bushels this year by having engaged it a season in advance. The cost is $3 per bushel, and parties ordering must pay transportation charges.

Second—The seed may be sown either in the fall or in the spring. The rice should be soaked until it sinks and then sown in water from two to five inches in depth. The quantity of seed to the acre may be varied from a bushel to a barrel.

The culture of this cereal has been in some cases successful and in others unsuccessful. There are many conditions of success and failure as in other crops. The majority of experiments have resulted favorably.

We shall be glad to hear from all gentlemen who are interested in its culture as to their methods and success.

—When the Blackfeet Indians wish to express great sorrow, they say "My heart is on the ground."

HISTORY AND PRESENT CONDITION OF THE FISHERIES IN THE UNITED STATES.

IN order to obtain all necessary statistics as above, the U. S. Fishery Commission have very wisely availed themselves of the machinery of the U. S. census, and have issued broadcast a series of interrogatory circulars, in the hope of reaching, through the friends of fish and fish culture, and of our commercial industries, all the data which can be obtained on the subject. Not only does the history embrace statistics of production, and the present capacity of our sea and inland fisheries, but statistics of apparatus and implements, modes of capture, migrations of fish, enemies of fish, food of fishes, habitat and distribution of species, specific characteristics, spawning habits, curing, marketing, sources of supply, fish guano, fishermen, vessels, composition and nationality of crews, &c.; and to facilitate the collection of such statistical material the circular blanks are provided with the names of each fish and shell-fish inquired after; all departments of inquiry are particularized, so that the laziest or least intelligent fisherman or coast dweller can have small excuse for not contributing his mite of information to the vast and important general fund. Such a compendium as this will presumably be will have a value possessed in like degree by no other tabulated statistical collection. With the history of this vast industry traced back to its inception, and brought down to the year 1880, and with the condition of the fisheries there indicated and mapped out, as it were, in plain view and tangible presence, it is manifest that fish-catchers and fish-culturists will have a rare basis for intelligent future action and operation. We may hope that the day is not distant when the Fish Commissioners of our several States, who have been serving as independent brigades in desultory work, will find a base for systematic operations, where their energies will be neither wasted or misapplied. They should be all made subordinate and subsidiary to the U. S. Fishery Commission as a Board of Direction, and this Board of Direction should be empowered by action of Congress to obtain appropriations from the several States for purposes of fish culture and fish protection, and to indicate and draft a budget of protective laws based upon the scientific information which their machinery enables them to gather. When the census is completed, the discussion of the policy here indicated will be in order.

THE SPORTSMAN DEFINED.

THE genuine sportsman, whatever his business may be, is always a true artist. He pursues his favorite amusement with a zest which astonishes the pot hunter and spear wielder. While they sleep or dawdle around camp, he is out and away, gathering inspiration from the nameless delights which rise like a perfume on every breeze and salute him with soulful welcome. The varying tints of spring's soft verdure, the sheen of midsummer's embellishment, and the glorious fruition of autumnal splendor, imbue his mind with feelings of superior affection for every concomitant of nature. There is a warmth in the glance of his eye, and a whole-souled, ardent ease in his way of doing the most unimportant things, which the average stay at home, plodding man of business has no time to learn or wish to cultivate. However his voice may sound it still retains that undertone of melody which charms the human heart and gratifies the reasoning analysis of skilled intelligence. The simple secret of all this superiority is improvement, the deep draughts which sober and refine without diminishing the glow of animal spirits or checking the cultivation of creative genius. Ruskin has explained this intellectual accretion by declaring that it results from a cultivation of the better impulses of our nature.* And no doubt he fathoms the theme with the lead line of art, which Sir. T. Browne lengthens in his declaration: "All things are artificial, for nature is the art of God." Seneca, too, bears witness to the sound philosophy of natural art. "It is," he says, "the bounty of nature that we live, but of philosophy, that we live well; which is, in truth, a greater benefit than life itself."

Wherever a sportsman of this character is found we recognise a gentleman at once, and recognise what tremendous influences he wields over the young. No matter how humble, or how exalted his station in life may be, we see the young attracted to him, often by his very pursuits, and comprehend the wonderful prudence of divine intent.

Such a sportsman will not fail to be abroad for days, and weeks if possible, during the natural holiday of nature. Of all the year this concentration in every kind and degree has no equal. The air is pure and bracing. The fogs and chill rains of September have passed away, leaving the whole landscape in the very zenith of its beauty and the earth laden with material realizations of the languid summer's prophecy. Every bird is on the wing and every voice of nature filling the azure with its inspiring diapason of melody and praise. The gladdened hearts of child and man unite in the serene pleasures of a simple woodland walk or the inspiring ardor of every known sport by field and flood. The morning song of Memnon is not an uncertain, lingering monody, but glad, and sweet and tender like the united voices of a happy household "when the vesper hymn is stealing" and the soul is filled with transcendent peace. EGO.

* "He only advances in life whose heart is getting softer, whose blood warmer, whose brain quicker, whose spirit is entering into living space."

GAME PROTECTION.

THE LAW PERMITTING HOUNDING.—*Jamestown, N. Y., Sept. 30th.*—We have a club here composed of sixty-five members, a gallery fitted up to practice in winter and stormy weather, and have just fitted a 200-yard range for off-hand practice. Our members keep a sharp look-out for all infringements upon the game laws; but the law passed last winter in regard to hounding of deer does not suit us out here, and is going to be the means of cleaning them all out unless we can have it amended. It just suits the Indians on the Cattaraugus reservation, and they are going to annihilate the last deer in this section if it is not stopped, and many of the vagabond whites are lending a helping hand. I have fought dogs all of my younger years, and tried to save the game, and would do so now if I were at liberty. But business compels me to stay here in the city, and I cannot get out to protect them. They ran into the river a splendid four-prong buck last week near the State line, and killed him. He was quite poor, and had the smallest set of antlers imaginable for a deer of his size. The fact is, the weather was so severe here last winter that the deer came through mere skin and bones, and have not fully recovered yet. We shall see no large or remarkable sets of antlers this fall for that reason. Our club are all to a man against this hounding of deer at any season of the year, and we are bound to have our Assemblyman from this district do what he can for the cause. The black and gray squirrel are also pretty well killed out. The ruffed grouse stood it better, and are quite plenty. Woodcock about as usual. Duck rather scarce on our lake, but hope for more later in the season. Our lake fishermen are having lots of fun, taking good hauls every day trolling. But the law prohibiting the taking of them through the ice in winter is all that saved them. THOS. J. F.

Our readers will bear in mind that, although the law of 1879 permits hounding deer with dogs, it does not apply to St. Lawrence county.

NO LICENSE IN PRINCE EDWARD ISLAND.—No shooting license is required for non-residents in Prince Edward Island. For the convenience of our friends who have an eye to the game of that country, we append the close game seasons:—Trout, Oct. 1st to Dec. 1st; salmon, Sept. 1st to Dec. 31st; partridge, Feb. 15th to Oct. 1st; woodcock and snipe, Jan. 1st to Aug. 20th; water fowl, wild duck, March 1st to Aug. 10th; muskrat, otter and martin, May 1st to Nov. 1st; hares or rabbits, March 1st to Sept. 1st. The secretary of the Fish and Game Protective Association is Hon. S. D. Fitzgerald, Charlottetown, N. B.

A TRIP TO NORTH PARK.

(SEVENTH PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

WHAT a charm there is about a camp among the green timber! The fragrant needles of the evergreens, spread thickly upon the ground, form a soft dry couch which would woo sleep to men less tired than ourselves. A glorious fire of resinous logs sends up spouts of flame which almost scorch the tufted twigs of the great fir beneath which we lie stretched at full length, and black columns of smoke, varied occasionally by showers of sparks, wind in and out among the branches above us. The yellow and brown trunks of the trees flicker in the changeful glow of the red light, and cast queer shadows behind them into the dark depths of the forest. Just at the edge of the circle of light we can see the shadowy and uncertain forms of some of the horses, which, having satisfied their appetite, have moved toward us to share the cheery sociability of the fire. As soon as the shadows had descended on the valley the temperature fell rapidly, and by the time it was quite dark the air was cold and crisp. We spread our blankets close to the fire and slept well and soundly, only awakened once or twice during the night by the noise made by some one who rose to replenish the fire, which had burned down to a heap of white ashes.

The early sun peeping over the snowy tops of the neighboring mountains, and sending his long slanting rays in and out among the pine trees in our little valley, may have smiled to himself as he looked upon the shivering half-dozen wretches who were clustered together as close to the fire as possible. The change in the appearance of things which had taken place since the night before was startling. The grass, flowers and willows were white with frost, and all the beautiful blossoms that we had so much admired during our ride of yesterday, were shriveled and apparently destroyed by the keen breath of approaching winter; the ice on some water left standing in our camp-kettle was so thick that we took the handle of the hatchet to break it, and the manes of the horses were sparkling with congealed moisture. The operation of performing one's toilet in the half-frozen water which flowed down from a snow-drift above our camp, was a painful one, and most of the party, I think, cut their ablutions very short that morning. Half an hour after the sun

rose, however, the frost had all melted, and the high grass and willow bushes were dripping with moisture. The flowers seemed to recover, and once more held up their heads, and the temperature rose almost to that of a summer day.

As Kosier and I were the only members of the party that had ever packed before, the labor of loading the mules, adjusting ropes and so on, naturally fell to us, and, as we had only two animals to pack, we got along very well. There are few things more disagreeable than packing, however, and I recommend any of your readers who may purpose to travel through the mountains with a pack train to secure a man who is up in this business before starting out. It will be far cheaper to do this than to have to repack your animals three or four times a day, besides ruining their backs and your own hands. It is no joke to be obliged to handle the wet, half-frozen ropes every morning for an hour, and gloves, although they protect the hands for a time, wear out after a few days' service, so that they are of no use whatever.

From our camp we pushed out as early as possible, travelling in single file, Kosier in the lead and the packs near the head of the line. The valley became rapidly narrower and rougher, and the impetuous force of the stream, which was now only a brooklet, increased. Sometimes it fell down in a sheer cascade for ten or fifteen feet, and at such points the trail would leave the stream and wind about in the timber until this ascent was overcome, when it would return to near the water's edge. Some of the slopes were very steep, and there were not a few rather dangerous places where a misstep on the part of one's horse would have thrown the rider down forty or fifty feet sheer into the streams bed below. I derived no little amusement during the ride from watching our little white mule which walked just ahead of me. He carried a light pack, but as it was composed mainly of blankets and robes it was quite bulky and stood up so high above the saddle that it occasionally became caught in the overhanging branches. The effect of this large pack on the small mule was funny enough; but when the little animal had to climb up an almost vertical slope the pack would stand out so that it seemed as if it must pull him over backwards. He never fell, however, and reached the summit in safety. The timber, from our camp up to where it ceased to grow, was very fine and large, many of the trees being apparently tall and stout enough for the spars of the largest ship. There was considerable down timber, which delayed us more or less, for some of the logs were too large to be stepped over, and we were hence obliged to make considerable detours to get by them. At last, however, the valley through which we were travelling became a mere gorge, and after climbing a few hundred feet up a very steep slope we found ourselves at the edge of the timber. Only the forest ended here, however; a few stunted spruces flourished in the little ravines and sheltered nooks for 500 feet more of the ascent before finally giving up and acknowledging themselves vanquished by the Arctic climate. We paused at the foot of the open slope to allow those behind us to come up. Before us lay spread out a wide amphitheatre, surrounded on all sides by the towering and rugged summits of the great Continental Divide. The floor of this basin sloped smoothly down to a line through its midst, along which flowed a sparkling brook, fed by a lake lying far above among the snow-fields, and into which poured a hundred little springs that arose everywhere throughout the broad meadow. Low willows, the last sign of arboreal vegetation, bordered the brook, and their dark glistening leaves marked its course for a little distance, and then they, too, disappeared and the brook flowed through the grass. To the northwest the heights above rose vertically for several thousand feet to the rounded summit of the range, the bare rocks being streaked with alternate vertical lines of red and yellow; nearly to the south was the pass which we were attempting to reach, and here was a deep sag, two or three thousand feet below the general level of the hill, up to which the amphitheatre which we were entering sloped to a gradual ascent. On the south and west of the pass the mountains rose by successive steps to a great height, terminating in a confused mass of gigantic fragments, from which towered towards the skies three slender pinnacles, which seemed too delicate to long withstand the fury of the elements that for nine months of the year beat and buffet them with unremitting violence. Beyond the pinnacles to the west lies an endless confusion of rocks. Piled one upon another, of all shapes and sizes, gorged here and there with ravines whose black depths the eye cannot pierce, or showing little patches of smooth level meadow which, though far above the line of eternal snow, shine bright and green as a bit of lawn in May, they present an endless variety of scenery which cannot fail to enchant the beholder.

The mountain vale which we now enter is carpeted with the softest and greenest of grass, and with an astonishing profusion of flowers, which, for beauty and variety, I think I have never seen equalled. Up to the edge of the pine forest the crimson *Epilobium*, not differing materially from one of our Eastern species, grew in profusion, and in the open spots just beyond were yellow *Ranunculaceæ* and a deep purple larkspur, which attains a height of two feet. Asters and other composite flowers of all hues, from white through pink, red and blue to purple, dotted the ground, and grew up in many places *through the snow*. A lovely *Campanula*, like our own, but with the flower an inch or more in length, waved its bells in the cool breeze, while the pale flax flower, as much at home here as on the plains, nodded rythmically, keeping time to the music of its neighbors' chimes. A blue gentian grew here and there, and the pale yellow flower of the wild mustard and the crimson of a meadow pink, lent their aid to brighten and diversify the scene. One of the most beautiful among the many lovely plants which we saw here was a columbine (*Aquilegia*). The plant resembles in most respects our Eastern species, but the flower is not less than one inch and a half across and is pure white, shading into a pale blue on the closed spur. It resembles more nearly some gorgeous tropical flower than one from the Alpine height of 13,000 feet. And these floral gems are found growing beneath the shadow of the snow-drifts, and nourished by their cool drippings. But I might run on forever on this subject had I the space, for the flora was so varied and abundant that it would have driven a botanist wild with delight.

Slowly riding through the sloping field, we approached the summit of the pass. The ascent was steeper than I had supposed, and our wearied horses had enough to do to drag themselves toward the top without carrying us. But two species of birds were visible—the Western song-sparrow and the titlark—and, besides these, a few insects were the only living things to be seen. The summit reached, we halted to rest and admire the scene before us. To the south and east we could see almost the whole of Middle Park, and all the rugged and broken mountains which surround it. In a little lake, which nestled in the mountain side a few hundred feet below us on the other side of the divide, the north fork of the Grand River takes its rise, and flows in a continually-increasing torrent down the narrow, wooded gorge, whose whole length we can see as far as the plains of Middle Park. Grand Lake is not visible from the point where we stand. In a saddle high above us to the right lies a huge snow-drift, whose melting waters from one extremity flow into the stream along which we have been traveling, thence into the North Platte, and passing through the Park, between the Big Horn and Laramie Mountains, out into the plains, through the great grazing and wheat regions of Wyoming and Nebraska, pour into the Missouri, the Mississippi and the Gulf. From the other end of this drift a cool stream leaps out to unite with the Grand River, which, flowing through Middle Park and southwestwardly between the Elk and Uncompagre Mountains, joins the Green River to form that marvellous stream, the Rio Colorado of the West. On it goes, through desert wastes, between lofty mountains, and through silent, solemn cañons, until at last, after its long and tumultuous journey, it finds peace and rest in the calm waters of the Pacific Ocean.

Continuing our march, we descended on the other side, passing by the little lake, until we reached the first few spruces that grew highest up on this side of the range. Here we made camp, and soon afterwards I started out on foot to ascend the high mountain to the north and east of our camp. After reaching a point a few hundred feet above the level of the pass, vegetation almost entirely disappeared, and a gray lichen, which attached itself to the loose blocks of trachyte which covered the ground, was the only plant to be seen. The mountain side was very steep, and the loose rocks afforded but an insecure foothold; besides this, the tenuity of the air was such that it was necessary to stop to take breath at frequent intervals. Although an icy wind was blowing from the west, I was wet with perspiration by the time I reached the summit. Here I reclined under the lee of a gigantic mass of rock, perfectly sheltered from the wind, and basked in the sunshine until I recovered from the fatigue of my climb. Near by was the edge of a beetling precipice which almost overhung our camp, and repairing to this I tried to estimate how high above my companions I was seated. It was impossible for me to recognize, even with the help of my excellent field-glass, any of my comrades in the camp; in fact, it was difficult to see the individuals at all, except when they moved. The horses grazing in a little meadow near the camp looked smaller than so many setter dogs. I learned afterward that those who saw me from camp took me for a mountain sheep, but finally recognized what the moving object was by the glint of my field-glass in the sun's rays.

At length, turning my back on the camp, I pursued my way along the ridge of the mountain. This was smooth and rounded and undulated; to the left was a deep and wide valley filled with low willows, among which, I am sure, if I had had a dog we might have started some ptarmigan, and from which flowed a considerable stream to join the south fork of the Cache la Poudre. To the right lay an illimitable stretch of mountains, most of them pine covered and dark green, but one or two bristling with dead timber, the white and weather-worn trunks of which gleamed and shone when touched by the rays of the sun. Far away across the park I saw the lofty crests of its western boundary, and noted with keen regret that the fire was still sweeping over the range toward the north. The bare Hog Back, where we had camped some time before, was easily recognizable, and near its base, between it and my present position, were a dozen lakelets sparkling in the sun like diamonds. To the southwest the view was cut off by the pinnacles which rose two or three hundred feet above the range, and by mountains of about the same height as the one from which I was looking; but I could see to the right dimly through the haze the Rabbit Ears and Arapaho Peak. Before me, on the southeast, beyond the mountains, lay the gorged and desolate plateaus of Middle Park, with many a pine-covered butte interrupting the view, and marked here and there with lines of brighter green, which indicate the courses of the various streams which traverse it.

The ridge along which I am passing is quite barren of life, and a single titlark is the only living creature that meets my eye as I slowly pursue my way along the crest. From the talus of trachyte, however, which in many places reaches high up on the precipice to the right, I can occasionally hear the plaintive, bleating cry of the little chief hare, which, safely hidden in some cranny among the loose rocks, sounds his notes of alarm as he beholds me and hears my footsteps; and in one place I found some white feathers, freshly shed, of a ptarmigan. Perhaps a mile from where I gained the summit I noticed in some loose sand in a little saddle, the fresh tracks of two mountain sheep, and followed them carefully; but before I reached the end of the ridge I saw the animals—a fine ram and a ewe—come out onto an open plateau, and after looking at me for a moment or two, plunge down the steep face of a precipice and disappear in a deep ravine. They must have seen or scented me, and to follow them would, I knew, be useless; besides, approaching night warned me to return to camp.

Two days more were passed in this camp, and occupied in climbing the highest mountains and enjoying to the full their majestic scenery. Game we found very scarce, prospectors and Indians having driven it off. About Indians I hear unpleasant rumors, which if true would lead me back to the railroad, but I shall wait before starting, for something definite.

In one of my mountain climbs I came upon a colony of the gray-crowned finches (*Leucosticte*), which greatly interested me, because I had never seen the genus before. They are most active and noisy little birds, and occupy themselves continually in searching for food among the rocks, uttering the while almost constantly a shrill but rather musical whistle. Unluckily, on the occasion when I saw them I had my rifle with me, and so could not secure any specimens. We were equally unfortunate with regard to the ptarmigan. Several times we found their fresh tracks in the snow, but though searching for them persistently, we never saw any. Better luck next time, I hope.

At last our provisions gave out and we were forced to turn our steps toward the Park once more, and a march of a day and a half brought us to Kosier's camp.

Kosier's, North Park, Colorado. Yo.

THE NEW JERSEY STATE SHOOTING TOURNAMENT.—We have kept our readers advised of the progress of preparations which are being made for the coming tournament of the pigeon shooters, and last week we printed a full programme of the anticipated events. This tournament, it will be borne in mind, will be held at the West Side Driving Park Manor, from the 21st to the 24th day of October inclusive. Eight thousand wild pigeons from the West are now in the coops of the Association, and it may be naturally supposed that their presence creates quite a flutter among the competitors for the liberal prizes which have been offered, the aggregate value of which amounts to $2,500.

THE LABORS OF DR. ELLIOTT COUES.—We are much gratified to publish Prof. Ballou's very just and carefully written review of the labors of Dr. Coues during the past eighteen years, and are thankful for the opportunity thus afforded to add our humble service to do him the honor he has so fully and laboriously earned.

—Mr. William C. Sadlier, the youngest son of Mr. D. Sadlier, has started the subscription business at No. 31 Barclay Street, having fitted up the second floor handsomely. He intends to supply Bibles, albums, standard works, etc., at cash prices, at weekly or monthly payments, at such low terms as to be in reach of all. He also proposes to do all styles of binding on the same terms and to furnish all of D. & J. Sadlier's publications.

BAKER'S CHOCOLATE, so noted for its nutritive, salutary and delicious qualities, hardly needs any further indorsement after the awards given for its excellence at the leading expositions in this country and Europe. A trial is all that is needed to convince any one of its great merit.—*Adv.*

—Mr. H. C. Squires, of No. 1 Cortlandt street, has just received two cases of guns from Greener, containing hammerless, top-snap and wedge-fast actions, with all modern improvements, which are well worthy the inspection of connoisseurs in that line. They range from twenty to ten-gauge, and especial attention is called to the twenty-gauge for lovers of small game.

The Rifle.

MASSACHUSETTS—*Milford, Oct. 4th.*—At the rifle range of Co. M, Sixth Regiment, M. V. M., a company target drill was held. The team selected from the company to compete for the State trophy, made the following scores out of a possible fifty at 200 yards range ;—

Sert. G. F. Jacob	38	H. E. Whitney	36
E. C. Carpenter	38	G. W. Gould	30
G. D Carpenter	36	J. H. Briggs	28

Oxford, Oct. 7th.—The return match between the Worcester and Oxford Clubs was shot on the Oxford Club grounds to-day, each shooting at thirty balls, with the following score :—

OXFORD		WORCESTER.	
Bowdish	26	Duncan	16
Appleby	22	Adams	17
Lamard	16	McAlver	18
Forest	23	Gilman	18
Joslyn	18	Hatch	23
Ingraham	18	Sheppard	19
O. Rich	23	Darling	22
F. Pike	21	Fuller	15
E. Rich	20	Messenger	15
G Rich	23	Cummings	16
Total	210	Total	179

Umpire, C. B Holden, of Worcester.

Hopkinton, Oct. 6th.—The Hopkinton rifle club held a shoot at their long range at Claflin's grove last week. The conditions were not the best. The following is the summary of the best scores :—

AT 800 YARDS.

O. C. White	5	5	4	3	5	5	5	5	5	5	5—47
C. A. Summer	4	3	5	5	5	5	5	5	4	5	5—46
N. Jewell	4	2	4	4	5	4	4	4	4	4	5—40
P. W. Smith	2	5	4	3	4	0	5	4	5	5	5—37

AT 600 YARDS.

N. Jewell	4	3	5	3	5	4	3	5	5	5	5—42
O. C. White	5	4	2	4	4	5	3	5	5	3	5—40
P. W. Smith	3	2	4	3	5	5	5	3	4	5	5—39

Worcester, Oct. 10th.—The following is the record of two recent matches at the Shrewsbury Pine Grove range, 10 shots at each distance, with a possible 50 at each range. The 200 yards work was off-hand :—

September 17th, 1879.

	400 *Yds.*	500 *Yds.*	200 *Yds.*
Stedman Clark	50	47	35—132
C. Jenkins	47	46	37—130
M. G. Fuller	50	41	38—129
A. H. Plimpton	39	40	31—119
Henry Wesson	32	32	33— 97

October 8th, 1879.

Stedman Clark	47	49	41—137
M. G. Fuller	43	48	41—137
A. L. Rice	49	49	37—135
C. Jenkins	47	39	39—133
A. H. Plimpton	46	39	dr.
Henry Wesson	37	33	31— 84

Medford.—The Medford Amateur Rifle Association have arranged a match, which opened October 8th, called the "United State Gold Coin match," which will be shot every Wednesday until 75 per cent. of the entire entrance fees shall equal the value of prizes and expenses. The conditions are: distance, 200 yards; rounds, ten; open to all; entry fee for members, 25 cents; non-members, 50 cents; re-entries, 25 cents. The prizes: first prize, a rosewood and ebony calender clock, valued at $25, and 9 coin prizes aggregating $57. The first prize is to be shot for once only each shooting day, the first score made by each competitor to count. At the close of the match the competitor that has won it the greatest number of times shall receive the prize. The other prizes to be won by the aggregate of the three best scores (whenever made), counted as one continuous score.

Milford, Oct. 1.—The semi-weekly practice shoot of the team of Company M., 6th Regt. M. V. M., took place to-day. The following scroes were made :

G. F. Jacobs	4	3	4	4	4	5	4	4	4	4—40
E. C. Carpenter	3	5	4	5	4	4	3	3	3	3—37
G. D. Carpenter	3	4	4	3	3	5	5	5	5	4—30
H. E. Whitney	0	4	3	4	3	2	2	3	3	1—25
J. H. Briggs	4	3	0	5	3	2	3	4	3	2—29

Distance, 200 yards; Springfield rifle (state model); position, off-hand.

Medford, Oct. 11th.—The Medford Amateur Rifle Association held the first competition in the handicap United States gold coin match at Bellevue range to-day. There was a large attendance of riflemen and friends. The weather conditions were perfect. The first prize offered in this match is a calendar clock, valued at $25, besides eight gold prizes from $20 to $1. Mr. R. S. Rogers stands as the winner of the clock to-day. The summary :—

W. Charles	4	5	5	5	5	5	5	5	4	4—47
H. A. Pickering	4	5	5	4	5	4	5	5	5	4—46
W. Charles	5	4	4	5	4	5	4	5	5	5—46
G. W. Sougett	4	4	4	4	5	4	5	5	4	5—44
H. A. Pickering	4	4	4	5	5	5	4	4	4	5—44
C. D. Harrison	4	4	5	5	4	5	4	4	5	4—44
N. P. Ames	4	4	4	4	4	4	5	5	5	4—43
J. H. Eames	3	3	4	5	5	4	5	5	5	4—43
A. J. Greene	3	3	4	5	5	4	4	4	4	4—40
R. S. Rogers	4	4	4	5	4	4	5	3	4	3—40
J. W. Vining	4	4	5	5	4	4	3	4	4	4—39
J. E. Irvine	4	3	4	3	3	3	3	4	4	3—34

BOSTON MAMMOTH RIFLE GALLERY.—*Oct. 11th.*—The regular monthly prize shoot for October has commenced with some very fine shooting. Four of the contestants have been nearly successful in getting the extra prize of $20 for eight consecutive bull's eyes; and although no clean scores have been made as yet, no doubt before the month is ended one or more will be made. Following is the summary ; 150 feet ; rounds, 8 ; possible, 40 :—

E. Whittier	5	4	5	5	5	5	5	5—39
E. F. Richardson	5	4	5	5	5	5	5	5—39
H. A. Pickering	5	5	5	5	5	5	5	4—39
C. A. Pollard	4	5	5	5	5	5	5	4—39
G. J. Seabury	5	4	5	4	5	5	5	5—38
W. H. Harrison	5	4	5	5	4	5	5	5—38
J. A. Nickerson	5	5	5	5	4	5	5	4—38
D. Hickey	4	5	5	5	5	4	4	5—37

Boston—Magnolia Rifle Gallery.—This rifle gallery was opened to the public last week—Oct. 8th. Among the visitors present were members of the Massachusetts Rifle Association, the Walpole Rifle Club, the Raymond Sportsmen's Club and Medford Rifle Association. The gallery is handsomely fitted up with all the latest improvements, including two ranges of 100 feet each, new improved targets, fixed telescopes, and the new Ballard rifle, 22 calibre. The proprietor is Mr. F. A. Ludwig. Two miniature prizes were offered for competition, one a breech-loading gun, the other a pistol. Brilliant shooting was done by those present, Mr. H. Tyler winning the gun and Mr J. F. Jones the pistol. Mr. Wm. R. Schaefer, our well-known gunmaker, fired the first shot at the opening of the gallery.

CONNECTICUT.—*New Britian, Oct. 4th.*—At the prize shoot held here to-day, $100 was awarded for the thirteen best scores made on an 18 inch. ring target off-hand; 200 yards ; in 3 shots out of a possible 54:—

1. O. E. Pillard	51	$20	
2. J. D. Marks	50	15	
3. H. Andrus	49	12	
4. H. Moore	49	10	
5. J. H. Bidwell	47	8	
6. O. B. Hull	46	7	
7. A. W. Spaulding	46	6	
8. Henry McEnre	46	$5	
9. John Butler	45	3	
10. W. W. Tucker	45	3	
11. Wm. Burritt	43	3	
12. A. Britt	42	3	
13. F. H. Williams	42	3	

J. D. Marks received $1. for first bull's-eye, and $3. for making the most bull's-eyes. Henry Andrus received $1 for last bull's-eye.

—The match which grew out of a challenge issued by the Wallingford team to any team of militia marksmen in the State to shoot for the National Guard championship took place last week. Company B, of Bridgeport, after, badly beating the Stratford company's marksmen, concluded to accept the Wallingford company's challenge. No return match is spoken of as yet.

As was expected, the "sand-lot marksmen" defeated the Bridgeporters, and by a score of 118 points. The eight men in each team fired ten shots each at the 200 and 500 yards distance :—

COMPANY K, SECOND REGIMENT, WALLINGFORD.

New Haven—The fall prize meeting of the Connecticut National Guard opened on the 2d inst. on the Quinnipiac Range. There was a crowd of spectators, among whom was the Governor, staff-officers of the regiments and officers and members of the companies throughout the State. Three matches were arranged—all military—one individual and two for teams. The first contest was the short range match, with thirty-five prizes, valued at $600, and without entrance fee ; open to any member of the Connecticut National Guard and Governor's Foot Guard, in fatigue uniform, military rifle as issued by the State ; 200 yards ; standing ; seven rounds without sighting shots. The following are the best scores :—

Private G. W. Marshall	30
Sergt. T. E. Watkins	30
Private E. W. Whitlock	30
Private C. Nichols	29
Capt. A. W. Sholes	29
Sergt. F. Chapin	29
Private J. Tinkey	29
Private J. E. F. Lewis	29
Sergt. C. S. Crampton	29
Sergt. H. Atkinson	29
Lieut. D. E. Marsh	28
Private B. Daley	28
Corporal F. D. Rood	28
Private H. J. Nicholson	28
Corporal G. H. Lowe	28
Private C. E. Case	28

G. F. Hurd, 28 ; F. R. White, 28 ; H. Simon, jr., 28 ; C. B. Erichson, 27.

In the Company Team Match, open to teams of eight from any company in the four regiments, Independent Battalion and Governor's Foot Guard, in uniform, State rifle, 200 and 500 yards, seven rounds at each distance ; with seventeen prizes, value $300, and a gold medal to the best individual score, value $50. There were thirty teams entered. The following are the best records of the match :—

CO. K, SECOND REGIMENT, WALLINGFORD.

	200.	500.	*Tl.*
G. G. LeBarnes	29	31	60

Company K, Fourth Regiment, Stratford	200	189	389
Company B, Second Regiment, New Haven	096	098	194

The special prize, valued at $50, presented by Mr. W. Hayes, of Newark, N. J., to the highest individual score, was awarded to Erastus W. Whitlock, Company E, Second Regiment, who made at 200 yards 30, and at 500 yards 33 ; total, 63.

The meeting closed with a Regimental Team Match, open to teams of twelve from each regiment or battalion in the State ; 200 and 500 yards ; State rifle ; ten rounds and two sighting shots at each range ; four team and two special prizes, value $350. The following is the result :—

	200.	500.	*Tl.*		200.	500.	*Tl.*
First Regiment	470	477	947	Third Regiment	303	293	661
Second Regiment	447	473	920	Independent Battalion	285	326	551
Fourth Regiment	427	466	893				

NEW YORK—*Syracuse.*—The fall meeting of the Sixth Division Rifle Association was held on the East Syracuse range Sept. 30th and Oct. 1st–3d. The weather was fine, and the attendance good. The first day was spent in individual contests and subscription matches. The second day, the opening contest, a company team match ; teams of five from any organization in the Division, at 200 and 500 yards ; five rounds at each range. Six teams entered from the Forty-eighth Regiment of Oswego and the Fifty-first of Syracuse. At the close Syracuse led by just three points, and were declared the victors. The following are the scores :—Company D, Fifty-first Regiment, 199 ; Company A, Forty-eighth Regiment, 196 ; Company C, Fifty-first Regiment, 193 ; Company C, Fifty-first Regiment, 189 ; Company B, Fifty-first Regiment, 189 ; Company H, Forty-eighth Regiment, 146.

M. T. Blakely won the Short-Range Subscription match with 32 in a possible 35, and Capt. J. McArten, Forty-ninth Regiment, Auburn, won the Officer's Prize with 43 in possible 50.

The Sixth Division Prize.—Teams of twelve from any organization in the division ; State rifle ; 200 and 500 yards ; five rounds per man. Four teams were entered, representing the Forty-eighth, Forty-ninth and Fifty-first Regiments and Thirty-fifth Battalion. Oswego captured the Division Prize, with Syracuse second and Auburn third. The Thirty-fifth Team shot well, but were not strong enough for the older teams :—

	200	500	*Total.*
Forty-eighth Regiment, Oswego	241	241	482
Fifty-first Regiment, Syracuse	235	245	480
Forty-ninth Regiment, Auburn	243	230	473
Thirty-fifth Battalion, Watertown	228	237	465

The last day was at long range. The light and wind were both variable, and a fire west of the butts kept a cloud of smoke in front of the targets through the greater part of the day, and rendered it very difficult to see the targets distinctly. Notwithstanding all the disadvantages some very high scores were rolled up. There were eleven entries for the first match, and the scores ranged from 99 to 78 points, out of a possible 100. Mr. James Thistlewaite, of Ilion, won the Crouse badge for the second time, by a score of 99 points. The other prizes were taken by the Ilion men by good scores :—

J. Thistlewaite	800 yards—	5	5	5	5	5	5	5	5	5	5—50
	1,000 yards—	5	4	5	5	5	5	5	5	5	5—49—99
R. Winnegar	800 yards—	5	4	5	5	5	5	4	5	5	5—44
	1,000 yards—	5	5	5	5	5	5	5	5	4	5—49—97
F. W. Partis	800 yards—	5	5	5	5	5	5	5	5	5	4—48
	1,000 yards—	5	4	5	5	5	5	5	4	5	5—48—96
G. Trowbridge	800 yards—	5	5	5	5	5	5	5	5	3	4—48
	1,000 yards—	3	5	5	5	5	5	5	4	4	5—46—94
F. Armstrong	800 yards—	5	4	5	5	4	5	5	5	5	4—47
	1,000 yards—	3	5	5	5	5	5	5	5	3	5—46—93
L. L. Hepburn	800 yards—	5	4	4	5	5	4	5	5	4	5—46
	1,000 yards—	3	5	5	5	5	4	5	5	3	5—46—92
A. C. Gates	800 yards—	5	4	5	5	5	5	5	5	5	5—49
	1,000 yards—	5	5	5	5	0	4	4	5	5	5—43—92

	800 *Yards.*	1,000 *Yards.*	*Total.*
R. Omand	48	39	87
D. M. Lefever	43	43	86
L. Eggleston	47	31	78
O. C. Jones	49	29	78

In the team match Ilion carried off first prize, and Syracuse second. The shooting of Mr. Thistlewaite was the best ever done on the range, and was remarkable. In the two matches he made thirty-eight bull's eyes in forty shots :—

ILION TEAM.

J. Thistlewaite	800 yards—	5	5	5	5	5	5	5	5	5	5—50
	1,000 yards—	5	4	5	5	5	5	5	5	5	5—49—99

NEW YORK SCHUETZEN CORPS.—The prize shooting for the FOREST AND STREAM $150 pipe, begins at Mauch Chunk, Pa., to-day. There will be a ball and supper in the evening. The festivities will be continued on Friday, and include a ride over the Switch-back, a visit to Glen Onoko, breakfast, dinner, etc. David G. Yuengling, jr., is the Captain.

CONLIN'S SHOOTING GALLERY.—The sixth of the series of ten contests for marksmen's badges was shot on Monday evening, October 6th, and was well attended, Mr. D. S. Banks winning the badge with the magnificent score of 34 out of a possible 35. Seven shots ; 300 yard target reduced for the range. The leading scores were :—

D. S. Banks	34	J. B. Stanton	29
W. Milton Farrow	32	W. H. Cadwell	28
C. A. Brown	31	S. Rothschilds, jr	28
Wm. T. Morgan	30	J. Hauser	27
J. T. Sinclair	30	T. F. Jacobs	26

The winners of of the marksmen's badge thus far are ;

F. H. Holton	32	D. G. Davis	32
S. W. Sibley	34	D. Fitz	33
H. J. Hawlett	33	T. S. Banks	34

Competitions each Monday evening.

WISCONSIN—*Milwaukee.*—The following are the officers of the Milwaukee Rifle Club for the following year : President, G. C. Markham ; Vice President, Gen. E. W. Hincks ; Secretary, H. P. Yale ; Treasurer, C. Simonds ; Executive Committee, the President and Secretary, ex-officio members, and S. J. Williams, J. Nazro, and J. Meunier. The club will hold a short range tournament on Thanksgiving Day.

EVERLASTING SHELLS—*Corpus Christi, Sept. 25th.*—Somebody who signs himself "Everlasting" in your issue of the 18th takes exception to my statement that the everlasting Ballard shells expanded in shooting, and either doubts my cleanliness, veracity, or common sense in living in this country, whose climate is so peculiar that a brass shell which drops easily into a rifle barrel will expand on firing. Answering the last proposition first, I have only to say I am not hunting a climate nor country to suit my firearms, for I had the country before I did the gun, and will keep it longer in all probability.

As to my veracity, I have no care to discuss that subject with a person of "Everlasting's" turn of mind. I certainly have a right to say that an advertised article is not what it purports to be, if I find it so at my own cost.

As to the cleanliness of my guns, they will compare with any of your readers' weapons in freedom from dirt or rust and they are used in the field entirely. As to the remarks of the gentleman signing himself "Bell-Muzzle," I thank him for his advice, and will state that with a few exceptions my shells, after being rubbed down with emery cloth, as he describes, work tolerably well, but not one of the fifty will enter the ball seater more than half way.

And now, Mr. Editor, I wish to ask if there is any particular reason why a gentleman should not make known the shortcomings of the gunmakers to his fellow-sportsmen through the columns of the sportsman's paper? and is it particularly sportsman-like in a person answering or communicating on that complaint to insinuate that filth is the probable cause of the trouble?

The Union Metallic Cartridge Company's shells are much better suited to this climate than the Howard's, which expand in the house on a damp day so they will not enter the chamber.

Will you through your columns name some lubricant, or rust preventive, that will keep salt spray from rusting a gun? Eaton's rust preventive does not answer the purpose as well as sperm oil, but neither fill the bill.

BEXAR.

In permitting a free discussion of topics of interest to sportsmen, we have no idea of evoking acrimonious remarks. "Everlasting," we are sure, had no personal insinuations in view, and "Bexar" is wrong in assuming such. That the shells stick in the chamber is proof of a fault, and it is our object, as it is of every one who has written on the subject, to find out where the trouble is. We have found cosmoline to answer very well as a preventor of rust in salt-water shooting.

ACKNOWLEDGMENT.—We have received the following card, which explains itself:—

Publishers of Forest and Stream:—

GENTLEMEN:—Permit me to acknowledge receipt of the very handsome and valuable badge, kindly presented by your Company, of prize in the Long Range Tournament, held at Creedmoor, Sept. 22d, 23d and 24th, and for which please to accept my hearty thanks. Yours very sincerely,

New York, Oct. 13th, 1879. W. W. DE FOREST.

THE SCHUETZEN CORPS CUP.—*New York, Oct. 15th.*—*Editor Forest and Stream:*—At a regular meeting of the New York Schuetzen Corps, held on Monday the 13th inst., at 98 Forsyth Street, Captain Yuengling presiding, Mr. F. Harenburg uncovered in your behalf the most beautiful present you presented to us. Everybody present was full of admiration, and a resolution offered was at once unanimously passed, as follows:

Resolved: That the most heartfelt thanks of the Corps be tendered to the FOREST AND STREAM AND ROD AND GUN PUBLISHING CO. for the beautiful meerschaum pipe they presented us. This resolution shall be entered on our minutes and a copy of the same be sent to the named Publishing Company for the New York Schuetzen Corps.

DAVID G. YUENGLING, Captain.

B. H. TIENKEN, Secretary.

Game Bag and Gun.

GAME IN SEASON FOR OCTOBER.

Moose, *Alce Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorous.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*

☞ This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

THE GAILLARD CLUB OF NATCHEZ.—The Editor of FOREST AND STREAM has received formal notification of his election as an honorary member of the Gaillard Club, of Natchez, Miss., and in acknowledging the courtesy so unexpectedly extended, wishes to say that gentlemen at the North, so far as our personal acquaintance extends, appreciate such evidences of comity and good will coming from that section. We shall ever take an especial interest in the proceedings and prosperity of the Gaillard Club, and wish it all the success which its praiseworthy objects deserve, namely, the "preservation of game in Mississippi, trap-shooting, and such sports as are entertaining to markesmen and sportsmen in general." We are glad to observe that increasing attention is being paid to game preservation in the South.

The officers of the Gaillard Club are R. H. Calhoun, President; W. Dunbar Jenkins, Secretary. This club was organized in 1875.

MASSACHUSETTS MEN IN THE SOUTHWEST.—Messrs. Wm. Jarvis, the breeder of the celebrated Elcho-Rose puppies, and John Fottler, jr., owner of Berkely, and a leading member of the Massachusetts Kennel Club, are visiting the St. Louis Bench Show, and taking a couple of weeks' chicken shooting. The dogs they have with them are the well-known Irish cracks, Elcho, Rose, Duck, and Berkely.

TIN-COATED SHOT.—I recently made some experiments with different kinds of shot, which proved conclusively that tin-coated shot gave a pattern much inferior to either soft or chilled shot. My experiments coincide perfectly with those of "C. M. A," in the October 2d No. of FOREST AND STREAM. The guns used were a Fox and a Scott. The cartridges were carefully loaded exactly alike, and in every shot fired the tin-coated shot gave a poor pattern. Chilled shot gave the best pattern by a slight percentage; soft shot next; while tin-coated shot was about 20 per cent. behind. I did not test for penetration, as I regard this merely a question of more powder. I was favorably impressed with tin-coated shot, until repeated unaccountables, while hunting, led me to test it as above.

W. L. CARPENTER, U. S. A.

Fort Omaha, Neb., Sept. 6th.

GROUSE SHOOTING IN SCOTLAND.—Shooting upon the Dalnawellan moors in Caithness is good. Wm. A. Adams, of Walford Manor, Shrewsbury, England, has killed 618 brace of game, besides sundries to his own gun. This is the largest bag this season to any one gun, and was made over dogs in twenty-one days. Mr. Adams uses a central fire, No. 12, with Bessemer steel barrels, weighing six pounds six ounces in all, and shoots with three drachms of Curtis & Harvey No. 3, and one ounce of small No. 6 Newcastle chilled shot. Mr. Adams is well known in America among railroad circles, and, we may add, has reached his fifty-eighth year.

RHODE ISLAND—*Newport, Oct. 9th.*—The fall shooting so far has been very good; one man bagged sixty-two in one week's shooting. Teal and wood ducks and other kinds of small ducks are shot at the Large Pond, near the beach. Some few snipe and woodcock are killed before the law is off. In fact but few sportsmen pay any regard to the law. OCCASIONAL.

PENNSYLVANIA—*Youngstown, Oct. 6th.*—The season for ruffed grouse began on September 1st, yet few bags have been made that are worth mentioning. A gentleman residing on the outskirts of this city was somewhat surprised onemorning last week, to see a pheasant come crashing through his parlor window, and fall dead on the carpet. DICK.

GEORGIA—*Macon, Oct. 5th.*—Here we go down our river, the Ocmulgee, in the fall and winter, when it is sufficiently swollen by the rains for the water to reach the overhanging branches of the willow. The shooter sits forward and the paddler in the stern. The boat is made to skim noiselessly and closely to the willows, and frequently the ducks are flushed only a few yards, and sometimes only a few feet away, and are brought down as they go down stream. The secret of success is in keeping very close to the bank, so as to escape observation of the keen-eyed game. This could not be done with oars; the various obstructions would compel going far out.

J. S. B.

Cairo, Oct. 10th.—The bird season has opened gloriously, and I am having all the sport I want. You Northern sportsmen who have never been South have no idea of the number of birds a moderately good dog will find in a day; at least twenty covies on ground with favorable weather, or say from three to four hundred birds. How is that for high?

A. W.

OHIO.—*Nelsonville, Oct. 5th.*—Quail are very abundant here, and if it were not for the foolish Granger law excellent sport could be had. I know of at least a dozen coveys within half a mile of my house. I have not pointed a gun at them yet, but it's very hard to say what I may do toward them before next New Year's. I have been shooting ruffed grouse and grey squirrels, which are also very plenty, and as for rabbits, there are lots of them.

There are very few bird dogs here, and very few wing shooters. The quail are not hunted till the snow is on the ground, when they are tracked and killed when they are huddled together.

If a couple of sportsmen were to come here (Monday Creek Station), and bring a couple of good pointers or setters, I will guarantee them excellent ruffed grouse shooting.

I have seen several flocks of wild pigeons in the woods.

ROB ROY.

OHIO—*Cincinnati, Oct. 3d.*—The Mercer County Shooting and Fishing Club, of Cincinnati, O., are making preparations for their annual fall visit to their shooting lodge, situated on the south shore of St. Mary's Reservoir, in Mercer Co. They have laid in a bounteous supply of provisions, and their cook has been engaged. This fall they have had built in Cincinnati ten new boats, which are models in the way of shooting craft, particularly adapted for their lake shooting. Two years ago the club purchased some 160 acres of land, with a frontage of one mile on the water; and have sown wild rice, which makes feed and shelter for the birds. They are anticipating as usual a glorious time with the ducks. The club is a joint-stock organization, and the membership numbers amongst them the best wing shots of the State. Their shooting lodge is capable of accommodating twenty persons, and is well and substantially built, and furnished with every appliance for comfort and convenience.

On their return I may give you a short history of their trip and its results. MCSPEGOCBACML.

Amesbury, Oct. 7th.—Since the fall shooting has commenced very little game has been seen around here, and but small bags have been made. While shooting rail on Powon stream I shot a large king rail, which measured twenty-one inches across the wings, and stood eighteen inches in height, and weighed sixteen ounces. He made a beautiful specimen when I stuffed and mounted him.

J. O'L.

MINNESOTA.—*Morris, Oct. 10th.*—Ducks and geese, brant and cranes are very plenty. They are just coming on from the North. One man can easily bag from 50 to 100 ducks per day. W. E. A.

NEVADA—*Austin, Sept. 30th.*—At a rabbit hunt, participated in by fifteen men, 486 rabbits were killed in one day—from sunrise till dark. The hunting grounds were the valleys and cañons surrounding this place. The highest number of rabbits killed by any one man of the party was 75; the lowest was 9. J. A. Wright scoring the highest, and doing the best work. G. E. M.

BRITISH COLUMBIA.—*Kootenai Lake, N. W. T., Aug. 25th.*—The Rocky Mountains are the home of the big horn, elk, deer (three species), Rocky Mountain goat or ibex, (rare sport, I assure you, as their ideas and habits are elevated,) bear (three species), grizzly, cinnamon, and black or brown. And last, but by no means least, either in size or numbers, the moose. Then there are many different species of grouse and pheasant, and two kinds of squirrels good for food, as well as cougar or California lion, wolverine or carcajou, wolves (two kinds), coyotes, foxes, (three kinds), and lesser animals of which I do not know the name. Buffalo and antelope are prairie animals, the latter especially, and seldom come nearer than two miles of this place. There is a species of the first named in the mountains. All the foregoing I have bought from Indians who killed or trapped them in this neighborhood, as well as beaver, otter, fisher, marten, mink, badger, and skunk, which it is proper to enumerate, and Indians have told me that there is a colony of prairie dogs across the lake.

Of fish, I have caught in the lake, within 300 yards of my house, white fish from 6 to 9 pounds weight, muskinonge from 5 to 23 pounds, and salmon trout from 6 to 17 pounds, and know of one being caught weighing 47½ pounds, and brook trout (speckled) from 2½ to 6 pounds. There are a few suckers, but very rare; the others are abundant. K. H. A.

—The genuine Norfolk Shooting Jacket, made of rough Scotch goods, can be had of Schuyler, Hartley & Graham of this city.

SHOOTING MATCHES.

MISSOURI STATE SPORTSMEN.—The annual convention will be held at Kansas City, October 21st to 24th inclusive. The prizes in cash amount to $3,100. There are twenty contests. All communications should be addressed to D. L. Hall, the President of the State Association, Kansas City.

FOUNTAIN GUN CLUB.—*Parkville, L. I, Oct. 8th.*—The regular monthly meeting of the members of the Fountain Gun Club; prize a gold badge; 7 birds each; handicap yards rise; 80 yards boundary, from five traps; both barrels allowed; ties decided, miss and out. The club rules to govern:—

Name.	*Yards.*							*Killed.*

S. Stanelman	20	1	1	1	1	1	1	1	1	w.	—10

A special meeting of the club was called for Thursday evening, the 2d inst., for the purpose of presenting the prizes, and to make arrangements for the annual shoot. Mr. R. Morrison, Vice President in the chair, presented Mr. J. Barrett, with the gold medal, he having scored 47 out of a possible 48 in the 4 shoots; and the silver medal he presented to Mr. W. Villiers, he having scored 46 out of 48.

Both gentlemen on receiving the medals made suitable speeches, and a very pleasent evening was spent.

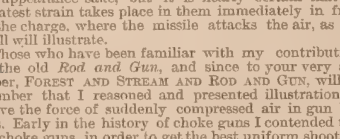
The annual shoot is arranged for the 15 inst.

HABITS OF MOOSE.—*Second Connecticut Lake, Sept. 27th.*—I have found a puzzler. I often find the tracks of caribou where they will follow a trapper's line; but this week two moose have at different times followed a well-beaten path on the east inlet, one coming out to the lake shore at a distance of over half a mile from where he came on it. He did not leave it where a fallen tree four feet high crossed, but jumped over it. What is the cause of their usually avoiding my tracks? Snow remained all day on the hills about the lake on the 24th. I fear that the moose will yard too near this lake this winter for their benefit, unless some still hunters drive them back, I shall not be here to do my part, but will give a limited number of sportsmen outline of the most frequented localities if they will do their own hunting. I do not wish to assist any man who wants to use his snow shoes and a butter-bred dog. NORTON.

—Gen. Randolph B. Marcy, Inspector-General of the Army, who has written some of the most instructive books on hunting, camping, prairie travel and woodcraft, has just returned from a tour in the regions between the Mississippi and the Pacific. Great game wanders over the vast plains and along the mountain sides of those regions, and the General, like Nimrod of old, is a mighty hunter. His party killed in their recent excursion what was estimated at thirty thousand pounds—say fifteen tons—of game, embracing 37 elk, 37 deer, 9 mountain sheep, 4 grizzly bears, 1 black bear, and 12 antelope. Many, if not all, of the numerous posts in the order of his official tour were supplied with venison from his abundant store, for which was found, from the places where it fell, transportation to camp.

—A man named Cannon has been convicted of forgery. Had the crime been murder, Mr. Cannon would have been safe. They would not have hung him. A cannon which hangs (fire) never goes off.

THE EXPANSION OF GUN BARRELS.



NEWARK, N. J., *Sept. 25th.*

Editor Forest and Stream:—

Herewith please find ruptured brass shell. On the 19th of July this shell was exploded in the hands of Mr. P. S. Backus, while attempting to force on a cap while the shell was loaded, quite seriously lacerating the hand that held it, and forcing a shot into the fleshy part of the hand below the thumb. While this painful accident should furnish a warning to sportsmen not to attempt to cap a loaded cartridge, the peculiar appearance of this ruptured shell, and the fact that a shot was driven into Mr. Backus' hand at right angles with the long axes of the shell, serves to illustrate and prove, at least, my former theories, that gun barrels of the present strength when fired with telling loads expand in front of the charge.

There are many things received and taught in natural philosophy, at least as applied to gunning, that exhibit questionable grounds; and my aim is to pick those questionable points. Guns universally are made stronger around the powder chamber, which may be well enough for appearance sake, but it is nearly certain that the greatest strain takes place in them immediately in front of the charge, where the missile attacks the air, as this shell will illustrate.

Those who have been familiar with my contributions to the old *Rod and Gun*, and since to your very able paper, FOREST AND STREAM AND ROD AND GUN, will remember that I reasoned and presented illustrations to prove the force of suddenly compressed air in gun barrels. Early in the history of choke guns I contended that all choke guns, in order to get the best uniform shooting, must have a specific charge—a charge that would just spring the choke to a straight—in plain terms, a thick gun, a large charge, and a thin one, a small. Among the opposers of the gun expanding was "Off-Hand," who in a well-written article questioned the expanding at all, and claimed if there was a trifle of expanding it was behind the shot, and, if anything, the barrel would tend to contract in front of the shot. Of course, he ignored the pouching action of the air in front. I gave the experiment with the leaden band, which, on being tested by a contributor, settled the expanding question in the affirmative: and now to prove the gun expanded in front of the charge, I could only give you my own experience with a bursted gun, where some of the shot passed out at right angles with the line of fire, and struck against the perpendicular face of a rock within a few feet. Now, to reinforce this theory, and to prove almost beyond question that gun barrels do expand in front of the charge, I present you with this exploded shell.

You will observe that the greatest stretch of the metal has taken place immediately at the shot-wad, and that the rupture began at that point, or in front of that point, and ran back toward the powder, and from the swell at the shot-wad this stretch converges each way, showing greater stretch in front of the wad than behind. It will be noted that where the powder was chambered there was no stretch or rupture, and that the tear stopped immediately on passing the powder-wad.

Mr. Backus grasped this shell in his left hand, as any person attempting such a thing naturally would to force and cap with the screw of an ordinary shell extractor, and the rupture or opening in the shell mostly took place between the ends of the fingers and the hand, and though, no doubt, most of the shot passed out in a straight line, more than the one that stuck to Mr. B.'s hand may have passed through the opening on the side. Of course, this lateral shot possessed but little force, barely sticking through the skin. At this day nearly every practical shot knows that a thick choke gun requires a larger charge of powder than a thin one, whether they have examined the cause or not, and no person who may examine this shell can say but there was greater expansive force at and in front of the shot-wad than at any other point.

To sum up: Guns spring open at the transit of the charge, and there is greater expansion in front of the shot than behind it. This I account for by there appearing to be a thin, consolidated air pack, having greater expansive force on a given point than the more voluminous powder gasses, and that point is immediately where the shot-wad attacks the air. Simply from overpowering charges, the tendency in guns to burst grades out in frequency from the starting of the shot-wad as it approaches the muzzle.

STRAIGHT BORE.

—What is the difference betwen a prosy speaker and an archer? One talks awful heavy, and the other toxopholite.

—San Diego posesses a genuine heroine in a young lady named Miss Mary Lawrence. As a band of wild cattle were being driven through the streets, one of them started for a child at play. The vaquero was drunk and tumbled from the horse as he attempted to turn the furious animal. Miss Lawrence being near sprang into the vacant saddle, ran down the animal, threw her shawl over its head and leaning from the saddle, caught up the child, carrying it off in safety. It showed rare courage and presence of mind as well as expert horsemanship.

—The remnants of Brother Adirondack Murray's church in Boston have been gathered together with the view of forming a new church on a broad and progressive Christian basis. The efforts to secure solidity in its finances is said to promise success. The Rev. H. A. Shorey, who has succeeded Murray in the charge of the *Golden Rule* becomes pastor of the new enterprise.

THE GAME OF CRICKET.

FIXTURES.

Oct. 16-17.—Detroit.—Peninsular vs. Gentlemen of Ireland.
Oct. 17-18—Stenton.—Young America vs. English Eleven.
Oct. 18—Chestnut Hill.—Chestnut Hill vs. Belmont.
Oct. 24—Stenton.—Newark vs. Young America (20).

DAFT'S ENGLISH TEAM VS. TWENTY-TWO OF CENTRAL NEW YORK.—The seventh match in the Daft series was played at Newell Park, Syracuse, N. Y., on Sept. 30th and Oct. 1st, between the above-named teams. The twenty-two was composed of players from Albany, Oswego, Fulton, Oswego Falls, Syracuse, Utica and Skaneatelas. The attendance was good, much larger than had yet been met with, and although the visitors won by an innings and 70 runs, yet the game was highly appreciated, and the wonderful bowling and batting of the visitors loudly applauded. Score:—

DAFTS' ENGLISH ELEVEN VS. PENINSULA EIGHTEEN.—This, the sixth match in the tour of the English cricketers was played on the Woodward Avenue grounds, at Detroit. The game was arranged to be continued through three days, Sept. 25th, 26th and 27th, but the bad weather on the last day caused the match to result in a draw, with the score in favor of the visitors. The wicket was soft and consequently slow; but it did not prevent the foreigners from running up the goodly score of 191. Dale's bowling was remarkably fine, and Joy's 17 was well obtained The following is the score:—

DAFT'S ENGLISH ELEVEN VS. TWENTY-TWO CANADIANS AT LONDON, ONT.—This, the fifth match in the Daft series, was played on Sept. 22d and 23d on the Tecumseh Base-Ball Grounds at London, W. O. The twenty-two were selected from all the cricketers in Western Ontario, and many of Canada's best representatives were included in the home team. The day was beautifully fine. Hyman, Captain of the Canadian side, won the toss, and he elected to take the field. Play was commenced at 12 M and continued, in dark and gloomy weather, on the following day. At no time was there a large attendance, but those spectators who were present were enthusiastic and generous in their applause. The subjoined score and bowling analysis give the individual record of the game:

BALL PLAYERS VS. CRICKETERS.—The recent discussion in the daily papers in regard to the merits of base ball players as cricketers, will have additional interest given it by the practical experiment which has been arranged in the form of a two day's match between base ball players and Daft's English eleven, to take place on the Union Grounds, Brooklyn, on October 15th and 16th. The first day's play will be devoted to a match of cricket—one innings a side—between eighteen base ball players captained by George Wright; the team including the champion Providence nine and Daft's eleven. On the second day the contest will consist of a base ball match between the Providence nine and Daft's players, the latter being captained by Mr. Sprague of the Staten Island Club; an old base ball player. This will be a unique affair. It will be the only time Daft's team willplay in Brooklyn.

Cricket Editor of the Forest and Stream:—

As neither the Philadelphia Club nor the Belmont Club has any representation on the team which was chosen to play againts Daft's eleven here, would it not be rather better to call the match "Daft's Professional vs. The Young America and Friends"; or "Daft's Professionals vs. A Selected Team," than to call it, "All Philadelphia?" The Philadelphia Club has always shown well enough on former international matches, and in the last United States vs. Canada, it was a Philadelphia man, I think, who made top score; a man whose showing on previous matches with foreigners was of the best. If all rounders were to make up the team, the Belmont Club has one very good player under that captain.

Philadelphia Oct. 8th, 1779. AN AMATEUR.

[Our reason for terming "the fifteen" which played Daft's Professionals, at Nicetown, on Oct. 10th, 11th and 13th, "All Philadelphia" is, that we understand that team to have been selected by a committee of five, who were duly elected by representatives of each Philadelphia cricket organization: If such is the base, we cannot see why exception should be taken to our naming the team as we have done.—ED.]

GENTLEMEN OF IRELAND VS. UNITED PHILADELPHIA.—This one day's match was arranged to be played at Newtown on the day following the game of Sept. 25th and 26th. It will be seen by the score that the game resulted in favor of the visitors by 14 runs on one innings totals:—

GENTLEMEN OF IRELAND vs. MERION FIFTEEN.—On Sept. 30th and Oct. 1st, the Irish team visited the beautiful grounds of the Merion Club, at Ardmore, Pa., and played against a picked fifteen of that organization. An interesting feature of this match, was the competition for two valuable and handsome silver tankards, which had been offered by over one hundred lady patrons of the club, for the highest individual score on each side. The fortunate winners were: Mr. D. Trotter for the Irishmen, and Mr. S. Law for the Merion. The former scoring 57 and 48; the latter, 6 and 45. Some excellent play was exhibited on both sides, and the match is reported to have been an interesting one:—

ST. GEORGES (2d.) vs. NEW YORK.—Played at Hoboken, N. J., on October 9th. Decided in favor of the home club, by 25 runs, on first inning's totals. George Giles, jr., son of the St. George's professional, contributed to the high score of 52, including two six hits over the fence, thus proving that the old saying, "Like father, like son," applies even to the cricket field. Score:—

A CRICKETER KILLED.—In England recently a cricketer was struck by a ball on the temple. He died instantly.

ARCHERY.

OHIO STATE ARCHERY TOURNAMENT.

Considering the fact that the Ohio State Archery Association was not organized until Sept. 10th, 1879, and their tournament appointed for the 2d and 3d of October, it is a matter of wonder that the management evolved so great a success out of it as they did. It was a success in every respect; in attendance, which reached 7,000 for the two days; in interest manifested, in scores made, and in the generally satisfied air with which every one left, reluctantly, and all promising to come again next year and bring all their friends. The direction was wisely left entirely to the President of the Association, who had visited the Chicago tournament and obtained a few points. His work was wearying and worrying, but he survives to enjoy the success of the first meeting—although his individual scores suffered badly in consequence of his fatigue. The assemblage was a notable one, being composed largely of "our best society" from the city and its suburbs, with a majority of sight-seers from where you will. The arrangements made by the Zoo were all that could be desired, and reflect great credit upon the management. The grounds were in beautiful condition, and are undoubtedly the best that could have been selected for that purpose, being almost level, and well situated as regards the sun, which is a very important item for the archer.

The scene was really picturesque. Three sides of the inclosure reserved for the bowmen were marked by a railing and a tightly-drawn rope, and the fourth by a high canvass screen, stretching across the entire width of the lawn, serving as a background that brought the handsomely colored targets out in bold relief as they reclined at an angle on their stands. Between the targets were placed blackboards, on which appeared the designating letters, while behind them, for safety, crouched the arrow-boys, every mother's son of them wishing he had a $10,000 accident policy on his life.

Following are the scores of the ladies' championship shoot:—

DOUBLE COLUMBIA ROUND.

	—THURSDAY.— 48 *arrows at* 30 *yards.*	48 *arrows at* 40 *yards.*	—FRIDAY.— 48 *arrows at* 50 *yards.*	*Grand Total.*
Names.				
Target C.	*Hits. Value.*	*Hits. Value.*	*Hits. Value.*	*Hits. Val.*
Miss Penrose	34 152	17 63	4 14	55 229
Miss Baldwin	16 68	.. ..	.. ..	16 68
Mrs. Davis	35 157	34 114	14 34	80 315
Miss K. Miller	47 239	35 171	22 86	104 496
Miss Morrison	41 219	38 168	24 122	103 509
Target D.				
Mrs. Baldwin	29 135	18 62	6 20	53 217
Miss Carey	38 160	15 67	6 22	59 249
Miss Hayward	32 155	14 42	10 42	56 239
Miss Kemper	35 161	18 90	10 36	63 287
Miss Goodman	36 169	33 121	13 51	82 341

The lady champion in the National Tournament scored 548 on the Double Columbia; and the second score (Mrs. John Lee) was 510. We think our lady champion's score compares very favorably, especially when it is stated she never shot an arrow at fifty yards until one week before the meeting. The same is true of all the ladies, most of them never having shot either forty or fifty yards.

The ladies were through their work so long before the gentlemen on Thursday afternoon that an impromptu shoot was arranged for them of fifteen arrows at fifty yards for three fine arrows offered by the Association. These were won by Miss Florence Morrison by a score of 32; Miss Goodman second, with 30. The Ladies Handicap the second afternoon resulted as follows:—

Names.	—30 *arrows at* 30 *yards.*— *Hits.*	*Value.*	*Per cent. deducted.*	*Net value.*
Miss Morrison	26	134	30	94
Miss Miller	29	181	25	136
Miss Goodman	24	102	20	82
Mrs. Davis	20	92	15	78
Miss Kemper	19	95	10	86
Miss Carey	23	99	5	94
Mrs. Myers	25	103	20	83
Mrs. De Golyer	19	97	5	93
Miss Penrose	21	79	—	79
Mrs. Baldwin	19	85	—	85
Mrs. Hayward	16	64	—	64

The gentleman's championship shoot resulted as follows, Mr. Adam Gray, of the College Hill Club, being the victor, with Mr. L. L. Peddinghaus, of Marietta, second. There were eleven of our gentlemen ahead of the best score made at the Boston tournament:—

Adam Gray's record of 478 surpasses the best team score at Chicago. Mr. Will Thompson making 474, and Gray's 30, 218, 30 arrows at 40 yards is wonderfully steady scoring at the end of two days' public shooting, several times he struck three golds at one end. Mr. Gray never shot at all before this season, drawing a bow for the first time in June of this year. He never shot the 50 and 60 yards ranges until fifteen days before the tournament.

Gentlemen, Forty Yards.—Best score, first prize, lance and hickery bow; Adam Gray, College Hill. Second best score, second prize, handsome ash receiver, well bucket; T. K. Bagley, Waverly. Most hits, half-dozen arrows; Adam Gray, College Hill. Most golds, target face; C. G. Slack, Arden Archers, Marietta. Most misses, copy of "Guide to correct Shooting;" J. A. Baldwin, Highland Archers, Wyoming.

Fifty Yards.—Best score, first prize, backed bow; Adam Gray, College Hill. Second best score, second prize, snake wood and hickory bow; L. L. Peddinghaus, Arden Archers, Marietta. Third best score, third prize, regulation target; J. W. B. Siders, Rob Roy, of Eaton. Most hits, regulation target; L. L. Peddinghaus, Arden Archers, Marietta. Most misses, copy of "Guide to Correct Shooting;" Chas. Welkey, Sagittaria

Sixty Arrows, Sixty yards.—Best score, first prize, backed bow; C. G. Slack. Best score, second prize, snakewood bow; L. E. Aiken. Best score, third prize, cigar case; L. L. Peddinghaus. Best score, fourth prize, regulation target; J. W. B. Siders. Most hits, regulation target; L. E. Aiken. Best end of three arrows, lemonwood bow, W. A. Clark. Most Misses, "Guide to Correct Shooting;" J. Webb.

For teams of Four Gentlemen, from any Society belonging to the State Archery Association, at the American Round.—Best gross score, first prize, box of two dozen prize arrows; College Hill, Cincinnati, 1,297. Second gross score, second prize, regulation target and lawn rack; Arden, Marietta, 1,096. Third gross score, third prize, regulation target; Waverly, Walnut Hill, 1,067. Fourth gross score, fourth prize, one dozen prize arrows; Merry Bowmen, Eaton, O., 1,015. Most team hits, Russia-bound club score-book and one target face; College Hill. Best team score at one end, portable target stand; College Hill. Most individual golds, Fingér tips; Adam Gray. Most individual reds, "How to Train in Archery;" Adam Gray. Most individual blues. "Witchery of Archery;" J. W. B. Siders. Most individual blacks, "Tac Hussey's Score Book;" C. J. Strong. Most individual whites, "How to Train in Archery; L. L. Peddinghaus.

Gentlemen's Special Prizes for Gross Score.—Best gross score at the Double American Round; champion gold medal, one half dozen prize arrows and one split bamboo bow, fifty pounds, Adam Gray. Second best gross score, one dozen fine arrows; L. I Peddinghaus.

Awards Ladies Thirty Yards.—Best score, first prize, lance and hickory bow; Miss K. Miller, Westwood. Second score, second prize, copy Tennyson's poems; Miss Florence Morrison, College Hill. Most hits, "Andrew's Bazar, one year: Miss K. Miller, Westwood. First gold, "Hussey's Individual Score-book:" Miss Florence Morrison, College Hill.

Forty Yards.—Best score, first prize, grandmother's spinning wheel; Miss K. Miller, Westwood. Second score, second prize, backed bow; Miss F. Morrison, College Hill. Third score, third prize, mother of pearl fan; Miss Goodman, Ivanhoe. Most hits, copy "French Pictures;" Miss Morrison, College Hill.

Ladies, Forty-eight Arrows, Fifty yards.—Best score, first prize, lace pin, archery design; Miss Morrison. Best score, second prize, backed bow; Miss Miller. Best score, third prize, fan album; Miss Goodman. Best score, fourth prize, bow; Mrs. Hayward. Most hits, silk umbrella; Miss Morrison. Best end of three arrows, arm guard, Miss Miller.

Ladies', Handicap, Thirty Arrows Thirty Yards.—Best score, first prize, silver goblet; Miss Miller. Best score, second prize, album; Miss Carey. Best score, third prize, ladies' quiver and tassel; Miss Kemper. Most hits, "Scribner's Monthly for one year; Miss Miller. Most golds, Japanese tray; Miss Miller. Most reds, Miss Morrison. Most blues, Miss Penrose. Most blacks, Mrs. Myers. Most whites, Mrs. Baldwin.

Ladies' Special Prizes for Gross Score.—Best gross score at Double Columbia Round, ladies' champion medal, handsome gold design with diamond setting, and one fine backed bow and one-half dozen arrows; Miss Florence Morrison. Second best gross score, archey lawn rack; Miss Kate Miller. Largest gross score not having won a prize, archers' lawn rack, Mrs. Davis.

Ladies special handicap second afternoon, 30 arrows, 40 yards; won by Miss Miller; prize, handsome backed bow, presented by the association.

MASSACHUSETTS ARCHERS.—*West Newton, Oct. 6th*—Saturday afternoon an archery contest was held between the teams of the West Newton Archery Club and the Toxarch Archers of Newton, each team consisting of three ladies and three gentlemen. The distances were thirty yards for the ladies and forty yards for the gentlemen, and the number of arrows thirty each.

The West Newtons scored 584 and the Toxarchs 492. The highest score—27 hits, value 135—was made by Miss Allen, of West Newton. G. A. M.

NOT SO BAD AS STATED.—*New York, Oct. 9th.—Editor Forest and Stream:*—In your account of the meeting of the Eastern Archery Association, of Boston, published in last week's number, I notice one error, which while the shooting at any range was poor enough, places the unfortunate contestants in the 80 yard match in a rather humiliating position. Only 24 arrows were shot, and not 48 as was stated. Five hits out of 24 arrows was in all cases a poor enough score, but to miss the target in times in 48 shots would be a trifle too bad. PILOT.

MANHATTAN ARCHERS.—A number of gentlemen met at the Metropolitan Hotel last Saturday and organized an archery club, to be known hereafter as "The Manhattan Archers." The officers chosen are:—President, J. G. Johnston; Vice President, J. O. Innis; Treasurer, S. E. French; Secretary, W. C. Beecher; an Executive Committee, composed of J. O. Innis, J. O. Davidson, W. C. Beecher, Robert Lawrence, and S. E. French. Special committees to draft a constitution and bylaws, select ground, and otherwise perfect the organization, were appointed, and last Tuesday, at 3 P.M., at Mount Morris Park, the first shoot took place.

NEW YORK ARCHERY CLUB.—*New York, Oct. 11th.—Editor Forest and Stream:*—A number of ladies and gentlemen interested, met last evening at the residence of Dr. A. B. DeLuna, 368 W. 32d Street, and organized a club to be known as the "New York Archery Club of New York City." After adopting a constitution, a permanent organization was formed with the following officers: Dr. A. B. DeLuna, President; Miss Ida Bailey, Vice President; Jas. W. Auten, jr., Secretary; Geo. D. Pond, Treasurer; John W. Sutton, Captain; Mrs. Dr. DeLuna, Juan F. Perez, Miss E. T. Morton, Clarence Clayton, Directors. We have secured a shooting ground at 6th Avenue and 87th Street, where the club will practice Tuesdays, Thursdays, and Saturdays, until cold weather. Our meetings will take place the last Saturday of each month, the next one occurring Saturday, October 25th, at the residence of Dr. A. B. DeLuna, where we hope to see those interested in archery. Propositions with name can be sent to any of the officers, and will be acted upon at our next meeting. We trust when your readers see the report of our doings, that we shall have them come forward and join the club, thus placing it upon a foundation that our city will, in the future, be proud to recognise the "New York Archery Club of New York City." J. W. A. JR.

A HIGH SCORE.—*Crawfordsville, Ind., Sept. 22d*—Mr. Will H. Thompson, of the Wabash Merry Bowmen, in a match shoot with several members of the club, made the wonderful score of 1,028 at the Double York Round. This score has not been equalled in England since the year 1873, when Major Hawkins Fisher scored 1,033. The details of Mr. Thompson's score are as follows:

	60 Yds.		80 Yds.		100 Yds.		Total.	
	Hits.	Score.	Hits.	Score.	Hits.	Score.	Hits.	Score.

ARCHERY MARKSMANSHIP.

Though many a year has fled since I drew a bow, I still feel nearly as strong an interest in archery as in the early days when I roamed the woods and sent an arrow after every squirrel, robin, rabbit, cat-bird, and thrush that crossed my path. I loved the sport then as dearly as I ever have loved the dog and gun; and though I long since laid aside the bow for something better adapted to cope with the slippery nature of modern game, I still retain almost unimpaired the fondness for it I once had. Therefore it is that I read with as much pleasure as I do any sporting article, the excellent articles on archery in the FOREST AND STREAM, and none have pleased me more than the late one by Mr. W. H. Thompson on the "Fables of Archery."

Mr. Thompson has made a bold, almost audacious, attack upon a long cherished delusion, and many wise-acres and "white-haired friends" will doubtless think him an envious ignoramus who wants to pull down to his own level those those to whom he cannot climb.

So far as my experience goes, Mr. Thompson is exactly right. The hitting of pennies at thirty or forty yards with an arrow, stands upon exactly the same ground that the driving of nails and snuffing of candles at 100 yards with a rifle does. But a few years have passed since that stuff was almost universally believed about the rifle, and thousands believe it yet. Mr. Thompson has done well to attack this kindred nuisance so boldly, and should be sustained in his efforts to tell us just what can and what cannot be done with the bow. No arrow can ever be made that could be driven so straight for forty yards as to hit a penny every time; any more than a rifle can be made that will shoot into the same hole every time at 100 yards. The Indian-penny shooting, as described by Thompson, is just about what I have always seen; half the time the penny is knocked down by hitting the stick, and most of the time is missed entirely; and the shooting is done at about ten paces instead of forty.

I have, perhaps, never seen the best Indian shooting, but have seen some that was pretty good. Moreover, when a boy, I shot a good bow, very different from the common boy's bow, used turned arrows made perfectly straight, and put rifled feathers on them at as early an age as thirteen. Of course I never attained the skill of Mr. Thompson, or even of the average Indian, perhaps, but attained enough to know that with such bows and arrows as the Indians use, such shooting as is generally attributed to them is utterly out of the question.

The trouble that Mr. Thompson and others will have to encounter, is that the vast majority of even intelligent people do not know what good shooting is, and thousands who think they do have not the most remote idea of it. Last year Mr. Maurice Thompson broke with a bow and arrow, at the first trial, thirty-five out of fifty glass balls thrown up at ten paces. This was an infinitely better performance than those at which the world was then standing aghast with wonder; for this was Mr. Thompson's first trial, and it is very fine shooting to hit that many with an arrow at ten paces, even when at rest; whereas to hit them at rest at that distance with a rifle, requires absolutely no skill at all. Moreover, Carver had already fired thousands upon thousands of shots at balls thrown up, where Mr. Thompson had fired none. And yet this fine shooting passed almost unnoticed, and is probably now forgotten. Dr. Parker at Logansport killed with a rifle last year four woodpeckers out of six shots, at fifty yards, and all crossing shots; probably the best rifle shooting ever done, or that ever can be done, and incomparably superior to his ball smashing at ten paces. Yet, though well attested, this performance elicited scarcely any notice whatever.

The crowd wants to see the mark hit often. No matter how difficult it may be to do it, it is no shooting unless it is done often. To shoot with a rifle twenty-five pigeons sprung from a trap at 100 yards, would be marvelously good shooting; especially if they were all cross fliers. And yet I believe a crowd would hoot at it as a swindle, and the next minute split the arch of Heaven with cheers for some pancake who should make a clean score on 100 at three feet.

But it will be long before Mr. Thompson can make the world believe him. So long and so often has nonsense about shooting been dinned into people's ears, that the echo will ring there for many a year to come. That marvelous faculty, often seen in mankind, of manufacturing observation and experience in support of some cherished whim will here play its part. The horschair-snake man will stick to it until the crack of doom, that he has actually tried the experiment and made snakes out of horsehair. The man who tells you of birds being killed on the telegraph wire "by the shock," has always a knock down answer for you when you tell him the electricity could not possibly injure the bird, but that they are killed by flying against the wires. He shuts you up in a flash, with the assertion that he has "seen them drop off the wires." And so Mr. Thompson's "white-haired friend" will stick to it for years to come that he has *seen* the wonderful Indian shooting in question, and will clinch the subject by the assertion that he "measured the distance." You can never make him back down, and his "suppression" is a good job to sublet.

Few will agree with Mr. Maurice Thompson about the relative merit of the bow and gun for hunting. Few have ever been cloyed with the ease of clipping with a gun the whistling wing of the autumn woodcock, the buzzing pinion of Bob White plunging through the tangled brush, or the obstreperous wing of the booming grouse as he darts like an arrow through the dark ranks of tree-trunks. And fewer still have been cloyed with the ease of tripping with a rifle ball the fleeting beauties of the forest, mountain and plain.

But there is nevertheless far more in Mr. Thompson's views than most votaries of the gun would at first suppose. Where the bow can be used with any reasonable chance of hitting, as on hares, etc., and without danger of losing too many arrows, it will afford much more pleasure than the gun to that class of sportsmen whose pleasure lies not in a big bag, not in the tickling of the almighty palate, and not in mere murder, but in the skill required, the scenery and associations of the chase, etc. That class, too, is fast on the increase. I joined it years ago, and have no disposition to leave it. On the contrary, the changed taste grows upon me. Year after year I care less for game and counts, and more for the way and manner of securing a little. A few ducks or geese shot with the rifle are far more satisfactory than a score bagged with the shot gun, and three or four hares killed on the run with a rifle afford more pleasure than a deer shots rending. Fawns and does now often go unshot at, whtae a few years ago I could not have resisted the temptation; and can contemplate with sublime contempt the whiz and buzz of straight-away flying quails, and find great pleasure in picking only the swiftest cross shots. And herein lies I believe the truest pleasure of hunting.

For persons of such taste hunting with the bow is a solid reality, and not a poetical fraud. Here, in California especially, are opportunities for its use that are seldom found in the Northern and Eastern States. If I could shoot as well as either of the Thompsons I could kill hundreds of hares, quail (mountain quail especially), ducks, and even some geese, with the bow, and have lots of fun on many other things that I never shoot at with gun or rifle. I know no place so good for bow shooting on ducks as some of our sloughs and lagunas; high banks allowing close approach without much deep water or weeds to lose arrows in. Gladly would I change the gun for the bow on some kinds of our shooting, if I could only use it as well as Mr. Thompson does; though from the nature of the case it can never be of much use on Eastern quail, woodcock, grouse, etc., which must be taken on the wing and can rarely be seen upon the ground.

For target shooting the hold archery has taken upon American taste must be permanent. So long as people will love out-of-door amusements, shooting will hold the first rank; and of all short range shooting on anything else but game, bow shooting is the finest. But its votaries may as well learn first as last just what can and what cannot be done with it, and then there will be far less temptation to lay it aside from a feeling of disappointment. T. S. VAN DYKE.

Fall Brook, San Diego Co., Cal.

THE O'LEARY BELT.—The competition for the O'Leary Belt began at Madison Square Garden in this city on Monday, Oct. 6th, with thirty-five contestants, and ended last Saturday night with only eleven men on the track. The following table exhibits the daily records of each of those who remained until the finish:—

	Sept. 30th	Oct. 1st	Oct. 2d	Oct. 3d	Oct. 4th	Oct. 5th	Oct. 6th	Total
Murphy	110	90	93	84	86	58	84	505
Howard	86	100	85	78	82	81	88	560
Briody	105	85	74	80	58	58	88	488
Mahony	78	99	78	74	74	66	76	475
Allen	82	86	89	75	75	76	74	467
Curran	100	89	74	75	66	48	80	432
Walker	103	84	81	67	65	58	81	439
Russell	111	91	81	73	65	59	70	450
Pierce	103	70	72	76	66	65	80	452
McKee	100	68	67	34	43	30	51	333
	71	67	51	62	33	29	29	362

Murphy receives $5,000 as the first prize; Howard, $2,000; Faber, $1,000; and Briody, $500. Mahony receives $200, and Allen, Walker, Russell and Curran receive their entrance money for scoring 450 miles. McKee gets the prize for neatness. A prize of a silk suit, presented by Thomas Miller, of Sixth avenue, and a pair of shoes from McSwyny, will also be awarded as fifth and sixth prizes.

Capt. Williams deserves credit for the order preserved at the Garden during the week, notwithstanding the large disorderly element present day and night.

—The first annual fall meeting of the Knickerbocker Athletic Club will be held on the Manhattan Club Grounds, Eighth avenue and Fifty-sixth street, this city, Oct. 28th.

—The Westchester Athletic Club games will be held on their grounds, Highland Street, Port Chester, N. Y. October 28th.

BOOKS RECEIVED.

TOINETTE: A TALE OF THE SOUTH. By Albion W. Tourgee, New York: Fords, Howard & Hurlbert. Cloth, $1.

FIGS AND THISTLES. A WESTERN STORY. By Albion W. Tourgee, New York: Fords, Howard & Hurlbert. Cloth, $1.

WARING'S N Y Z, OR ALPHABETICAL RAILWAY AND STEAMBOAT GUIDE, is published every month, and contains explicit directions when, where and how to go to all railroad and steamboat stations reached from New York. It is a most valuable publication for strangers and New Yorkers too.

AMERICAN WILD FOWL SHOOTING. By J. W. Long. New York: Orange Judd Co. Price, $2.

We are glad to note the publication of a new edition of this book which has long been looked upon as a *vade mecum* by all gunners who shoot ducks. The pages of this volume contain about all there is to be taught concerning the pursuit of wild fowl. The publishers have issued the book in attractive form, and it deserves a place on the shelves of every sportsman's library.

THE HORSE. A BOOK FOR THE PEOPLE. By B. Pitcher. Chicago: Western News Co. Price, 75 cents.

This valuable book contains the fruits of the author's experience of thirty-seven years as a practical horse-shoer. It contains also a great deal of valuable advice as to the care and management of the horse.

A butcher enters the office of a lawyer.

"Sir, I want your advice. Is the owner of a dog responsible for any damage that the animal may do?"

"Certainly."

"Then your dog has run away with a leg of mutton from my stall and I will trouble you for ten francs."

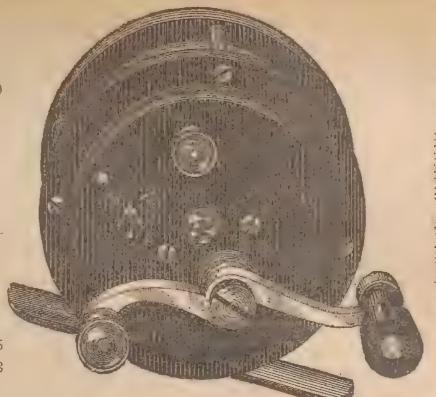
"Very well, my friend, have you five francs change?"

"Yes, sir." (Produces them).

"That just makes it square; my fee for advice is fifteen francs."

NEW FACTS ABOUT PARROTS.—One day last week there arrived in Pittsburg from South America nearly 600 young and uneducated parrots, which are being disposed of at $5 apiece. A reporter of the *Leader* dropped into the store where they are on exhibition and had a chat with the importer, who during the past few years has brought from South America over 6,000 of the birds, for which he found a ready sale at $5 a head. The birds he brings are from the windward islands, off the north coast of South America. The birds from that section are larger, hardier and more intelligent than from any other portion of the parrot section. These birds build in the royal palmetto tree, digging a hole into it, and building their nests much after the fashion of the woodpecker. In order to get them the trees have to be cut down.

The young birds are then put in cages, and fed upon palmiche, g uava, and banana until the palmiche season closes, when they are old enough to eat any and all kinds of food. The breeding time is in May, and there are three kinds to the nest—never more. When they are sorted, the males from the female, and sold, the price received is about one dollar and-a-half apiece. They hatch but once a year, and receive their full growth in about eight months. The importer states that he sells on an average from twenty to forty a day when he has stock on hand, and never finds any difficulty in disposing of them. In response to the question as to whether it is necessary to split a parrot's tongue in order to make it talk, the parrot man said that the idea was an old woman's story. All that was necessary to make a parrot talk was to place it, while young, where there was a great deal of talking going on, and the bird would soon repeat what it heard, and when it did begin to imitate sounds it would keep them.



Its propensity to repeat anything it hears may sometimes be amusing and often annoying, owing to the possibility of it striking the sensibilities of the pious-minded by being profane, not to say blasphemous. A great many amusing stories are told of the sayings of parrots, some of which will bear repeating. At the McHenry House, Meadville, there is a parrot which is a source of great annoyance to train men. When it sees a freight train coming, it will yell at the top of its voice: "Switch off! Switch off!" The enunciation is so distinct, that it not unfrequently happens that the train will be switched to avoid a supposed danger. The same bird, when it sees a passenger train, will yell: "All aboard!" and thereby cause a scatter among passengers, who, after sitting in the cars for ten or fifteen minutes, will discover that they have been sold.—*Pittsburg Leader.*

The Kennel.

I WILL SELL THE BALANCE OF MY valuable Kennel of Setters at the following sacrifice, which is less than one-third what they have cost me: The pure black-and-tan Gordon bitch Midge, a great beauty, and winner of the First Prize and best brood bitch at Philadelphia Show, and for speed, endurance, and scenting powers in the field she has no better; price, $100. Imported red Irish Setter bitch Floss, winner of prizes at the following shows: Cork Show, Ireland; Centennial; St. Louis; Baltimore, twice; New York; and Philadelphia. She is a great beauty, and a fast worker in the field; price, $75. Imported red Irish Setter bitch Colleen, winner of prizes in England and here; price, $75. The red Irish Setter bitch Nora; a slashing strong bitch; only two and a half years old, and the making of the best field worker that I have ever seen; price, $40; a great bargain. A handsome Llewellyn setter bitch; a beauty, and a capital bitch in the field, and a good brood bitch; her price only $65. One brace of handsome puppies, five months old; large, strong, healthy pups, out of Arnold Burges' celebrated Champion Field Trial and Bench Show winner Druid, and the Llewellyn bitch Leda; price, $25 each. This is a rare chance to obtain a pure breed dog at a low figure. Full pedigree will be furnished with all of the dogs. C. Z. MILEY, Lancaster, Pa. Oct. 16, 1t.

PURE BLOODED GORDON SETTER—Very handsome color, black and tan; very obedient; broke to charge and hunt by motion of the hand, and retrieves; will make a first-class dog for the field by killing a few birds over him, and will make a prize winner for the Bench Show. Price $40.

Gordon setter bitch; very beautiful; no white; black and tan; broken on quail, woodcock and snipe; fast, good nose, backs and very staunch on point; kind and easy to handle. Price $50.

Irish setter bitch; red and some white; hunted some on quail; she was sired by the best red Irish setter ever in the United States—Duncan's Dash; she is very gentle; gave $110 for her and sister when pups. Price $35.

Llewellin setter bitch Bonny Lass, one year old, blue ticked. I purchased her from the kennels of L. H. Smith, of Strathroy, Ontario, Canada. Sire Paris, prize winner on bench, and the field winner of too many prizes to here mention. Parties purchasing will be furnished with printed pedigree and prize winnings. Price only $50. A rare chance. Just right to hunt.
H. B. VONDERSMITH, Lancaster, Pa.

BESTOR'S COCKER SPANIEL KENNEL

Owing to contemplated changes (involving possible inconvenience in keeping them) I offer my ENTIRE KENNEL OF COCKER SPANIELS FOR SALE, separately or together. They are believed to be the finest specimens in America, and have been largely profitable and their ownership pleasurable to me. The stock is well known and properly vouched for by leading sportsmen and the press. The kennel comprises:

1st. The imported dog Snip, whelped May, 1872; famed in the stud, on the bench and the field; retrieves; price, $100.

2d. The bitch Fairy, she by imported Snip, out of imported Juliette; whelped May 25th, 1877; partially broke; price, $75.

3d. The bitch Roxy, whelped Aug. 1st, 1878; by imported Snip, out of Fairy; not broke to field, but very intelligent, very handsome, and bound to make a reputation in the kennel; price, $50.

4th. The dog pup Senior, whelped July 20, 1879; out of Fairy, by imported Snip; price, $60.

5th. The bitch Sally, whelped July 20, 1879; out of Fairy, by imported Snip; price, $35.

Or to one purchaser, together with good will and all future demands which might come to me, $275. Terms cash.

In good hands and well advertised, the orders in a single season will more than refund costs.

These fine specimens are nearly alike in color (liver and white), are beautifully marked, very affectionate disposition, and are in fine health.

Circulars on application, and dogs may be seen any day.

S. J. BESTOR,
Oct.—e.o.t. Hartford, Conn.

PINE LODGE KENNELS.—I am prepared to take a limited number of dogs, either setters or pointers, and train them thoroughly. I give my puppies seven months' work out of the twelve, and guarantee satisfaction, if the dog has all the natural instincts. References on application. Prices, $50 and $75, according to length of time I keep the dog, with discount to parties at long distances. A. WINTER, Cairo, Thomas County, Georgia. Oct 2,tf.

DOGS BROKEN FOR FIELD SPORTS.—A few more well-bred setters or pointers will be taken. For particulars concerning game, terms, etc., enclose a stamp. Price low and terms easy. Any dog taught to retrieve. E. & C. VON CULIN, P. O. Box 18, Delaware City, Del.

RATTLER.—In the Stud.—Blue belton, Llewellin setter, winner of three bench prizes, by champion Rob Roy, winner of five English field trials, out of the pure Laverack bitch, (Pickles). Will serve bitches at $20. Litters warranted. Inquire of L. F. WHITMAN, Detroit, Mich. jan 2tf

IN THE STUD.—The pure Laverack dog Pride, by Pride of the Border x Petrel. The only pure Laverack in New England. Fee, $30. Address H. F. DEANE, Box 1,612, Boston, Mass. Sept. 4—t. f.

ST. BERNARDS FOR SALE.—The undersigned, wishing to reduce his kennel offers for sale several magnificent imported Mount St. Bernard dogs and bitches, carefully selected from the best European strains. To be sold for no fault. For prices, pedigrees, etc., address.

The following celebrated Dogs are for sale.

DOGS!

St Bernard dog "Marco"; rough coated, two years old; a magnificent animal—Rev. J. Cumming Macdona's stock—second prizes Hanover Show and Rochester.

New Foundland dog "Keeper"; four years old; first prize Westminster Kennel Show, 1879.

Pointer dog, "Croxteth," liver and white; one and a half year old; out of Lord Sefton's renowned stock—one of the handsomest pointers in the United States. Second prize in the Hanover International Show. Broken.

Blue Belton setter, "Decimal Dash," eighteen months old; sired by Llewellyn's celebrated "Dash"—a magnificent stud dog—never exhibited.

Irish setter, "Rover II"; pure red; son of Macdona's champion "Rover." Never exhibited; thoroughly broken.

English setter, "Ranger II"; a pure bred Laverack, son of Macdona's celebrated "Ranger". His get won first at Hanover and Paris shows.

English setter "Ranger Rival," a half brother to Ranger II., never exhibited.

Any of these dogs will serve approved bitches at $25.00.

Bitches.

St. Bernard "Braunfels," rough coated, out of Prince Solm's celebrated stock; a magnificent bitch, in whelp to "Marco," 1st prizes in Hanover and Rochester shows.

Pointer "Queen," liver and white. 1st Westminster Kennel Show 1878, in whelp to champion "Sensation."

Gordon setter "Beauty," 1st Boston Show 1878, 2nd New York Show 1878.

Pointer "Dora"—liver and white, out of "Queen" and "Sancho," in whelp to Croxteth.

Blue Belton setter "Silk," in whelp to Ranger I.

Irish Setter "Moya," out of Col. Hilliard's "Palmerston;" will be bred to Rover I.

English Setter "Donna," white and lemon, in whelp to Ranger II.

Pups out of all the above first-class bitches can be secured by an early application. Besides I offer for sale pointers, setters of minor quality, but of good thoroughbred stock; full pedigrees. Particulars will be furnished on application to

MR. CHARLES FOLSOM: SAVANNAH, Ga.

Dear Sir: I would thank you to send me a circular. I have one of your little Pistol Stock Rifles, saloon kind, and do say, without flattery, that it is a perfect shooter. It can explode a cap five times out of five at ten paces. Respectfully, GEORGE ALLEN.

MAYNARD RIFLES AND SHOT GUNS.

Our New Off-Hand Rifle.

For Hunting and Target Practice at all ranges the "Maynard" more completely supplies the wants of hunters and sportsmen generally, than any other rifle in the world, as many barrels can be used on one stock, and for ACCURACY, CONVENIENCE and Durability is not excelled. The following are some of the scores recently made at Walnut Hill by members of the Mass. Rifle Asso.:—J. N. Frye, President, in all-comers match; 15 shots; 200 yards; without cleaning: 5 4 5 4 5 5 5 5 5 4 4 5 5—71. L. L. Hubbard, Executive Officer, 200 yards; off hand: 4 5 5 5 5 5 5 5 5—49. O. M. Jewell, 300 yards; off hand: 5 4 5 5 5 5—34. O. M. Jewell, 300 yds.; off hand: 5 5 5 5 5 5—30.

WHITNEY ARMS COMPANY, NEW HAVEN.

Thread-Wound, Long-Range Cartridge Shot Cases.

(S. WHITE PAINE PATENTS,)

For Muzzle-Loading and Breech-Loading Cylindrical and Choke-Bore Shot Guns.

Any desired closeness of pattern made at 50, 70 and 90 yards, with penetration superior to that made by the best choke-bores at 40 yards.

INDISPENSIBLE TO HUNTERS OF ALMOST EVERY KIND OF GAME.

Ten and Twelve Gauge now ready.

This Cartridge consists of two semi-cylindrical cases, wound with thread, containing one ounce of shot, heavy in front and light in rear, to keep it from turning. When the thread is all unwound by the friction of the air, the cases fly apart, and the shot scatters.

Price, $5 00 per Hundred. 20 sent post-paid for $1 00. Address

THE PARKER GUN.

PARKER BROS., Meriden, Conn. New York Show Rooms, 97 CHAMBERS ST.

The Parker Gun Again Victorious!

In the Tournament just closed at the St. Paul Driving Park, **30 prizes** in the regular shoots and the sweeps following them were won by sportsmen using the Parker Gun.

The Rochester (N. Y.) *Democrat and Chronicle*, of recent date, in referring to the remarkable execution of these guns at their tournament, in which the Parker Gun won the **Gold Medal for the Best Average**, says: "The Parker Gun is one of the finest ever admired by a true sportsman, and of late years it has been generally used where before nothing but those of European make would be thought of. This company has successfully succeeded in making their own steel barrels, which, together with other novel and important improvements, make their guns the finest yet introduced among lovers of field and forest sports. Dr. Carver, the celebrated American marksman, used this gun in his late exhibition before the Prince of Wales, and recommends it highly as a fowling piece, as do also Ira Paine and other noted shots.

Sportsmen's Routes.

"THE FISHING LINE."

TAKE THE

Grand Rapids & Indiana R.R.

Mackinaw, Grand Rapids and Cincinnati Short Line FOR THE

Trout, Grayling, and Black Bass Fisheries, AND THE FAMOUR SUMMER RESORTS AND LAKES OF

NORTHERN MICHIGAN.

The waters of the

Grand Traverse Region

and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING Season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.

The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthma Affections.

The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. B. LEET, Gen'l Pass. Agent, Grand Rapids, Mich.

Sportsmen's Routes.

St. Louis, Minneapolis

AND

ST. PAUL SHORT LINE.

Through Pullman Palace Sleeping Cars between St. Louis, Minneapolis and St. Paul.

Burlington, C. Rapids & Northern Railway.

QUICKEST, CHEAPEST AND BEST!

TWO PASSENGER TRAINS each way daily, between Burlington, Albert Lea and Minneapolis, crossing and connecting with all East and West Lines in Iowa, running through some of the finest hunting grounds in the Northwest for Geese, Ducks, Pinnated and Ruffed Grouse and Quail. Sportsmen and their dogs taken good care of. Reduced rates on parties of ten or more upon application to Gen'l Ticket Office, Cedar Rapids,

C. J. IVES, Gen'l Passenger Agent.

E. F. WINSLOW, General Manager. tf

FOR HALIFAX,

PORT HAWKESBURY, PICTOU, AND CHARLOTTETOWN.

THE first-class steamships Carroll and Worcester, will leave T wharf, Boston, for above ports, every Saturday at 12 M. Through tickets sold to all principal points in Nova Scotia and Cape Breton. No freight received after 10 A.M. on day of sailing. Shippers must send with receipts the value of goods for Master's manifest. For rates of freight or passage inquire of W. H. RING, 18 T wharf, or O. G. PEARSON, 219 Washington street. F. NICKERSON & CO., Agents.

TO SPORTSMEN:

The Pennsylvania R. R. Co.,

Respectfully invite attention to the

SUPERIOR FACILITIES

afforded by their lines for reaching most of the TROUTING PARKS and RACE COURSES in the Middle States. These lines being CONTINUOUS FROM ALL IMPORTANT POINTS, avoid the difficulties and dangers of reshipment, while the excellent cars which run over the smooth steel tracks enable STOCK TO BE TRANSPORTED without failure or injury.

THE LINES OF

Pennsylvania Railroad Company

also reach the best localities for

GUNNING AND FISHING

in Pennsylvania and New Jersey. EXCURSION TICKETS are sold at the offices of the Company in all the principle cities to KANE, KENOVA, REDFORD, CRESSON, RALSTON, MINNEQUA, and other well-known centers for

Trout Fishing, Wing Shooting, and Still Hunting.

Also, to

TUCKERTON, BRACH HAVEN, CAPE MAY, SQUAN, and points on the NEW JERSEY COAST renowned for SALT WATER SPORT AFTER FIN AND FEATHER.

L. P. FARMER, Gen'l Pass. Agent.
FRANK THOMSON, Gen'l Manager. feb17-tf

Old Dominion Line.

THE STEAMERS of this Line reach some of the finest waterfowl and upland shooting sections in the country. Connecting direct for Chincoteague, Cobb's Island, and points on the Peninsula. City Point, James' River, Currituck, Florida and the mountainous country of Virginia, Tennessee, etc. Norfolk steamers sail Tuesday, Thursday, and Saturday. Lewes, Del., Monday, and Thursday, at 2 P.M. Full information given at office, 197 Greenwich Street, New York. sep22 1y

GUNPOWDER.

DUPONT'S

RIFLE, SPORTING and BLASTING POWDER.

The Most Popular Powder in Use.

DUPONT'S GUNPOWDER MILLS, established in 1801, have maintained their great reputation for seventy-eight years. Manufacture the following celebrated brands of Powder:

DUPONT'S DIAMOND GRAIN,

Nos. 1 (coarse) to 4 (fine), unequaled in strength, quickness, and cleanliness; adapted for Glass Ball and Pigeon Shooting.

DUPONT'S EAGLE DUCKING,

Nos. 1 (coarse) to 3 (fine), burning slowly, strong, and clean; great penetration; adapted for Glass Ball, Pigeon, Duck, and other shooting.

DUPONT'S EAGLE RIFLE,

A quick, strong, and clean Powder, of very fine grain for pistol shooting.

DUPONT'S RIFLE, FG, "SEA SHOOTING," FFG and FFFG. The FG for long range rifle shooting, the FFG and FFFG for general use, burning strong and moist.

SPORTING, MINING, SHIPPING, and BLASTING POWDERS of all sizes and descriptions. Special grades for export. Cartridge, Musket, Cannon, Mortar, and Mammoth Powder, U. S. Government standard. Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 70 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. only.

Hazard's "American Sporting."

Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration*. For field, forest, or water shooting, it ranks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6¼ lbs. and cans of 5 lbs. FFFG is also packed in 1 and ¼ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.

Superior Mining and Blasting Powder.

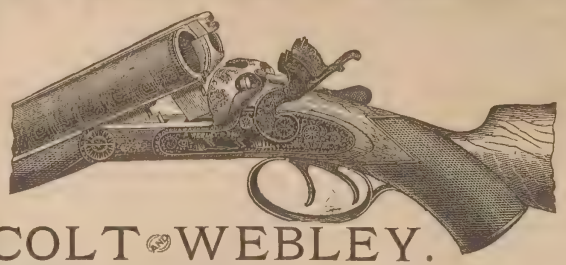
GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office,

88 WALL STREET, NEW YORK.

A GOOD PLAN

The most profitable way of dealing in stocks is by combining many orders and co-operating them as a whole, dividing profits *pro rata* among shareholders, according to the market, monthly. Each customer thus secures all the advantages of immense capital and experienced skill, and can use any amount, from $10 to $10,000, or more, with equal proportionate success. "New York Stock Reporter" and new circular mailed free. Full information for any one to operate successfully. Lawrence & Co., 57 Exchange Place, N. Y.



CAMPING OUT.

YOU CANNOT DO IT WITHOUT AN AXE.

THE INDIAN CAMP AXES, with patent covers are the only ones you can pack and carry with perfect safety. Three sizes. Send for a circular. A. S. CROSBY & CO., Waterville, Me.

ENGLAND AND AMERICA.

COLT WEBLEY.

The two GIANTS in gun-making at the present time, are P. WEBLEY & SONS, Birmingham, England, and the COLT FIRE ARMS Co., Hartford, Conn. Both owe their marvelous success to the same two causes. First, that they learned just what constituted PERFECT GUNS. Second, that they applied labor-saving machinery to their production. The result is, THE BEST GUNS IN THE WORLD, AT VERY SMALL COST. You can now buy a COLT or a WEBLEY gun, which it is a pleasure to use, for no more than is commonly paid for guns bearing unknown or fictitious names.

Of WEBLEY'S GUNS we have the TREBLE WEDGE GUNS—every gun having beautiful Damascus or laminated steel Barrels, Rebounding Bar Locks, Pistol Grip, Lever For part, Double Bolt, and Extended Rib.

DOUBLE BOLT GUNS (Top and Side Lever). | WEBLEY-LANG SELF-COCKERS.
SINGLE BOLT GUNS (Top and Side Lever). | EXPOSITION GUNS (various styles).

The last four styles named above constitute a JOB LOT, which we are selling off at about half their real value. These guns are in NO WAY inferior to the Treble Wedge guns as regards quality of material or EXCELLENCE in shooting, and are the CHEAPEST lot of guns we have ever seen.

Of COLT GUNS, we have all the regular grades, and, in addition, THE CLUB GUN. This gun is made for US, with selected barrels and the very finest materials, and is designed especially for Glass Ball and Pigeon Trap Shooting. Gentlemen who indulge in these contests will be obliged to either shoot the COLT CLUB GUN, or lose the prizes.

Every one of these guns has an elegant heel plate, with the Rampant Colt in a circle, and the words "The Club Gun," beautifully embossed upon it. *Any* Colt gun not answering to the above description is *not* the Club Gun.

Besides the Webley and Colt DOUBLE guns, FOREHAND & WADSWORTH, of Worcester, Mass., make for us a SINGLE barrel breech-loader with Scott pattern Top Lever. These guns are very light and handy, and just the thing for BOYS or men who cannot afford to buy Double Guns. They cost but a mere trifle. We are happy to announce that we are the principal distributing agents at New York city for all three of the above-named manufacturers.

P. O. Box 4,309. R. & D. FOLSOM, 30 Warren street, New York.

Shot-Gun and Rifle-Powders Revolutionized.

DITTMAR POWDER.

Champion Shot Gun and Rifle

POWDER OF THE WORLD!

IS UNEQUALLED BY GUNPOWDER

for strength, accuracy, cleanliness, and gives little smoke, recoil, or noise. It is absolutely safer than gunpowder, as it cannot explode when not confined, and does not stain the gun or heat the barrels as much in rapid firing. Captain Bogardus, champion wing-shot of the world; Dr. Carver, champion rifle-shot of the world; Ira A. Payne, and all the leading shots, use DITTMAR POWDER in their matches. Our challenge to shoot a long range rifle match, as published in our circulars, was never accepted, and is yet open to the world. Address

DITTMAR POWDER M'F'G Co.,

P. O. Box 836. 28 Park Place, New York.

NEW CROP VIRGINIA

The new crop of tobacco from which VANITY FAIR TOBACCO and CIGARETTES are being manufactured, is without doubt the finest that has been grown in a long time, and possesses a rare fragrance and a mildness so much sought after by connoisseurs. The above are now put up by us and sold under the brand EXCELSIOR, throughout Great Britain and Europe.

A GREAT INVENTION!

IMITATION

STAINED

GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or Elegantly Stained Window. It is easily applied to the glass in Windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented*, and not a single agency has as yet been established.

ONE GOOD MAN in each State wanted, to whom exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of $1.00.

Agents Apply to | L. Lum Smith, Patentee & M'f'r. 717 SANSOM ST., PHILADELPHIA, Pa. | Solo Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald:*

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to every part of the remote section of the country *free* of express or freight charges."

Original.

ESTO LUX.

GATHER up dry leaves,
And crisp and seasoned twigs, and place them here,
Beside this fallen pine, then deftly build
Them, even as the skillful raven builds
Its curious nest. Now strike the match with care,
And shield the flickering flame with bended hand.
It catches now, the tiny blaze will grow,
Will creep with stealth and twist the fibres round,
To serve as spiral stairs to mount still higher
And swing aloft the signals of our fire.

The sparks fly forth,
And rifts of fickle smoke, this way and that,
Blend with the dusky eve, and floats away
Into the night, beyond the grand old trees
That stand like sentinels against the sky.
The twigs are quickly gone, unnoticed, like
The little-heeded years that make our youth—
The years that build the fire of age matured,
To burn to blackened waste with fierce control,
Or test, in Nature's crucible, the soul.

The very flames
Speak out, and mutter through the crooked limbs
In sounds articulate—in weird-like tones,
They call aloud for more. So pile on high
The fagots here, greaved like a giant's arms;
Turn loose the demon in his mighty strength;
More, pile up more! feed him with knotted logs!
Throw on the resinous pine as piquant sauce;
More, and still more! till clouds of sparks are hurled,
The breathing of a power that moves the world.

Ah, this is grand!
The roaring blaze is calling spectres out,
And now they skip and dance among the trees,
Then chase each other off, and quick return,
And beckon each to each, and rise and fall
Like goblin figures in a masquerade.
Up leap the flames, as if to grasp the forms
Of spruce and fir and hurl them to the earth,
As mighty monarchs doomed to fall and die,
While livid tongues exultant lick the sky.

The tranquil night,
Yon dome thick-studded with its myriad gems,
Are now too calm a scene. Keep we to this;
Stir up the monster once again; turn loose
The wanton power that tramples cities down,
Then thrust him back and bait him in his den!
See now his angry flash, and hear the growls
And gnashing teeth that threaten us in vain,
While startled birds, and cringing forms afraid,
Seek rest and silence in another glade.

The glaring light
Illumes the country round, and magnifies
The standing audience of trees, that seems
To look with fixed and stupid gaze upon
The orgies of a band of sprites unknown.
But now the sombre curtain from the sky,
So rudely sundered by the unfettered flames,
Rolls down to earth; the demon fire
Wavers and falls, exhausted in his might,
And peacefully return the shades of night.

JEROME BURNETT.

A Winter in East Florida.

(FIFTH PAPER.)

DEER-HUNTING ON ST. SEBASTIAN RIVER.

ON the morning succeeding the earthquake we breakfasted at daybreak, and leaving the camp in charge of Ed and Henry the rest of us started on a deer-hunt. We were accompanied by Strobhar and his ox-cart to bring in the game. Reaching Tom Zellers' cabin at sunrise we found that worthy smoking his pipe beneath his palmetto-thatched verandah.

"Good mornin', gentlemen," was his greeting; "glad to see you—ah. Hit's a right fine day for a hunt—ah. The moon sets about 9 o'clock, and souths below along about 4 this evenin'—ah."

Sellers—a cracker "cow-boy," born and raised in the flatwoods, a good hunter and a thorough woodsman—has, in common with all Florida hunters, implicit faith in the theory that deer feed at moon-rise, moon-set and moon-south, above and below. I remarked that I did not take kindly to the moon theory.

"Why," said he, "aint it low tide at moon-rise and moon-set, and high tide at moon-south—ah?"

"Yes," I answered, "that is nearly correct, for the moon is supposed to influence the tides; but every one does not believe even that theory."

"And don't fish feed at high and low water—ah?"

"Fish bite better at low tide," I replied.

"In course," said he, triumphantly; "and so deer, fish and everything else feeds at rise, set and south of moon—ah!"

As it was worse than useless to argue the point I merely said:

"Well, Tom, perhaps you're right; and I believe myself that deer feed at those times if they are hungry."

"Hit's a fact," said he; "and I think you'll find ven'zin to-day, for I was out looking up some stray cattle yesterday evenin', and I saw lots o' sign—ah."

Taking his dogs Troop and Trailer, we left him muttering to his wife:

"These fellers will try to make me believe next 'at the moon is made 'o green cheese—ah, and no manner of account—ah."

Just beyond his cabin we crossed the North Prong of the St. Sebastian, which is here but a dozen feet in width, and we were soon traversing a large "burn" in the pine woods. The view was unobstructed for a half a mile in every direction, save by an occasional clump of saw-palmettoes and a few small "bays" or thickets. The cowboys burn off the old grass and scrub in the flatwoods at certain seasons, which is succeeded in a few weeks by a new crop of succulent and tender grass, upon which the cattle range and feed. It is on these "burns," as they are called, that the deer are found at feeding-time, whenever that may be. The hunter, by standing on a log, can see a deer at a long distance in these level, flat pine woods; but his observations will be much enhanced by the aid of a field-glass or a good opera-glass. Having discovered the object of his search quietly feeding, the experienced hunter can by careful stalking approach his quarry and obtain a shot at short range. In hunting with dogs the method is to track the deer to his hiding-place, where he may be resting or sleeping, and, by "jumping" him, bring him down with a charge of buckshot. As the dogs are trained to follow a trail very slowly, and as the game generally lies very close in the bays and brush, it is no difficult matter to jump a deer within easy gun-shot.

The dogs soon struck a fresh trail, whereupon we deployed our force in a skirmish line and moved on a parallel with the creek on our right and with the wind in our faces. I was on the extreme left of the line, then Frank, Ben and Marion, in the order named, each being a hundred yards apart. Ben, carrying the only rifle in the party, and which was rather a heavy one, soon began to lag behind, and finally he and Marion were close together at some distance in the rear. Ben, seeing a promising sappling in a little bay near the creek, whipped out his hunting-knife and, in accordance with his ruling passion, proceeded to cut it for a cane. As he was hacking off the small branches, a deer bounded out of the coppice not ten yards from him. As Ben stood staring, startled and stupefied with amazement, Marion coolly brought it down at thirty yards—his first deer—dead in its tracks. Ben, recovering from his surprise, made the woods ring with a Kentucky "who-whoop!" as he rushed in with his knife and cut its throat. It proved to be a fine fat doe. Marion's shot had made sure work of it: her neck and both legs on one side were broken. Strobhar soon coming up with the oxen, the doe was eviscerated and placed upon the cart, and Marion's face was duly "blooded" by Strobhar and Ben, as is customary in the event of killing one's first deer. They also hinted at the propriety of turning the paunch over his head, as a necessary proceedure in affairs of that kind; but Marion, flushed with victory and gore, looked quite wicked at the suggestion, and that additional feature of the cervine rite was omitted.

Frank and I were now a mile or more in advance of the others. The dogs had followed the trail to the brush bordering the creek, and I had swung around in the same direction and was thus in advance of Frank. Suddenly, a herd of five deer, three does and two fawns, bounded out of the brush into the open woods about a hundred and fifty yards ahead of me, and stopped by the side of an immense pine, where they huddled together with necks stretched listening to the dogs which were making music on the hot trail. I stood perfectly motionless and longed for a Winchester repeating rifle; then I felt that I would have been happy with one of Shelton's auxiliary rifle barrels. As it was, I had twelve buckshot, weighing just an ounce, in each barrel, and could not move a single step nearer without alarming the herd. As the dogs were drawing nearer, I could not resist the temptation to hazard a shot even at that distance. So cautiously and slowly putting up the gun, I took deliberate aim high up on the shoulder of a doe that was standing broadside to me, and fired. They sprang away for a distance of ten rods and stopped again for a few moments, when, the dogs bursting out of the cover at this juncture, they bounded away with the speed of the wind. I noticed that one of the does left the herd and made for a bay several hundred yards to the left, with the dogs following on her trail. Frank now came running up and said excitedly:

"You hit that one which the dogs are after, because it went off with it's tail down, and Tom Sellers said a wounded deer always holds it's tail down!"

We followed the dogs, and sure enough we came upon the doe struggling in the throes of death. Frank had the mournful satisfaction of cutting her throat, and shouted "who-whoop!" in defiance of Ben's previous effort and my admonition to keep quiet. Upon dressing the doe I found that a shot had cut the aorta or large artery near the heart, while a second shot had struck her in the flank. I naturally felt quite elated at the result of this long shot, and while awaiting the arrival of the ox-cart, I stepped off the distance which I had accurately marked by the aid of the large pine, and found it to be fully 123 yards; certainly an extraordinary as well as a lucky shot.

Loading up the venison we started back to camp, leaving a saddle with Sellers on the way, who would scarcely credit the long shot with the "scatter gun." Arriving at camp, the other doe was skinned and quartered by Strobhar, who then rubbed all of the meat with pepper and hung it in the shade, remarking that it would now keep ferfectly sweet until it could be consumed. This fact was borne out by our subsequent experience, for the pure, salt air of East Florida is an admirable preservative of fish, flesh, or fowl, when well dressed, dried, and hung in the shade. Ed and Henry soon set about making a venison stew, overlooked by Frank and Ben, who were meanwhile discussing the most scientific way of cutting a deer's throat. Ben, having stuck his doe pig-fashion, was of course maintaining that view of the subject, while Frank argued for the conventional crosswise method as being the only professional mode. Frank had evidently been coached by Tom Sellers. Ed while preparing some liver for the frying-pan observed that he could not find the gall. I informed him that a deer had no gall-bladder, Frank remarked that it was "goll darned" queer that Sellers had told him nothing about it, and seemed inclined to believe but half of the fact by intimating:

"Perhaps the bucks have galls if the does do not," and further added: "I will kill one just to find out."

Ed dryly observed:

"You had better swallow it, Frank, for if you wait till you kill a buck to be convinced you will die in ignorance."

"I can't swallow it if there is none," retorted Frank.

King and Strobhar had some logs at the head of the South Prong, and were going up the next day to haul them to the water. Having decided to go with them, our preparations were soon made. Early on the following morning Strobhar, Frank and myself started with the ox-cart, while the balance of the party went up in King's boat, which was of very light draught. We of the overland party crossed the North Prong at Sellers', and passed around the head-waters of the West Prong, where we discovered an abandoned Indian camp. We arrived at noon at the point of destination, and found the boys in camp, with dinner ready. Dinner over, King and Strobhar went to work on the logs, while our party struck out over the burns in different directions. Frank and I were together for a time, but separated to pass on opposite sides around a large pond. Having passed some distance beyond the pond, where I saw plenty of "sign," but no deer, I discovered a turkey running like a quarter-horse, which soon disappeared in the brush on the margin of a small stream. I ascertained that the stream was dry, with the exception of an occasional hole of water, and proceeded cautiously along the bed of it, well screened by the foliage on each side, which here and there met over my head, forming virescent arches, from which the vines and creepers hung in luxuriant festoons.

Keeping a sharp lookout for "moccasins," which slid into the holes of water as I crept along, my patience was at length rewarded by a glimpse of the turkey, which I soon succeeded in knocking over with a charge of buckshot. He was a fine gobbler, in splendid condition. While stalking the gobbler I had heard a shot behind me, on the opposite side of the pond. I crossed over in that direction on my way back to camp, and soon descried Frank a half mile away, carrying a deer. As he was not proceeding in the direction of the camp I shouted and hallowed to him, but he only kept on the faster. Finally I fired both barrels of my gun, when he looked around and I signalled him to stop. Coming up with him, I observed that his face was quite bloody, and he was smiling like a prize-fighter after going to grass.

"Frank, I congratulate you, old fellow, upon your first deer. But what's the matter with your face?" I sung out.

"Well, I thought I would save the boys the trouble of 'bloodying' me; but perhaps you had better give me a daub."

"There," said I, as I put my "red right hand" against his forehead, "I brand you with the mark of Cain."

"I am glad to be *able* to bear it," said he, with a sanguinary grin.

"But, Frank, why didn't you stop when I called to you?"

He looked quite serious a moment, and then said:

"Don't tell the boys; I thought you were an Indian

till you fired your gun. I knew the sound of it then, for Tom Sellers told me that the Indians always carried *rifles*."

"Well, but where are you going?"

"To camp," replied he.

"Frank, my boy, do you know you're lost? The camp is back there," said I, pointing in the direction.

"No," he replied, I'm not lost; I'm like the Indian; "I'm here—camp lost."

"It seems to me that you have Indian on the brain. That is a fine yearling buck, Frank; but why didn't you cut off his head, and take out his entrails, and not pack him on your shoulders like a sack of meal, with twenty-five pounds of offal which had better been left behind?"

"I was thinking of it," said he, "but just then I heard you shoot, and then I began to think of Indians. By the way, that's a nice turkey; why didn't you get more?"

"More!" I replied. "Because there were no more. What an Oliver Twist you are!"

"Well, you'd be *all of a twist*, too, carrying that buck on the double-quick, as I did."

"Frank, these Florida deer are quite small—not more than two-thirds the size of Northern deer."

"They're big enough for me," said he, "and I shan't kill another out of sight of camp, unless we have an ox-cart along."

We trussed up the little buck, cut off his head, took out the entrails, skinned up the legs to the knees and hocks, where we cut them off and tied the loose skins of the legs together in pairs. We then slung him and the gobbler over a pole, shouldered it, and started for camp, where we arrived at sundown.

Our entrance into camp was in the nature of a triumphal procession. When within a hundred yards Frank insisted on carrying the buck in alone, and swung it over his shoulders in orthodox style, with his arms through the leg loops. He strode in with his face beaming and bloody, while I followed as arm-bearer to the hero, carrying both guns and—what Benjamin Franklin said should have been the emblamatic bird of America—the turkey! The boys received the pageant with an ovation of shouts and cheers, and relieved Frank of the victory perched upon his shoulders.

"He was bound to go to the bottom of that gall business, you see!" said I, as I hung the gobbler by the side of two sand hill cranes that the boys had brought in.

"Well, how was it, Frank?" asked Ed.

"Not any gall in mine, if you please," replied Frank.

While smoking our pipes after supper, in the ruddy glare of blazing pine knots, Frank related his experience as follows:—

"After I left Doc and had got to the end of a large pond, I climbed a small tree to look for him on the burn beyond, but seeing nothing of him I looked over the pond and saw a deer feeding on the lilly-pads near the edge of the water. I slid down and crept along until I came in sight of him. Then I straightened up, kept my eye on his tail, and walked towards him without moving my arms or head. When he shook his tail—as he did every few minutes—I stopped perfectly still, for then you know he would lift up his head and look around. I was to the leeward of him, so he could not wind me. As soon as he went to feeding again I started and kept moving up to him until he winked his tail again, when I would stop, for you know a deer always shakes his tail before he raises his head."

"How did you know that, Frank?" asked Ed.

"O, Tom Sellers told me. Well, I got up to within seventy-five yards of him when he shook his tail, raised his head, turned around, and saw me. I kept perfectly still, hardly breathing. After staring awhile he started on a trot right towards me and came up sniffing, until he was but twenty yards from me. I thought that was close enough, and raised my gun—then you ought to have seen him jump! I blazed away and down he came; he tried to get up again, but I rushed in, caught him by the head, and had hard work to hold him. He threw me once on my head and made my nose bleed, and that's how my face happened to be so bloody when Doc met me."

At this the boys made a movement as if to get up, but I stopped them by saying:—

"It's all right, boys; I 'bloodied' him when I found him."

Go on Frank.

"Well," continued he, "I got his head to the ground and held him down like a horse by sitting on it till I got out my knife and cut his throat. I found that I had bored him through the neck with three buckshot, though I aimed at his head."

"Why didn't you give him the other barrel?" asked Strobhar.

"I never thought of that," said Frank, and added: "And then I didn't want to shoot him all to pieces."

On the next day we all returned to our camp at the mouth of the North Prong. J. A. HENSHALL.

Fish Culture.

SPAWN IN OFF SEASON.—*Santa Barbara, Cal., Tuesday, Sept, 23d.*—We hunting folks are greatly puzzled over a question in natural history, and come to you in hope that you can solve it. Until the last two years our trout always ascended the streams during the heavy spring freshets, and laid their spawn about the time the water began to subside, say in March or April. Last year and also this, I have seen trout caught in August and September that were full of spawn; a thing that was never known to happen before. I have talked with old fishermen, and one in particular says he has caught fish every year for twenty years and he never saw such a thing before last year. The Fish Commissioners have been stocking some of our Northern streams with Eastern trout lately. Can it be that they have mixed with our trout so much as to change the time of spawning?

E. C. TALLANT.

REPLY.—Embryo eggs and ova in various stages of growth, are found in all fishes nearly all the year round. We have specimens of immature ova taken from black bass in October and February; from Eastern trout in the spring; and from salmon peel or parr *only a year old*. One writer in London *Land and Water* states that parr-marked fish have been taken with ova, roe actually exuding from the fish on and previous to the fish being handled to remove the hook. He says: "Some were sent me by Mr. England, fishing on the Exe, some four years since, preserved in glycerine, most certainly as a novelty, since which many such cases have come before me. But with regard to the ova or milt of such young fish being productive, that I cannot vouch for, and if asked the question pointedly should certainly say 'No'; in fact, I do not believe in breeding salmon until they are in their third year. It may be a trifle of time either way, probably soon after their second year has expired, but not before." It would be well to determine whether the spawn of your trout (which, differently from ours, spawn in the spring) are mature and fruitful. Variations in nature are phenomonal, but not marvellous. Eastern salmon spawn in the fall, yet there is late run which spawn in January and February, and return to the sea as kelts in June.

INTRODUCTION OF NATURAL FISH INTO IOWA.

THE following paper was read by Mr. B. F. Shaw, of Anamosa, Ia., before the Central Fish Cultural Association at Chicago, October 2d:—

—MR. PRESIDENT AND GENTLEMEN OF THE CENTRAL FISH ASSOCIATION: At the request of some of those who were foremost in inaugurating this convention, I agreed to write a few word about my experiences in stocking Iowa waters with native fish. I shall attempt to be as brief as possible.

Along the Mississippi bottoms there are innumerable sloughs, ponds, and lakes. During the spring months and high water, they are connected with each other, and with the main river. As this is the spawning time of many of our native fish, they find their way into and deposit their spawn in these waters. Many of them, but more especially the bass family, stay by and watch their nests and young until the receding and clearing waters warn them to return to the main river. In this way a large supply of the young of these fish is insured. The large fish return to the river, leaving their young to care for themselves from this time. The waters begin to dry up and recede, the sloughs are cut off from the main river, the shallow portions dry up, the deeper parts become ponds, and all, including lakes, sometimes of hundreds of acres extent, during the summer months, gradually, by percolation and evaporation, become entirely dry; the higher and shallower ones first, and the deeper and those on lower ground later in the season. And all the untold millons of young fish they contained are lost. More than twenty years ago my duties brought me very frequently to these prison-pools of dying young fish, and I have seen them frequently since.

To save a small portion of this loss, and place the fish where they could live and thrive, would it has long seemed to me, be a very valuable work. In accord with this thought I have made for the Iowa fish commission two trips down the Mississippi river, where it bounds the eastern border of our State, one in the fall of 1876, and another and more successful one in the fall of 1878. I will give you a very brief account of this last trip.

The main purpose was to take the fish from these sloughs, distribute as many as possible in the inland waters of the State, and put the balance into the Mississippi. To aid in accomplishing this purpose, I first saw the superintendents or general managers of the various railways running across the State from the river west, and procured their consent to assist in the work by moving an aquarium car, giving us water from their water-tanks, stopping trains to distribute fish, etc. which necessary assistance was cheerfully given. The C. B. & Q. railroad furnished a car to be used over all roads during the trip. The arrangement of the car was simple, but but quite effective. In one end of the car, as high as they could be raised from the floor, and firmly fixed in position, were placed two large casks holding about thirty barrels of water. A tin conductor running the whole length of the car was connected with the above by a rubber hose. In each side of this conductor, about eighteen inches apart, were inserted faucets, under these faucets the cans for carrying the fish were placed in such a manner that the water ran into them in a constant stream at one end and out at the other through a wire screen. The cans were four feet long, one and a half wide, and one foot high. An opening in the top of one car admitted water from water tanks along the line of railroads directly into the casks.

To insure against lack, the water after being used was gathered in a reservoir beneath the car, and with a pump could be thrown back into the casks for use as many times as necessary.

I arranged with Capt. T. G. Belton, of Clinton, Iowa, for the use of his little propellers Dart and Flat to accompany the expedition, both of which were put in condition for the services required of them. We left Clinton, Iowa for the north line of Iowa on the third day of September. Our method of procedure was to take the fish from the before described sloughs with minnow nets. Select such as we desired (varieties and sizes) for distribution, which we put into live boxes, and turn those left into the running waters of the Mississippi. Our live boxes were made twelve feet long, one and a half feet wide, and one foot high, ends sloped to run easily through the water, openings covered with wire cloth and slides to open or close, as the motion of the boat or current might require. These were fastened side by side in couples, for convenience in handling, and we had twelve of them. Our seines were like ordinary minnow seine web, and were from sixteen to sixty feet in length, and three to four feet in depth. When the live boxes were full of suitable fish, we would meet the car at some station on the river, transfer fish from boxes to cans in the car and arrange to meet again at some time and station below. The attendants and car proceeded to distribute the car of fish, and the boat and fishermen continued their work down the river.

We sent car-loads west from North McGregor, Buena Vista, Dubuque, Sabula, Clinton, Davenport, Muscatine and Burlington, distributing along the lines of road over which we traveled, from 640,000 to 650,000 fish. Black and stripped bass, wall-eyed pike, croppies, sunfish, channel cat, drum fish and striped perch, neither the largest nor the smallest, but good healthy fish, used to finding their own food, natives of our own waters, and beyond most of the dangers of young fish. The distribution was as general as the magnitude of the work would admit, and they went into every stream of any size crossed by all east and west railroads in the State. The larger proportion of fish caught during the trip were of the varieties named before, for the reason that we fished but little except in ponds nearly dried up, and most of the soft rayed fish, buffalo, suckers, minnows, &c., had already died, leaving only the hardier varieties, and in some of the more stagnant pools all but the bass and wall-eyed pike were gone, and from some of the larger ponds that had dried into stagnant pools I have seen four bushels of oung fish, principally young bass, taken with one haul of the minnow seine. As many of the ponds had dried up before we made our trip, and as many more were yet too deep and large to fish with our small seines, it follows that as successful work could have been done after and before us during the time we were at work, and that, although we took from the sloughs along the Iowa line of the river 1644 bushels, estimated at 20,000 to the bushel, in round numbers, 3,290,000 fish, yet we saved but a very small portion of the fish hatched there that season. In the fall of 1876 we took from the sloughs 1,574,000; deposited in the inland streams of the State 319,000, and in the Mississippi 1,255,000, and in the two trips took a total of 4,864,000; deposited in the inland waters 960,000, and in the Mississippi 3,914,000.

If it is true that a few bass can in a few years stock plentifully a great river like the Potomac or Connecticut, here is a supply of fish that, if properly economized, would soon make them abundant in every water upon the continent in which it would be desirable to have them placed. No expensive trips for eggs; no hatching-houses, boxes, troughs or screens; no egg-picking or manipulation of young fish: no vexatious questions of fungus or disease, salt or no salt; but ready at hand for distribution near the stations of many of our best railroads. We find an abundance of our most desired fishes, and those that no fish-culturists have yet been able to successfully raise artificially, and of varieties best suited to a great majority of our Western waters. With our primitive arrangements for carrying the fish, we had excellent success, losing but few in transportation, and with arrangements such as an extensive experience could design, large numbers could be moved to any part of the country. This work, as it is of common interest to all the States along the Mississippi, should be carried on by the united effort of the interested States, on a small appropriation by the general Government for the purpose.

It will naturally be asked, What is the result of this work? I have not space to give evidences or testimonials, but will say that in all the inland waters of the State where the laws are enforced there has been a very manifest increase in the numbers of fish, especially of bass, and in many waters where they were unknown they have made their homes. But I am sorry to know, and have to report, that the great numbers deposited in the Mississippi have not been enough to keep good the destructive losses caused by fishing out of season. During the months of April, May and June our Mississippi fishermen go upon the spawning grounds and reap their greatest harvests of percoids. They have studied their habits until they know their spawning haunts, and their peculiar labors at this particular time make them comparatively an easy prey. One market in the town in which I live, nearly eighty miles from the river, sold 300 pounds of native fish from the Mississippi River per week during April, May and June, or 3,600 pounds in that time. The members of the bass family in this lot of fish contained not less than 5,000,000 eggs. Consider the number of markets along the river and the various lines of railroads furnished with fish from the same source, and you will have some idea of the terrible destruction from this one cause alone. These fishermen think me their enemy, and denounce me in round terms for calling their attention and the attention of the public to these facts. My great desire is to increase the fish, but a continuation of this practice means their utter annihilation, and the annihilation of the fisherman's business as well. These same fish caught after spawning, in much finer condition, would give to the river an abundant future prospect of good fishing. Shall this destruction go on, or will the good sense of our people demand that our law-makers give to the fish the much-needed protection? I conclude, therefore, gentlemen, that in streams depleted of any of the basses by excessive fishing and improvidence, where a few remain in the stream, that in view of their peculiar habit of caring for their eggs and young, the best method of insuring plentifulness is to protect them for a time before and during their breeding season, and prevent a wasteful destruction at all times, and in waters barren of these favorite fish, utilize the million of fish that would otherwise die, as I have heretofore explained in this paper. Asking a careful consideration of these matters at your hands, I thank you for your attention.

MAINE—*Indian Rock, Oct. 13th.*—Fishing closed up rather poor with us this season, the trout not making their appearance on their beds until after the close time. The Commissioners are busy at work, and the house that holds one million is already half full. FRED.

—The Maine Fish Commissioners have brought a libel against the Sprague Company to enfore the law for neglecting to construct a fishway at the dam in Bangor City. The libel states that the company is liable to pay to the State no less than $2,440, nor more than $12,200, that is, not less than $30 nor more than $100 for each of the 122 days that the neglect has continued between May 1st, and Nov. 1st, 1879.

MICHIGAN.—*Escanaba, Delta Co., Oct. 12th.*—I had but few trout to sell this year. I have a fine lot of fry which are doing well, but I have no hopes of there growing like those in Iowa. I have a good lot of breeders and expect to get all the spawn I can take care of and bake my own bread. A. F. YOUNG.

Natural History.

THE REDFISH OF THE NORTHWEST.

FORT WALLA WALLA, W. T., *Sept. 27th.*

THROUGH the kindness of Mr. J. A. Messenger, who has been fishing during the past summer in the Wallowa Lake, I am enabled to give you a little more information about the redfish found in the above locality, as well as in the Payette and Salmon river lakes in northeastern Idaho. Mr. Messenger resides in Walla Walla, and is well known throughout this country as an excellent sportsman and close observer, and his statements can be fully relied on.

He tells me that the redfish or redtrout is anadromous; that he has seen them ascending to Wallowa River to the lake in large numbers in the spring, and that the peculiar deep red color for which the fish is noted is only assumed during the spawning season. At other times this fish is of a bright silver color, and is probably the same fish known under the the name of "mukletio salmon" about Puget Sound. When these fish first arrive at the lake they look trim and slender, but once there they soon become very broad and deep (perch-shaped), growing constantly in depth, but not much in length. The head of the fish also undergoes a great transformation, and becomes hook-nosed. The fish have no teeth when they first come to the lake; these make their appearance shortly after their arrival, however, and as they also shed their scales about the same time, you find an entirely different looking animal from what this fish was perhaps a couple of weeks previously. The average weight of the male is from five to six pounds, that of the female from four to five pounds. The largest one caught this season weighed about ten pounds, but fish of this size are very rare. Although these fish do not appear to feed on anything while in the lake, they nevertheless will take a hook now and then if it is baited with their own eggs. Presumably they do not bite for the sake of the food on the hook, but more out of play. I know that salmon trout do the same thing here in the Walla Walla River, and, I think, for the purpose of replacing the eggs in a safe spot. The mates of the redfish are said to be very quarrelsome on the spawning beds, and to fight each other constantly. Redfish eggs are about one-third smaller than those of the chinook salmon (*salmo quinnat*), and of a deep red color.

The principal spawning grounds of these fish are about the mouths of the small tributaries of the lake and also along the shallow, gravelly shores of the lake itself. This is about four miles long, and from a mile to a mile and a half wide. In places it is known to be as much as 325 feet deep, and there are undoubtedly deeper spots than this to be found in it. The fish commence running into the lake in the first half of July, and the run continues throughout the month of August. After spawning during September they leave the lake again, and return presumably to salt water. Many die, however, annually while in the lake from injuries received during the run up, or from exhaustion, and large numbers are destroyed by bears, who are very fond of them, and are said to be very expert in catching them. This summer from twenty to twenty-five thousand pounds were caught and salted, and they command readily from ten to fifteen cents per pound in this market. Besides the redfish the lake abounds in fine, large mountain and bull trout and a species of small whitewish (*Coregonus*). Mr. Messenger caught a bull trout, a splendid, slender-looking fish, with elegant pink spots on the sides, weighing nine pounds four ounces, and tells me that mountain trout of five and six pounds weight are plenty.

Wallowa Lake is easy of access, the climate there during the summer is delightful, and besides the excellent fishing, large game such as elk, Deer is plenty, and anyone who may have lost a bear can easily find one there.

CH. BENDIRE.

REMARKS.—The value of the information given above by Capt. Bendire may be inferred when we state that the redfish of Idaho and adjacent country have been the subject of earnest inquiry and investigation by leading naturalists for the past seven years. As usual, FOREST AND STREAM is the first medium to shed the light sought for. We refer to our columns as a standing record that we have ever been foremost in the field of investigation and discovery as respects natural history subjects in America. The conclusion is palpably reached, namely, that the hues and shapes which fish often assume at different seasons of the year are very apt to be mistaken by careless observers for characteristics of new or different species. In determining species the greatest care is necessary to see that all the conditions are uniform when the comparisons are made; that the fish compared shall be of the same sex and age (and size, inferentially, though fishes of the same age differ greatly in size); and that the investigation be made at the same seasons of the year, and, if possible, from water of the same temperature and character.

From the definite description given above of the redfish, there seems every reason to believe them identical with salmon, a variety of which are so common in Alaska, as described by our special correspondent there.

REMEDY FOR RATTLESNAKE BITE.—In confirmation of what has been written by ourselves and Captain Bendire, in regard to the *Euphorbium glytosperma*, as an antidote for rattlesnake bites, Mr. Livingston Stone writes from Baird, Shasta Co., Cal., that this plant is very common in that locality, even growing as a weed in the door yard, and he says:—

I am informed by Mr. J. G. Lemmon, an eminent botanist of this state who has been visiting me, that he has often heard it alluded to in the Colorado region as a remedy for rattlesnake bites, and that in 1878, a rattlesnake's victim in the Yoesmite Valley was treated solely with this herb by a Spanish woman and recovered. This seems to indicate that the remedy was known to the early Spanish setters of this coast.

Mr. Lemmon further informs me that in 1874, a child of J. M. Hutchings of the same valley, ate of it by accident, and was deathly sick for several days.

This shows the active character of the poison of the plant. Your editoral on the subject was deeply interesting to us here, because the rattlesnakes are so outrageously thick on this river, that it is a question of grave practical importance to us all whether a supposed remedy for rattlesnake bites is really an antidote. The testimony thus far seems to be conclusive that the *Euphorbium glyptosperma* is an antidote for them.

ANOTHER CURE FOR RATTLESNAKE BITE.—M. G. Collins, of Tennessee, claims to have discovered a cure for rattlesnake bites. Drs. Eve and Shacklett of Nashville, according to the *American*, made a test of the medicine. Collins let a rattlesnake bite him on the wrist, and at once applied to the wound, and took inwardly a decoction of mosses from oak and hickory trees. He suffered from nausea, and his pulse and temperature were excited, but within an hour he had completely recovered. The bite of the same reptile speedily killed a dog.—*Louisville Medical News.*

MANUAL OF CONCHOLOGY.—Mr. Geo. W. Tryon, Jr., of the Academy of Natural Sciences, Philadelphia, announces the publication of the first volume of his Manual of Conchology, being the Cephalopoda. The attention of naturalists is invited to this most important work, which when completed, will be the most comprehensive as well as the most available compendium of conchology published.

EELS IN A NEW ROLE.—The following I clip from the Toronto *Mail*, of the 9th inst., and, as I think the case a rather singular one, would ask you to make a note of it. The question arises, what induced those eels to take refuge in a turbine wheel? C. A. P.

"*Oct. 8th.*—The turbine water-wheel, at forty-horse power, furnishing the motive power for Patterson & Law's foundry, at New Edinburgh, has been stopped by eels during the past two days. One of the eels taken out measured three feet eight inches in length, and over nine inches in circumference. The blockade was perfect. The eels take lodging in the wheel when it is not in motion. This is the second time this season that the wheel has been stopped from working through the same cause." *Guelph, Canada, Oct. 10th,* 1879.

REPLY.—Instances, such as you relate, are not at all uncommon. Eels are fond of fish fry, and will follow them into the smallest rivulets. The eels which clog the turbine are in pursuit of food. Seth Green says: "Eels are exceedingly destructive in all waters to which they have access, and it is impossible to keep them out, as they can go up the perpendicular sides of water-gates, and possibly over the sides of the dam when wet with a heavy rain. The only plan is to use eel-pots, and keep down their numbers as much as possible." Eels are gregarious; which accounts for their massing in such numbers as to clog the mill-wheel.

AND ALL IN THE SHELL.—*Bridgeport, Oct. 15th.*—There is an association of Fat Men who assemble every year at Norwalk to eat clams, and we hear fabulous accounts of what they can do in that respect. Shades of the mighty fat men grow pale! Behold, I affirm that I have this day removed and counted 732 clams eaten by a coot, which coot, plump and sleek, fell before deadly aim in Black Rock Harbor. Said clams I herewith present to the FOREST AND STREAM, to be entered in the collection of your office. GEO. T. LEWIS, M.D.

The Kennel.

THE LEONBERG DOG.

ST. JOHN'S, *Newfoundland, Oct. 5th.*

IN FOREST AND STREAM for May 8th, 1879, the following extract from *Land and Water*: "Such, in all probability, is the Leonberg dog, about which so much has of late been written. I believe he is simply a big mongrel, a combination of Newfoundland, mastiff and deer-hound, or some such other incongruous mixture."

The writer of the foregoing paragraph is altogether mistaken regarding the Leonberg breed of dogs; and as we have here three specimens of these fine animals, of which I gave a very brief account in the issue of FOREST AND STREAM of July 5th, 1877, I now submit a more extended description.

The specimens I refer to were brought here by a friend of mine, Herr T. A. Verkruzen, of Frankfort on the Main, in 1877. They were then puppies of ten weeks old—two females and one male—and were procured direct from Count Essig, of Leonberg, Wurtemberg, the breeder of this new variety; and were specially selected by him, with the view of introducing the breed into this island, for further improvements by crossing, and in order to try the effect of our climate. Herr Verkruzen, who at no small trouble and expense procured these puppies, hoped to benefit the colony by the introduction of this valuable species into our island, where the genuine Newfoundland dog is almost extinct. Two or three friends united with me in taking charge of them. In a year they had grown to be magnificent animals, in regard to size and symmetry, and were the wonder and admiration of all lovers of dogs. Unfortunately we lost the male soon after, in consequence of his swallowing a dose of strychnine which accidentally came in his way. Count Essig, being informed of our loss by Herr Verkruzen, immediately forwarded another dog even finer than one whose premature death we had to deplore. This misfortune has delayed the propagation of these animals somewhat, as they do not come to maturity till three years of age. The names of our Leonbergs are Marko, Diana and Juno. Marko is now over a year old, and is a dog of immense size already, having a double or split nose, noble presence, most teachable and sagacious, and very gentle and fond of children. Diana is admitted to be the handsomest dog ever seen here. She is 27 inches in height at the shoulder, 5 feet in length, and weighs 107 pounds. Juno is also a fine dog, showing, in her split nose, a preponderance of the Pyrenees wolf dog; very intelligent and an excellent watch dog. She has been the first to breed, her first litter being now eleven weeks old, and the sire being the largest and finest Newfoundland dog in St. John's. Marko is yet too young for breeding purposes. Juno's progeny are very promising, and will, when grown, show the effect of increasing the Newfoundland strain of the Leonberg dog. We have now fairly transplanted this valuable animal to the soil of Newfoundland, and in a short time the species will have multiplied considerably. In this climate they thrive admirably. Applications for puppies are already very numerous. In Europe a good specimen, duly trained, often sells for £50 sterling, and some of the finer animals have brought £100. The Prince of Wales has one of them which he highly prizes, and another is a favorite with the Empress of Austria. At the leading dog shows of the world the Leonberg dog has carried off the highest prizes. Their introduction here will ultimately prove to be of great benefit, and may yet entirely displace the wretched mongrel race we have now, and, as an article of commerce, become even more valuable than our present purebred Newfoundland dogs.

Count Essig in a letter to Herr Verkruzen gives the following account of his dogs:—

"I beg to state that the breed I reared since 1846, is a result of a successful crossing of the Newfoundland dog with the original dogs of the St. Bernard Mount, which latter I have since improved by the great Wolf dog from the Pyrenees, whence the first Bernardine dogs originated. The Leonbergs are the largest race of long-haired dogs who unite sagacity with size and beauty. All European papers have favorably noticed my dogs, and given illustrations and descriptions which prove the utility of the race. For the first honorable mention of them I am indebted to His late Majesty King William of Wurtemberg. In 1855 a gentleman of Aix la Chapelle wrote to me: "I have received a kind of dog from you which I have been wanting for years, but could never meet with. Two years ago I travelled to Italy, and crossed purposely over the St. Bernard's Mount, to procure a dog thence, but found upon inspection that the actual renowned race did no longer exist there, but were replaced by a commoner short-haired animal. The same I found to be the case at the Convent of Mount Simplon, which I likewise visited. Subsequently I obtained a Newfoundland dog from the Zoological Gardens at Berlin, which did not answer my expectations either; but now I am suited, and you may rest assured that proper care and attention will be paid to the dog." The Rev. Deliquise, Friar of the St. Bernard Hospital, expressed in a letter to me his sorrow that they only possessed one dog suitable for the service, and when I made them a present of two dogs, the Friar wrote to one afterwards that the community of St. Bernard's Mount had desired him to express their heartfelt gratitude, since they regarded the present as a great service rendered to the hospital. Subsequently a traveller was told by the Friar Christopher, after describing a snow storm in that place, that a stranger from Wurtemberg, (Essig) an experienced breeder of dogs, had ten years ago made a present to the hospital of a couple of his dogs, who crossed with their old race, had produced an excellent breed of great strength and perseverance; and that the English Prince of Wales had got one of their dogs, for which he had made them a present of a piano from the factory of Erard, which agreeably shortened their long winter evenings. The Director of the Hospital of the St. Gothard's Mount, Mr. Lombarne, wrote in 1868 to a friend at Leipsic, that, in place of the Barry race, which are no longer existing, they now had the good natured and superior dogs of the Baron Essig of Leonberg who acquitted themselves of their duties.

"At the first dog show in Germany the Hamburg report states that Baron Essig obtained the highest prizes for his Leonberg dogs, and carried the day over all others, which is the more remarkable as English dogs representing the value of £1,000 entered into competition. The honor was all the greater as there were forty or fifty Newfoundland dogs at the exhibition. At all exhibitions since, viz., at Islington, London: Altura, Berlin; Vienna, Paris, Baden and Lima, in Peru, my dogs have mostly carried off the highest prizes for excellency in form and size. The *Suabian Mercury* (newspaper) Nov. 15th, 1872, writes:—'We have mentioned before that the Leonberg dogs of Baron Essig are sent all over the world. This autumn three went to Kischineff, in Bessarabia, and we now learn by news from London that at the International Exhibition at Lima, in Peru, two of Essig's dogs have fetched the first prize, consisting of a gold medal and money. This large, long-haired race of dogs has, like many things, become an article of luxury, and they are not only to be found in the country for watching purposes, but especially in the palaces of the great, since from kind disposition they are great favorites, especially with the ladies. At the great dog show of Paris in 1873 my dogs obtained the first prizes of two gold medals and two silver medals. My dogs are great favorites of the Empress of Austria, who well knows how to value a dog's good qualities, and has lately received the fifth dog from me. The Zoological Gardens of Brussels, Dresden, Frankfort have had many dogs from me.

"These dogs are not subject to madness, since hitherto no case has occurred. I often have dogs from thirty to thirty-six inches in height and above 100 pounds in weight, of great value. It may be necessary to state that the rearing and training of my dogs requiring two and three years for their development, is associated with expense and trouble, and requires perseverance and a love of the object in view. The colors of my dogs are white, with black spots, wolf-gray or black, the latter having frequently a double or split nose. They differ from other kinds, since owing to their size they require a longer time for development, and they likewise need a more indulgent treatment in their youth. Whilst other dogs are full grown at one year, this race requires three years to come to perfection."

I observe by FOREST AND STREAM that the celebrated

Leo has become the property of an American gentleman. This is the dog who obtained the first prize at the Crystal Palace show. A friend of mine here, who is an excellent judge of the points of a Newfoundland dog, says that Leo is deficient in two of the essentials of the race—color and dew-claws. His brown, or foxy color, would at once condemn him in the eyes of a Newfoundland judge as not being of the genuine breed. A jet black color and wavy coat, with a curling over the rump, are here regarded as essential points. Great stress is also laid on dew-claws as a mark of the true breed. Leo has none. His coat is the color of a dry beech leaf, and is thin and fine. For these reasons my friend pronounces the dog who has won such high honors as a Newfoundland to be "a fraud," being deficient in the essential attributes of the pure breed. His opinion, I may add, is entitled to weighty consideration. M. HARVEY.

Our correspondent is wrong with regard to Leo. The dog has not been imported to this country to our knowledge. The Leo to which he alludes as having been mentioned in these columns is probably the first prize winner at the New York show of 1877, and owned by Mr. D'Espinville Picot, of Philadelphia.—[ED.

CHOREA.

This terrible sequel to distemper is but too common although it does not necessarily immediately follow an attack, or at least become immediately apparent. It may be developed only after the first violent exercise to which the animal is subjected. We deem the matter so important that, instead of answering the following query in the usual way, we give it space here :—

Manistee, Mich., Oct. 10th—Editor of Forest and Stream :—I have a three-year-old black and tan hound, which I use for deer. During the past summer he lost a toe from his right foot, but it inconvenienced him hardly any. Supposing that same was well I let him have a run last Friday. The day was quite warm, and he had some four and a half hours' run before I got the deer. On looking at his foot I found that the skin on his toe was partly gone, and a peculiar twitching in the foot, leg and shoulder, and same continues yet. When standing the twitching is less, or scarcely noticeable : when lying down it can be plainly seen ten feet away. These twitches or movements are easiest seen from the center of breast to shoulder in front ; the cord or muscles of the legs move somewhat, and holding the foot in my hand it seems as if he was trying to twitch or pull the same away. No fever or swelling, and he seems in perfect health. What is it, and caused by what—nervous irritation or from strain or becoming too tired in running? I prize him highly, he being the best dog we have in the county. I would like a full explanation of case, treatment, and what to do to cure him, if same can be done. If it gets no worse it would not hurt his hunting qualities, but I would feel greatly relieved if same could be cured.

E. A. SHORES.

The trouble is chorea, and is due to nervous irritation. This form of disease often follows distemper, and when recovery follows, the twitching will only occur after too much exertion. It is impossible to say whether the injury to the foot caused in any way the chorea, without seeing the dog, but think not. It is possible the twitching may have existed unnoticed for some time, and the four and a half hours been the cause of the attack which was noticed. This would be the more probable if the dog ever had distemper even in the lightest manner. The treatment consists in giving 1-32 grain strychnia three times a day, giving less if this causes the dog to "stiffen out" any—*i. e.*, have a kind of tonic spasm—increasing gradually until 1-16 grain can be taken, the idea being to keep just short of the dose which causes this spasm or stiffening of the muscles. Cod liver oil should be given if needed, as shown by emaciation.

A friend has at present a setter which twitched most of the time, just as described by the above correspondent —*i. e.*, "from center of breast to shoulder in front." This yielded to strychnia given continually as described, so that now the twitching is only seen after a hard run and swim, or when the nervous system is exhausted. We can recall several such cases. Good living and a dry kennel are necessary adjuncts to a cure. If the wound of the foot was the cause, or thought to be, it would be as well to clean it well by keeping a warm flaxseed meal poultice on the wound for a day or two, having previously washed the foot and removed any thorn, bit of gravel or any extraneous substance. Then dress with simple cerat, and if it does not heal readily it may be powdered with pulverized red cinchona bark (*Rub. cort.*), or it may require to be touched with stick nitrate of silver.

MISSISSIPPI.—*Natchez, Oct. 13th.*—A display of thorough-bred dogs was given at the Goillard Sporting Club tournament, at which the following awards were made :

CLASS FIRST, SETTER DOGS.—Best setter, first premium, blue ribbon, awarded to H. S. Cotman's Rap—100 points ; second premium, red ribbon, awarded to R. H. Colhoun's Medoc, and Samuel Stanton's Monk—95.

CLASS SECOND, POINTER DOGS.—Best pointer over 12 months old, first premium, blue ribbon, Aaron (Tip) Stanton's Bluff—200 points ; second premium, red ribbon, to C. W. Babbitt's Shot —97 points.

Best pointer, under 12 months, first premium to W. D. Jenkins' Rino ; second premium to Samuel Stanton's Kate.

—Mr. T. D. Boardman, of West Manchester, Mass., claims the name Satan for mastiff puppy, by Four, out of Sally ; whelped May 25th, 1879.

—Mr. T. D. Boardman claims the name Nemo for St. Bernard puppy, out of Fannie, by Jack, he by imported Hero ; whelped Feb. 5th, 1879.

The Dalmatian Dog "Captain."

THE DALMATIAN OR COACH DOG.

IT is rather surprising that more of these handsome house and stable dogs are not bred. In fact, really handsome specimens are very rare, and it is seldom that more than half a dozen are seen at any of our shows. Not many years ago, in England particularly, the carriage dog was much more generally kept as a part of the stable establishment, but it was also then the barbarous custom to crop his ears short to his head. The origin of the Dalmatian is obscure, but "Corcincom," an English authority on dog matters, thinks it is reasonable to assume that he is a native of Dalmatia, on the eastern shore of the Gulf of Venice. The fact that for two years and a half he has been domesticated in Italy, would point to this having been his origin. When he was first introduced into England seems uncertain, although in the last century he was considered an indispensible adjunct to the equipages of the wealthy. The authority mentioned above, in a recent article in the columns of our English contemporary, *The Country*, says :—

"It has been assumed that the Dalmatian possesses an instinctive fondness for the horse, but this I do not conceive was the cause of his being attached to the carriage and stable ; but I rather suppose his ornamental qualities were the attractions to owners of equipages, and that his liking for horses and all connected with them has been fostered by habit and is now inherited.

"'Idstone' says he never knew a dog of the breed that did not readily take to following horse and conveyance, but my experience has been different, and I possess one now of prize blood that shows no propensity to following a carriage, although reared among horses. Still, that is a predominating trait in their character, and, in fact, in that seems to consist their sole delight, and no matter at what hour, they are always ready for the turn out, and do not seem to care how far the run may be.

"Some Dalmatians keep close under the carriage in running, so much so that they appear to run as though chained to the axle, but others—indeed the most of them —when fresh and full of life gallop in front, showing much dignity as the forerunner of the carriage, and pleasure in association with it. At other times they run marvellously close to the horse's heels, but they never snap at them or jump up barking at them in front of their nose as dogs of other breeds are apt to do under similar circumstances.

"The Dalmatian has been accused of an apathetic temper, of concentrating all his affection on the horse and showing none to his master. This is, however, an unjust charge. Dalmatians, like all other dogs, are very much what they are made, and if the owner forgets that the Dalmatian is an animal appreciative of caresses and kindness, and treats him merely as an ornament to his establishment, he cannot reasonably complain if the dog bestows his affections on his fellow-occupant of the stable, and strong are the friendships sometimes seen to exist between the dog and the horse. But the carriage dog, when made a companion of, is faithful and affectionate, if less demonstrative than some breeds, and therefore I strongly recommend him to the bicyclist and should like to see him regain his popularity as a carriage dog. It is said he is used in some continental countries as a pointer, and I do not doubt his innate capacity to fill that position if his powers were developed by training, but as he is never so used here I treat him merely as an ornamental and companion dog."

The points of the Dalmatian, as given by the same authority, are as follows :—

The Head, Ears and Eyes—The head very much resembles that of the pointer, but is neither quite so deep nor so broad in muzzle ; the skull tight-skinned, no flews —indeed, no loose skin about either head or throat ; the eyes medium size, dark in color, and bright and sparkling ; the ears broad at base, narrowing to a rounded point, thin in texture and spotted.

The *Neck* of fair length, nicely arched, airy—that is, free from coarseness—and clean cut, there being little or no wrinkling or dewlap.

The *Shoulders* must be well sloped and free, and wel covered with muscle : but not thick or loaded.

Body, Loin and Quarter—The body elegant, not heavy ; the ribs fairly sprung, but not rounded like barrel hoops, which would indicate slowness and destroy the symmetry ; the loin strong and muscular ; the quarters strong, nicely sloping from the huckle bone to set on of tail.

Legs and Feet—These are most important. In the hindlegs the second thigh should be seen and the hock well let down ; the forelegs should be straight and clean made, lined with strong muscles. The feet are of good size, of compact shape, rather round than long, knuckles well up, and the sole thick, hard, and tough. A spreading foot is very objectionable, rendering the dog unfit for travel.

The Tail—This should be strong at the insertion, and rush grown—that is, tapering to a point, and carried with a slight curve upwards, but neither crooked nor curled. If distinctly spotted it is considered a great advantage, as adding much to the beauty of the dog.

The coat should be clean and sleek, but firm, close, and wet-resisting, neither woolly nor silky.

Color and Markings—These give the dog his very distinctive character, and therefore are properly very highly valued. The body must be a pure white ; single black hairs running through the ground color, giving a grayish hue, are a very great fault ; the purer and brighter the white, the better the black and liver spots look by contrast ; the color of the spots should be a pure black, blue-black, or rich reddish liver ; the handsomest are the tri-colors, with black spots on body and bright, well-defined liver spots on back of forelegs, inside and front of thighs, and sometimes under and on sides of jaw. Some of the earlier winners had distinctly tanned faces, but these and black patches are objectionable, although less so than the dark ridge of conglomerated spots that often runs down the back. The more distinct from each other and the more clearly defined against the white the spots are the better. In size they should be from that of a sixpence to a florin, and the rounder the better. Large ones generally run into each other, and when too small they want boldness, and give a shotted or freckled appearance.

The portrait we give is that of Mr. Faudry's Captain, who of late years has been the principal prize winner in England, and who was selected by "Stonehenge" to illustrate the breed in his recent edition of "Dogs of the British Islands."

Furs and Trapping.

CAN A MINK BE DROWNED?—One of our correspondents made to us the remarkable statement recently that he purposely kept a mink, with trap attached, under water for ten consecutive hours, and that when taken out he was as lively as ever, and not a bit drowned. It would seem to be a question whether a mink is not strictly amphibious. Beavers and muskrats are not so ; for they cannot live many minutes under water without suffocating.

WHO CAN TELL HIM?—Here is a bit of evolution study. Our friend, Mr. A. W. Hubbard, of Magog, P. Q., is in a muddle. We do not wonder at his soul perplexity. Mr. H. set his traps for foxes. He found them full of skunks. Somewhat terrified by the recent skunk-bite articles in the FOREST AND STREAM, he feared to deal with the varmints. But urged on by the market quotations of skunk pelts he accepted the situation, removed the unsavory prey and set the traps for more. Then came a new surprise. Set for foxes, the traps caught skunks ; now set for skunks, they caught only crows. The baffled trapper could not eat crow ; so accepting the belief that the traps were bewitched, he set them for the birds, and—of course caught foxes !

What would he find in his trap if he should set a big one for a polar bear, or for a giraffe?

FASHIONS IN FURS.—Grecian chinchilla is a new-clipped fur destined to great popularity during the coming season.

Squirrel continues to be popular fur lining.

Fichus of lace and muslin of all sizes are worn.

New French wraps are as often lined with soft satin quilting as silk fur.

The Armide, a new circular, long dolman, one of Ehrichs'-designs, is a fur-lined sicilliene silk wrap, with lappets, also fur-lined, inserted in the front, and simulating an inner garment of rich damassée silk. These lappets are rounded upward toward the hips, and folding closely around the person under the circular are fastened to the waist in the back. Rich Grecian chinchilla fur bands and collars trim the Armide cloaks.

A TRAPPING INCIDENT.—*Montreal, Canada, Sept. 15th*—The following will interest those of your readers who are trappers and manufacturers of steel traps:—

Mr. Codar, a trapper, living near Acton, Quebec, in November, 1878, set a steel trap in a brook of running water, back in the woods some distance from his place, for otter. Other business prevented him from visiting the place again until two weeks ago, when he visited the brook while trout-fishing in company with a gentleman, and found his trap with a freshly caught otter in it. The trap had remained set over nine months, and was in good order; the springs were as lively as ever. The otter had not apparently been in the trap over twenty-four hours when found. S.

TROPHIES PLENTY.—An old hunter in Maine writes from Bethel, Sept. 15th: I have killed in my hunting experience seventy-three bears, over fifty moose, and many caribou, deer and other graminivorous animals. I killed forty-nine Canada lynx in one winter, and for many years a large number. I collected in one year over $1,000 worth for Prof. Agassiz. I always hunted alone

J. G. RICH.

SINGULAR COINCIDENCE.—One of our Canadian correspondents tells of having set a steel trap for otter nine months ago, but circumstances prevented him from visiting it until recently, when to his surprise he found a freshly caught otter in it. The trap had not been sprung during the whole period.

Yachting and Boating.

ROYAL NOVA SCOTIA YACHT SQUADRON.—The race for the two prizes presented by the Royal Artillery and Royal Engineers was sailed Sept. 20th, unfortunately in a light wind from the South. The race was a "sealed handicap," flying start with no allowance for difference in time of starting, a method, by the way, which we consider decidedly preferable to the family plan allowing a long period in which to cross, thereby sadly nullifying any exhibition of smartness and good seamanship. Course from Lumber Yard, round Mars' Rock and Dartmouth Ferry buoys, and return to Lumber Yard. Y. R. A. rules in force. A full list of entries had been made and twelve yachts came to the start as under:—

Name.	Rig.	Tons.	Owner.
1. Hebe	sloop	3	J. E. Butler.
2. Psyche	sloop	7	W. H. Brookfield.
3. Daphne	sloop	6	A. E. Jones.
4. Petrel	sloop	20	A. C. Edwards.
5. Kate	sloop	8	W. B. Mcsweeney.
6. Ina	sloop	3	F. S. West.
7. Osprey	schooner	8	Capt. Cautley, 97th Regt.
8. Isabel	sloop	6	Capt. Welch.
9. Lily	sloop	4	W. H. Weeks, M. D.
10. Volante	schooner	9	F. Rudolf.
11. Edith	sloop	5	W. Atkinson.
12. Spray	sloop	12	H. St. G. Twining.

Ina got off first, followed by *Psyche* and *Daphne* abreast, with *Kate* and *Hebe* to windward. *Spray* was badly hampered by getting under the lee of some of the rest. *Hebe* soon took the lead in the beat to Mar's Rock, and rounded first, with *Petrel*, *Psyche* and *Kate* in her wake, the latter sailing well and going into third place. To the next mark it was a run before the wind, and spinnakers were in requisition. Dartmouth buoy was hauled around by the leaders in pretty much the same order, when the wind fell light, and a tedious beat to the line against the flood commenced. *Hebe* got the first gun at 5h. 18m. 30s., and after a long interval *Ina* crossed at 6h. 53m., with *Isabel* third 7h. 5m. 55s., the rest having given up. The sealed handicap was opened, and *Hebe* declared winner by the hon. secretary, and the *Ina* second.

On Friday, Sept. 19th, *Phantom*, 7 tons, W. H. Troop, and *Daphne*, sloop, 6 tons, A. E. Jones, sailed a match over the Bedford Basin course to decide the protest lodged by *Daphne* against *Phantom* in the race of June 21st. *Phantom* won easily by 3m. 53s., with time allowance, and therefore takes second prize in second class in race of June 21st. The Nova Scotia fleet has commenced to lay up its vessels, after a most interesting and prosperous season. The *Squirrel* has been converted into a schooner, and Mr. Brookfield offers his *Psyche* for sale, as he intends to build a schooner this winter. *Sea Foam* is also in the market.

At the recent Provincial exhibition, held at Halifax, J. E. Butler, R. N. S. Y. S., was awarded first prize for yacht models.

MATCH ON THE DELAWARE.—An exciting match was sailed October 5th between the first class cat-boats *Hasse* and *Pauline*, of Bridesburg, Pa., over a course from Kensington Waterworks' Wharf to Chester buoy, and return to Bridesburg, forty-five miles distance, $100 a side. Both boats measure 23 feet, and the *Hasse* carries 105 yards, and *Paulins* 125 yards in mainsails. Wind fresh from N. E. *Pauline* turned first, *Hasse* being blanketed badly by the judge's tug. It was a beat up the river, the *Hasse* winning on her opponent gradually, and finally taking the purse by ten seconds only. On the same day a match was sailed between the *Ledyard* and *Sullivan* from Southwark, Yacht Club, around Chester buoy and return. The latter was a new boat. *Ledyard* won by half a minute.

BUFFALO YACHT CLUB.—Sloop *Cygnet* sailed on a cruise October 17th, and was joined by *Fleetwing* and *Petrel* at Point Albino, Canada, the following day. The fleet was bound on a gunning and fishing trip for several days, and reports ducks very plentiful. The warm weather promises to make the season on the lakes later than usual.

FARRAGUT BOAT CLUB.—*Editor Forest and Stream*:—The annual election of officers for the ensuing year was held at the boat-house October 13th. The following officers were elected: President, T. R. Jenkins; Vice-Pres., W. R. Wiley; Secretary, Alf. S. Porter; Treasurer, Geo. M. Murison; Captain, Geo. R. Blodgett; Commander, C. S. Downs; Lieut. Com., W. R. Collins.

The club was organized in March, 1872, and incorporated three years later. It has now forty-six active, forty-two associate, five life, and fourteen honorary members. HENRY M. HOW.

Chicago, Oct. 14th.

LLOYD'S YACHT REGISTER.—Dixon Kemp, Esq., Associate I. N. A., London, has kindly sent us the paper read by him before the twentieth session of the Institute of Naval Architects, April 5, 1879, on Lloyd's Yacht Register. It is an interesting review of the history of yacht building in England, and commends the results brought about in the building yards by the publication of tables of scantling, etc., in Lloyd's Yacht Register, and bears testimony to the value of building under survey.

CUTTER AND SLOOP.—The discussion of types has reached the shores of France, and we see by our excellent contemporary, *Le Yacht*, that a spirited war promises to be waged in that country, as well as in America, between the advocates of the sea-going cutter and the smooth-water racer.

THE HANLAN-COURTNEY RACE.—Thursday, Oct. 16th, saw an expectant crowd in the little village of Mayville, Chautauqua Lake, N. Y., a crowd which would have been swelled by many thousands had not rumors of foul play on the part of Courtney's hangers-on got abroad and been telegraphed far and near. It was just as well that most people stayed at home after planning a run up to the Lake and a view of a race between the fastest and one of the fast scullers in the world; for had they been present, only disappointment and aggravation were in store for them. In the nick of time, when it was discovered that Hanlan's party was not to be bargained with, since they felt that they had the race in hand, Courtney's boats were sawed nearly in two, and the act attributed to his opponents; consequently there is little to be said about the race itself, if a walk-over in the fastest time on record can be called a race. When it was discovered that both the paper boats in Courtney's shop had been ruined, he was offered the choice of the champion's or Frenchy Johnson's boats, but declined. No one familiar with shell-boat pulling will blame him for that. It is one thing rowing in one's own boat, but quite another jumping into a strange ship at the eleventh hour. Then an attempt was made to have the race postponed for a more or less indefinite period; but it was soon discovered that this move was only a feint, and another attempt to put off the race entirely if impossible to get on the right sight side of the betting. The person conducting negotiations for the Union Springs sculler refusing any reasonable arrangements, Mr. Blaikie, the referee, decided to call the race at the hour set. Hanlan promptly put in his appearance, and was sent over the course, doing the five miles in 33m. 56½s., the best ever made. He came in fresh and vigorous, and gave an exhibition of fine and graceful rowing not often seen. The general impression seems to be that he would have beaten Courtney by many lengths, as none of the prophecies about ill health were fulfilled, he being altogether in excellent condition, notwithstanding the rumors to the contrary instigated by the blackleg fraternity. Innumerable charges, counter-charges and private opinions concerning the race were set afloat immediately, and, with the padding from reporterial pens, were a perfect God-send to the penny-a-liners, and the public has been deluged to surfeit therewith. Nothing in the way of evidence other than circumstantial has been brought to light at time of writing this, and it would hardly be worth while to give currency to mere rumors which may or may not turn out to be correct surmises. The race has settled one question in the minds of all, that Courtney is not a match for Hanlan in a shell, and that at Lachine last year Hanlan won on his merits. It is said that the purse of $6,000 offered by the Hop Bitters Company of Rochester will not be turned over to the champion, but that his right thereto will be carried into court. Upon what claims he can be debarred from the money remains to be seen.

Rational Pastimes.

ARCHERY.

—Every club in the United States should join the National Association, and next year send some member to shoot at the national meeting.

—The Highland Park Archers have adopted a rule to shoot no more at any range shorter than 60 yards. Look out, boys of other clubs! This means Double York Rounds of 500 to 1,000 at the next grand national.

—Mr. Maurice Thompson is rapidly regaining the use of his bow arm, and now scores more than double his average scores of two months ago.

—Why do not clubs send in the scores of the lady members?

—At the Crystal Palace meeting in July of this year, the Rev. W. Rimington made the splendid score of 966 at the Double York Round. He has won the champion medal four times.

—The State fairs of several States are giving fine premiums for excellence in archery. This is just the thing to do.

—Why do not our archery friends exercise more ingenuity in naming clubs. We have too many Toxophilites. Will not some one send us a list of suitable names to be published for the needy ones?

WICKED ARCHERY.—Alas for the days of our forefathers! What are we coming to? Here are archery associations all over the country offering prizes to young gentlemen who have the "most misses." Such premiums for the encouragement of wholesale flirting is too awfully lawful. Next the young ladies will be getting rewarded for the greatest number of mysterious hits.

THE ARCHERY MOVEMENT.—Our call for an archery club in this city has borne fruit in a manner quite unexpected. The "New York Archery Club" was organized one Friday, and the "Manhattan Archery Club" formed the next day. That the new corps means enthusiastic work may be inferred from the fact that the New York Club, ladies and gentlemen, held their second field meeting last Saturday, and the Manhattans met Tuesday. Now our friends across the Big Bridge and across the North River; at the Hub, yes, and the sharp-shooters of Chicago and Crawfordsville, must look well to their bow-strings. New York archery has begun to "boom;" we have a million men, women, and children on this island, and among that million there ought to be at least ten thousand bowmen, good and true. We shall see what we shall see.

NEW YORK ARCHERY CLUB.—The New York Archery Club had a regular meeting for practice, Saturday afternoon, Oct. 18th. The Club, next Saturday evening, Oct. 25th, at 8 o'clock P.M., will hold its regular monthly meeting at the residence of Dr. A. B. De Luna, 368 West Thirty-second street, where propositions for membership will be received. Ladies and gentlemen both are cordially invited. If any of our readers will address the Secretary, Mr. Jas. W. Auten, jr., Post-Office box 4,476, he will reply promptly and give any further particulars that may be wished. The Club will be pleased also to see friends at the practice, Saturday afternoon, at 3 o'clock P.M., Eighty-eighth street and Eighth avenue.

MANHATTAN ARCHERS—*New York, Oct. 5th.—Editor Forest and Stream*:—On Saturday last the Manhattan Archers of New York City were formally organized as a club, elected their officers and made initial preparations for an active campaign. It seems strange that New York, the great mother city of the land, should have for so long a time been unrepresented in the archery world, and that archers living within her limits have been compelled to look outside for opportunities to enjoy this most delightful of all recreations. It is confidently believed that the organization of the Manhattan Archers will supply to the gentle lover of this sport the opportunity so long desired.

It is the intention of this club to confine its membership strictly to ladies and gentlemen. Application for membership should be made to Mr. J. G. Johnston, 261 Broadway, New York City. Through the courtesy of the Park Commissioners, Mount Morris Park was assigned to the use of the club for one day (Tuesday, Oct. 14th), that the Commissioners might see how it was done, and whether there was any objection to a permanent assignment. The grounds are perfection, and were fully appreciated by the club, while the presence of some 300 ladies and gentlemen, who lined the walks surrounding the grounds during the entire shoot, bore ample testimony to the interest felt by the residents in that neighborhood in archery.

Being the first meeting on a strange ground in the presence of so large an audience, the nerves of the club, collectively, were not a little disturbed and scores correspondingly cut down. After the club has become accustomed to the ground and its surroundings it will give a better account of itself.

The scores were as follows:—

	40 Yards.	50 Yards.	60 Yards.	Total.
W. C. Beecher	137	92	36	265
J. G. Johnston	99	98	33	230
W. Holberton	81	54	75	210
J. V. Davidson	114	39	29	182
S. E. French	61	38	90	129
W. H. Young	out	—	—	97
H. Innis	out	—	—	92
Dr. N. McLean	out	49	25	74

GOOD HITS WITH GOOD BOWS.—*Detroit, Oct. 9th.*—I have read with much interest the discussion in your paper, as to the relative merits of American and English bows and arrows. I have used both, and my preferences are for home-made wares. Are your correspondents aware that the highest score ever made at forty yards was made with an American bow and arrows. I refer to Mr. Maurice Thompson's recent wonderful score of 30 shots, 30 hits, 244 points; eight points higher than any score ever before recorded. Mr. Thompson informs me that he made this score with a Horsman bow and three 5.0 Horsman arrows. This would indicate that American bows and arrows are equally as good and to be depended on for fine shooting as the best English makers.

A DETROIT ARCHER.

ARCHERY TARGET SCORING.—*Boston, Sept. 29th—Editor Forest and Stream*:—I believe with Mr. Sutton that archery will be Americanized and improved, and I join

in some of the ideas expressed by him in your issue of Sept. 25th. Who will be the first manufacturer to give us American weight for arrows?

In regard to bows, with my short experience I think our manufacturers are supplying a better article for a medium-priced bow—the article that is used by the average archer at present—than can be found among the imported. I would much prefer a Mallison split bamboo or one of Horsman's extras to anything imported that the same money would buy; these are good enough for any ordinary archer. I am also quite favorably impressed with Mr. Sutton's rawhide-backed bow.

I have used all through this season an American-made bow of forty pounds pull; have averaged five days' per week in its use, have several afternoons lately shot upwards of 200 arrows with it, and now it comes back as straight when unstrung as it was when first bought. The archers of our town are even now patriotic enough to use American bows, arrows, etc., though "N. K. D." does not seem to have arrived at that point.

It has always seemed to me that the value of hits in the inner rings and gold of a target were not arranged in the most equitable proportion. I think that hitting two blacks and two whites with a given number of arrows is better shooting than one hit in the gold with the same number of shots; but as we now count values, the one gold hit scores one point more than the four hits mentioned, and it seems to me if the colors were counted from one for white consecutively to five for the gold, it would be a more equitable proportion of values.

To illustrate: I take two scores made at our recent meeting at Beacon Park, Boston, which were 50 hits, value 202, and 55 hits, value 201. These large number of hits give a fair proportion to the several colors, and I think, with the slight difference of values, the 55 hits the best shooting. To figure the hits by my proposed values would give 50 hits, value 127, and 55 hits, value 128. In my score-book I find 24 hits, value 120, and 27 hits, value 117. These would be by my valuation 72 each, and the 27 hits would win, as I think it should.

The adoption of such a change would make no radical change in the comparative value of scores, but it would give to scores having a large number of hits, with few gold and reds, an equity which they deserve, especially for low-range shooting, and would bring the actual scores to a better per cent. of the possible score. Will some one state the objection to such a change?

Another question suggests itself in regard to bows. I take a six-foot bow of a given weight to pull twenty-eight inches, and a five and a half foot bow made to give the same weight at the same length pull. Theoretically they would, as Mr. Sutton figures, in trajectory and distance, give the same result to the same arrow; but practically would they? Who knows? A. S. BROWNELL.

ARCHERY IN ENGLAND.

While no scores equal to the wonderful achievements of Ford and Fisher in their best days have been this year recorded in Great Britain, yet the general average of the shooting has been very fine. Mr. Palairet, who last year won the champion medal with the splendid score of 932 at the Double York Round, did not shoot this year on account of the death of his wife, and no doubt Mr. R. Walters owes his success in winning the medal with a score of 729 to this misfortune of that fine archer. Mr. Palairet had been coming up so rapidly in his scoring that his rivals were reduced to barely two, and it was confidently expected that this year he would score over 1,000 points at the Grand National, but the loss of his wife prevented his shooting and Mr. Rimington, though not winning the championship, proved himself to be by far the best man of the year. At the Crystal Palace meeting he scored 966, at the Grand Western 925, and at the Grand National 799, an average of nearly 900 points at the three great public meetings. On the last day of the Grand Western meeting he scored as follows on the Single York Round:—

100 *Yards.*	80 *Yards.*	60 *Yards.*	*Total.*
38 156	44 218	23 133 - 105	507

His shooting at the 100 yards and sixty yards ranges was very good, and at eighty yards superb. Forty-four hits out of forty-eight arrows at eighty yards is uncommonly fine, and the yield of 218 points very high to the hit. On the same day Mrs. Piers Legh performed the feat of making a clean score of hits at the National Round of forty-eight arrows at sixty yards and twenty-four arrows at fifty yards, a rare thing in the history of archery. Despite this wonderful shooting she was beaten by Mrs. W. Butt by forty-four points, Mrs. Butt scoring on the Double National Round 744, and Mrs. Legh 700. With her forty-eight hits at sixty yards Mrs. Legh scored 358. At this meeting, out of the twenty-seven gentlemen who shot, the following scores over 600 were made:—

	Hits.	*Score.*
W. Rimington	200	699
H. Walrond	165	709
Piers Legh	151	683
C. H. Everett	170	674
E. N. Snow	151	653
W. Yates-Foot	151	631
H. Kendall	157	629

This gives a much higher average than has been made by the first seven at any of the great public meetings for many years. Of the twenty archers who fell below 600 points seven exceeded 500. These fine scores need not dishearten American archers, but on the contrary should greatly encourage them to greater effort. Such scoring does not come of natural aptness, but of long and patient practice. Mr. Rimington won the championship of Great Britain in the year 1868, eleven years ago, and his name has appeared high in the score lists for twenty years. He is growing in power year by year, and probably has not seen his best scores yet. The large scores of Rimington, Palairet, Fisher, Ford and other notables of the bow were chiefly obtained by patient practice at the long ranges. This is well shown by the details of the above scores of Rimington, which are as follows:—

144 *Arrows at* 100 *Yds.*	96 *Arrows at* 80 *Yds.*	48 *Arrows at* 60 *Yds.*
79 327	76 372	45 221

The sixty yards shooting is not hard to equal by any good archer, and several of our American archers will agree to beat it any day. But who will tackle the two longer ranges?

Since the longer ranges are sure to be always the ones shot at the National meetings, our archers should give them patient practice and build up their scoring at those ranges to respectable proportions.

THE GAME OF CRICKET.

FIXTURES.

Oct. 23-24—Nicetown, Philadelphia.—Yorkshire vs. Nottinghamshire.
Oct. 28-29—Hoboken.—England vs. America. Giles' benefit.
Oct. 30—Hoboken.—St. George vs. Albany.

ENGLISH AND IRISH CRICKETERS.—Scores of the English and Irish visitors, both in the United States and Canada, are unavoidably deferred until our next issue.

COMPLIMENTARY MATCH TO MR. DAFT.—A grand complimentary farewell match has been tendered to Mr. R. Daft, Captain All-England Eleven, by the Philadelphia cricketers, and Thursday and Friday, Oct. 23d and 24th, have been selected as the dates. The game will be played on the Germantown Cricket Club Grounds at Nicetown, Philadelphia; and as the English team sails for home on the 25th inst. it will be their last match in this country. To afford the cricketing community an opportunity of seeing the English professionals bat against their own bowling the seven Nottinghamshire players—R. Daft, Barnes, Morley, Oscroft, Selby, Shrewsbury and Shaw—will play against the five Yorkshire members of the team, the elevens being completed by well-known English residents, such as Lane, Pearson and the Hargreave brothers. Capt. Daft, by his kind bearing and fair way of playing the game, has won the hearts of all he has been brought in contact with, and we trust there will be a large turnout to witness this unusually fine game.

DAFTS ENGLISH VS. NEW YORK TWENTY-TWO.—The English party, including Capt. Daft. J. P. Ford., Esq., Town Counsellor for Nottingham, E. Browne, Esq., Secretary of the Nottinghamshire County Cricket Club, and the players arrived in New York, on the morning of Oct. 2d, and at once proceeded to Staten Island, where they took up their quarters at the Pavilion Hotel, at New Brighton, which is within five minutes' walk of the Staten Island Cricket Ground.

The morning of the match dawned most auspiciously, and early in the day a large and impatient crowd awaited the coming of the foreigners on the field. Play had been arranged to commence each day on the arrival of the 12 M. boat from New York, and with wonderful punctuality for that city, Capt. Stevens had won the toss, and sent in Moore and Hulburt to the bat, before the bells on the Government Dock had been rung for one o'clock. Shaw (slow round, opened the bowling at the upper end, and Emmett (left fast round) *vice* Morley, who had cut his foot while in bathing, succeeded at the club-house end. To Shaw's bowling the Eleven were thus placed: Pinder, at the wicket; Daft mid off; Oscroft, point; Selly, cover point; Barnes, short leg; Ulyett, on drive; Shrewsbury, long slip; Lockwood, short slip; Emmett, long field off; and Bates mid on. To Emmett, Selby fell back to draw; Shaw took slip; Barnes, deep long off; Ulyett, long slip; Shrewsbury, moved in to mid on; Lockwood, dropped to long stop; and Bates, to cover point. Later on, to Barnes (right medium round), Emmett took mid on; Shrewsbury, long field on; and Selby, third man. To Bates (slow round) Selby, cover point; Barnes, straight drive; Ulyett, long slip; Shrewsbury, on hit deep; Lockwood, long on: Shaw, short slip; and Emmett, mid on close. This arrangement was adhered to with slight alteration.

Moore drew first blood with a snick to draw for 2, off Shaw. Wicket after wicket then fell, until Hubbard, of "Hub," made his appearance, when by steady play and good all-round cricket he contributed a score of 19, the only double figure of the inning. Lane and Ronaldson, 7 each, were the only other players who topped an average score; the inning closing for a total of 67. At 4.20 P. M., Oscroft and Ulyett commenced the inning of the Englishmen, against the bowling of Lane (left medium round). and Hooper (left round). When time was called at 5.30 P.M., the tins showed 39 up, and Oscoft, Ulyett, Lockwood and Daft out. On Saturday, at 1.20, P. M., the game was resumed in the presence of over 2,000 spectators. Selby and Shrewsbury, the two "not outs," continued to score, and 20 runs more were put before Moeran captured the former at mid off. Barnes and Bates by wonderful defence and good sound cricket contributed excellent double figures. The former had been two hours and three-quarters at the bat for his 34, which was made up of six twos and 22 singles. The latter had played a more free inning, and his style was the favorite with the ring. Shaw was captured nicely by Sprague in the slips, and with Emmett and Pinder at the wicket, stumps were drawn at 5 P. M., the English having been all day at the bat.

With score at 159, the game was resumed on Monday noon in fine cricket weather. The two last bats were, however, difficult to separate, and the score stood at 188 before Soutter found his way to Pinder's stumps. Emmett had played a sound inning marked with splendid cutting and driving. During the inning seven bowlers had had a try with the ball.

Taking the batting collectively of the eleven, it was an illustration of the steady and sure profesional style. With wonderful skill was the ball got away for ones and twos, and at all times was it kept on the ground. There were but few big hits, and the whole play contrasted strongly with the dashing, sensational batting of the amateur Irishmen. Lane's bowling was excellent, "the best," Capt. Daft said, "he had yet met with." His record of 80 balls, 14 runs, 13 maidens, and 3 wickets, at the end of the first day's play, being unsurpassed when the great proficiency of the batsmen is taken into consideration. The analysis will show that he took five wickets for 57 runs, his average, however, would have been greatly improved if the catches off him had been accepted. Of the general fielding, modesty compels us to say nothing. One twisting, hopping ball, which was shyed in from on, ran the gauntlet of 28 feet and hands and catches that should have been held, were subsequently called "bum balls" by the tyros that missed them. There were a few exceptions to the above, noticably Cross at the wicket, who besides doing fine and steady work, sharply caught Ulyett off Lane.

The New Yorkers then went in for their second inning. The feature of the venture, was the really first-class batting of Cross, who contributed the high score of 27, which, by the way, is the top score as yet made against the English bowlers since their arrival in this country. The 27, however, was not altogether free from luck, for Bates failed to hold a sky-scraper when this fine batsman had put 15 to his name. Woolston made things lively for his 9, and Dodge for the same figure, and "not out," did nicely. The innings closed for a total of 94, leaving the invaders victors by one inning and 27 runs. The bowling and fielding of this wonderful eleven is too well known to be hackneyed by superficial comment. The score is produced in full:—

ENGLISHMEN VS. CANADIANS, AT OTTAWA, ONT.—This long-talked-of match between the residents of Ottawa was played on a good wicket on the Rideau Hill Grounds on October 5th. The royal standard floated from Rideau Hall, and the ground was prettily decorated with flags. The Old Country eleven was captained by His Excellency the Gov.-General. A large number of spectators visited the ground during the day, and among those present were Sir Fenwick Williams, Admiral Inglefield, and Sir A. T. Galt. The following is the score:—

GEORGE GILE'S BENEFIT—ENGLAND VS. AMERICA.—The fifth annual benefit tendered to the excellent professional of the St. George Cricket Club, Mr. George Giles, will take place on the Hoboken grounds on Tuesday and Wednesday next, the 28th and 29th insts. The sides will be selected from the best representative cricketers in New York and vicinity, and a large attendance may be expected.

COLLEGE FOOTBALL.—The Columbia College fifteen will play the fifteen of Steven's Institute at football on Saturday, the 25th inst., at the St. George Cricket Club Grounds, foot of West Ninth street, Hoboken. Game to be called at 3 P.M.

WILLIAMS COLLEGE ATHLETIC SPORTS—*Williamstown, Oct. 15th.*—Five mile "go-as-you-please," won by Wm. Wilbur, of '80, in 32m. 26⅗s.; two hundred and twenty yards dash, won by H. Parker, of '80, in 25⅗s.; running high jump, won by —— Johnstone, of '83, height, 4 ft. 10 in.; sack race, won by W. P. Thornton, of '80, 50 yards in 13s.; half mile run, won by A. H. Vanderpoel, of '81, in 2m. 13⅗s.; running broad jump, won by F. Yates, of '82, distance, 16 ft. 9½ in.; 100 yards dash, won by J. M. Mott, of '80, in 11⅖s.; throwing hammer (weight 10 pounds), won by Wm. P. Thornton, of '80, distance, 101 ft. 5 in.; three-legged race, won by J. M. Mott and M. M. Mower, both of '80, in 11s.; distance, 50 yards; one-quarter mile run, won by H. Parker, of '80, in 55s.; potato race, won by —— Brewer, of '82, in 2m. 29½s.; 25 potatoes, 3 feet apart; one mile walk (unsettled).

C. K. O.

—The Scottish-American Club will hold their fifth annual handicap games, Thanksgiving Day, November 27th. Entries from individuals must be endorsed by an officer of the amateur club, and must be in by November 18th.

—The third annual fall games of the Orion Rowing and Athletic Association of Jersey City will be held at the West Side Driving Park, Nov. 8th. All communications should be addressed to John W. Aymar, Station H, Jersey City, N. J.

WHY LOONS ARE DIFFICULT TO SHOOT.—The great Northern diver, or loon, is a proverbially hard bird to kill. Wonderful stories are related of his dodging a ball, or diving at the flash of a gun. Of course these achievements of the wary bird are to an appreciable extent real; but we may doubt if he has the faculty, innate or acquired, of accurately judging distances, or timing the flight of projectiles. Indeed, on water so perfectly calm as to indicate the slightest ripple, we have often seen, from favorable points of vantage, charges of shot patter like rain all over and around a loon which had been fired at, without apparently injuring the bird. The fact is, there are several reasons why loons cannot be easily struck. In the first place, they sit very deep in the water, so there is really no vulnerable part exposed, except the head and neck. The body is wholly submerged. What appears to be a capital mark, is merely a mass of matted feathers, almost as impermeable as an armor-plate, which shot could not penetrate at long distances, even if they struck fairly and squarely. In the next place, loons are usually heard, seen, and approached, only in very calm weather, preceding a change, when the atmospheric conditions create a mirage, causing the object to appear much larger and nearer than it really is. Third, they are seldom fired at except at long range: in which case the only effective projectile is a rifle ball. The ammunition is sure to be wasted unless it strikes the head or neck, for a bull's-eye shot at the body would either ricochet, or pass through the plumage. Finally, a loon is always on the alert. He invariably keeps his face to the shooter, swimming *toward* him until he dives, and then placing distance between them while under water. Trap and field shooters know by experience that an incoming bird must be shot at, rising the top of the head. So with a loon: the only effective shot at a long distance, or a still surface, is a rifle ball, with the sight drawn fine at the top of the bird's head. Of course there are opportunities when loons may be killed at very short range, with shot gun; but these do not often occur on such occasions; the angle of the aim is not sufficient to cause a deflection or ricochet, and therefore both bullets and pellets are driven through the water and then take effect in the body.

We have no doubt that there are some of our readers, even among the oldest, to whom these suggestions never occurred. The reason is, that most hunters, especially young beginners, like to believe and indulge in the marvellous, and would rather cherish the notion that a loon can judge better of time and distance than the most acute practitioner in the science of gunnery, than they would to study out the cause of his immunity from harm, or attempt an explanation. It is very satisfactory to a story-teller to leave his listeners wrapt in wonder at the finale, instead of demonstrating how simple causes produced a given effect. It produces a dramatic affect and helps to exalt the author to a place in the estimation of his audience which he would fail to occupy were he willing to dwell in the realms of homely common places. The indulgence of such fancies is apt to indurate into positive superstition, or implicit belief.

ANOTHER SPORTSMAN'S WIFE.—We are glad to print the following sprightly scrap of testimony, and heartily join in her appeal to the sisterhood to keep the ball rolling. Truly, we have struck a "rich vein," and we hope the ladies will work it with a vim which only they know how to apply:—

MAINE.—*Auburn Oct. 2d.*—"Zena's" and "Diana's" experience relative to sportsmen's wives, is but similiar to hundreds throughout the country, and with trap-shooting tournaments and glass-ball mania, together with the influences exerted by FOREST AND STREAM, "Frank Forester," gazetteers, and similiar publications, it would seem as though we were all destined to become sportsmens' wives, hereditarily or through cultivation, if we become wives at all. I happen to be the wife of an hereditary sportsman, one who has had a dog and gun ever since he could walk, so his mother informed me, and has had bows, guns, revolvers, fishing-rods, dogs—pointers, setters, mongrels, and all other fancy strains—ever since, and even as I write, a great lean pointer (in splendid working condition, husband says) is standing looking into my face as much as to say, don't slur us. "That husband of mine" belongs to innumerable local, county and State clubs and associations, and from September 1st, to January 1st, comes home every few days with the welcome(?) news that such and such an association is to have a grand field-day to-morrow, and he wants a good hearty lunch put up; this means food for a dozen; then he must have his breakfast at or before day-break, with hot rolls and coffee; coffee sure, as he would have a head-ache without it. Having given these orders, off he goes to feed his dogs, and make up a bag of shells and prepare for the morrow, while this sportsman's wife however tired, no matter how long her day has been, is expected to cheerfully prepare for her Lord's (spell that with a capital L) early departure, and to see prepared the requisite lunch, and the arrangements for his early breakfast.

And the last I hear before retiring is my sportsman husband singing:—

"You must wake and call me early, call be early mother dear;
To-morrow'll be the happiest time of all the glad new year.

This is not all, but the beginning in fact; there is the coming home, tired, sure! wet, probably; and famishing you need have no doubt; a hot supper must be in waiting, no matter whether my lord comes early or late, 6 or 11 P. M., every thing must be just to his fancy or an explosion takes place. Undoubtedly he will require a dry shirt and hose, possibly want a pail of hot water to soak his feet in to start that dreadful cold he has caught; and who can attend to all these details but that sportsman's wife? Keep the ball rolling, sisters, we have developed a rich vein, and it's our fault if it does not pan out well for "that sportsman's wife." MINNIE.

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We make no charge for answering inquiries in this column.*

A. M. C., New York—For quail shooting use 1 or 1¼ oz. No. 10 shot, 3 dr. powder.

F. S. D.—Write direct to T. Desmond, 39 Peck Slip, N. Y. Hull will cost about $7 to $8 per foot.

N. P. G.—Ice yachts can under certain circumstances, sail faster than the wind. For explanation, see our issue February 13th, 1879.

AIX SPONSA, Bushville, Ind.—1. You might perhaps sell pigeons by advertising them, and so bringing to the notice of gun clubs. 2. We know nothing of the gun makers.

A. G., New York.—The greatest fine imposed for Sunday shooting or fishing in New Jersey is $25. If the constable has no authority to confiscate the gun, he ought to have.

J. B. H., Louisville, Ky.—Can you let me know where I can obtain a Government Sanitary Map of Florida, and its probable cost? Ans. U. S. Geological Survey Office, Washington, D. C.

J. R. E., New York.—To dye buckskin black you had better take the material directly to a dyeing establishment. It will be as cheap as a home-made dye and much more satisfactory.

C. O. VAN D.—You will find directions for building Canoes in Appendix of Canoeing in Kanucks; Harper Brothers, seventy-five cents. Also in Baden Powell's Log of Canoe Cruise, $2.75.

R. E., N. Y.—Please give pedigree of Hamilton Thompson's red Irish setter bitch Bess, and oblige. Ans. Thompson bred or owned one or two Irish setters named Belle, but we know of none of his named Bess.

F. S. E., Boston.—The Shelton auxiliary barrel will not injure any gun barrel. We have from time to time published testimonials from various correspondents as to the shooting qualities of the barrel. It seems to give satisfaction.

HALIFAX, Nova Scotia.—S. Nugent Townsend's book is entitled "The Coming Empire, or A Thousand Miles Through Texas on Horseback." Price, $1.50. Published by A. S. Barnes & Co., New York. Contains much reliable information about Texas.

C. D. V., Fort Davis, Tex.—We do not know how many men there are in the United States who break glass balls with rifles. No one knows. No one ever will know. We doubt if Gen. Amasa Walker himself, the census man, could ever find out.

H. L., New York.—Will you please give pedegree of Batchelor's Duke, who I understood took first prize in 1877? Ans. By Hamilton Thompson's Duke, out of Belle or Bess. The pedigree is variously given in the stud book, and in the prize-list. Write to B. Bachelor, Vallsburg, N. J.

E. H.—Have not got dimensions of *Parole*. Does not differ much from others of her class. Has shown good speed, but much depends upon the handling of such boats, more in fact than upon the small differences in model existing among the best open boats. Was built by Jake Schmidt.

E. H., New Orleans.—Open sloop *Parole* is 27 ft. 4 in. long; 11 ft. 5 in. beam; 33 in. deep. Mast 44 ft., boom 39 ft., bowsprit outboard 32 ft., gaff 19½ ft. For sale for $1,000. Is very fast, but has not much of a record, as present owner does not race her much. Jake Schmidt will duplicate her for $750.

N. J. G. C.—W. bets P. that his gun has a shoulder in the breech. P. bets it has not. Examining the same we find about 2¼ inches from the breech a gradual contraction. P. says that it is not a shoulder. Who is right? Ans. It is what is generally called the shoulder, although literally not one. Some guns have a divided shoulder.

INQUIRER, Aiken, S. C.—We have the authority of Mr. Fred Fitch, a California magazine writer for the statement that the brook trout of the East are caught in Mexico, in the state of Durango. If so, the low latitude (23°) is extraordinary, although the mountain altitude may compensate for higher temperature. Brook trout are not caught south of latitude 38°, except in high elevations.

H. S., Troy.—I have a dog between eight and nine years of age, and lately I have noticed that he has spells of coughing or choking, which last for one minute or so, during which he falls over on his back and is not able to rise; it appears to be a convulsion; he appears bright and well as soon as he rises. Ans. Give your dog a Dover's powder night and morning and a tablespoonful of cod liver oil twice a day. Old age probably has something to do with his trouble.

C. H. B., Fort Wayne, Ind.—I have a setter dog one year old, which seems to be in a bad condition. His eyes are sore and his spirits low. His nose is also dry occasionally, and vomiting quite often sets in. Ans. We should give the dog a good purge, say the following: blue pill, one scruple; compound extract of colocynth, one scruple; powdered rhubarb, five grains; oil of aniseed, two drops. Afterwards give a wine glassful of codliver oil twice a day. The dog may have worms, in which case he should be treated accordingly with Areca nut.

S. T., Newburgh.—We have printed a great deal at different times respecting suspended animation in frozen fish. Fish, frogs, eels, and many other creatures are often found frozen in ice, and anglers who fish in severe mid-winter find the fish they catch frozen immediately after being taken from the water. If these fish are thawed out in very cold water they will live, but if in warm water they will die. The principle is the same which requires frost bite in men to be cured by an application of snow, and not by warm lotions.

C. B.—The *Newrill* recently had her headquarters at Gowanus, foot Court street, Brooklyn. The *Volante*, when in New York waters, moors foot of Twenty-eighth street, East River. Is at present at Whitestone we believe. Shifting cabins consist of short upright stanchions stepped in iron brackets on the washboard of the cockpit. Light beams run across the stanchions and the whole is decked over. They can be taken apart and sent ashore when not wanted. A ten ton cutter will range from 33 to 38 feet in water line with 9 to 7.6 beam. For long cruises three or four in the cabin and a man and boy forward.

P., Garrettsburg, Ky.—1. Are Hollis & Son considered first-class gun-makers? 2. Would you think a finely finished Damascus steel, 12 gauge gun of this make a desirable one to have? 3. Where is their manufactory? 4. Which is the better dog for quail hunting, in brier and bramble wood and field, the pointer or setter? 5. How old should either be before it is taken into the field to hunt? Ans. 1. Yes. 2. Yes. 3. In Birmingham we believe. 4. Little to choose. In very hot weather or when water is scarce possibly the pointer. 5. Much depends upon disposition and early training Some dogs are ready to be taken to the field when six or eigh months old.

S. C., New Orleans.—My dog is about four years old, and in perfect health as long as he remains indoors; when taken ou into the fields, however, he hunts for about one-half an hour then stares around, staggers, foams at the mouth, and finally falls to the ground in a fit, which lasts from three to five minutes, after which he can resume work, but seems to have a dazed appearance and doesn't know what he is about? Ans. Your dog is subject to epileptic fits, a not uncommon occurance. If the dog was younger he might outgrow them, but now there is little chance of his recovery. All you can do for him is to attend to his general health Some aperient medicine might help him.

J. S. B., Macon, Ga.—Can you recommend the Osgood folding canvas boat for safety and durability? Will it answer on a stream with swift current, obstructed by logs and snags? Is a paddle used instead of an oar? Is there an agency for the sale of this boat in New York? Ans. We have the affidavit of Thos. S. Steele who has just done 200 miles of the east branch of the Penobscott in one of the Osgood canoes, that it is quicker and stauncher than a birch canoe, much less liable to damage by rocks, and much easier unloaded when injured. You can buy them of Mills & Co., 7 Warren street, and of Conroy, Bissett & Malleson, who believe. Better send to Chapin & Osgood, Battle Creek, Michigan.

SUBSCRIBER, Johnstown, N. Y.—I have a young setter dog apparently in good health, except when I take him out to hunt, he is then very anxious, excited, and very active and in less than half an hour he goes into a fit, drops, kicks and twitches, for from three to five minutes; gets up with a profuse flow of saliva from his mouth and wants to go to work again. I allowed him to do so once and soon saw indications of another fit, so I stopped him. Can he be cured, and if so, how? Ans. It is a very common thing for young dogs to have fits when taken in the field, and unless they arise from confirmed epilepsey, the dog generally outgrows them. The only treatment is in attention to diet with little meat and plenty of exercise.

H. H. K., Brooklyn.—We have repeatedly answered your question. Section 12 of the New York Game Laws, passed June 20th, 1879, reads as follow: "No person shall at any time within this State, kill or expose for sale, or have in his or her possession after the same is killed, any eagle, woodpecker, night-hawk, yellow-bird, wren, martin, or oriole, robin, bobolink or any song bird. Any person violating any of the provisions of this section shall be deemed guilty of a misdemeanor, and in addition thereto shall be liable to a penalty of five dollars for each bird killed, exposed for sale, or had in possession." If the editor of another paper says there is no such provision it simply shows that he does not know what he is talking about.

F. R. G., New York.—1. Does it injure the shooting qualities of a breech-loader, if there is a slight looseness at the breech, which, when loaded you can hardly make perceptible? 2. Also, if at Freeport, L. I., there is good shooting during November? Ans. 1. No. 2. You might get a few ducks on the Bay and there are some quail in the neighborhood.

TOM, Brainard, Minn.—The poem beginning

"I fill this cup to one made up
Of loveliness alone,"

and which is one of the neatest toasts in the English language, was written by Edward Coate Pinkney, born 1802, died 1828. It is from a volume entitled "Rodolph and Other Poems." But why do you think that the poet overestimated the good qualities of the fair one he pledges? We know some one whom the language of the poem does not begin to describe.

FOREST AND STREAM ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY,

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

***Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, OCTOBER 23, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remited to us is lost.

☞ Trade supplied by American News Company.

PERSONAL.—Major J. Nelson George, of the British army serving in New Zealand, returned from Colorado last week with several fine trophies of his hunting prowess, and sailed on Saturday for Liverpool. The Indian disturbances interfered materially with his sport and cut his expedition short. He will try the mountains again next year, when he expects to have a fair field and no interruption. The Major is one of the most accurate rifle shots in the British army.

We were honored last week by a visit from Dr. E. A. Crane, publisher of the *American Register* at Paris, and were glad to welcome in him an old college classmate after many years of separation. The Doctor will return to France next month.

Thos. S. Steele, of Hartford, recently completed a month's navigation of the East Branch of the Penobscot, in Maine, and has prepared an interesting account thereof, illustrated by drawings and photographs, which he will offer to the magazines for publication. The East Branch traverses a total wilderness, and there are but two houses in the distance of 100 miles. His entire journey covered 200 miles of water course, including eleven falls and many rapids. The section he traversed is an excellent trapping and game region.

W. A. Wheatley ("*Guido*"), of Memphis, Tenn., has just completed his two months' fall shooting trip and returned to his home. We hope the health and strength he has acquired may prove a complete defence against attacks of the fever which has afflicted his town so seriously for so long a time.

J. Gwyn Foster, cousin of the U. S. Minister to Mexico, will spend the next six months in Mexico, collecting natural history specimens, and has promised to furnish the readers of FOREST AND STREAM with the results of his observations. His investigations will cover nearly one-half of the Mexican territory.

Commander Beardslee, of the U. S. steamship *Jamestown*, at Alaska, will remain on the station all winter. There is no more careful student of physical geography and natural history than he, while he serves equally well in the capacity of peace-compeller and diplomatist. The Government made an excellent selection when they appointed him to the duties in which he is now engaged.

—While we have been having midsummer heat here for the past three weeks, with an average midday temperature above 80 degrees, the weather in Colorado has been inclement, and snow has repeatedly fallen to a depth sufficient to seriously impede the movements there of troops now engaged in the Indian campaign.

NEARING THE "POSSIBLE."

IN our rifle columns will be found a detailed account of the match at Benning's Range, near the national capital, on Saturday last, when Mr. P. J. Lauritzen, of the Columbia Rifle Association, added to the laurels his club recently won at Creedmoor, by making the highest match record yet attained, rolling up 222 out of a possible 225, in forty-five consecutive shots at 800, 900, and 1,000 yards. The steady increase in the average of the scores of our leading marksmen chronicled this year, and the frequency with which new men thus come to the front and eclipse what seemed to be the unapproachable records of even two years back, show that the end of attainable excellence in American long-range marksmanship is not yet. Mr. Lauritzen is now one point ahead of Mr. Sumner's hitherto unsurpassed record of 221. Only three steps more remain between this score and the highest possible; and it is not, perhaps, too much to look for, if we await the accomplishment of a clean score at all the ranges within the next decade.

There is, however, one disheartening feature about the phenomenal shooting now growing into vogue this side of the big water. The prospects of a renewal of the International contests, which gave so healthy an impetus to American marksmanship a few years ago, having already sadly dwindled as our riflemen began to average in the teens, now bids fair to fade away altogether, as they gradually acquire a habit of passing the twenties. Still, if rifle shooting can be maintained (and why should it not?) as a gentlemanly, unprofessional pastime, free, hereafter, as now, from the degrading influences and contaminating associations which seems to be rapidly dragging down our other populous sports into the mire, no one will regret its having an indigenous and unapproachable American growth.

HANDICAPPING SHOOTERS.

TO the Fountain Gun Club, of Brooklyn, belongs the credit, it is claimed, of having devised the system of handicapping shooters according to skill. In England it has been for some time the custom to handicap upon the basis of the weight of the gun; but this seemed to our sportsmen to be wrong in principle, and has been proven to be unfair and unsatisfactory in practice. A poor shooter cannot defeat a good shooter, by merely increasing the weight and calibre of the weapon. Our best shooters are constantly using guns of light weight, from seven to eight pounds, and in calibre from twelve to even sixteen, and at the increased rises of from twenty-eight to thirty-one yards are making almost perfect scores. For some time our local clubs provided that the winner of the badge or cup should, while holding the prize, shoot at a rise of twenty-five yards. In 1877 the Fountain Gun Club found that the rule was ill adapted to encourage the inexperienced shooters, and to add to the interest of the monthly contest they handicapped every member in such a manner that, taking their respective averages for the three preceding months, those having an average record of three birds out of seven should shoot at eighteen yards rise; those having a record of more than three, and not over four, should shoot at twenty-one yards; those having a record of more than four, and not over five, should shoot at twenty-five yards; those having a record over five, and not over six, should shoot at twenty-eight yards; and all over six should shoot at thirty yards.

The rule appeared to be unsatisfactory, in that a good shooter could keep his average so within his control as to practically give him the badge; and for that reason it was amended in May, 1878, by providing that a committee should at the annual meeting handicap the members, according to merit, at a rise of from nineteen yards to twenty-five yards, and that the badge-winner for each time winning should be placed two additional yards back, and so remain until the next annual meeting; but the rise was never to exceed twenty-nine yards.

Objection was made to this arrangement, that the good shooter was placed at too great a disadvantage; that an equally skillful marksman, who had not been so fortunate perhaps, was left at a low handicap; and that, in many instances, the greater rise was beyond the range of the gun; also, that two yards was too great a penalty after reaching the twenty-five-yard line. In practice the badge more frequently did not go to the highest score for the year.

The present rule was then adopted, and has proved eminently worthy of acceptance; as indeed it has been approved by many clubs, notably in the West. It requires that the handicap should be reported at the annual meeting by a committee of five on the basis of merit—the rise to be from nineteen to twenty-five yards. The winner, for each time winning the badge, is placed back two additional yards until he reaches twenty-five yards, and therefore, for each time winning, is placed back one additional yard until he reaches thirty yards, but no further.

Under this rule, the average of the entire club has rapidly advanced. It is used only at the badge competitions. The club has also a mid-month contest for four special prizes, donated by Messrs. Pike, Chappell, Wingert, and Madison, in which contest the participants use the Parker plunge-traps, and shoot under the rules of the "New York State Association for the Protection of Fish and Game." The shooters have each seven birds, of which three are at twenty-one yards, two at twenty-six yards, and two at thirty-one yards rise. The purpose is to obtain the practice necessary to successful entry at the State annual tournament.

At the first of these contests held the score was remarkably good, being without a miss for the first five rounds. Each member, on entering, contributes one dollar towards a special fund to defray the entry fees of the club at the next State Convention. If the same practice were shown by the other clubs in this section, better work would be the result, and the example of the Fountain Club be commended by all.

THE HANLAN—COURTNEY RACE.

ONE of the most shameful pieces of "professional" rascality ever perpetrated at the expense of the public was the recent Hanlan-Courtney race at Mayville, Chautauqua Lake, Oct. 16th. Though neither party to the match can be called to account for racing for stakes offered by a business concern with alien purposes in view, the whole affair was more or less tainted thereby from the very out set as a money-making scheme whereby the unwary public was to be fleeced of its spare cash to the advantage of sundry local hostlers, stable-men and groggery-keepers. With such an *entourage* as the worthies officiating on either side, but more particularly on the side of the Union Springs sculler, it required little penetration to divine beforehand some sort of foul play should it be found impossible to "arrange" matters to suit the hangers-on and betting fraternity, who hoped to fill their pockets from the plethoric purses of the unsuspecting public which crowded to the spot, lured by the imaginary prospect that a fair race between the Canadian champion and America's best sculler was, at least to be had. "Arrangements" having fallen through, the Canadians not biting at the bait held out, and having full confidence in the ability of Hanlan to distance his competitor, nothing presented a more natural or ready method of escaping defeat and the loss of wagers than the clandestine destruction of Courtney's boats, ascribing the vandalism committed to solicitous friends or backers of the Canadian champion. This little ruse, however, failed entirely in the effect intended, for the race was called by the referee and ended in a walk-over for Hanlan. The despicable means employed to stave off the race are already recoiling upon the originators of the libel on the champion and his friends, and probably the evidence yet to come to light will once for all place certain individuals connected with the affair in a position from which it will be beyond their power to again swindle the public and bring disgrace upon professional rowing.

It is manifestly absurd to suppose that a sculler who has beaten the best men of the world "hand over fist," without even as much as exerting himself, and who made the fastest five-mile time on record—33m. 56½s.—could have anything to fear from Courtney in a fair race. Hanlan not only made very fast time, but he did not faint away, was not taken with cramps, nor was he pumped; but, on the contrary, came in from his pull as fresh and jolly as ever. To persons open to reason, his ability to beat Courtney as he likes is now beyond question, even if the Lachine race had not settled that point in their minds long ago. One thing is certain, if Courtney has any regard for public opinion he will at once cut loose from the pirates and sharks who have fastened on to him, and who by their reputation, occupation and actions, do him no credit, and he will besides have to do less rowing and winning on paper beforehand and a good deal more actual pulling in his shell, to maintain himself in the good graces of men now thoroughly disgusted with the constant repetition of "accidents" and "mishaps" befalling him in his prominent matches.

There was never produced even a shadow of evidence that would hold in court showing that Hanlan or his friends dealt dishonestly in the Lachine race a year ago, and the impressions created by the recent farce at Mayville on the part of the Union Springs delegation, tends to confirm the opinion we held at the time, that Hanlan was not pushed at Lachine, as admirers of his opponent would have it believed. Hanlan at that time had an eye on future events in England, and did not propose to "give himself away" by making such time as he has more recently shown himself capable of doing, even without a man to pull against.

It will be difficult to get on another match between the two, especially if the money to which Hanlan is fairly entitled be withheld for the purposes of further advertisement by carrying the matter into the courts. In the meantime Hanlan stands without an equal in a shell in the world.

The only redeeming features of the race were the smooth, even tenor of the champion's ways and the tact of his friends, as well as the cloak of respectability given the affair by the presence of Mr. Wm. Blaikie, as referee, to whose rulings no exception can be taken.

THE RETURN OF THE VEGA.—The safe arrival of Prof. Nordenskjöld at Yokohama after his long imprisonment in the Arctic seas is most satisfactory news, and the success of his expedition may be hailed as a favorable omen for the other exploring parties now striving to wrest some of her secrets from the Far North. The northeast passage has been proved to be practicable, and even if no great results, from a commercial point of view, should follow, the success of this attempt cannot fail to be of the very greatest benefit to science.

The *Vega* was frozen in the ice near the Ishuctshe settlement from September 28th, 1878, to July 18th of the present year, a period of no less than 264 days. On makher escape from this point, the vessel passed East Cape on the 20th of that month, and was soon in the Pacific Ocean. After touching at Port Clarence, on the American coast, the ship's course was directed to Komian, dredging all the way. It can scarcely be doubted that the results of this investigation of the sea bottom will prove most interesting when they shall have been worked up. Behrings Island was visited, and here the remains of the huge extinct *Rhytina Stelleri* were discovered. This animal belongs to the order Sirenia, which contains also the manatee and the dugong. It was discovered about the middle of the last century by the celebrated explorer who was wrecked here in 1741, and after whom the island was named. He found the place inhabited by great numbers of these huge creatures. The species was first described by Herr Steller. It would appear that the extermination of the *Rhytina* was speedily accomplished, for none have been seen alive since 1768. This group, the Sirenian, stands almost alone in the animal kingdom, though they have some affinities with the Proboscideans. They were formerly included among the Cetaceans, or whales.

The *Vega* sailed from Behrings Island for Japan on the 19th of August, and arrived at Yokohama in safety September 2d. It is pleasant to learn that no deaths took place from the date of the vessel's departure from Sweden until her arrival at Yokohama.

Punch hailed the bold mariner with the following lively verse:—

A MODERN SAGA.

[*With Punch's acknowledgments to Professor Longfellow.*]

Named like some Viking old!
Thy deeds, brave Nordenskjöld,
No Scald in song hath told,
No Saga taught us!
Telegram brief and terse,
Did the strange tale rehearse.
Worthy of deathless verse,
The news it brought us!

On, past that Kara Sea,
First ice-bound mystery.
Now, to its stout keel free,
Slowly yet surely,
Eastward the *Vega* bore,
Till round that headland hoar,
Never yet turned before,
Sailed she securely.

Then, spreading wing, she flew,
Where, while the white whale blew,
Labored her learned crew,
Dredging and sounding.
True modern Vikings they,
Born of our better day,
Finding in bloodless fray
Pleasure abounding.

Fighting a dauntless fight
'Gainst Nature's Titan might,
Winning from Arctic night
Light for their fellows.
Fearless and scorning ease,
Sure stouter souls than these,
Ne'er of those Northern seas
Braved the chill billows.

On, till with ice pack close
Compassed and endless snows,
They, midst the frozen floes,
Fixed winter quarters.
Nigh thrice a hundred days,
'Neath half a sun's scant rays,
Locked in those icy ways,
White waste of waters!

Many a hunting bout
Helped the long winter out,
While the Norse savans stout
Searched, watched and noted.
Then, that grim season past,
Scattered the floes, and fast
Through Behrings Strait at last
Safely they floated.

So courage wins the game!
Brave Swede, thy Viking name
Ranks on the roll of fame,
Northern De Gama!
Who shall applause refuse
To that long Arctic cruise,
Told in that brief, swift news
From Yokohama?

Three hundred years or more
On that far Arctic shore,
For way that eastward bore,
Man hath contended.
Now, thou hast reached the goal,
Swede, sage and stout of soul,
Skoal! to thee, Norseman, *Skoal!*
Thus the fight's ended!

"MALT."—Malt, an English setter belonging to Mr. Henry Altenbrand, of Brooklyn, was brought into this office the other day to exhibit his acquirements as a mathematician, euchre-player and master of English orthography. Malt's master spread out upon the floor in a circle a pack of cards, and one of the gentlemen present called for the ace of spades, which Malt promptly picked out from the pack and deposited in his master's lap. Other calls were made at random, and the dog soon showed a most depraved intimacy with the paste-boards. Then the letters of the alphabet, printed on cards, were substituted for the cards, and Malt proceeded to spell out "FOREST AND STREAM." Then the canine showed his political sagacity by promptly choosing greenbacks from a quantity of other paper currency. In numerous other ways the dog proved himself an apt and very intelligent scholar. We are assured that, with all his other acquirements, Malt has not forgotten the greatest excellence of a sporting dog, namely, good work in the field; his performances there are the pride of his master, and at the bench show of dogs whose owners think the best in the world (there are thousands of them), Malt shall have a blue ribbon.

GOING TO THE POST-OFFICE.—We don't know how many times a day our Camp Cheleur, W. T., friends go to the post-office, but judge not more than once or twice. A subscriber writes: "We are well in the wilderness here, and send 212 miles to Walla Walla for our mail."

—Lucy Ann Lobdell Slater, aged fifty, known as the "Female Hunter of Long Eddy," has just died at Delhi, N. Y. She was noted for her wonderful skill with the rifle. She was married at seventeen, and her husband soon after deserted her. She donned male attire and lived the life of a hunter.

A TRIP TO NORTH PARK.

(EIGHTH PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

FROM Kosier's we proceeded down the Michigan to the crossing, and then turned south, following the road which leads to the Owl Creek Mines; our purpose being to cross the range into Middle Park. The Hot Sulphur Springs are well worth a visit, and the fishing in the tributaries of Grand River is usually very good. The road which we followed passes over the rolling plateau of North Park, at a considerable distance from the mountains, and no game was to be seen except antelope and sage grouse. Coyotes were rather abundant—attracted to the neighborhood of the road by the carcasses of the antelope which are killed by travellers.

As we had but little meat in the wagons, all hands were on the lookout for game as we came down the Michigan. Antelope were extremely abundant in the stream bottom, but were rather wild, and for some miles we got no shots. At length, however, a band of about twenty ran out of the brush a little ways ahead of us, and stopped on the bluff about three hundred yards off. I dismounted and fired at a buck, not raising my rear sights but holding level with the tips of his horns and just over his shoulders, thus allowing for a fall of about two feet for the ball. As I lowered my rifle I saw the ball strike the bluff just beyond the animal, and, as I remounted, Kosier, with whom I was riding, said, "Well, that was a close call, anyhow." The band tore up the hillside at railroad speed; but, before they had gone fifty yards, the buck turned around and dashed back, almost to where he had been standing when I fired, and fell. On riding up to him we found that the ball had pierced both shoulders—a lucky shot.

After leaving the Michigan we crossed Owl Creek, along which are some placer washings which are dignified by the pretentious title of the Golden Gulch. They have not proved specially rich, I believe. The whole country contains more or less gold, and there are numberless claims staked out all through the mountains. The irruption of miners and prospectors this spring has caused much hard feeling among the Utes, who regard this section as their hunting ground, and view with suspicion and dislike the encroachments of miners and cattle men. The Utes have always been friendly to the whites; and although occasionally wild spirits among them have robbed or murdered, these acts have been condemned by the tribe at large, and the perpetrators, when it was possible to capture them, have been punished. It is too likely, however, that if the rush into this country continues there will be trouble. The Indian, however friendly, if constantly pressed upon by the white man, will turn at last, and make a brave, if despairing, struggle. As to what inherent right a few thousand Indians have to occupy as a hunting ground a section of country that would support ten times as many white men, I have nothing to say. This is a great question in ethics on which there are different opinions; but all will acknowledge that it is sad to see a nation of brave, fine people driven from their homes, as I fear the Utes must soon be. I have a particularly warm feeling for these Indians, for just nine years ago I spent some time hunting with the tribe, and was most kindly and hospitably treated by them. In the event of a war with them, many of my old friends among the mountain men would come to grief, for the Utes are brave, and good shots, and the Indians, after great losses, would be conquered and moved away, so that I earnestly hope that the threatening danger may pass away.

Just after passing the diggings of the Golden Gulch Mining Co., the road crosses a timbered spur which here runs out from the mountains, and then strikes the prairie again, and soon crossing the Illinois leads almost directly toward Arapaho Peak. The day had been cloudy and threatening, and, after crossing the Illinois, we had a couple of snow storms, the last one so severe that we could not induce our horses to face it, but were obliged to turn our backs to the wind and wait for the gale to blow itself out. Just after the last of these snow storms, as we were riding along muffled in our rubber coats and blankets, I saw W. and Kosier, who were ahead, halt on reaching a low creek, and gaze earnestly at some object off to the right. As soon as I reached the ridge, I saw a black object, about a mile off, feeding on the prairie. If I had been in what I supposed was a buffalo country, I should have shouted "Buffalo!" and been off at once; but as it was, I had to have recourse to my glass before I could believe that it was really a bison. Old mountain men say that the mountain buffalo, or, as they call them, in contradistinction from the plains' buffalo, bison, is quite a different animal from his once more abundant cousin of the prairie, but there is no good evidence in support of this statement. No zoölogist, so far as I know, has ever been able to separate the two by any good characteristics. The inhabitants of the mountains are said to be larger and darker than the plain dweller, but I know of no more decided differences than these.

Of course when we saw the buffalo I was very anxious to get him, and at once started to try to kill him. The boys accompanied me, for it was impossible to resist their eager excited glances. The hunter's spirit was thoroughly aroused in them, and both were determined to have a shot at the bull if any one did. Every hunter knows that to kill game, the fewer there are in the party the better. Two individuals may hunt together successfully, if they fully understand each other, but usually it is better, if meat is wanted, to hunt alone. The great fault with most men new to the mountains is that, when hunting, they want to see everything for themselves, and I have seen an old hunter stand with tears in his eyes, and swear till all was blue, because his companion, an eager greenhorn, had frightened away a band of bighorns by incautiously raising his head above a ridge.

Well, we did not get the bull, but it was through no fault of my young companions, both of whom did splendidly. The fault, if any there was, was on my part. This is what took place: The bull was feeding towards the mountains, and the cover among the foot-hills was good; so we rode briskly along until we were near the point where he would enter the hills, and then, leaving our horses, we advanced on foot. I soon saw the game, and by cautious stalking reached a point on the bare hillside above him, with a fringe of quaking aspen brush below us, behind which he was feeding. Here we posted ourselves, waiting for him to appear at either point of the bushes below us. We waited for some time, and I finally made up my mind that the animal must have laid down on the lower side of the bush—and slipped cautiously down to one point of the fringe to see if my supposition was correct. Just as I reached the edge of the brush I heard a low whistle, and looking around, beheld a sight which I shall never think of without the most hearty amusement. At the upper edge of the brush, about thirty feet from A. and W., stood the bull, only his gigantic head being visible to my companions, though from my position further down the hill, I could see his shoulders just above the low bushes from which he was emerging. The buffalo was standing still, looking at the boys who were glancing in turn at him. In the excitement of stalking the game they had dropped their hats upon the ground, and frequent wipings of their brows had caused their hair to stand on ends like the proverbial quills of the peevish porcupine; their astonished eyes were like saucers, and altogether they presented a most laugable spectacle. It was evident, however, that although surprised they were not flustered, for their guns were at their shoulders, and just as I looked around, I saw the smoke leap from each rifle, heard the reports, followed by the "clap clap" which told me that both balls had struck, and saw the bull toss his head contemptuously and hurl himself backward into the brush. All this took place in an instant. I had just time to take it all in, but not enough to raise my own rifle and fire. We ran to the top of the hill, but nothing more was to be seen of the buffalo, nor did we again catch sight of his huge black carcass. He had come up through the thick brush so quietly that he had reached his point of observation without being detected, and it was only by accident that he was seen by W., who, when he first beheld him, was impressed with the idea that the grandfather of all the grizzly bears had come down from the mountains for the express purpose of making a meal of us. The shots fired at the bison had struck him in the head, the only part visible to the shooters, and had evidently not done him any material injury.

Slowly and sadly we retraced our steps, reaching our camp on Buffalo Creek about the middle of the afternoon. The next day we crossed the range by the Arapaho or Muddy Pass, and toward evening camped at the foot of Whiteley's Peak on Muddy Creek in Middle Park. As soon as the wagon reached camp, our rods were set up and two of us, A. and myself, fished for an hour, but without any very marked success. The fish were small, the largest which I took only weighing half a pound, and not very abundant. The past summer has been so dry that all the mountain streams are low, and the fish are consequently inactive and but little inclined to take the fly. A dozen or twenty trout were all that we took. The next day we followed down the Muddy as far as the Hermitage Ranche, the home of old Jack Rand, and from there crossing to the Troublesome and following that stream down to the Grand, we reached the mouth of Corral Creek about dark, and camped there. That portion of Middle Park which we traversed is a barren desert in comparison with North Park. There are few antelope here, and these few are very wild; but it is said that blacktail deer are numerous in the neighboring mountains.

Four miles beyond our camp, on Corral Creek, are the Hot Sulphur Springs, on Grand River. These springs have proved extremely valuable in cases of rheumatism and in certain other complaints, and invalids come from long distances to bathe in their waters. Their temperature varies from 112° to 117° F., and the waters are strongly impregnated with sulphuretted hydrogen. The hot springs are on the north side of the river, and on the south there are several cold sulphur springs, the waters of which are by no means unpleasant to the taste. The hot springs are owned by our old-time correspondent and friend, Col. W. N. Byers, of Denver, Col., and one of the main objects of our visit to Grand City was, if possible, to see him

there. To our great regret, however, we found that he was absent, and we were obliged to forego the pleasure of meeting him. We spent but a few hours in Grand City therefore, and after a bath and a "sit-down" dinner at the hotel we retraced our steps to the camp on Corral Creek.

On our return journey we crossed the range by way of the Rabbit Ears Pass, and found the road a good one. Prospectors have been busy along the head of the Grizzly Bear River, but we saw none. On this stream we met with the first sharp-tailed grouse seen on the trip, and found them very abundant.

The Rabbit Ears Mountains take their name from a peak which is surmounted by two high pinnacles of rock standing close together and looking, from most points of view, somewhat like the erected ears of a hare. The mountains, though not high, ten or eleven thousand feet, afford some very fine scenery, and are said to abound in game. We had no time unfortunately to investigate them. This range is rather a favorite hunting-ground for parties who start from points in Middle Park or who pack over the range from points north of Denver. The country is not a good one to hunt, however, for the mountains are covered with fallen timber, through which it is very difficult to pass without making a great deal of noise. I could see, however, that in winter it must be a superb locality for the hunter to visit. There are many high, bald hills which, swept by the fierce winds of November, December and January, afford good pasturage to the deer and elk. Everywhere over these hillsides the traveller sees scattered on the ground the shed antlers and other signs of game in such abundance as to make one long to be able to spend a month or two in this district at a time when all game is at its best.

Descending the mountains into North Park we soon reached a point where we could cross over and strike the road which we had followed in going through the Muddy Pass. Near the point where we struck this road we passed a deserted Ute Camp about a month old, the poles of the wicky-ups and of the frames for dressing hides being still in position. The camp had not been occupied for any great length of time, but I noticed several bushels of antelope hair on the ground, indicating that the Indians had dressed a large lot of skins. I am told that they have killed this summer thousands of antelope for their hides alone.

We camped that night on the East Fork of Arapaho Creek, and, as the horses were very weary from their pulls up and down the hills of Middle Park, we determined to move the next day only to our old camp on Buffalo Creek, a distance of two or three miles, and let the animals have a day of rest there. Game had been so scarce along the road in Middle Park, and we had been travelling so fast, that we were about out of meat, and it was necessary to secure some if possible. I started out on foot for an hour or so, soon after reaching our camping-ground, but saw nothing but one old buck, who discovered me before I did him, and at whom I did not get a chance to shoot. That evening, at supper, some sarcastic remarks were made as to the hunting abilities of the company generally, and before I went to bed I told the cook to call me at daylight, having resolved that before I ate again I would kill some meat. Yo.

Buffalo Creek, North Park, Col.

The Rifle.

ANOTHER CALIFORNIA RIFLE SHOT.—Dr. John Ruth, of Oakland, Cal., has come to the front as a competitor for the peculiar kind of notoriety which belongs to rifle trick shooting. At a recent exhibition in Sacramento the other day he shot cigars from the mouth of his assistant, twenty feet distant, rifle held upside down, and with a mirror, &c. Of 1,000 glass balls shot at, thirty-nine were missed. The rifleman was laboring under the disadvantages of a big boil on his neck. What could he not have done without it?

MASSACHUSETTS—*Boston.*—The fall meeting, opened Oct. 9th, was a great success, some of the finest scores being rolled up that the famous Walnut Hill range has ever shown. The attendance was large and the receipts all that could be desired. The first match was the State Team Match, open to all teams of five from all organized rifle associations in Massachusetts. Associations were allowed to enter more than one team, but no person could shoot in more than one team; distance 200 yards; rounds ten; entry fee, $5 for each team. The Massachusetts Rifle Association entered three teams, the Gardner Rifle Club two teams, the Medford Amateur Rifle Association one team, and the Wakefield Rifle Club one team. The prizes:—First, 75 per cent. of entry fees; second, 25 per cent. The Massachusetts first team carried off the honors with a total of 216, followed by the well-known Gardner team only three points behind, with 213. Below is the summary of the team shooting:—

MASSACHUSETTS, TEAM NO. 1.

O. M. Jewell	5	5	4	4	4	5	4	5	4	5—44
J. R. Osborn	4	4	5	4	4	5	5	4	4	5—44
W. H. Jackson	5	4	5	4	4	4	5	4	5	4—44
D. Kirkwood	4	5	4	4	5	5	4	4	5	4—44
Nat. W. Arnold	4	4	4	4	4	4	4	4	4	4—40—216

GARDNER, TEAM NO. 1.

G. F. Ellsworth	4	4	5	4	4	4	4	5	4	5—43
H. O. Knowlton	4	4	5	5	4	5	4	4	4	4—43
A. Robbins	5	4	5	4	5	4	4	4	4	4—43
C. O. Beat	4	4	5	4	4	4	4	4	5	4—42
J. N. Dodge	5	4	3	4	5	4	5	5	4	4—42—213

MEDFORD TEAM.

B. Kimball	4	5	5	4	5	5	5	4	5	4—46
W. Charles	4	5	4	5	5	4	5	4	5	4—45
H. H. Hawkins	4	4	5	5	4	4	4	5	5	4—43

E. F. Brooks	4	5	4	3	2	2	4	5	4	4—36—201

Short Range Handicap Match—The condition of this match is 200 yards, off hand; seven rounds; the aggregate of two scores to count. The aggregate to be considered as one score in settling ties. The first class gave one point to the second class, two points to the third class, three points to the fourth class, and four points to the fifth class. The other classes gave to the classes below them in the same ratio. The match was shot on Thursday and Friday. We give below the prize winners:—

W. H. Jackson	5 5 5 4 4 5 5—33	5 5 5 5 5 5 5—35	68
O. M. Jewell	4 5 5 5 5 3 5—34	5 5 5 5 4 5 5—34	68
N. W. Arnold	5 5 4 5 5 5 5—34	5 5 5 4 5 5 5—34	68
W. Fellows	5 5 4 5 5 5 5—34	5 5 5 5 5 4 5—34	68
G. L. Winship	5 5 5 5 5 5 5—35	4 5 5 5 4 5 4—32	67
J. W. Frost	4 4 5 5 5 5 5—33	5 4 5 5 4 5 5—33	66
E. B. Souther	5 5 5 4 4 5 5—33	5 5 5 4 5 5 4—33	66
G. F. Ellsworth	4 5 5 4 5 5 5—33	5 5 4 5 5 5 5—33	66
E. F. Richardson	5 5 5 5 4 5 4—33	5 4 5 4 5 5 5—33	66
D. Kirkwood	4 5 5 5 5 4 5—33	5 5 4 4 4 5 5—32	65
E. Whittier	5 4 5 4 4 5 5—32	5 4 4 5 4 4 5—31	63
J. Borden	5 5 4 4 5 4 4—32	4 4 5 5 4 4 5—31	63
H. C. Knowlton	4 4 5 5 5 5 4—32	5 5 4 4 4 4 5—31	63
E. A. Robbins	5 5 5 4 4 5 4—32	5 5 4 5 4 4 4—31	63
R. A. Blood	5 5 5 4 4 4 5—32	4 5 4 4 5 4 4—30	62
L. W. Serrar	5 5 5 4 4 4 5—32	4 4 5 5 4 4 4—30	62
J. N. Frey	4 5 4 4 5 4 5—31	4 4 5 5 4 5 4—31	62
W. Poland	4 4 5 5 5 3 5—31	4 5 4 5 4 5 4—31	62

The prizes were as follows, awarded in their order of standing:—

PRIZES.

First prize, Winchester repeating rifle	$40
Second, cash	20
Third, Lemair's fine pearl and nickel-plated opera-glass	16
Fourth, cash	10
Fifth, carving set	10
Sixth, cash	8
Seventh, one dozen silver-plated table forks	8
Eighth, cash	7
Ninth, cash	6
Tenth, cash	6
Eleventh to fourteenth, each cash, $3	12
Fifteenth to eighteenth, each cash, $2	8
Total	$150

LONG RANGE CASTOR HANDICAP MATCH.—The conditions of this match are 900 yards, any position, seven rounds; the aggregate of two scores to count in settling ties; the aggregate to be considered as a continuous score. The classes gave points to the classes below the same as in the short range match. Cartons to count six. We give below the prize winners:—

J. F. Brown	6 6 6 6 5 5 6—40		82
	6 6 6 6 6 6 6—42		
N. Washburn	6 6 6 6 6 6 6—42		82
	6 6 5 5 6 6 6—40		
Wm. Gerrish	6 6 5 6 6 6 6—41		82
	6 6 6 6 5 6 6—41		
R. Rathbone	80	C. A. Sumner	65
E. W. Lum	78	J. L. Shippens	64
J. Peckenill	71	O. M. Jewell	80
M. W. Wares	64	W. Poland	73
S. Wilder	80	T. Howe	66
A. W. Newland	71	H. Tyler	65

The prizes awarded in this match are as follows:—

First, fine French clock, $30; second, cash, $15; third, hygrophant from J. S. F. Huddleston, $10; fourth, cash, $7; fifth, cash, $6; sixth, order for a pair of shoes from T. H. Bell, $6; seventh, cash, $4; eighth, year's subscription to FOREST AND STREAM, $4; ninth, cash, $3; tenth, "Sportsman's Gazetteer" from Charles Hallock, $3; eleventh, quarter keg powder from Laflin & Rand, $3; twelfth, same, $3; thirteenth, "Abroad Again" from Curtis Guild, $2.50; fourteenth, "Over the Ocean" from same, $2.50; fifteenth, cash, $2; total, $101.

Medford, Oct. 8th.—The Medford Amateur Rifle Association held its regular meeting, and the first competition in the handicap United States gold coin match to-day at Bellevue range. There was a large attendance of riflemen and their friends. The weather conditions were perfect. The first prize offered in this match is a calendar clock, valued at $25.

W. Charles	4	5	5	5	5	5	5	4	4—47	
H. A. Pickering	4	5	5	4	5	4	5	5	5	4—46
G. W. Sougett	4	4	4	4	5	4	5	5	4	5—44
H. A. Pickering	4	4	4	4	5	5	4	4	4	5—43
C. D. Harrison	4	4	5	5	4	5	4	4	5	4—44
N. P. Ames	4	4	4	4	4	4	5	5	5	4—43
J. H. Eames	3	3	4	5	5	4	5	5	5	4—43
A. J. Greene	3	4	5	5	5	4	4	4	4	4—40
R. S. Rogers	4	4	4	5	4	4	5	3	4	3—40
J. W. Vining	4	4	3	5	4	4	3	4	4	4—39
J. E. Irvine	4	3	4	3	3	3	3	4	4	3—34

Medford, Oct. 11th.—The Raymond Sportsmen's Club held its meeting yesterday. In the glass-ball shoot Mr. G. B. Blanchard ranks one, with a 29 out of 30:—

	Double Trap.	*Single Trap.*	*Rotary Trap.*	*Total.*
G. B. Blanchard	10	9	10	29
Re-entry	10	9	8	27
W. S. Pickering	10	8	9	27
J. E. Mason	8	8	7	23
J. Harten	7	7	6	20

In the 200 yards handicap match J. S. Bennett leads with a score of 43. The summary is:—

J. S. Bennett	4	5	4	5	4	4	5	4	4	4—43
Re-entry	5	5	4	5	4	4	5	4	4	3—43
J. Smith	5	4	4	5	4	4	4	4	4	4—42
Re-entry	4	4	5	4	4	4	4	4	4	4—41
W. B. Witherell	3	5	4	4	3	3	3	3	3	3—32
Geo. Freeman	3	4	4	3	0	4	3	3	4	3—29
J. E. Mason	4	4	4	2	3	4	0	3	0	0—24

THE ZETTLER'S FALL MEETING.—The Zettler Rifle Club held its annual fall shooting on the 7th and 8th inst. at the Schuetzen Park, Union Hill, N. Y. The distance for all the targets was 200 yards, off-hand shooting; any rifles allowed. Both days were fair, and made for good shooting, as the following records will show:—

Target of Honor; members only; three shots each man; score in possible 75:—

Henry Oehl	65	G. Schurmann	55
J. H. Brown	63	L. G. Beatse	54
W. Hayes	63	V. D. Linden	54
W. Klein	63	B. Zettler	54
Ph. Broadway	62	H. Joiner	53
Charles Zettler	62	D. Calhune	51
Ph. Kliesrath	61	Zimmerman	51
D. Miller	61	Jack Levy	49
F. Blumenberg	60	Major Aery	46
W. M. Farrow	57	J. R. Grohmann	45
M. B. Engel	56	Charles Recht	42
F. Fenning	56	F. Fabarius	37
Charles Junge	56	H. D. Fischer	37
D. Patterson	56	F. D. Patterson	27
M. L. Riggo	56	J. D. Ward	24

The Ring Target was open for all comers; number of tickets unlimited; twenty prizes were received by the following gentlemen; possible, 75 rings:—

W. Hayes, Newark	72	J. M. Brown, N.Y.	69
Charles Zettler, N.Y.	71	G. Joiner, "	69
D. Miller, "	71	A. Tobin, Newark	68
W. Klein, "	71	O. B. Hall, New Britain	68
W. M. Farrow, "	70	J. C. Falco, New Britain	68
J. Beyer, Hartford	70	—Marks, N.Y.	67
Henry Oehl, N.Y.	70	M. M. Hellwig, "	67
J. H. Raschen, Hoboken	69	P. Jenning, "	67
O. E. Pillard, New Britain	69	L. Beatse, "	66
H. Andrew, N.Y.	69	Phil Klein, "	66

The Man Target was also for all comers; fifteen prizes; number of tickets unlimited; possible 60:—O. E. Pillard, New Britain, 58; P. Ferning, N. Y., 56; Z. Beyer, Hartford; C. Judgson, N. Y.; J. H. Raschen, Hoboken; J. C. Falco, New Britain, 55 each; H. Andrew, N.Y.; V. D. Linden, Poughkeepsie; M. W. Farrow, N. Y.; W. Hayes, Newark; Charles Zeigler, Hartford; G. Joiner, N. Y.; J. Blumenberg, N. Y., 54 each; O. B. Hull, New Britain; P. Klein, N. Y., 53 each.

The rules and regulations of the N. R. A., which are similar to those of the "Schuetzenbund of the United States of North America," were in force.

Champions' Target (in size and form a regular twenty-five half-inch target; open to all-comers and with no entrance fee; only three shots to be fired by each man. Mr. P. Fenning was the successful shooter, making 66 rings.

Bull's-eye Targets; number of tickets unlimited; open to all comers; the black was twelve inches, and the regular bullseye four inches in diameter; ten shots each. The men in the order of prize-taking stood:—D. Miller, W. Hayes, E. Holzmann, H. Oehl, M. Seppenfeld, Ph. Klein, W. M. Farrow, G. Joiner, J. H. Raschen, J. H. Brown, H. Andrews, P. Fenning. The most bull's eyes (35) were made by G. Joiner; J. H. Raschen, 24; D. Miller, 22; J. Blumenberg, 21.

A fine banquet and ball at the castle closed this meeting.

SHOOT OF THE SCHEUTZEN CORPS.—The New York Scheutzen Corps, numbering 127 members, and guests, in command of Captain D. E. Yuengling left Jersey City on Thursday last, via special train of six cars on the Lehigh Valley Railroad, for their annual fall shoot. They were accompanied by the 71st regiment band and had everything necessary to make the party happy and comfortable. The destination was Mauch Chunk, Pa., 120 miles from the city. The scenery viewed during the run out was enchanting, and all were well pleased with the selection made by the Captain of the Corps. The entertainment was strictly private. On the arrival at Mauch Chunk, the entire party were transported to the Mansion House, James S. Wybert, proprietor, where an ample supply of edibles were ready, after partaking of which, the shooters took their positions, and at short range, off hand shooting, three shots each, contested for the various prizes, which occupied the rest of the day. In the evening Mr. F. Beringer, President of the Arion Society, R. Guggenheimer, Esq., and T. C. Banks, of the FOREST AND STREAM, were appointed judges, and Mr. Philip Klein measured the targets, which was no easy task for him, and after their labors were finished the party retired, leaving the distribution of prizes until the next day. As the immense dining-hall had been cleared of tables, the regimental string band soon sounded a march which opened the grand ball for the evening.

On Friday the day was ushered in by the firing of cannon in front of the hotel at six o'clock, which was continued until the band assembled for a morning concert. After an early breakfast the Corps assembled with the band and marched to the station of the celebrated "Switch Back" railroad, while the ladies and children were taken in carriages. The trip over this wonderful road was highly exciting and the scenery enchanting.

A description of the excursion over the mountains would be almost impossible in our limited space, but all who participated in it have it thoroughly impressed on their memory. At Summit Hill an hour was passed in visiting the wonderful coal mines, and especially the burning mine, whose fires have been raging for over twenty years. At this point a slight collation was served, while the band gave the miner's families an open air concert. On returning to the hotel dinner was served, and then came the distribution of prizes contested for the day before, viz.:

Philip Klein, 1st prize, FOREST AND STREAM Pipe, value $150—score, 3 2-16 in.; Bernard Zettler, 2d, $25 cash—score, 4 1-16 in.; Louis Fink, 3d, $20, gold—score, 4 5-16 in.; Maj. Geo. Aery, 4th, one Case of Wine—score, 5 10-16 in.; G. A. Kundahl, 5th, ten Quarter Kegs of Beer—score, 6 in.; P. Valkman, 6th, $10 cash—score, 6 1-16 in.; L. Fink, 7th, two Cases Wine—score, 6 4-16 in.; Wm. Klein, 8th, $10, score—6 4-16 in.; M. Henken, 9th, Castor—score, 6 9-16 in.; Fred. Hausen, 10th, Wine Cooler—score, 6 9-16 in.; Louis Lane, 11th, fifty Bottles Seltzer—score, 8 4-16 in. The following twenty-five members each received a sterling silver medal, with scores in merit as presented, viz.:

John Brummerhop, W. Radebold, Anton Meyer, J. R. Grohman, J. Lippold, D. Meschendorf, G. Menken, Wm. Lemken, H. Evers, J. C. Huser, G. Whrenberg, Cord. Manhuken, Capt. Yuengling, H. Knebel, A. W. Lemcke, J. H. Meyer, George Orht, J. Stemme, A. Fischer, F. Grumermann, J. Eggers, N. F. Britenshow.

After the distribution the corps assembled in front of the hotel, and the group were photographed. "Fall in!"

was the next order, and the music echoed on the mountain side as they were marched to the large saloon for a few parting words, and the ceremonies opened with three hearty cheers for Capt. Yuengling, and a speech giving him great credit for selecting so fine a resort for the annual festivities. Capt. Yuengling responded handsomely, and proposed three cheers for ex-Capt. George Aery, which met a hearty response. After which, speech-making, cheers and music were in order. Col. Wybert, the landlord, was highly complimented. The toast to the ladies was not forgotten, and the affair closed with a hearty cheer for our guests. During the remarks made, the Captain referred to the change of scenery, the new life imparted, and the wonders of the Switzerland of America. Maj. Aery spoke handsomely of the trip, highly complimenting the landlord, and remarked that the corps always came as men, and went home as men. At 4.30 P. M. the party started on the return trip amid the firing of cannon, music by the band, and cheers from the multitude assembled.

Creedmoor, Oct. 8th.—The New York Rifle Club met to-day for weekly practice and to shoot for the "Donaldson Trophy," 200 and 300 yards; seven rounds at each distance; winners once handicapped, two points, and winners twice handicapped, four points. Owing to the lateness of the hour in which the match was shot, the scores were not very brilliant, Mr. S. P. Wells winning the trophy for the first time with the following score:—

	200 *Yards.*										300 *Yards.*										
S. P. Wells	5	5	4	4	4	4	5	5		36	4	3	4	4	4	3	3	5	5	27	57

This was the tenth competition for the trophy, which has to be won three times before becoming the final property of the winner. The following is a record of the competition for the trophy, showing how it stands:—

No. of Comp.	*Winner.*	200	300	*Total.*
1	A. J. Howlett	29	33	62
2	H. D. Blydenburgh	34	27	61
3	J. S. Conlin	29	28	57
4	A. J. Howlett	30	28	58
5	N. O'Donnell	31	27	58
6	W. H. Dunlap	31	28	59
7	Fred Alder	30	27	57
8	Fred Alder	32	30	62
9	D. S. Banks	28	29	57
10	S. P. Wells	30	27	57

—A prize shooting "everybody's match" commenced in Conlin's Shooting Gallery, 1,232 Broadway, New York, on Wednesday, Oct. 15th. Twenty-five (25) valuable prizes will be presented. No competitor to win more than one prize.

Jamestown, Oct. 14th.—Some very good work was done last week with the "Gallery Rifle" at R. H. Burns' rifle range, distance sixty feet; Creedmoor target reduced for range. Among the best scores, possible 25, were:—S. C. Van Vleck, E. S. Blakesly, A. F. Warner, W. H. Hotchkiss and S. G. Love, 25 each at 300 yards; C. W. Hatch, A. H. Johnson, D. I. Langworthy, Dr. A. F. Ward and H. W. Watson, 24 each at 500 yards target. Monday, the 20th, commences the "Prize" shooting for 38 cal. Ballard rifle and three cash prizes.

PINACENTER.

—The Columbia Everybody's, which was called for October 20th, is postponed till November 3d.

WASHINGTON, D. C., *Oct. 11th.*—The Weather Bureau provided a good day for the Harkness gold medal shoot of the Columbia Rifle Association. The skies were evenly overcast, the light was gray and clear, and the strong wind which blew across the range from the right hand was singularly steady in direction and strength, although brisk enough to keep the streamers pointing out straight to the Capitol dome which rose westward beyond the hill-tops. Only three men presented themselves for the contest, but under the rules three make a match in shooting for the Harkness medal. Mr. Laird shot remarkably well at the 800 yards stage, his clean score being nearly all made up of carton shots. Mr. Lauritzen kept him company until the fourteenth round, and then broke for an unlucky centre, while Mr. Adee brought up the red one twice in his string. At 900 yards Mr. Lauritzen's 72 was the top score, Mr. Laird, through his opening "red bird," only getting 71—a tally which was tied by Mr. Adee, notwithstanding a provoking "mag" on his second round. At 1,000 yards Mr. Lauritzen maintained his good luck, and although the "flamingo" bobbed up four times, nothing worse happened, and he retired with a fine 71, and a flattering total of 217—his best score thus far. Mr. Laird also made 71 at this range, and toted up the same gross figures, but a "mag" on his tenth round at 1,000 yards prevented his taking first place under the rules. Mr. Adee's bad luck at the longest range left him well in the rear with a tolerable 208. The average for the three contestants was 214. The scores are as follows:—

P. J. Lauritzen	800	5	5	5	5	3	5	5	5	5	5	5	4	5	—54	221
	900	5	4	5	5	5	5	5	4	5	5	5	5	4	5—74	
	1,000	5	4	5	5	5	4	4	5	5	5	5	5	4	5—71	
C. H. Laird	800	5	5	5	5	5	5	5	5	5	5	5	5	5	—75	217
	900	4	5	5	5	5	4	4	5	5	5	4	5	5	5—71	
	1,000	5	5	5	4	4	5	5	5	3	5	5	5	5	5—71	
A. A. Adee	800	5	5	5	5	5	5	5	5	4	5	5	5	4	5—73	208
	900	5	3	5	5	4	4	3	5	5	5	5	5	5	5—71	
	1,000	5	4	4	3	5	4	4	5	4	5	5	4	3	5—64	

On the aggregates Col. Burnside still leads with a total of 648 for his three best scores. Mr. Laird follows with 642, his lowest score being 210, which he has yet two chances to change for a better and possibly a winning score. Prof. Harkness, although a noted shot, prefers not to enter in the contest for the medal he himself offers.

WASHINGTON, D. C.—The Columbia Rifle Association held its penultimate shoot for the Harkness gold medal on Saturday last, the 18th; and capped the climax to the good shooting done by its members lately at Creedmoor by piling up the highest individual score yet made in a match. The day was apparently unfavorable, for, although the lowering skies gave promises of unbroken continuance of the grateful gray light without mirage so prized by all riflemen, yet the wind shifted from VII to X, on the wind dial, and needed four or five points of allowance on the guages of the guns. Four marksmen faced the targets, Mr. A. V. Canfield, Jr., of Baltimore, coming over to join Colonel Burnside and Messrs. Laird and Lauritzen in the friendly contest. He was unfortunate, however, at the first stage, opening with the red-bird, and keeping it in sight for three rounds until he found the bull's-eye. The others, more lucky, struck the bull and stayed on for four rounds. Mr. Laird was the first to break for centers, on his fifth and sixth rounds, the Colonel's turn coming on the seventh. On the latter's tenth shot, by an unlucky mishap, his bull's-eye was on the wrong target, scoring as a miss under the rigidly enforced rules. Mr. Lauritzen, unmoved by the minor calamities around him, kept on without a break to the end, and rolled up his first clean string in a match. Mr. Laird's 72 came next. The Colonel's 68 would have been 73 had he confined himself to his own target, while Mr. Canfield's 68 was well fought for, only one point being dropped after he got fairly on the bull. At 900 yards the Colonel opened badly with a "mag," followed by a "flamingo, but he then pulled himself together for an unbroken sequence of bull's-eyes to the end. The race at this stage at first lay between Mr. Lauritzen and Mr. Laird, the former holding on the iris up to his seventh shot, which brought up the red, while the latter dropped but two points up to his fourteenth round, when emulating Col. Burnside's example he too planted a fine carton provokingly near the middle of the wrong bull's-eye, and got credited with a miss in consequence, closing with only 67 to Mr. Lauritzen's admirable 74. When the marksmen moved back to the thousand yards' firing point the interest centered on Mr. Lauritzen, who approached the last and most trying stage with 149 to his credit out of a possible 150. The scorers and umpire carefully focussed their telescopes to bring out with the utmost distinctness the sharp white shot-marks on the black of the bull's-eye, which showed clear and round without haze or mirage. The wind grew more gusty, and a few warning rain-drops fell from time to time; but on the whole the clerk of the weather did his duty well. Both men found the bull on their opening shots, but on the third round Mr. Lauritzen misjudged the wind for a puffed-off centre. This lowered his score two points from the possible, with a dozen shots yet to fire, not, however, a very disheartening prospect. Mr. Laird stuck to the bull in a style which would have won him forty Wimbledon cups had they been up for competition, and justified the reputation he gained at Creedmoor as a long-ranger, but Mr. Lauritzen kept close to his heels for four shots more, only breaking once for a flamingo on his eighth round, giving him three points, dropped from the total possible, with seven shots yet to fire. Could he stand the strain and keep on raising the white disc to the end? Mr. Laird set him the example, and he followed it bravely. Bull after bull was announced by the scorers as the two men fired shot after shot in the midst of a painfully anxious silence; and when the last shots were sent in and the grateful white showed on the black bull's-eyes the restrained enthusiasm burst into a cheer to greet the wonderful marksmanship of both. Laird had made a clean 1,000 yards' score, so seldom done in a match, and Lauritzen had beaten the best record hitherto—Mr. Sumner's—by one point, tallying a magnificent 222 out of the possible 225 in a formal match conducted with the most rigid adherence to N. R. A. rules. General John Coughlin was umpire, and Dr. Parsons and Mr. Dingman were the scorers. The following is the shot for shot record of the match:—

P. J. Lauritzen	800	5	5	5	5	5	5	5	5	5	5	5	5	5	—75	221
	900	5	5	5	5	5	4	5	5	5	5	5	5	5	—71	
	1,000	5	4	5	5	5	5	4	5	5	5	5	5	5	—73	
C. H. Laird	800	5	5	5	5	4	5	5	5	5	5	5	3	5	—72	214
	900	5	5	5	4	4	5	5	5	5	5	5	0	5	—65	
	1,000	5	5	5	5	5	5	5	5	5	5	5	5	5	—75	
Col. Burnside	800	5	5	5	5	5	4	5	5	0	5	5	5	4	—68	203
	900	3	4	5	5	5	5	5	5	5	5	5	5	5	—72	
	1,000	5	3	5	3	5	5	4	3	5	4	4	5	4	—65	
A. V. Canfield, jr.	800	4	4	5	5	4	3	5	5	5	5	4	5	5	—68	203
	900	3	5	5	5	4	3	5	5	5	5	5	4	5	—69	
	1,000	3	5	4	5	5	5	4	3	5	5	4	4	5	—66	

But one more match for the Harkness badge remains to be shot on Saturday, the 25th instant. The terms of the match call for the aggregation of the three highest scores of each contestant, the largest total to win the medal. Col. Burnside's aggregate thus far is the highest, viz.: 214, 216, 218—648. He is closely followed by Mr. Laird's 214, 215, 217—646. Mr. Lauritzen's magnificent shooting these last two Saturdays has gained him 203, 217, 222—642, and if his recent luck holds, he may yet come out winner. At any rate, with propitious weather a close and exciting windup to the contest next Saturday may be looked for.

A LARGE CALIBRE ADVOCATE—*Chicago, Ill., Sept. 25th*—*Editor Forest and Stream:*—I have noticed in your columns communications from different gentlemen advocating small-bore rifles for shooting. Perhaps they will answer well enough for experts, but will not ordinary shots save much more game with the larger calibre?

The great veins and arteries yield with great freedom to the slightest pressure and escape marvelously from the track of a bullet. When severed they retract, and if not too large soon seal up their torn ends with a clot. The tissues also retract and close up small wounds very soon. The shock is more suddenly fatal than the flow of blood, and both increase with the size of the bullet. I have known a buck to go several rods with a .40 bullet through his heart and leave not a drop of blood on his trail, so that he was only found the next morning by the help of the ravens. I saw another run more than fifty yards with 2½ inches square of his liver shot clear out of him.

While hunting in the Upper Peninsula, Mich., last month, I had the good luck to send a .45 bullet through both shoulders of a large bear, hardly half way above the brisket—not far enough forward to strike the heavy bones nor far enough back to touch the heart, but it brought the black blood spouting from both sides. He made off slowly through a thick swamp. After following about 200 yards I got in another shot behind the butt of his ear. The bullet was 350 grains of soft lead and propelled by seventy grains Hazard's F. G. It pulverized the large processes at the base of the skull, also the first vertebra, and lodged in the thick, tough skin on the opposite side, losing about half its weight in its passage. It was badly upset, and so was the bear.

If my first bullet had been a .35 I do not believe I would have got a second shot. There would have been much less shock, much less internal bleeding, and almost none externally; and as it was after 6 P. M. when I first met him, he would probably have gone so fast and so far that I could not have renewed his acquaintance that evening, and the chance of finding him the next morning would have been next to nothing.

It may be all very well for a skilful, cool-headed, iron-nerved marksman like Dr. Hornaday to use a .40 bullet and take a tiger's eye for his target, but for myself I prefer making a large-sized hole in any game that I want to take into camp, or that may possibly hinder my taking myself there. Nothing smaller than a .44 is good enough for me in the woods; nor would I use less than seventy grains of powder. A flat trajectory helps to correct many errors of judgment as to distance and saves many misses.

Less powder and less lead may often do just as well, but with that amount (.45—70) one is ready for any emergency except a grizzly, and an explosive bullet will help through that.

B. W. PIKE.

Game Bag and Gun.

GAME IN SEASON FOR OCTOBER.

Moose, *Alces Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorus.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*

☞This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

FEW WOODCOCK.—The very warm weather of the past few weeks has ruined the woodcock shooting, all the customary resorts of the birds on their migration southward at this season being dried up by the warm weather and the absence of rain. There will, therefore, be nothing of a season this year from woodcock shooting.

NEW BRUNSWICK—*Campbellton, Oct. 10th.*—Wild geese and ducks are now near this place in the Bay Chaleur by the thousands. The geese are in prime condition. I have just knocked down a young gander that weighs a little over ten pounds. Decoys are unknown or not used here in the fall. The usual way that geese and ducks are killed is for the gunner to lie in the bushes near the shore and shoot as they come in with the tide. With decoys and blinds built out on any of the marshes along this bay, sportsmen would be sure of good sport until the ice forms which will be about November 20th or 25th.

STANSTEAD.

MAINE.—*Indian Rock, Oct. 13th.*—Ducks are uncommonly plenty on the Lakes this fall, and partridges are recovering in numbers from their terrible winter killing of three years ago. We are having very pleasant weather. Last week at the Upper Dam the mercury stood in three successive days 100, 100.5, 100.7—pretty warm October weather for us.

F. C. B.

MASSACHUSETTS—*Ashfield, Oct. 15th.*—Lest my sporting friends should think I am parting with my wits or have got a new kind of grouse, please state that I wrote that: "There being many late broods they had consequently hung together later than usual." Your compositor left out the word late, thereby destroying the sense.

RUFF.

NEW YORK—*Buffalo, Oct. 14th.*—The hot weather near Buffalo has checked in some measure active sporting operations. Woodcock are more abundant than last year, and bags of from eight to twelve birds are occasionally made. Partridge are very plentiful, since they are never affected by severe winters, and the fine, dry spring weather favored the raising of their young broods. Niagara River during September was literally alive with several species of small gulls and terns, among these latter two species never before known to occur here—*Sterna macrura* and *Phumbia*. A few blue-bills are now coming in, though the great army of aquatic migratory birds betrays as yet no signs of activity. One of our great Nimrods, P. Heinty, Esq., is getting ready for another of his annual shooting excursions. Beaver Lake, Ill., will be his objective point, and the magnitude of his preparations may be judged from his ammunition bill, which amounts to nearly $70 for three weeks' shooting.

C. L.

ADIRONDACKS.—*Lowville, Oct. 16th.*—We are having very fine weather and the sportsmen are having rare sport in the Adirondacks. Large bucks are brought out from the Beaver River chain to Lowville. Woodcock and ruffed grouse are quite scarce this season although some of our sportsmen have made fair bags.

H. W. H.

NEW JERSEY QUAIL.—The New Jersey quail season opens November 1st.

THE FLORIDA RAINY SEASON.—*Titusville Brevard Co., Fla. Oct. 6th.*—Teal, blue winged (*Querquedula discors*) are reported as having arrived in numbers in Banana Creek and the marshes off this place. The rainy season has been very excessive. Only two days since Sept. 1st, in which rain has not fallen during the twenty-four hours. The whole country is flooded with water. A traveller just returned from the lower southwestern part of this county, rode 40 miles in one stretch and could find but one little knoll above water, on which he could alight dry shod. The cattle there feeding in water up to their bellies.

AL. I. GATOR.

LOUISIANA—*New Orleans Oct. 12th.*—Our sportsmen are beginning to prepare for an active campaign this fall; and many are leaving for the swamps in quest of woodcock, squirrels, deer, etc.

E. C.

MICHIGAN.—*Escanaba, Oct. 12th.*—I see you told some one in your last paper about turkey at Escanaba. I never heard of any, but a few tame ones in the eleven years I have been here. Game—deer, bear, grouse, and plenty of fish.

A. F. Y.

INDIANA—*Washington, Oct. 13th.*—Last week a party of four went about eight miles north of this city for a day's hunt, and killed sixty-one squirrels and five ducks. The quails are rather scarce this season, having been about all frozen or trapped out last winter.

M. P. R.

CALIFORNIA.—*Benicia, Oct. 11th.*—The duck and quail season opened here on the 15th of September. Quail are abundant in the southern counties. Owing to the mildness of the weather the ducks have not come in yet in large numbers. Benicia and its vicinity are noted as the best resorts for ducks known in the State. Three years ago I bagged alone in one week nine hundred ducks. If ever you should come to California during the ducking season, give us call, and we will show you some good duck shooting.

L. W.

CALIFORNIA GEESE.—The farmers of the Sacramento and San Joaquin valleys are alarmed at the hordes of wild geese which have settled down to devour the grain. The only adequate agency employed to cope with the birds seems to be strychnine. If any Eastern gunner wants to tread in goose blood, here's his chance.

CARELESS GUNNERS.—*Rushville, Ill., Oct. 11th.*—Close upon your note on gun accidents, comes one from our section of the country. Three brothers who were in the river bottom hunting, met with a serious accident a few days ago. In some unaccountable way one gun was discharged, killing one outright, taking a second one's thumb off, and shooting the third one in the arm and neck. No one can account for the discharge of the gun, but is probably from being carelessly handled.
AIX. SPONSA.

THE RUPTURED SHELL.—*Portland, Me., Oct. 18th.*—In your issue of the 16th inst. is a cut of a ruptured brass shell, which "Straight Bore" claims is an illustration and proof of his theory of the expansion of gun barrels in front of the shot-wad. Without entering upon a long argument to prove the incorrectness of his position, allow me to suggest that possibly the "bulging" near the open end of the shell was due to the "upsetting" of the charge of shot when starting, and that the rupture commenced at that end, and ceased as it approached the other, because the metal of the shell was thinner at the former, and increased in thickness toward the latter. G. L. B.

YARDING MOOSE IN MAINE.—*Bethel.*—The winter of 1846-7 was a very severe one in northern Maine. About the Rangeley Lakes the snow fell to the depth of seven feet, and moose were plenty. The hunters took no guns with them, but fastened their knives to the end of a pole, and cut their throats.

When approached by the hunter the moose would make a desperate rush for a little distance—a few rods, then tread a bit for a standing place; and woe to the dog that ventured within their reach. About fifty were killed about those lakes that winter. On one occasion four of us worked up the fall signs of a bull and two cows, going northerly to the top of a large mountain. When we came upon them they were yarded in a dense thicket of fir and spruce. They could not run, but the bull managed to reach an open space in the woods, and a young fellow named Bowley ran up near the moose, to show off a little, though cautioned to keep away. The moose immediately sprang upon the boy, and, as we thought, treaded him to a jelly, as one of his snow-shoes was to be seen under the creature's feet.

This time we had a gun, and as soon as possible after the flurry, shot the moose, and we all ran up to dig out the fellow's body. And as we were moving the moose around and digging away the snow, up popped Bowley's head twenty-five or thirty yards away, near the stump of a fallen tree. He had plunged under this tree and crept along to the end of it, and dug his way up through the snow, with no further harm than the loss of his snow-shoe. J. G. R.

All this happened before the FOREST AND STREAM had promulgated the code of ethics which puts moose yarding where it belongs.

BOOTS FOR MARSH SHOOTING.—Very long boots, for marsh shooting, I consider a great mistake, because they tire their wearers before half the day is over, and, moreover, practically they have no *raison d'être*. A man never deliberately goes into water which reaches above his knees, because if he does so, he cannot tell within a few inches the depth of the water through which he may be wading, and he will be pretty sure to suddenly get into a hole, when he will have his long boots filled with water, thereby producing just what long boots are theoretically supposed to avoid—*i. e.*, wet feet.

No. A man who does a deal of tramping in a marsh must be somewhat lightly shod, so as not to be "done" with his walking exertions ere he has had time to fully enjoy his day's sport. Indeed, for a long time I have worn simply orninary walking boots—keeping on the move until I could change them and my socks, and thus avoiding any of the ill effects which may arise from having wet feet. But when one has to drive back a goodish while in the cool of the evening, it is best to be prepared with such feet covering as will insure tolerably dry feet, and yet not clog the shooter with unnecessary weight. Any cloth lining in shooting boots is the greatest possible error into which a makar may fall. Cloth gets worn through with astonishing rapidity, to begin with; this is in favor of the trade, though. Cloth, moreover, chafes the feet, and this is very riling; so that, altogether, I abominate cloth in any form inside a boot.—"WILDFOWLER," *in London Field.*

A PLEA FOR STILL HUNTING.

The early accounts of deer stalking, or still hunting, dates very far back, even to the days of the patriarchs. It appears by the record that Isaac sent his son Esau out on a still hunt with bow and quivers to procure venison; that while Esau was hunting, old Aunt Rebecca concocted a scheme, and with the help of Jacob succeeded in deceiving the old man, and swindling Esau out of the blessing. It seems to be a plain case of fraud on the part of Jacob and the old woman, and my sympathy has always rather leaned on the side of Esau. We have an account dating back still further, of one Nimrod the son of Cush, who was a mighty hunter. The record does not say what weapons he used, nor that he rode after hounds, only that he was a mighty hunter before the Lord.

Cooper's Leatherstocking was supposed by many to be a myth, existing only in the author's brain. But reliable historical information proves that such an individual did exist in the latter part of the seventeenth century, a man of English origin whose antecedents were well known to Mr. Cooper, and that the description of his character and habits were but slightly overdrawn, if overdrawn at all. That he was a man well versed in the tactics of Indian warfare, and that he was the most adroit still hunter of that age or any other, is beyond question.

In order to become a skillful still hunter, it requires patience, perseverance and long practice.

I had made still hunting rather a specialty from my youth up, and at the age of twenty-five years believed that I was nearly master of the business; but after twenty-five years more experience I discovered and was forced to acknowledge that at twenty-five I was a mere novice in the art. Experience is said to be a dear school, etc. I have frequently known some old hunters who would camp out for the purpose of hunting deer, with three or four young hunters who were crack shots, and could shoot off a squirel's head from the top of the highest trees, while the old man with eye-sight impaired, and perchance trembling limbs, would manage some way to bag most of the deer. I have often been amused while hearing the mishaps as told by these young recruits as they would drop into camp after a day's hunt. One had unexpectedly run on to a big buck, and if it had been in any other place than where it was he would have made daylight through it at once. Another had shot a deer plumb through; he knew by the way it clung its tail and sloped off, and then he found lots of hair strung along (a pretty sure indication that the deer was slightly wounded or perhaps not wounded at all). Another had nearly been run over by a small drove of deer, and being so excited he even forgot to take his gun from his shoulder until too late to get a shot. Another had traveled all day and had seen nothing, and he believed the deer had all left for some other part.

There are various ways in which deer are hunted. The practice of running deer with dogs should be condemned by every true sportsmen and every honest hunter. The idea of from one to a half dozen men, lying concealed on a runway for the purpose of pouring a broadside of buckshot into a worried deer at the distance perhaps of two or four rods and calling it sport! I say the idea seems to me simply ridiculous. If there is any sport in it I fail to see it.

Venison which has been run down by dogs is worthless and unwholesome, unfit to be eaten by any person of ordinary refined taste.

The practice of fire hunting seems to me to be another outlandish way of killing deer. It is well known that in certain localities where small lakes or ponds abound, and where deer are plenty, that they may be found in the night time among the bayous and in shallow water along the shores, where they resort in hot weather for the double purpose of protection from flies, and for feeding on water-lilies, tender grasses and other water plants. Here the vandal can get into a dugout with a blazing torch on the bow, and with an old buckshot gun can slaughter deer at short range. Let me relate a case in point, which occurred (if I remember it right) about the second year of the war:—

A man living in St. Lawrence Co., N. Y., with a couple of grown-up sons, went in the month of July up into the Shadagee woods and camped in the vicinity of two or three small lakes, where the deer seemed to be unusually plenty at that time. They succeeded in slaughtering over forty deer in about ten days (or rather ten nights) taking off the skins and leaving the carcasses to rot on the ground, portions of which were seen laying about there as late as October following. Some of the hunters feeling indignant that such a flagrant outrage should be perpetrated on their favorite hunting grounds, had them prosecuted; but in some way they were let off by paying forty dollars. In addition, they ought to have been sent back and compelled to feed on those carcasses, and picked the bones until their destructive propensities had been checked up a little.

A remark which an old Seneca chief made in reference to this occurence is somewhat to the point.

"Well," (he says) "God he no make deer for white man throw away." Venison was the chief support of the numerous tribes of North American Indians who were once so promiscuously scattered over the Atlantic States. They firmly believed that the great Spirit made the deer for their especial benefit, also that other wild game were created for their use, but more especially the deer as a direct godsend.

However improvident or wasteful they might be in some matters, they were sure to utilize every available part of the carcass of a deer, with scrupulous exactness. The skins when dressed, supplied them with genuine article of clothing, also moccasins, which ever was an indispensible article with the whole Indian race. Another important item was the sinews, which they valued highly as an article that in no way could be substituted. The brains were used for dressing skins, the bones were broken and with the head were made into soups, even the intestines were cleansed, washed and cooked in a manner which, according to aboriginal ideas, made a very palitable dish.

I have noticed the rapid decrease of deer for many years past, and it is not a consoling thought to know that nine-tenths of the whole area comprising the Northern and Middle States, has been denuded of this noble and most desirable of all game. This beautiful race of animals, is fast diminishing in numbers, they are growing alarmingly less year by year in every part of the United States where they are known to exist, and we may safely predict, that the day is not far distant when the wild Virginia deer will exist only in name. ANTLER.

RIFLE SHELLS AND EXPRESS BULLETS.

Editor Forest and Stream:—

In September 11th number of FOREST AND STREAM, I notice one "Bexar" is cutting up a good deal about some rifle shells that are making trouble with him.

Well, I have to say that my experience with the "everlasting shells" is precisely as "Bexar's." I had Nichols & Lefever to make me a double barrel shot gun, last fall, with rifle combined; the rifle to be inserted or taken out at pleasure. I was tickled to death over my new gun, and thought I had the boss gun of the universe. The shot gun part was there, and is now all right except he only choked one barrel instead of both, as I wished. Gun makers sometimes prefer to have things their way despite any specification in your order to the contrary. They sent fifty of these everlasting shells with the gun, also ball seater and some other fixings. In loading the shells the first time with the ball seater or loader, the shell would enter the instrument easily, and I could load some of the shells very evenly and nicely, and others I could not get the ball in at all, without cutting or mashing it out of shape. The balls not being cylindrical, but thicker one way than the other, then I would take my knife and trim the ball round and drive them in the shell with a gravel. This perplexed me not a little; I then took the rifle out to try it. The first three shots would have entered an inch circle at eighty yards. I shot some twenty times, but the rest of the shots were wild—from three, four, five and six inches from the center—above and below and on either side. I attributed this to rapid firing and heating of the barrel, which no doubt caused the barrel to warp or twist out of line; or, to the irregularly loaded shells, from imperfect tools and bullet moulds. And when I went to reload the shells not one of them would reenter the ball seater at all, the shell having so expanded, and one shell split open from one end to the other the first fire. So I had to trim all my bullets afterwards and push them in the shell with my fingers and mallet. Another fault with these shells, the force of the powder invariably drove the primer back into the plunger hole and so wedging the breeches together that often it was with difficulty I could open the gun to reload, as the cap would fall off as the breeches were opened and get down into the locking of the barrels, preventing a closing of the gun, and I would have to take the gun apart right in the presence of an old buck, and get the old cap out. I did this once last fall. I shot down one old buck and another stood at fifty yards and saw me go through this manipulation until just as I introduced a fresh loaded shell and brought the gun together with that snap peculiar to Nichols' guns, when he, the buck, hoisted his flag, gave a loud whistle, and went like—well he went! Ahem! I did not "cuss." I "skipped over the hard words," and sat and waited for another shot. I shot 52 grains Orange lightning No. 4 powder and a 180 grain bullet. I afterwards sent to the U. M. C. Co. to make me two dozen shells and 100 express bullets. I received them. The shells were made exactly like the others only much finer material and finish. Both kinds using Berdan's No. 2 primers. I loaded them first with the express bullets, 40 calibre, 220 grains lead, and 52 grains Hazard Electric No. 3 powder. I then made a target by nailing together six one inch pine planks and set up this target at seventy-five yards to start with. My object in this was to get lateral or horizontal range of the sight, and to try penetration (this express bullet being a novelty to me). I fired a dozen shots at this distance at a four-inch bull's-eye, but not a shot did I get into the black; they were all around from one-half to six inches from the bull's-eye, on both sides, above and below. I went and looked and was satisfied. I then looked for penetration; there was none there. The balls were all out and gone. Some I found buried two inches into a seasoned shell of an oak stump, the others had gone through target, stump, and all. On endeavoring to reload these beautiful shells I find they too have expanded and will not go into the ball seater; and I find that in this rifle the express bullet is a failure, so I have given up in despair; but I intend giving it one more trial, and if with no better success I will take out this rifle barrel and give it to some old negro woman for a fire poker, and then get me a '76 Winchester or Ballard, or something that will shoot without so much ceremony.

There is one fault about these express bullets, they are too loose in the gun. No gun can shoot well unless the bullet fills the grooves, and that tightly. The Wesson rifle is the only breech-loading rifle that I have used much that would place its balls uniformly and regularly into a target; but the great fault of Wesson's rifles, they are all too straight and short in the stock, and too much fork in the butt to shoot or handle quickly. His rifles are the most ill shapen things in the world, but as to their shooting, I have used no better. As to stocks, if gunmakers would make all their guns and rifles with stocks fourteen inches long and three inch drop, and quit making those miserable forked stocks as they did in flint lock time, but make their rifle stocks just like shot gun stocks. I have never seen a rifle that came up to the shoulder and face as well as shot guns do. The Winchester comes nearest to it.

And now about this shell business. I think these thick rifle shells will prove in most cases a humbug, and I think making them central fire is no good in most cases. I have always found that the U. M. C. Co.'s fixed ammunition is good enough for any ordinary purposes. Their rim fire cartridges are as well made and sure fire as ammunition can be, and no loss of gas at all, when fired, but the central fire, rifle, or pistol shells do lose much gas and blacken up the rear parts of the barrels, which the rim fire lubricated thin shells never do. And I believe it would pay sportsmen (not professional target shooters), and hunters who use the rifle, to first know what you want, then make out your order to the U. M. C. Co. or some other company who manufactures ammunition (I mention the above company because I know their work to be unexceptional), and get them to make you so many cartridges, giving calibre of gun, shape and length of bullet, and length of shell; they will know how much powder to put in, which will or should be all they could get in conveniently, and whether central or rim fire, and what kind of gun you have. Some guns have better shaped shell chambers and some straight; then order as many made as you want; when they give out, order more; they will keep your order on file, I presume, and can make as you want them. Throw away the old shells and let this reloading business alone. It will cost you more in the long run than if you bought your shell already fixed, and bullets for game shooting should have canclures around them and well lubricated. Dry bullets will soon ruin a good gun. Don't use balls patched with paper in breech-loading rifles—they won't do. If you prefer patching your bullet, then use a muzzle-loader and patch your ball with strong new drilling or Irish linen, well tallowed and stretched between the fingers and thumb; but if you use a breech-loading rifle have your bullets made in length about twice the diameter of the bullet, sound on the front end and square behind, with rings for lubricating ointment, and never put one in your gun without plenty of ointment on it. In ordering your bullets made get the full diameter of the calibre at the bottom of the grooves, for that is the true calibre of the gun, or should be, and have your bullets made precisely that diameter. If these express bullets were made that size I could shoot them altogether, but a bullet sloshing along loose in a rifle will not shoot. This upsetting business of a loose ball is all bosh. Of course you will find on the bullet after being shot, that the rifling has made its impression; but that does not prove that the ball was "set up" by the force of the powder against it; if it did, there would be no use of patching in muzzle-loaders at all, or using forced balls in breech-loaders. Take a round buckshot and shoot naked, out of a rifle larger than the shot, and when you examine the shot afterwards you will find the impression of the

rifles on it. I think those express bullets that I got of the U. M. C. Co. are the prettiest shaped missiles I ever saw, and must shoot excellently out of a gun they fitted, and would be destruction on game. I did not see that these bullets made such an awful hole in the wood where they come out, but they made a fearful mess of themselves by turning wrong side out and back on their base, and spreading out and distorting generally. This shell matter should be looked well into by manufacturers. I shot some U. M. C. and some Remington shells all last winter at ducks; shot the same shells hundreds of times, and no injury as yet that I have seen, and no expansion; but these were common brass shells and thin (the usual thickness). I had some half dozen of them to expand all at one time at a glass ball shoot. I was then testing some Dittmar powder of eight or ten of them, and when I attempted to introduce a few of the shells they would not go in the chamber. I had shot those shells all the winter, and had not, out of 100, a single one expand until the day I used that Dittmar powder. I don't know whether it was that or not. C. L. J.

Willis, Texas, Sept. 23d.

SHOOTING MATCHES.

NEW JERSEY SPORTSMEN.—The tournament at the West Side Driving Park is in full blast as we go to press. The meeting is a large one; the shooting excellent. Full report next week.

CONNECTICUT—*Collinsville, Oct. 2d.*—Canton Rod and Gun Club; practice meeting at 200 yards, off hand; 3 pound pull; 10 shots:—

											Mass.	Cred.
Hull	10	11	10	8	9	12	12	12	10	10	104	44
Bidwell	11	6	10	9	11	10	12	11	10	9	99	43
Marks	7	9	10	11	10	10	11	9	10	10	97	42
Laubenstein	11	7	11	10	7	11	10	10	10	9	96	43
Lewis	4	9	9	10	7	9	10	10	8	8	81	39

October 8th:—

	Mass.	Cred.		Mass.	Cred.
Fancher	99	44	Andrews	83	39
Bidwell	93	41	Lewis	79	39
Laubenstein	85	41	Pfister	79	39

NEW YORK—*Coxsackie, Sept. 15th.*—The Coxsackie Rifle Club; all comers' match; range at Cochran's Grove; first match, 200 yards; second match, 300 yards. The leading scores were:—

200 *Yards.*		200 *Yards.*	
W. M. Farrow	45	J. A. Smith	42
J. G. Newbury	44	A. H. Cobb	41
J. C. Falco	44	W. M. Hunter	40
G. W. Gemmill	43	R. Bell	40
L. Geiger	43	D. F. Wilcox	40

When the time arrived for the 300 yards competition the wind, which had been moderate up to this time, increased to a stiff breeze.

The following were the leading scores:—

W. M. Farrow	43	J. C. Falco	36
A. H. Cobb	39	D. F. Wilcox	34
J. G. Newbury	37	J. A. Smith	34
L. Geiger	37		

J. G. NEWBURY, President Coxsackie Rifle Club.

MINER ROD AND GUN CLUB.—The Gold "Aery Medal" was shot for; 10 balls each; 25 yards rise. The wiry and everlasting "purveyor" Michael Englert, proved to be the champion of the day after a tie between him and the jolly, fat, good natured and hardly ever missing, John Wood Esq. They shot the first miss out, and unfortunately, Mr. Wood got hold of a bird which he could not stop. The following is the result:—

Aery	1 1 1 0 1 0 1 1 1 1— 8
Wood	1 1 1 1 1 1 1 1 1 1—10
Englert	1 1 1 1 1 1 1 1 1 0—10
Voskamp	0 1 1 1 1 1 1 0 1 1— 8
Davis	1 1 1 1 1 1 1 1 1 0— 9
Steers	1 1 1 1 0 1 1 1 1 1— 9

Several sweepstakes were afterwards shot for, and 125 birds were sent to eternity on that day. The club has some very crack shots among them, and can compete with almost any other club.

NEW JERSEY GUN CLUB.—*West Side Park, Oct. 15th.*—Regular monthly shoot at pigeons for Champion Badge; handicapped rises; plunge traps; club rules:—

	Yards Rise.	*Score.*
John Toffey	22	1 1 1 1 1 1 1—7

KANSAS STATE TOURNAMENT.

SALINA, *Kan., Oct. 7th.*

Editor Forest and Stream:—

The opening day of the annual tournament of the Kansas State Sportsmen's Association at Oakdale Park, Salina, was ushered in with a bright sun and strong wind from the south, which blew across the traps. There was a fair attendance. The shooting ground was fair, but with a solid background of trees, which made the ball shooting difficult.

First Day.—Purse 1, $150; 20 glass balls; 18 yards rise; three traps; class shooting:—

Capt. Smith, Chicago, Ill	14	E. E. Fuller, Ottawa, Kas	7
R. B. Morgan, Canton, Ohio	12	J. K. Stafford, Wichita, Kas	11
A. G. Allen, McPherson, Kas	15	F. Arrow Smith, Rochester, N. Y	7
A. G. Allen, Clay Center, Kas	11	Chas. Cutter, Junction City, Kas	14
R. M. Gage, Junction City, Kas	10	E. L. Pitzer, McPherson, Kas	14
H. Thield, Junction City, Kas	12	F. G. Smyth, Wichita, Kas	8
G. S. Dryer, Abilene, Kas	9	Willis Kesler, Salina, Kas	14
C. Stevens, Abilene, Kas	14	C. H. Smith, Wichita, Kas	17
J. M. Hershey, Osage City, Kas	15	F. E. Tucker, Hopkinton, Mass	11
H. Grubb, Wichita, Kas	10	R. Walton, Newton, Kas	10
G. W. Bragonier, Emporia, Kas	13	S. Cockrell, Topeka, Kas	12
J. C. Caldwell, Topeka, Kas	16	N. R. Baker, Topeka, Kas	10
W. B. Giles, Abilene, Kas	13		

C. H. Smith won first prize; J. C. Caldwell won second prize; J. M. Hershey and A. C. Allen divided third prize.

Second match:—Purse 2; 10 single birds; class shooting; first prize, $100; second, $60; third, $40:—

Willis Kessler	8	J. C. Caldwell	6
H. Grubb	5	A. G. Allen	8
G. S. Dryer	5	C. H. Smyth	8
W. B. Giles	6	F. G. Smith	9
J. F. Stafford	6	Theo. Davis	3
F. Arrow Smith	9	E. E. Fuller	10
H. G. Allen	8	C. Stevens	8
J. M. Hershey	7	R. B. Morgan	8
G. W. Braganier	8	E. L. Pitzer	5
R. A. Adams	9	C. Cockrell	7

Scrub; Purse 3; 10 balls; 18 yards; open only to amateurs who have not won a prize in this tournament:—

Capt. Smith	8	T. E. Tucker	6
H. Grubb	5	H. G. Allen	4
W. Kesler	7	Rob Ricketts	4
C. Stevens	4	G. S. Dryer	7
R. B. Morgan	3	H. Thiele	7
G. W. Braganier	2	R. M. Gage	5
Theo. Davis	5	C. Cutter	5
E. L. Pitzer	5	R. Walton	7
W. B. Giles	4	N. R. Baker	3

Ties on 7, miss and out, won by Dryer; ties on 5, miss and out, won by Cutter.

Wednesday, Oct. 8th.—Bright and pleasant, with strong wind from same quarter as on yesterday. Purse 4, $250; class shooting; 5 double birds; 18 yards:—

J. M. Hershey	10	S. A. Tucker	7
A. G. Allen	6	George Stockwell	5
F. E. Boswell	6	Eugene Bogardus	7
J. B. Wheeler	6	E. E. Fuller	8
H. Grubb	6	C. H. Smyth	6
S. Cockrell	6	F. G. Smyth	9
W. Kesler	6	M. M. Alexander	6
C. Caldwell	7	B. H. Pendleton	7
Capt. Smith	4		

Ties on 7, miss and out, won by Tucker.

Purse 5, a setter or pointer pup from Irwin & Waddell's kennel, Topeka, donated by Lynn & La Rue, Topeka; 10 double balls; 18 yards:—

H. W. Nunamaker	8	G. S. Dryer	11
J. L. Bell	8	C. Stevens	6
Charley Mohler	9	J. Fowler	11
A. Allen	15	N. R. Baker	6
W. La Rue	5	Theo. Davis	12
J. W. Clark	13	W. Kesler	10
J. F. Stafford	9	J. C. Caldwell	12
B. H. Pendleton	9		

Purse 6, $500; 10 birds; 18 yards:—

W. Kesler	9	R. A. Adams	7
Geo. Stockwell	9	S. Cockrell	9
E. D. Thompson	7	G. W. Braganier	8
F. E. Boswell	6	H. W. Hershey	9
Capt. Smith	9	J. C. Caldwell	9
S. A. Tucker	8	B. H. Pendleton	4
F. Arrow Smith	7	E. E. Fuller	10
J. L. Bell	6	C. Stevens	9
A. G. Allen	8	R. M. Gage	7
J. W. McGee	8	C. H. Smyth	7
W. B. Giles	7	M. M. Alexander	6
H. W. Nunamaker	7	R. Baker	9
H. Grubb	8	J. W. Clark	8
J. F. Fowler	5	J. F. Stafford	7
A. G. Abdalel	8	F. G. Smith	9
J. B. Wheeler	7	Theo. Davis	7
W. E. Treadwell	7		

Ties on 8, miss and out, won by McGee; ties on 7 won by Gage.

Thursday, Oct. 9th.—Purse 8; 5 double birds; 18 yards rise; class shooting; first prize, $75; second, $50; third, $25:—

Sam Plank	6	A. M. Copeland	4
E. L. Pitzer	3	J. F. Stafford	7
H. Thiel	7	M. M. Alexander	9
H. W. Nunamaker	6	R. M. Gage	6
A. G. Abdalel	5	E. W. Thompson	3
H. Grubb	7	F. E. Boswell	6
W. B. Giles	3	W. T. Irwin	2
J. E. Bell	5	S. Slusfer	5
G. W. Braganier	4	J. B. Wheeler	7
N. H. Baker	4	H. G. Allen	7
J. H. Hayden	7	T. Gardner	11
M. J. Clark	8	B. H. Pendleton	5
G. W. La Rue	5	Geo. Stockwell	7

Ties on 7, miss and out, won by Wheeler.

Purse 7; ten single birds; open to teams of four belonging to State associations; first prize, 300 lbs. shot; second, 175 lbs. shot; third, 100 lbs. shot; fourth, 75 lbs. shot. Shot donated by St. Louis Shot Tower, Chicago Shot Tower, Philadelphia Shot Tower, and Tatham Bros.:—

SALINA TEAM.

W. Kesler	8	H. C. Brickman	8
R. M. Gage	8	T. Stroitz	7

WICHITA TEAM.

S. Plank	5	C. H. Smyth	10
H. Grubb	9	F. G. Smyth	5

ROCHESTER, N. Y. (ENTERED FOR BIRDS).

Capt. Smith	7	Dr. Miller	6
S. A. Tucker	10	R. A. Adams	9

ABILENE TEAM.

G. S. Dryer	9	H. G. Allen	8
B. H. Pendleton	8	W. B. Giles	6

TOPEKA TEAM.

S. Cockrell	10	J. M. Clark	9
J. C. Caldwell	9	N. R. Baker	9

WINKLE CLUB, LAWRENCE.

W. L. Bullene	6	F. E. Boswell	9
J. B. Wheeler	9	F. Gardner	8

MADE UP TEAM.

Dr. Wesson	4	J. W. Hershey (handicapped to 26 yards)	9
E. E. Fuller (handicapped to 26 yards)	10	G. W. Bragun(er	6

Salina and Abilene clubs divided third prize.

Purse 9: 10 single birds; 21 yards; class shooting; first prize, $150; second, $100; third, $50:—

J. M. Hershey	8	Capt. Smith	7
E. D. Thompson	5	H. W. Nunamaker	6
F. E. Boswell	6	W. Kesler	7
J. P. Usher	8	G. W. LaRue	9
S. A. Tucker	10	J. B. Wheeler	8
F. Gardner	9	C. H. Smyth	9
George Stockwell	6	F. G. Smyth	8
W. L. Bullene	9	J. F. Stafford	6
E. E. Fuller	7	M. M. Alexander	9
S. Plank	7	N. R. Baker	7
A. G. Abdalel	6	M. M. Alexander	9
A. G. Allen	9	J. M. Clark	6
J. W. McGee	6	S. Cockrell	8
G. S. Dryer	6	C. Caldwell	9

LaRue and C. H. Smyth divided second prize; J. M. Hershey won third prize.

Captain Bogardus and son gave their usual exhibition of rapid and skillful shooting in the afternoon, which drew out a large crowd, but a heavy shower which came up seriously interfered with the comfort of the spectacle, and delayed the programme. In the evening all were entertained with a display of the Bogardus fireworks.

Friday, Oct. 10th.—Sweepstakes; 4 birds; 21 yards:—

G. B. Braganier	3	Geo. Stockwell	3
H. W. Nunamaker	3	S. Cockrell	4
S. Plank	3	J. C. Caldwell	4
J. W. Hershey	3	G. W. La Rue	4
F. E. Boswell	2	G. S. Dryer	2
A. G. Allen	4	H. Grubb	3
J. W. McGee	4		

Allen and Caldwell divided first prize; Hershey and Grubb, divided second prize.

Purse 13.—Open to teams of State Association; 10 birds; 21 yards rise; first prize, fine Clabrough gun donated by Winkle Club, Lawrence; second, pointer or setter pup; thoroughbred, donated by Topeka Club; third prize, $25, by Osage City Club:—

TOPEKA TEAM.

J. C. Caldwell	8	J. M. Clark	9
A. W. Copeland	7	G. W. La Rue	7
S. Cockrell	10	N. R. Baker	10

ABILENE TEAM.

W. H. McCartney	9	C. Stevens	7
G. S. Dryer	8	J. V. Bettis	9
J. Fowler	9	W. B. Giles	5

WICHITA TEAM.

H. Grubb	7	C. H. Smyth	9
M. M. Alexander	9	W. Treadwell	7
S. Plank	8	F. G. Smyth	9

WINKLE CLUB, LAWRENCE.

J. B. Wheeler	9	J. P. Usher	8
F. Gardner	10	F. E. Boswell	8
W. L. Bullene	8	E. D. Thompson	6

SALINA TEAM.

Frank Seaton	8	J. Brickman	8
R. M. Gage	10	T. Streitz	9
J. E. Robinson	4	W. Kesler	9

Topeka Team won first prize; Lawrence Team won second prize, and divided third prize with Wichita Team.

Purse 17.—$500; gold cash prizes, open to teams; first prize, $250; second, $150; third, $100:—

NEW YORK STATE TEAM.

S. A. Tucker	9	Dr. Miller	3
Capt. Smith	10	F. Arrowsmith	8
R. A. Adams	6		

MISSOURI STATE TEAM.

E. Work	9	Theo. Davis	6
J. H. McGee	8	D. L. Hall	6
J. K. Jones	5		

KANSAS STATE TEAM.

W. Kesler	6	J. B. Wheeler	8
J. M. Hershey	7	E. E. Fuller	8
C. H. Smyth	8		

WICHITA TEAM.

M. M. Alexander	7	W. Treadwell	7
H. Grubb	7	S. Plank	9
F. G. Smyth	8		

TOPEKA TEAM.

S. Cockrell	9	N. R. Baker	8
J. C. Caldwell	8	J. M. Clark	7
A. G. Allen	7		

LAWRENCE TEAM.

W. L. Bullene	8	F. Gardner	8
Geo. Stockwell	10	F. E. Boswell	10
J. P. Usher	9		

ABILENE TEAM.

C. Stevens	7	W. H. McCartney	8
J. V. Bettis	5	G. S. Dryer	6
J. Fowler	6		

SELECTED TEAM.

G. W. Braganier	5	A. W. Copeland	6
J. W. McGhee	4	J. H. Haydeu	8
G. W. La Rue	6		

Lawrence Team, won first; Topeka Team, won second; Wichita Team, won third.

The second annual meeting of the association was held in the City Hall; the following clubs were represented by delegates: Topeka Club, Salina, Wichita, Ottawa, Hallock, Emporia, Orange City, McPherson and Ellsworth.

Following are officers for ensuing year: Pres., L. C. Wassen; Vice-Pres., F. G. Smyth; second, N. R. Baker; third, J. E. Bell; fourth, W. B. Giles. The next tournament will be held at Lawrence, some time between April 1st and July 1st. A large amount of business was transacted, and every thing was done in a pleasant manner.

Saturday Oct. 11th.—All interest centered in the club shoot for State Medal. Weather all that could be wished; 10 birds each; 31 yards:—

Wichita—S. Plank and C. H Smyth	15
Lawrence—Bullene and Boswell	13
McPherson—Allen and Pitzer	15
Topeka—Cockrell and Caldwell	14
Ottawa Fuller and Wassen	11
Abilene—Stevens and Dryer	10
Salina—Kessler and Seaton	9

Ties on 15.—Wichita, 6; McPherson, 3.

The McPherson men carry home the medal.

Several sweeps were shot of which there is no official score.

Thus ends one of the most successful tournaments ever held in the West; every thing passed off pleasantly, and all felt that it was good to be there.

Wild pigeons procured from Indian Territory were used until noon of Thursday, then tame birds; all ties were shot off at 26 and 31 yards. Had the pleasure of meeting Horace Silsby, Pres. N. Y. State Sportsmen's Association, and S. A. Tucker of same State, both pleasant gentlemen and crack shots. Dr. Adams and F. Arrowsmith, of Rochester, N. Y., were present. They are taking in Kansas chicken and quail as well as tournament,

Salina seems delighted with their fine large leather medal.

The beautiful gold medal for best average shot was won by C. A. Smyth, of Wichita. DIRIGO.

MISSISSIPPI—*Natchez, Oct. 13th.*—Tournament of the Gaillard Sporting Club of Natchez. Guests and members had a thoroughly pleasant day. Score of first match at glass balls; 18 yards; Bogardus trap and rules:—

John A. Dicks	1	1	1	1	1	1	1	1	1	1	1	1	1	1
John Jenkins	1	1	1	1	1	1	1	1	1	0	1	1	1	1
R. H. Calhoun	1	1	1	1	1	0	1	1	1	0	1	1	0	1
W. D. Jenkins	1	0	1	1	1	1	1	1	1	1	1	1	1	1
Sam Stanton	1	1	1	0	1	1	1	1	1	1	1	1	1	1
J. S. Shields	1	1	1	1	1	1	1	0	1	1	1	0	1	1
W. A. Coulson	1	1	1	0	1	1	1	1	0	1	1	0	1	1
Aaron Stanton	1	1	1	1	0	1	1	1	1	1	1	0	0	1
C. W. Babbit	0	1	1	0	1	0	1	0	0	1	1	1	1	1
C. H. Rowan	1	0	0	1	1	0	1	0	0	0	0	0	1	1
M. E. Taylor	1	0	0	1	0	0	0	0	0	0	0	0	1	0

Jerkins won shoot-off for second with 2 out of 3 at 21 yards.

Second match; 21 balls; 3 traps; 18 yards rise; 10 yards apart; Bogardus rules:—

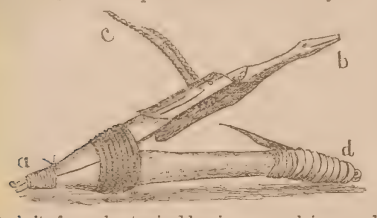
John A. Dicks	1	1	1	1	1	1	1	1	1	1	1	1	1	1	0	1	1	1	1	1	1	
John F. Jenkins	1	1	0	1	1	1	1	1	1	1	1	1	2	1	1	1	1	1	0	1		
R. H. Calhoun	1	1	1	1	1	1	0	1	1	1	1	1	1	1	1	1	1	1	1	0		
W. D. Jenkins	1	0	1	1	0	1	1	1	1	1	1	1	1	0	0	1	1	1	1	1		
Sam Stanton	1	1	1	1	1	1	1	0	1	1	0	1	0	1	0	0	0	1	1	1		
J. S. Shields	0	1	1	1	0	1	1	0	1	1	0	0	1	1	0	0	1	1	1	0		
W. A. Coulson	1	1	0	0	0	1	1	0	1	1	0	0	1	1	0	0	1	1	1	0		
Anson Stanton	0	1	0	0	1	1	0	0	0	1	0	0	0	0	1	0	0	0	1	0		
C. W. Babbit	1	1	1	1	1	1	0	0	0	0	1	1	0	1	1	0	1	1	0	0		
C. H. Rowan	0	0	0	0	1	1	0	0	0	0	0	1	0	1	1	0	0	1	0	0		
M. E. Taylor	0	0	0	0	0	0	0	0	0	0	0	1	0	1	0	0	0	0	0	0		

Dicks won championship medal and also cartridge belt.

Sea and River Fishing.

FISH IN SEASON IN OCTOBER.

FRESH WATER.



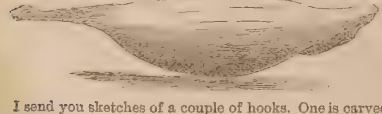
Black Bass, *Micropterus salmoides*; *M. nigricans.*
Pike or Pickerel, *Esox lucius.*
Yellow Perch, *Perca flavescens*
Muskalonge, *Esox nobilior.*

SALT WATER.

Sea Bass, *Sciænops ocellatus.*
Striped Bass, *Roccus lineatus.*
White Perch, *Morone americana.*
Weakfish, *Cynoscion regalis.*
Bluefish, *Pomatomus saltatrix.*
Spanish Mackerel, *Cybium maculatum.*
Cero, *Cybium regale.*
Bonito, *Sarda pelamys.*
Kingfish, *Menticirrus nebulosus.*

PRIMITIVE FISH HOOKS OF ALASKA.—Our third Alaska letter, printed last week, referred to the sketches of fish hooks and implements which are herewith presented. These hooks are used by the Indians in the capture of halibut, a species of fish which abounds on the Alaska coast, and constitutes an important item of the food supply. As we inadvertently omitted the use of these cuts in their proper places in the letter referred to, we take the occasion to reprint the descriptive text there given, in order to make the whole consecutive and intelligible:

The hook (see sketch) is made of two pieces of tough wood each about eleven inches long, bevelled at the larger end, and seized together at such an angle that the opening, *b-d*, is about five inches. A sharp iron spike projects from the lower portion and forms a barb by which



the bait of a moderate sized herring or perch is secured, and by which the halibut secures himself. Halibut hooks

are always ornamented with more or less carving, and some of them are quite tasty; generally birds of different species are copied in their carvings, then next seal and sea otters.

The Indians ornament nearly all of their wood-work; even a club with which caught halibut are stunned, must be made to resemble a bird of some kind.

I send you sketches of a couple of hooks. One is carved to represent some long-neck duck, and the other I should suppose was two doves fighting for the same morsel.

—Some large bass have been taken recently in Coney Island Creek, near by, and the fishing will likely be good for the rest of the month.

SILVER BASS.—A fisherman at the Red Rocks, on the Potomac River, the other day caught a five-pound bass, which upon being dressed was found to have stowed away in his stomach three silver half dollars, two of them bearing date of 1876 and the third 1858. Of course they went where all such things should go—to the desk of the local editor.

INDIANA—*Washington, Oct. 13th.*—The bass fishing in this vicinity has been excellent this fall. Dr. Jones, of this place, and his brother, of Bloomfield, made the best catch of the season; they caught over sixty, one of which weighed six pounds. William Tranter, another old fisherman, caught three last week, the combined weight being sixteen pounds. The most enthusiastic fisherman in this city is Stephen Belding, editor of the *Democrat.*

ON THE ALLEGHANIES.

IN August my friend and I made an excursion to Fort Pendleton, which is about eight miles due south from Oakland, a station on the Baltimore and Ohio Railroad, at the very summit of the mountain crossing. The situation is one of the most salubrious and picturesque these grand old mountains afford. The noble Potomac (South Branch) is here a wild stream, whose channel is deeply eroded into the carboniferous rocks, whose nobly rounded profiles rise to a height of seven hundred or eight hundred feet, and then slope gradually up to the dominant ridges on either side. An isolated house stands some six hundred or seven hundred feet above the river valley, which is very narrow, and is the remnant of the former homestead of the Pendletons, having been built by the father of the present Senator, Geo. H. Pendleton, of Ohio.

A well graded road, known as the "northwestern grade," coming from Winchester and Romney, and leading westward to Clarkesville and Parkersburgh, crosses the river at this place, and passes the door. This road was once macadamized with the prevailing sand stone rock of the country, but the railroad having stolen away the travel, it has not been kept in repair, though it is still practicable, and many visitors to these mountains come up from the valley of Virginia by it. Captain Phelps, one of the Commissioners of the District of Columbia, lately drove through from Washington City with his family, in two strong phætons, and returned by the same route, stopping here and there to fish. The cleared field of a once beautiful farm, now gone to grass, adjoins the house, which affords accommodations for from fifteen to twenty persons. The best and sweetest of mountain mutton is served, and everything else of the best that can be procured. A tri-weekly mail communicates with Oakland. Grand old woods clothe the mountains in every direction, and the river winds among the many ridges that slope down from the mountains. The elevation is two thousand six hundred feet above the sea, and here those who suffer from "hay-fever," "rose-cold," or "autumnal catarrh" always find relief, and many, immunity from this troublesome disease.

In May and June the river is the very best of trout streams. In May last Capt. Phelps and a companion and Mr. W. F. Deakins, the proprietor of the resort, took, in one day's fishing over a mile of the river, about one hundred and thirty trout each, weighing from one-half a pound to a pound and a half. There are several branches putting into the river within two miles from the house, in which less ambitious trouters may try their hand. There is Difficult Creek, three miles over into Virginia (for the Potomac is the boundary between Maryland and Virginia) along the graded road, and Buffalo, also on the Virginia side of the river; and on the Maryland side Shield's Run, from which I one day, in three hours, took some twenty speckled beauties, from three and four to seven and eight inches long, and my friend Hood took nearly as many, and a party of four struck eighty beauties under the same circumstances. This stream was visited once a week with like results, as were also Difficult and Buffalo. But for the true lover of trout fishing the Black Water Fork of Cheat River, on the western slope of the mountain, and some twenty miles south south-west from Fort Pendleton, is a Mecca, where trout are taken daily by the hundreds, and of much larger size. There are plenty of pheasants (ruffed grouse) and turkeys in the fall season, some squirrels, and wook-cock, and later, deer. Bears are occasionally seen in Virginia.

The graded road described is the one by which Gen. Garnett's beaten army retreated from West Virginia after the battle of Cheat Mountain, subsequent to which event a field fortification was made here, with flanking rifle pits, to protect the river crossing, and hence the name Fort Pendleton.

Altogether I do not know of a pleasanter place to while away a summer month, with fishing and wood tramping; or a fall month for pheasant and turkey shooting. A large portion of the game furnished to Baltimore and Washington is sent from the vicinity of Oakland.

VIATOR.

Washington, D. C., Sept. 1st, 1879.

CHOICE SPORTING GROUNDS IN MICHIGAN AND WISCONSIN.—*Mr. Editor:*—I started from Republic, on the head of the Michigammi River, about the middle of August last; ran down this stream in canoes for about thirty miles to Mary's Lake; carried to the lake, about eighty rods; crossed it, about one and a half miles; then carried to the Paint River, about two miles; poled some fifteen miles up the Paint to the Chacogan Portage, which ran through a small pond to Chacogan, two and a half miles hand-carrying; up Chacogan Creek for ten miles to Chacogan Lake; across it, three miles to Brulé Portage, one and a half miles long (through a half mile pond), to the Brulé River; down it, about thirty miles, to Badwater, and then out.

As for the hunting and fishing: the Michigammi is *not* a trout stream; but deer are very abundant all along its banks, and can be readily approached by floating down to them with the current. Partridges abound, and the ducks are nuisances, as, by thrashing along on top of the water just ahead of one's boat, they scare the deer away.

The Michigammi is best for the hunter down stream. The up-bound traveller has to pole, and the noise of the pole on the bottom alarms the deer. Around Mary's Lake the deer are as thick and tame as sheep, can be readily approached in daylight in canoes, as they feed on the bank, to within seventy-five yards, and are easily "jacked" at night. In the woods, back of the lake, the hunter has a good chance for still hunting, and a much better chance of losing himself, if he does not keep a compass with him. No fishing in the lake, except small perch and roach.

The Paint affords good fishing for trout at its head, and good deer hunting all along. At Chacogan Lake are several Chippewa Indian settlements. There the deer are shot by the Indians on the "fence," *i. e.*, a loose brush fence, running east and west, about five feet high, the under brush being cleared away for several yards on the north side, and a trail made on the south side. As the deer, in making their regular fall move (from north to south), come to this fence they stop, and, after staring at it a while, move along its side looking for an outlet. The hunter, stalking under cover of the fence, on the south side, if the wind is right, gets plenty of shots; 250 were killed last fall on one fence.

The Brulé River swarms with small trout, very seldom more than a pound in weight—average about a ¼ lb. The little lakes and ponds which are found on either side of it, are full of black bass. The Menomimee, into which the Brulé runs, is a capital deer stream, giving a good chance for jacking at night or floating by day. All through this part of the country are found innumerable small ponds, where deer can always be found.

Guides for these regions can always be found at Marquette, or, better yet, at Marinette, Wis., at the mouth of the Menomimee River, their charges being from $2.50 to $3 per day. At Badwater, on the Menomimee, good birch canoes can be brought for from $8 to $12 apiece.

So far as I could learn from repeated enquiries, no turkeys can be found in this section of Michigan.

W. C. B.

THE CHARMS OF NORTHERN MICHIGAN.

MY trip to Northern Michigan this fall, was cut short by a summons home. My vacation season, though brief, was pleasant. Many persons start out in pursuit of game, with the sole idea of enjoying themselves, as soon as they have accomplished some wonderful feat; caught a five-pound bass, a four-pound trout, a two-pound grayling, or shot a deer or bear. So far as my experience has taught me, I have invariably observed that those who start out in this way, and who do not enjoy the trip from the commencement, the fresh pure air, beautiful hills, valleys, trees, cold and rapid streams, rowing, boat-riding, transfer of boat, traps, and equipment through some wild and scarcely passable country, the bagging of a few pigeons, a partridge, or perchance a duck or two from some secluded pond, or a halt by the wayside at some clear and beautiful stream or lake for an hour or two's fishing, but expect to get rid of—to them—all discomforts, and go right to the place where they can sit in the parlor and shoot deer from the door, catch grayling, trout, and bass from the window or porch, are not the ones who really enjoy what to a real sportsman is the wild and interesting part of such a journey. I have met people of this kind a number of times; one, for instance, who could not enjoy the beautiful and wild appearance of Crooked River, and the lakes and streams on the inland route in Northern Michigan from Petoskey to Cheboygan, and the ride on the crudest of all crude railroads on the dummy from Petoskey to the head of Crooked Lake, in the open overgrown street car, drawn by *such* an engine—it would have to be seen to be appreciated—running over the wooden rails, through a wild unbroken forest, with space cut through just wide enough for the car to pass, in many places just grazing the trunk of some huge tree while the branches of a fir, balsam, or evergreen, are continually brushing against the car, making as pleasant a wild trip as one could take, and not soon forgotten. I really think a person who cannot enjoy and appreciate such a trip as this, is hardly worthy of being deemed a sportsman. When it comes to finding game, any one who has had experience knows that, in order to have successful sport, it matters not what kind of game you are after, work is absolutely necessary, and that work must be made one of the pleasures of the trip, or it's a failure, even if you have succeeded in getting a reasonable quantity of game. I do not like to hear any one say, "What we go after is the game, and not anything else." If this is the feeling with which they start out, in the majority of cases their trip will be a total failure—socially, certainly so.

Deer and bear were reported quite plenty this year, much more so than last. Ducks were scarce; in fact there were very few to be seen, and consequently the duck shooting was very poor, and could hardly be accounted for, as the crop of wild rice was certainly twice as large as the year before, and then they were plenty enough.

Petoskey seems to be the goal for hay-fever subjects, and the air certainly works a wonderful change in them.

Pickerel Lake, which I made the subject of a letter in your columns last spring, seems to have been the resort for fishermen this fall, and many were the fine strings of fish taken from its waters, and there are many more in it just as good.

There is a small lake—Long Lake—near Cheboygan, which is more celebrated in Northern Michigan for its large bass than any of the other bodies of water thereabouts (go to Cheboygan and get conveyance to the lake, about ten miles). Here is where they do really catch black bass way up in the figures, so far up in fact, that I dare not give them; but a bass that will tip the scales at five pounds is not a rarity by any means; and, if you catch them weighing more than that—but probably you won't—you need not be greatly surprised.

I saw a string of a dozen bass, caught by a gentleman and lady from Indianapolis, Ind., in an hour's time, at the mouth of Cheboygan River, in Mullet Lake, with two and a half pounds for the smallest, and a number weighing four pounds each; it was the handsomest string of bass I ever saw.

The lakes in Northern Michigan, during the fore part of September, were in what is termed blossom or bloom, so the fishing at that time was not as good as many expected.

One of the redeeming features of a trip to this locality, is the very reasonable figure at which a person can make the journey. Be they in search of sport or relief from hay-fever, the very low rates established by the Grand Rapids and Indiana Railroad do away with the excuse of "exhorbitant railroad fares." And I wish to take this opportunity of saying, that all the attachés of this road, with whom I have been brought in contact, are the most courteous and accommodating of any road I have ever traversed. Seemingly, their sole object is to make it as pleasant and agreeable for passengers as possible. FRANK N. BEEBE.

Columbus, O., Sept. 20th.

NO DANGER.—An exchange says: "Bears are reported to be numerous in New Hampshire. One of extraordinary size was caught in a trap near Warren the other day. Its weight is not stated, but its head measured eighteen inches in length. Near Milan another was killed after having passed within a few yards of a little child. Others have been seen in various localities." The little child was safe enough, unless they have very small yards in Milan.

HUNTER'S LUCK.

STOLEN BONDS RECOVERED.—THE CURIOUS MANNER IN WHICH THEY WERE FOUND BY A SPORTSMAN.—In September, 1878, during bank hours, the National Bank of Baltimore was robbed of two tin boxes, one containing $35,000 in bank notes belonging to the bank, and the other containing bonds of various coal and other companies, aggregating $28,000, deposited by the late Colonel William M. Boone, together with stock certificates and private papers. Since the robbery, detectives have failed to find any trace of the stolen property. On Friday last a young man while hunting in the woods near Woodberry, about three miles from this city, saw two men prospecting with an iron bar, apparently sounding for something buried. On Tuesday last, while gunning in the same place, he saw two men digging, and they finally drove off without finding what they were in search of. At night the young man with several friends went to the spot, and, after digging awhile, unearthed a tin box which proved to be that deposited by Colonel Boone, with all the stolen bonds and a number of Boone's private papers. No trace of the other box was found.

In 1845 the Catholic Church at Martinsburg, W. Va., was broken into and robbed of its altar adornments, among which were a half-dozen heavily plated candelabra. On Monday last three candelebras were found by a hunter buried in the woods near Martinsburg, where they had lain thirty-four years.

PUBLICATIONS.

HARPER'S for November has a paper by Mr. W. N. Ridoing on the "Old National Pike between the East and the West, across the Alleghanies." The author, with his eloquent description, assisted by Pyle's excellent illustrations, reproduces in vivid colors the lively pageantry of this great highway, which little more than a generation ago was the scene of a traffic that "seems like a frieze with an endless procession of figures." "There were sometimes," says the writer, "sixteen gayly painted coaches each way a day; the cattle and sheep were never out of sight; the canvas-covered wagons were drawn by six or twelve horses with bows of bells over their collars; the families of statesmen and merchants went by in private vehicles; and while most of the travellers were unostentatious, a few had splendid equipages and employed outriders."

An article descrsptive of "Cattle Ranches in Colorado" is a paper which will prove of unusual interest to many of the readers of FOREST AND STREAM, while others will read with equal care Professor N. W. Elliott's article on "The Sparrow War."

LIPPINCOTT'S for November has an excellent budget of good things. "Rambles of Three" is a spicy paper of frolic among the Pompeian ruins. One of the most interesting papers is that of Citali Seton on "The Secret Societies of Southern Italy." "The Bicycle and Riding It" will be read with pleasure by the hosts of people who are finding out the merits of that silent steed.

PUBLISHERS' DEPARTMENT.

—The thread-wound, long range shot cartridge cases advertised in our columns by H. H. Schleber & Co., promise to be of great value to hunters of ducks, geese, deer, foxes, turkeys, and other game difficult of approach. The cases containing the shot are held together by layers of thread of different length for the different distances. The thread unwinds during the flight of the cartridge and at last releases the shot, giving great penetration, and good pattern up to twenty rods. They are warranted to harm no gun if the directions are followed. Of course good judgment of distance is required, because up to a certain point the cartridge goes as a solid bolt. The cases are sold empty to be loaded by the consumer with any desired size of shot.

—o—

FERGUSON'S RUST PREVENTER.—We have frequent inquires for a good rust preventer, and have much pleasure in calling attention to that prepared by Mr. Ferguson, of 65 Fulton street, which has been found to answer the purpose admirably, and is free from any injurious ingredients.

—o—

—Bilious persons should avoid the use of coffee, and nervous persons the use of tea. An agreeable and healthful substitute is found in cocoa. Walter Baker & Co.'s chocolate and cocoa preparations are highly recommended by the medical faculty, and are sold by all grocers.—*Adv.*

Cartridges for Target Practice.
SEND FOR ILLUSTRATED CATALOGUE.

VICTOR GLASS BALL TRAP.
STOCK & MORRIS PATENT.

This Trap is destined to revolutionize glass-ball shooting. It weighs but four pounds, and can be set up anywhere, without previous preparation, in two minutes. It is so simple that it can never get out of order. It throws balls without breaking, at any desired velocity, in any direction, faster than twenty guns can continue to shoot them. To become a good shot it is now unnecessary to go to club grounds for practice, as anyone can find a good place for shooting within a few rods of his dwelling, and have an hour's daily practice without the slightest trouble or inconvenience. The Trap has been entirely remodeled and greatly improved, both as regards efficacy and finish.

No. 1 (Plain), $4. No. 2 (Nickel-Plated), $5. Will close out the balance of Old Model Traps at $3.

CHAS. FOLSOM, Sole Agent,
For Sale by Dealers Everywhere. **53 Chambers street, New York.**

PEORIA, *August 8th*, 1879.

Mr. Charles Folsom, Agent for the Stock & Morris Patent Glass Ball Trap, No. 53 Chambers street, N. Y.

SIR—You ask the opinion of the Peoria Shooting Club on the above trap, which is now used exclusively on our grounds. We give it decided preference over all. It delivers the balls with varying velocity, thus more closely imitating the natural flight of a bird, and in this point it has no competitor. We have yet to see its equal for any of the following qualities: Simplicity of construction, rapidity and certainty of action, durability, lightness, and portability. It works perfectly and is so simple; it does not break down or get out of order at all. We recommend it in highest terms for the use of clubs, and also for amateurs for private practice. For those who would like frequent practice on their own premises, without the need of costly and tiresome preparation, it fully meets a long-felt want, as it weighs but four pounds, and can be set up ready for use anywhere in two minutes. It was to-day tested on our grounds for power and speed, when it threw fifty-nine (59) glass-balls an average distance of twenty-five yards from a single cup in sixty seconds, keeping two balls constantly in the air at the same time. The new model is a decided improvement upon the old. We wish you success in its introduction, and think its use will do quite as much to popularize glass ball shooting as anything that has yet been found. Yours, &c.,

Thread-Wound, Long-Range Shot Cartridge Cases.

For Muzzle-Loading and Breech-Loading Cylindrical and Choke-Bore Shot Guns.

Any desired closeness of pattern made at 50, 70 and 90 yards, with penetration superior to that made by the best choke-bores at 40 yards.

INDISPENSIBLE TO HUNTERS OF ALMOST EVERY KIND OF GAME.

Ten and Twelve Gauge now ready.

This Cartridge consists of two semi-cylindrical cases, wound with thread, containing one ounce of shot, heavy in front and light in rear, to keep it from turning. When the thread is all unwound by the friction of the air, the cases fly apart, and the shot scatters. The cases are sold empty, to be filled by the purchaser with any size of shot.

Price, $5 00 per Hundred. 20 sent post-paid for $1 00. Address

Sportsmen's Routes.

"THE FISHING LINE."
TAKE THE
Grand Rapids & Indiana R.R.
Mackinaw, Grand Rapids and Cincinnati Short Line
FOR THE
Trout, Grayling, and Black Bass Fisheries,
AND THE
FAMOUR SUMMER RESORTS AND LAKES
OF
NORTHERN MICHIGAN.
The waters of the
Grand Traverse Region
and the Michigan North Woods are unsurpassed, if equaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in those waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING Season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE, also abound in large numbers in the many lakes and lakelets of this territory.

The sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at many points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful; the air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthma Affections.

The hotel accommodations are good, far surpassing the average in countries new enough to afford the finest of fishing.

During the season Round Trip Excursion Tickets will be sold at low rates, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

It is our aim to make sportsmen feel "at home" on this route. For Tourist's Guide (an attractive illustrated book of 80 pages), containing full information and accurate maps of the Fishing Grounds and Time Cards, address A. H. LEFT, Gen'l Pass. Agent, Grand Rapids, Mich.

Sportsmen's Routes.

St. Louis, Minneapolis
AND
ST. PAUL SHORT LINE.

Through Pullman Palace Sleeping Cars between St. Louis, Minneapolis and St. Paul.

Burlington, C. Rapids & Northern Railway.

QUICKEST, CHEAPEST AND BEST!

TWO PASSENGER TRAINS each way daily, between Burlington, Albert Lea and Minneapolis, crossing and connecting with all East and West Lines in Iowa, running through some of the finest hunting grounds in the Northwest for Geese, Ducks, Pinnated and Ruffed Grouse and Quail. Sportsmen and their dogs taken good care of. Reduced rates on parties of ten or more upon application to Gen'l Ticket Office, Cedar Rapids,

C. J. IVES,
E. F. WINSLOW, Gen'l Passenger Agent.
General Manager. tf

FOR HALIFAX,
PORT HAWKESBURY, PICTOU, AND CHARLOTTETOWN.

THE first-class steamships Carroll and Worcester, will leave T wharf, Boston, for above ports, every Saturday at 12 M. Through tickets sold to all principal points in Nova Scotia and Cape Breton. No freight received after 10 A.M. on day of sailing. Shippers must send with receipts the value of goods for Master's manifest. For rates of freight or passage inquire of W. H. RING, 18 T wharf, or O. G. PEARSON, 219 Washington street. F. NICKERSON & CO., Agents.

TO SPORTSMEN:

The Pennsylvania R. R. Co.,

Respectfully invite attention to the
SUPERIOR FACILITIES
afforded by their lines for reaching most of the TROUTING PARKS and RACE COURSES in the Middle States. These lines being CONTINUOUS FROM ALL IMPORTANT POINTS, avoid the difficulties and dangers of reshipment, while the excellent cars which run over the smooth steel tracks enable STOCK TO BE TRANSPORTED without failure or injury.

THE LINES OF
Pennsylvania Railroad Company
also reach the best localities for
GUNNING AND FISHING
in Pennsylvania and New Jersey. EXCURSION TICKETS are sold at the offices of the Company in all the principle cities to KANE, RENOVO, BEDFORD, CRESSON, RALSTON, MINNEQUA, and other well-known centers for
Trout Fishing, Wing Shooting, and Still Hunting.
Also, to
TUCKERTON, BEACH HAVEN, CAPE MAY, SQUAN, and points on the NEW JERSEY COAST renowned for SALT WATER SPORT AFTER FIN AND FEATHER.

L. P. FARMER, Gen'l Pass. Agent.
FRANK THOMSON, Gen'l Manager. feb17-tf

Old Dominion Line.

THE STEAMERS of this Line reach some of the finest waterfowl and upland shooting sections in the country. Connecting direct for Chincoteague, Cobb's Island, and points on the Peninsula. City Point, James' River, Currituck, Florida and the mountainous country of Virginia, Tennessee, etc. Norfolk steamers sail Tuesday, Thursday, and Saturday. Lewes, Del., Monday and Thursday, at 2 P.M. Full information given at office, 197 Greenwich Street, New York. sep28 1y

Powder manufactured to order of any required grain or proof. Agencies in all cities and principal towns throughout the U. S. Represented by

F. L. KNEELAND, 70 Wall Street, N. Y.

N. B.—Use none but DUPONT'S FG or FFG Powder for long range rifle shooting.

THE HAZARD POWDER COMPANY,

MANUFACTURERS OF

GUNPOWDER.

Hazard's "Electric Powder."

Nos. 1 (fine) to 6 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of 1 lb. only.

Hazard's "American Sporting."

Nos. 1 (fine) to 6 (coarse). In 1 lb. canisters and 6½ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to shot guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 5 (coarse). In 1 and 5 lb. canisters and 6½ and 12½ lb. kegs. Burns *slowly* and very clean, shooting remarkably close and with *great penetration*. For field, forest, or water shooting, it ranks any other brand, and it is equally serviceable for muzzle or breech-loaders.

Hazard's "Kentucky Rifle."

FFFG, FFG, and "Sea Shooting" FG in kegs of 25, 12½, and 6½ lbs. and cans of 5 lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting, and the "Sea Shooting" FG is the standard *Rifle* Powder of the country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT, OF ANY REQUIRED GRAIN OR PROOF, MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city, or wholesale at our office,

88 WALL STREET, NEW YORK.

ENGLISH

Sporting Gunpowder.

CURTIS & HARVEY'S

DIAMOND GRAIN.

Nos. 2, 3, 4, 5, 6, 7, and 8. Superior Rifle, Enfield Rifle, and Col. Hawker's Ducking. W. STITT, 61 Cedar St., N. Y. Agent for the U. S.

A GOOD PLAN

The most profitable way of dealing in stocks is by combining many orders and co-operating them as a whole, dividing profits *pro rata* among shareholders, according to the market, monthly. Each customer thus secures all the advantages of immense capital and experienced skill, and can use any amount, from $10 to $10,000, or more, with equal proportionate success. "New York Stock Reporter" and new circular mailed free. Full information for any one to operate successfully. Lawrence & Co., 57 Exchange Place, N. Y.

ENGLAND AND AMERICA.

COLT AND WEBLEY.

The two GIANTS in gun-making at the present time, are P. WEBLEY & SONS, Birmingham, England, and the COLT FIRE ARMS Co., Hartford, Conn. Both owe their marvelous successs to the same two causes. First, that they learned just what constituted PERFECT GUNS. Second, that they applied labor-saving machinery to their production. The result is, THE BEST GUNS IN THE WORLD, AT VERY SMALL COST. You can now buy a COLT or a WEBLEY gun, which it is a pleasure to use, for no more than is commonly paid for guns bearing unknown or fictitious names.

Of WEBLEY'S GUNS we have the TREBLE WEDGE GUNS—every gun having beautiful Damascus or laminated steel Barrels, Rebounding Bar Locks, Pistol Grip, Lever For part, Double Bolt, and Extended Rib.

DOUBLE BOLT GUNS (Top and Side Lever). | WEBLEY-LANG SELF-COCKERS.
SINGLE BOLT GUNS (Top and Side Lever). | EXPOSITION GUNS (various styles).

The last four styles named above constitute a JOB LOT, which we are selling off at about half their real value. These guns are in NO WAY inferior to the Treble Wedge guns as regards quality of materials or EXCELLENCE in shooting, and are the CHEAPEST lot of guns we have ever seen.

Of COLT GUNS, we have all the regular grades, and, in addition, THE CLUB GUN. This gun is made for US, with selected barrels and the very finest materials, and is designed especially for Glass Ball and Pigeon Trap Shooting. Gentlemen who indulge in these contests will be obliged to either shoot the COLT CLUB GUN, or lose the prizes.

Every one of these guns has an elegant heel plate, with the Rampant Colt in a circle, and the words "The Club Gun," beautifully embossed upon it. *Any* Colt gun not answering to the above description is *not* the Club Gun.

Besides the Webley and Colt DOUBLE guns, FOREHAND & WADSWORTH, of Worcester, Mass., make for us a SINGLE barrel breech-loader with Scott pattern Top Lever. These guns are very light and handy, and just the thing for BOYS or men who cannot afford to buy Double Guns. They cost but a mere trifle. We are happy to announce that we are the principal distributing agents at New York city for all three of the above-named manufacturers.

Shot-Gun and Rifle-Powders Revolutionized.

DITTMAR POWDER.

Champion Shot Gun and Rifle

POWDER OF THE WORLD!

IS UNEQUALLED BY GUNPOWDER

for strength, accuracy, cleanliness, and gives little smoke, recoil, or noise. It is absolutely safer than gunpowder, as it cannot explode when not confined, and does not stain the gun or heat the barrels as much in rapid firing. Captain Bogardus, champion wing-shot of the world; Dr. Carver, champion rifle-shot of the world; Ira A. Payne, and all the leading shots, use DITTMAR POWDER in their matches. Our challenge to shoot a long range rifle match, as published in our circulars, was never accepted, and is yet open to the world. Address

DITTMAR POWDER M'F'G Co.,

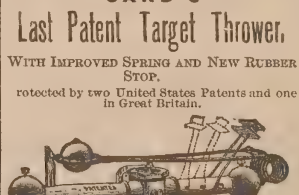
P. O. Box 836. 28 Park Place, New York.

NEW CROP VIRGINIA The new crop of tobacco from which VANITY FAIR and FRAGRANT VANITY FAIR TOBACCO and CIGARETTES are being manufactured, is without doubt the finest that has been grown in a long time, and possesses a rare fragrance and a mildness so much sought after by connoisseurs. The above are now put up by us and sold under the brand EXCELSIOR, throughout Great Britain and Europe. Try our Fragrant "HALVES"—Rare Old Perique and Virginia.

SIX FIRST PRIZE MEDALS. WM. S. KIMBALL & CO., Rochester, N. Y.

"SAPANULE"

CURES BY ABSORPTION.—The well-known medicinal properties of Glycerine, of which "SAPANULE" is largely composed, is an assurance to the public of the wonderful curative powers of this celebrated Lotion for all Nervous Inflammatory and Skin diseases. Rheumatism, Neuralgia, Lame Back, Headache, Bruises, Sprains, Burns or Scalds, Chilblains, Bunions, Piles, &c., yield at once to its soothing influence, and are permanently cured. Salt Rheum, Erysipelas, Humors, Chapped Hands, Roughness, and all diseases of the Skin are quickly and positively cured. Used in sponge or foot baths removes all pain or soreness of body, limbs and feet. Sold by all druggists. Satisfaction guaranteed or money refunded. Send for illuminated circular and cards. SAMUEL GERRY & CO., Proprietors, office 257 Broadway, N. Y. LAZELL, MARSH & GARDNER, wholesale agents.



CAMP LOUNGE CO. TROY, N. Y. Free Circulars. Full-Length COT, in this case, $10; LOUNGE, in this case, $8. Sold Everywhere by the Trade.

CARD'S

Last Patent Target Thrower.

WITH IMPROVED SPRING AND NEW RUBBER STOP.

rotected by two United States Patents and one in Great Britain.

[Patented May 7, 1878, and April 22, 1879.

THE only rotating trap that throws *every way*, or can be made to throw in any *desired* direction, or that can be made to throw *every way, except at shooters and spectators*, all of which are covered by the above patents. Remember you get no balls (unless you wish them) in your face, but have *rights and lefts, and all other angles*. Send for circular. Price $10 at factory. No charge for boxing.

WILL H. CRUTTENDEN, GENERAL AGENT, Cazenovia, N. Y.

$5 to $20 per day at home. Samples worth $5 free. Address STINSON & CO., Portland, Me.

Ammunition.

TATHAM'S

IMPROVED

Chilled Shot.

American Standard Diameters.

(RED LABEL)

GIVES GREATER PENETRATION and BETTER PATTERN than ordinary shot. Equally well adapted to choke-bores, modified chokes and cylinders.

Beware of Imitations.

Our Chilled Shot will be found to be more *free from shrinkage, more spherical, more uniform in size, harder and of brighter and cleaner finish than any other.*

Send for circular.

A GREAT INVENTION!

IMITATION

STAINED

GLASS.

Patented December 3, 1878.

CURTAINS, SHADES, AND BLINDS

Dispensed with. New, Elegant, Cheap and Durable. It produces all the unique effects of a richly painted or Elegantly Stained Window. It is easily applied to the glass in Windows of Houses, Public Buildings, Churches, Steamboats, Street and Railroad Cars, Libraries, Parlors, Offices, Bath Rooms, Stairways, Transoms, Vestibule Doors, etc., with the full effect and brilliancy of variously colored ground glass. The article has *just been patented*, and not a single agency has as yet been established.

ONE GOOD MAN in each State wanted, to whom exclusive territory will be reserved for five years.

SAMPLES of three of the most beautiful styles will be sent prepaid with full instructions, wholesale prices, etc., on receipt of $1.00.

Agents Apply to L. Lum Smith, Patentee & Mf'r. 717 SANSOM ST., PHILADELPHIA, Pa. Sole Agent for U. S. & Canada.

READ the following extract from the *Representative Agents' Paper* of the world, *The Philadelphia, Pa., Agents' Herald*:

"We regard the above as the most remarkable and beautiful invention ever patented, and would advise the Agent readers of the *Herald particularly* to be on the alert to secure choice territory. The article is so simple, and yet will be in such universal demand, that it will undoubtedly meet with a most enthusiastic reception and large sale. It will offer the best opportunity for coining money that has ever been presented to Agents, and the business being light, neat and respectable, will be peculiarly adapted to ladies and gentlemen who from timidity, etc., have hitherto been debarred from engaging in the agency business, for want of some meritorious and suitable article to canvass for. Another very important feature of attraction is that all goods purchased will be promptly forwarded to even the most remote section of the country *free* of express or freight charges."

AGENTS' HERALD

The Largest, Spiciest, and only REPRESENTATIVE PAPER OF ITS KIND,

ACTIVE AGENTS GIVEN GOOD EMPLOYMENT EVERYWHERE

by over 200 responsible advertisers in this month's issue of the *Agents' Herald*. Grand outfit, including circulars, terms, and a beautiful 10x14 engraving of the *Smithograph*, sample card and full particulars of the AGENTS' DIRECTORY and sample copies of last month's *Agents' Herald*, all for 10 cents. Yearly Subscription, $1.00. One cent stamps taken. We cannot afford to give the paper away, so don't ask us. Address in haste, AGENTS' PUBLISHING CO., Phila., Pa.

FOREST AND STREAM & ROD AND GUN

THE AMERICAN SPORTSMAN'S JOURNAL.

[Entered According to Act of Congress, in the year 1879, by the Forest and Stream Publishing Company, in the Office of the Librarian of Congress, at Washington.

Terms, $4 a Year. 10 Cts. a Copy. Six Mo's, $2, Three Mo's, $1.

Volume 14—No. 12. No. 111 Fulton Street, New York.

A Winter in East Florida.

(SIXTH PAPER.)

ST. JOHNS PRAIRIE—THE NARROWS—FORT CAPRON.

KING and Strobhar having finished hauling their logs to the tributary waters of the St. Sebastian, it was the intention of Strobhar to drive his oxen home to Eau Gallie—some thirty miles by land—on the day following our return from the head of the South Prong. Frank and I resolved to accompany him, in order to see something of the back country. Accordingly, we built a rack for the cart, took a tent and a few supplies, and started soon after breakfast on a lovely morning in January. There being no roads our rate of travel was necessarily very slow, and we were two days in making the journey, though we had a team of four good oxen.

After leaving camp our course was W. N. W. some six miles through the pine woods, and along the borders of some long ponds, which were then nearly dry. We crossed the big cypress belt, which was parallel with and about midway between the Upper St. Johns and the Indian rivers. Along this belt we saw large numbers of cranes, herons, egrets and ibises, a few flocks of paroquets, and an extensive buzzard roost, where there appeared to be thousands of buzzards hovering and circling around upon our approach. The cypresses were covered with epiphytes, or air plants, whose spikes of scarlet bloom appeared in pleasing contrast with the light green and feathery foliage. Floundering through the saw-grass that skirted the cypress timber, we at length came out upon the St. Johns prairie. These savannahs stretched away for miles, as far as the eye could reach, a sea of vivid living green, meeting on the horizon the boundless blue sky above. The monotony of the scene was somewhat relieved by clumps of palms, long distances apart, like oases in a desert. Here and there could be descried a stork or a white heron standing solitary and motionless, like silent sentinels guarding the emerald wastes. A mysterious silence akin to awe oppressed the sense painfully, and produced upon one the impression of a consciousness of immeasurable distances and solitude.

Proceeding along the prairie a few miles in a northerly direction, we made for a narrow pine ridge, and camped for the night. Here we found a few mosquitos, but they were not very troublesome. During the day I had procured a number of specimens of fresh water fishes from the small ponds about the head waters of the St. Sebastian. Some of them were new, among which were two varieties of *Zygonectes* or top-minnows, that have since been named *Z. sanguinifrons* and *Z. henshalli*, by Prof. D. S. Jordan. There was also a new genus, but it had been anticipated a short time previously by Prof. G. Brown Goode in his "Fishes of the St. Johns," and which he had called *Jordanella Floridana*. In scooping out the specimens with a dip net, I found the moccasin snakes a little troublesome, and on one occasion I stirred up a huge alligator that had at some period in his early life lost his caudal appendage. He was an odd-looking customer, with an immense head and body and a bob-tail, and was unusually ferocious and remarkably active with his legs and jaws. On another occasion, while cutting away the brush from around a small spring stream to allow the oxen to drink, a very bold 'gator seemed bent on having a taste of fresh beef, and came within an ace of seizing one of the oxen by the leg, but Strobhar gave him his quietus by burying the hatchet in his brain.

Leaving the prairie we again struck into the flat woods on our right, and for a few miles followed the old military trail running from St. Augustine to Fort Capron. All that now remains of the trail are the old blazes on the trees. We killed a buck at the head of Turkey Creek, and a fawn near the head of Crane Creek. The balance of the journey was through the dense palmetto-scrub, whose immense roots, lying above ground like railway ties, made our progress exceedingly slow, and was the roughest bit of travel I ever experienced. We were not sorry when we at length reached the mouth of Elbow Creek, which we crossed, and soon arrived at Eau Gallie, where we found King waiting for us with his boat. The next day we returned to camp, well pleased, upon the whole, with our laborious trip.

On the following morning we broke camp and proceeded on our way down Indian River with a head wind. At the mouth of the St. Sebastian we passed the fine hammock of Mr. Gibson, and a few miles below we arrived at Barker's Bluff, quite an eminence, on which is the cabin of Arthur Park. Opposite here is Pelican Island, a few acres in extent, and the first of a series of islands forming the narrows. The mangroves and water-oaks on this island have been all killed by the white excrement of the pelicans which breed there. This guano, which lies several inches deep on the ground, is utilized by the settlers as an efficient fertilizer. At a distance the dead trees and bushes and ground seemed covered with frost or snow, and thousands of grey pelicans were seen flying and swimming around or perched upon the dead branches. As we passed we saw a party of Northern tourists at the island, shooting down the harmless birds by scores through mere wantonness. As volley after volley came booming over the water we felt quite disgusted at the useless slaughter, and bore away as soon as possible and entered the Narrows. Indian River Narrows is some ten miles in length and from an eighth to a half-mile in width; the channel is about a hundred yards from the western shore or mainland. There are numerous oyster beds and reefs lying but a few inches below the surface of the water, and one must keep his eyes open even with a fair wind. As we were beating through, the difficulties were correspondingly increased, but we were extremely fortunate and merely touched the centre-board a few times in our passage through. The scenery in the Narrows is quite pleasing. On the right the mainland is a level bank, clothed with mangroves and water-oaks, with occasional patches of rushes and saw-grass, while in the background can be seen alternations of pine woods and hommocks, which once in a while run down to the river bank. On the left are islands innumerable, with tortuous channels between them, and woe betide the unlucky boatman who gets lost in the labyrinth of their intricate windings. The islands are green to the water's edge with mangrove bushes, and the scene is enlivened by the numerous water-fowl, egrets, herons, pelicans, gallinules, water-turkies, cormorants and fish-crows, feeding near the islands, and the gulls, terns, vultures, ospreys and man-o'-war hawks, swooping, skimming and sailing in the air above.

"Look, what a queer snake!" suddenly exclaimed Frank, as he seized his gun.

We saw a snake apparently wiggling out of the water several feet into the air near one of the islands. As Frank fired, part of the snake dropped on the water, while the other part took wing and flew away.

"Did the snake drop the bird, or the bird drop the snake?" asked Frank.

"Yes, that was about the way of it," observed Ed.

The explanation was quite simple. A snake-bird or water-turkey (*Plotus anhinga*), swimming with his long neck only out of the water, had the snake in his bill, which he dropped and flew away when Frank fired his gun. Sidney Lanier's description of this bird is quite characteristic:—

"The water-turkey is the most preposterous bird within the range of ornithology. He is not a bird, he is a neck, with such subordinate rights, members, appurtenances, and hereditaments thereunto appertaining as seem necessary to that end. He has just enough stomach to arrange nourishment for his neck, just enough wings to fly painfully along with his neck, and just big enough legs to keep his neck from dragging on the ground; and his neck is light colored, while the rest of him is black. When he saw us he jumped on a limb and stared. Then suddenly he dropped into the water, sank like a leaden ball out of sight, and made us think he was drowned, when presently the tip of his beak appeared, then the length of his neck appeared, then the length of his neck lay along the surface of the water, and in this position, with his body submerged, he shot out his neck, drew it back, wriggled it, twisted it, twiddled it, and, spirally poked it into the east, the west, the north, the south, with a violence of involution and a contortionary energy that made one think in the same breath of corkscrews and lightnings. But what nonsense! All that labor and perilous asphyxiation, for a beggarly sprat or a couple of inches of water-snake!"

At the lower end of the Narrows is a staked channel leading off through the islands on the left, to the United States Life Saving Station, No. 1, on sea-beach, in charge of Mr. John Houston. Just as we were emerging from the Narrows we observed two deer feeding on the mainland near the water's edge, but they scampered away before we could obtain a shot. We had now got into the broad river again, with more sea-room for tacking, making long legs and short ones; but the greater number of oyster bars required extreme watchfulness and careful sail to avoid them. We could now see the stakes of the turtle nets with palmetto leaves fastened to their tops, all along the river below us; but with our usual good luck we steered clear of all difficulties and arrived at the site of old Fort Capron late in the afternoon, where we camped in a grove of bitter sweet orange trees near the mouth of a small brook of good, cool water.

Fort Capron, quite a noted place on Indian River, is thirty-eight miles below St. Sebastian River and a hundred from Titusville. Directly opposite is an inlet to the sea, through which can be seen the white crests of the breakers as they sparkle in the sunlight. The only vestiges of the old military post are a fallen chimney and the debris of a brick bake-oven; but the parade-ground and a moat or ditch can still be distinctly traced. There are evidences of a good state of cultivation at some remote period in the furrowed ground, the groves of sour and bitter sweet oranges, limes, lemons and guavas; in the hedges of oleander, Spanish bayonet and Cherokee rose, and in the ornamental groups of date palms, century plants, cacti and sisal hemp. There are but two or three houses in the vicinity, the principal one belonging to Judge Paine, at whose house is the post office, the last on the river, and called St. Lucie. Judge Paine is an old resident, and is United States revenue officer for this locality; he has a comfortable home and keeps a few boarders during the winter. There are also the houses of Mr. Jones and Mr. Cassidy. Four miles below is the site of Fort Pierce where lives Mr. Bell.

There were several turtling camps scattered along between the foot of the Narrows and Fort Pierce, the principal ones belonging to Judge Paine, Martin and Hoke, Jim Russell and Jim Bassett and August Park. The green turtle is here taken in gill nets with a mesh of eighteen inches. The business is quite profitable, there having been taken last winter several thousand turtles varying in weight from twenty to a hundred pounds. They are kept in crowls and shipped North, via., Titusville and Jacksonville. The turtlers have many difficulties to contend with, however, not the least among them being the numerous saw-fish, sharks and rays which play sad havoc with the nets occasionally. The channels and guts among the small islands near the inlet abound in oysters of a delicious flavor, and the fishing is the best on the river. Red fish, sea trout, sheepshead, crevalli, grouper, black fish, drum, snapper, cat fish, and other varieties of the finny tribe can be taken by the boat load if necessary. The tide rushes through the narrow guts like a mill tail, and fishing, even with a hand-line, is exciting sport, enhanced once in a while by fastening to a shark. Wild fowl are plentiful enough to afford good sport, and in old fields near Capron will be found numerous bevies of quail. A mile or two back of the old fort there is superb snipe shooting on the savannahs or wet prairies. In Taylor Creek and several smaller streams there is fine blackbass and bream fishing. One can here live on the fat of the land; green turtle, oysters, crabs, fish, venison, duck, quail, snipe, etc., can be had for the taking, without price.

The day following our arrival at Fort Capron was Sunday, and as the boys could neither fish nor hunt they were quite eager to go over to the inlet and get on to the sea beach, for as yet they had not seen the sea, though they had heard the roar and dash of the breakers almost daily. As the wind was northwest and rising, and the swift-flying scud portended dirty weather, I endeavored to dissuade them from the attempt and pointed out the danger should a norther set in. But they were importunate, and I at last gave in, though against my judgment and inclination. After taking everything out of the boat we started, leaving Marion in charge of the camp, who remarked that he did not want to be drowned on a Sunday. We made a quick sail across and anchored under the mangroves, where the water was quite deep. Lowering the sail the boys struck out for the beach, but I deemed it advisable to stay in the boat as the tide was running out strongly; and it was well that I did so. I had cautioned the boys to be back in an hour, and sat smoking my pipe awaiting their return. I soon discovered that the anchor was dragging and that the rush of the tide was tremendous in consequence of the water being blown to that side of the river. If the cable had parted I should soon have been drifting out to sea with a norther coming on. As the bottom seemed to be solid rock and the anchor continued to drag, I carried a line ashore and made it fast to a big mangrove. The wind had now increased to a gale; black, ominous clouds were piling up in the northwest and an angry sea was lashing the river into a boiling cauldron, while I was completely drenched with spray. The boys now returned loaded with shells, corals, sea-beans, etc., and looked with amazement at the wild scene and with evident misgivings of trouble ahead.

"Well, boys," said I, "make up your minds quickly; we must get back at once or stay here without food or water. Which horn of the dilemma will you take?"

"How long will this storm last?" anxiously inquired Ed.

"I can't tell," said I; certainly all night, and probably two or three days, as these northers often do. It's getting worse every minute."

"Do you think we can get back?" asked Frank, and added: "It looks worse than the sea."

"Yes," I answered, "if you do as I tell you, and the rigging and rudder hold. But we will have some trouble in getting away from this lee shore."

"Well, let's try it," said Frank; "we may as well drown as starve to death!"

Accordingly we reefed the sail, run a life-line around the boat and pumped her out. We then cast off the shore-line, made sail, hove the anchor and by the help of the setting poles we got her away from the shore close-hauled on the starboard tack, and headed for camp directly across the river.

"Now, Ed," said I, "you and Henry hold on to the main-sheet and don't let go unless I give the word. Ben, you stand by the peak halliards, and Frank you bail out with the bucket—never mind the pump—when I tell you. All hands sit well to windward, outside the combing. If she goes over, hold on to the life line, and keep cool. She can't sink, and we will drift ashore somewhere!"

The wind was now howling, the halliards shrieking, and the sea pounding with terrific force against the little *Blue Wing*, but she stood it bravely and at her way to windward slowly but surely. Suddenly a tremendous sea washed Frank and Ben from their windward perch into the cock pit and jammed them against the centre-board trunk; but they were up again in an instant, and Frank was bailing out for dear life. It was not long before I found myself sprawling in the cock-pit, knocked down by a heavy comber, but without loosing my hold on the tiller. We finally got across without any further mishaps, but it was the longest two miles I ever sailed. None of the boys could swim a stroke save Frank and myself, but they stood it manfully and well; it was a good lesson for them, and one that they did not forget. We cast anchor, made everything snug, and waded ashore, where we found Marion, who was the most frightened one in the party.

"I thought you were all gone, sure," said he, "half of the time I could only see the top of the sail, and I thought you were swamped."

"Oh, no," said Frank, "we just kept down behind the waves to keep out of the wind!"

A number of the turtlers were there watching our manœuvres with much interest, and ready to put out to our assistance in a Whitehall boat should it have been necessary. Among them was "Jim" Russell, the well known Indian River guide, who said:

"Boys, that's a bully boat and well sailed; you need'nt fear to go anywhere in her!"

As this was "praise from Sir Hubert," we were well satisfied. J. A. HENSHALL.

A TURKEY SHOOTING MATCH.

THE story of the old-fashioned shooting match as related in the issue of October 2d, so interested me and afforded so much amusement that I would fain make payment therefor by relating another story of old time shooting. After the war I went into rifles heavily for a youngster, and had about all the ups and downs of rifle experience; filled the neighbors with terror and the trees around with bullets; got myself into hot water times without number, and at length sold all my guns and bought some other makes. But to the story:—December 25th, 187—, "A Grand Turkey and Chicken Shoot," so said the posters, took place in the suburbs. George, Old Dennis, and myself proceeded to the place of shooting; found it near a lager beer garden, and given by the proprietor thereof. Turkeys there were, also chickens; at least they designated them thus. Our citizens were there in force, and so was *zwei lager*. Shot guns, chickens, ten rods; rifles, turks, and chicks, distance unknown, and a ledge of rock behind it; the fowl placed on a little knoll, tied to a stake, with ten feet of cord to play with. Dennis had a rifle of his own make, 7½ pounds, 36 calibre, using about 90 grains powder behind a 120 grain conoidal bullet. It was a miniature target rifle. George had an ordinary gun for which he payed $15, and was a beginner. My gun was 19 pounds, 42 calibre, bullet 196 grains, powder 100 grains. There was one Ballard .44 carbine, and one Frank Wesson .32 sporting rifle on the ground. Conditions:—Shooting, off shoulder; sighting shots, none; hits, bury the ball above the knee; twenty-five cents per shot for turks, ten cents for chicks. Weather, cold; atmosphere, thick; wind, 5 o'clock and strong, gusty. Dennis was captain of us, and these were his directions: "Them Dutchmen are so drunk that we needn't be afeared of 'em hittin' a turk only by accident. Let them shoot first, so B——. will get some of his money back, and don't you kill every one you can, if you do old B——, 'll shet down on us. Do as I say, an' we'll git every turk he's got. Now, George, you take the glass (a splendid one by the way), and git to wind'ard and watch my bullet. I've got eight turns on the screw, and the front sight knocked off a foot for a foot." This last for my benefit, as I followed. Some shots had been fired by "them Dutchmen." Gambrinus was triumphant, and the turks safe! At the report of Dennis's rifle there were exclamations, for "dot leedle guns make a pig noise," and almost simultaneously with the stream of smoke from the muzzle of the rifle, a puff of dust just in front of the turkey told where the shot had struck. So much for elevation and wind. "A leetle more powder next time," said the old man. I took position for firing, Dennis took the glass, and George prepared to follow. "Turn that screw of yourn down to five," said Dennis, after I had fired. George tried his gun in turn, and so we alternated, until at Dennis's third shot the bird tumbled. I was shivering so much with the cold that I took a run out to the turkey, and when George fired, would put one foot upon the exact spot the bullet touched the ground. Soon, over went a turkey in answer to his shot. Then he got cold and had too run out to the turkey-stand, and I went to my position, which, when reached, found Dennis ready to shoot; a cloud of feathers answered the shot, but Mr. Turkey stood there as though nothing had happened. "Fire away, Doc, he ain't hurt." I was instructed, and in answer to my fifth shot (not at that turk) a twelve pound turkey was declared to be mine. (Dennis did hit him, and by the rules might have claimed him. My shot killed him instantly.) After this, all three of us were warm, and I don't believe that to this day B——, knows any better than that we really were cold. When we went out to the stand it was by instruction from Dennis, and from the firing-point the exact location of the hit could be noted by the position of the foot, by the use of the glass. "Them Dutchmen" didn't realize the fact that every time we fired, the turky stood in the same place as when the less shot was fired, or that the small boy who happened to be out there was advised to "shoo the turk up by the stake when we waved a hat!" That the turkey was the length of the cord from the stake in any direction, was none of our business while they shot. After a time the "proverbial bird" ceased to be, and we tried chickens. At nightfall B—— had placed 17 turkeys upon the stand. We had 15 of them; Dennis, 6; George, 2; I, 7; I remember 5 five chickens for my shooting, and that altogether a decent wagon load of poultry was killed by us three. "Them Dutchmen" had the remaining turkeys, a few chickens, and more lager than was comfortable.

After this shooting match we three fellows used to go every opportunity, and when working on the plan spoken of, were invariably successful. One day I went alone, walking two miles and carrying my kit (about eighty pounds), and thinking I would be smart and have a lot of turks before George could get there, I shot away two dollars and a half not counting the ammunition, and then had no bird. The reason was, the flight of the shot was so rapid that it was impossible to spot the shot; couldn't get the gun down from the face soon enough unless the range was known. We did not try shooting soins again.

VIDETTE.

FACTS AND FANCIES ABOUT SHOOTING.

NO. 2.—BY A. WINTER.

HOW TO FIND AND KILL GAME.

AS preliminary to the introduction of the sportsman into the field, a few words will not be amiss, as to proper equipments and ammunition. The relative difference between the better grades of different makers of powder in common use, is very small. I would recommend for breech-loaders, a moderately coarse grain; it burns more slowly; the full charge is ignited before it leaves the barrel, and, consequently, the shot get all the momentum there is in it. In addition to this, it leaves less residuum after combustion, and the gun is easier to keep in order. If the Dittmar powder could be relied on, as being safe and uniform in its action, it would be the sportsman's desideratum. Unfortunately, however, it is not always to be depended on. My first experience with it was delightful; there was "no smoke, no recoil, and no dirt." I have been trying it again this season, and find it, not relatively, but positively worthless. While it may be true that the particular powder I have been using was an exception to the general make, still my experience demonstrates the truth of what I have said. As to the charge, of course that varies with the guage of the gun. I have never seen the utility of the very large charges so much in vogue. I find that 2¼ drachms answer every purpose, and the sportsman's ears are not deafened with cannon-like reports. I would therefore recommend the charge mentioned, as being amply sufficient for any gun not larger than 12-guage; this, with 1-ounce No. 10 shot, will kill a quail, snipe, or woodcock with certainty, or at least reasonable certainty, forty paces, if the gun be all right and well aimed. As to the personal equipment of the sportsman, I shall leave that to his own taste, only cautioning him against buying the very costly shooting suits, so assiduously advertised, unless indeed he desires to appear as a perambulating advertisement for some fashionable tailor. Hunting is rough work; and briars and thorns have no more respect for a forty dollar than for a ten dollar suit. Have the feet comfortable, the arms free and easy, and no superfluous straps to interfere with the movements of the gun. I have missed many a fair shot by getting my gun entangled in the straps, used for carrying pouch and flask, when I used a muzzle-loader. And, only the other day, I failed to bag a bird that sprung in the fairest possible cover, because my gun caught in my shooting-coat, which happened to be buttoned up at the time. These may appear unimportant details, but the man who persistently neglects details in any of the affairs of life will never be successful.

I believe by common consent the quail, *Orthyx virginianus*, is regarded as the representative American game bird; I shall therefore confine myself to directions as to how to find and kill the nimble and swift-of-wing "Bobbies." Woodcock and snipe shooting is, at best, but episodical in its character; and taking into consideration the favorite haunts of these birds—dense swampy coverts, and slushy, boggy quagmires—the sport of killing them is not to be compared to that of bringing down the whirring quail. One great mistake made by sportsmen in hunting quail, is that they start out too early in the morning; the birds are then seeking their feeding grounds—are running, and will never stand well to be pointed. Wait until the sun has dried off most of the dew, and you can hunt with decidedly more comfort to yourself, as well as to your dog. The birds will have finished feeding in a great measure in the meantime, and will be quietly resting in some grassy covert in their feeding grounds, or immediately contiguous thereto. Their flight will not be so long, and their movements more sluggish after taking flight, which however they will do very reluctantly.

Enter the field, if possible, so as to hunt up wind. A dog will do much better work if this advice is followed; and, though I am trenching somewhat on what will properly come under another head, endeaver to make your dog *understnnd* the difference between pattering over ground scents, and hunting with his head well up. The best dog imaginable is likely to run over his birds, particularly early in the morning, if he hunts ground scents, or if he hunts down wind. A little patience and care on this point will be amply repaid. After your dog has established his point, if you are disposed to be nervous, remain perfectly quiet, or stationary, for a full minute. This will serve to steady you, and will teach the dog habits of stanchness. In the meantime, cast your eyes around, to see in what direction the birds are likely to fly when flushed. If there is a cover of any sort, woods, or swamps within a radius of three hundred yards, you may be sure the birds will make for it; and, in the absence of woods and swamps within reach, if there be a depression or hollow, or ditch, or fence overgrown with grasses or briars and weeds, the chances are as ten to one, that the birds will go there. After you have taken this observation, settle, as well as you can, from the direction of the point, the exact location of the birds; then make a small circuit, so as to approach from the direction in which the birds are likely to fly. This plan possesses two advantages: the birds, in passing, should they persist in going to the covers, will give the sportsman the fairest possible shot, with the chances of his striking a vital part, considerably increased over a dead-away one; and in using the second barrel, the smoke from the first does not interfere. Again, if there be a cover, such as I have spoken of, the probabilities are that the birds will go in the other direction, and thus afford some fine single bird shooting. I have very frequently seen a covey kept by these tactics from dense cover, into which it would have been folly to have followed them. Walk your birds up slowly and deliberately; do not rush on them, as though you were frightening an obstreperous pig; and do not shoot the moment they get out of cover; you will miss entirely, or tear your bird up so that it will be useless. Wait till the bird has passed you; if they persist to cover, or, in other words, in passing cross shots; or, if they be going straight away, until fully twenty paces off, it will then be time enough. The bird, in the meantime, has gotten straight in its flight; if shooting a crossing bird, aim about a foot ahead, or have the sight apparently an inch in front of the bird; pull trigger lustily, the moment your gun gets to your shoulder, and my word for it, if you have practised the lesson given in the preceding paper, you will bag the bird. Don't wait, however, to speculate on the probabilities of your having killed—the birds are going like lightning. Again: select your bird; and, as the distance has increased nearly double, or quite so, aim two feet ahead, or have the sight two inches in front of bird Of course it frequently happens the birds pass so near the sportsman, that the angle at which he shoots is not above ten or fifteen degress, in which case he must aim a very little in front of his bird. The rule given above will apply to a square cross shot, or, say an angle of ninety degrees—the bird at a distance of twenty paces. If the angle be less, or the bird further away, diminish or increase the distance aimed ahead, proportionately. If the bird be going straight from the sportsman, of course he ought to cover him exactly, if possible. After you have put in both barrels, don't get excited; keep perfectly cool, if possible, or as cool as you can—at any rate, remove your empty shells, if using a breech-loader, or proceed to load, if using a muzzle-loader. After you have finished loading, no matter whether using a breech or muzzle-loader, bid your dog hold up. I will take it for granted that he has either held his point, or dropped to shoot, which is better. If you are *certain* you have killed a bird, tell him to "fetch." I say certain, advisedly, for no man can hope to have a good retriever who makes his dog look for a bird that has never been killed. He will soon learn that there is some doubt about the matter; and even when the sportsman does kill, will not look up dead game half as industriously. And again I would say to the young sportsman, keep cool; if your dog does not find the dead bird as readily as you would wish, don't you get out of patience with him; endeavor to calm him, if he is wild or excited, and do so in as quiet a manner as possible. Nothing is half so infectious as excitement; and if your dog sees you are not calm, he takes it as *carte blanche* permission for him to run wild.

One thing I forgot to mention: If the sportsman is not provided with a marker, he ought to try to mark his birds down as well as he can; this is not so easily done when he uses both barrels at the rise; he can, however, locate the game very nearly, or, if his dog be an adept at his business, he will assist very materially. Practice, in marking, can alone make perfect. The best plan is to keep the eye well ahead of the birds, when they are ready to alight; they will perform the arc of a circle, fold their wings, and come to grass. And now comes the most difficult part of the young sportsman's work; difficult, because it requires slow, careful and deliberate work on the part of both sportsman and dog. My observation has been that, to ten good covey dogs, you will find one good single bird dog, and the proportion of sportsmen who work up the scattered birds thoroughly, is still smaller. In the South, where I have done all my shooting, this arises principally from the abundance of birds, the sportsman preferring to look up another covey rather then devote so much time to the one already scattered. This plan is wrong, however, both in principle and practice; it works badly on dog as well as man; the man it teaches to do his work in a hurried, slovenly manner, while the dog can never be depended on for careful and thorough work should it ever become necessary.

I would advise the young sportsman, after he has bagged his birds, killed on the rise, to wait ten minutes before looking up the scattered birds; if his dog did well, caress him, and let him know he appreciates his obedience and zeal; the interval will serve to steady sportsman and dog, and the birds will become settled. When approaching the ground, where the birds likely dropped, send the dog forward, steadying him by frequent commands, and making him work always directly in front, swinging backward and forward after the manner of a pendulum. If the sportsman finds the birds run after alighting, and the dog is disposed to road them up by ground scent, check him sharply, bringing him to heel; make a detour, so as to get beyond the birds, then work toward them from the direction in which they are running. The advantages of this plan, if the conformation of ground will permit its use, are obvious and decided. It is one of the hardest things in the world to make a dog do satisfactory work when following up a fresh ground scent, even if he hunts with his head well up; more especially if he be working up wind; the strong scent, arising from ground and coming down wind, confuses him, and he is apt to make a long point, if cautious, or to flush his birds outright, if disposed to press his points. If, however, the birds have not moved—and they are not likely to do so, if the cover consists of grass, briars, or rag weeds—keep the dog well in hand, hunting thoroughly every part of the ground, over and over and again if necessary. Do not give over hunting for them too readily; frequently they lie so close, they will suffer themselves to be trodden on, before taking wing. When at last the dog makes point, approach him cautiously; the probabilities are very strong that you will spring one or more birds in going to him, and, remember one thing—never budge an inch without being ready for instant work. After you have walked up the pointed bird, the sportsman is treading on enchanted ground, and his ears may any moment be assailed with the sharp whir of rising quail. Do not leave the ground until you have sprung something like the number of birds you may think dropped there. Whether or not the quail has the power to withhold his scent, I do not pretend to say; but they have a way of allowing hunter and dog to walk over them, which is puzzling to say the least. The tactics I have

suggested will do for successive covies, and I will pass to the consideration of the dog. If the sportsman has diligently applied himself to the lessons given, experience must finish his education. I can but remark in conclusion on this point, that the old Latin adage, *Poeta nascitur non fit*, applies with equal force to sportsmen.

Cairo, Ga., Oct. 6th, 1879.

P. S.—In what I have said of the Dittmar powder, I do not wish to be misunderstood. I am not actuated by a spirit of captious opposition; on the contrary, I would be more than pleased, if my last experience had been as pleasant as my first. If the white, or paper powder, could be depended on in the matter of penetration, I would regard it as the greatest boon to the sportsmen of the past quarter of a century. What sportsman has not been annoyed by the abominable smoke from the black powder? And further, I am bound to confess that the Dittmar Powder Manufacturing Co. seem to desire honestly to benefit the sportsmen of the country; they listen very attentively to all complaints, or at least they did so in my case; and I can but indulge the hope, that they may speedily overcome the defects of their powder, and be able to furnish an article that will give general satisfaction.

Fish Culture.

PROTECTING THE MISSISSIPPI FISH.

THE following "Plea For Protecting The Mississippi River System," was read by Dr. R. O. Sweney, of St. Paul, before the Central Fish Cultural Association at Chicago, Oct. 2nd:—

He desired to call attention, he said, to the particular and marked omission of legislation in the commonwealths bordering upon the Mississippi River and its navigable, State-dividing tributaries, either regulating, restricting or prohibiting wanton, abusive and exhaustive fishing. He thought that the remedy, to be effective, must emanate from the national legislature. There were, besides the resident despoiler of the waters, those who use arks or fishery-boats, which are anchored at various points along the rivers wherever fish abound. These arks are inhabited by amphibious people, citizens of nowhere in particular, and yet voters everywhere in general. Sometimes as many as fifteen men to an ark are employed, slaughtering fish with trap and set-nets of such destructive character as literally to let nothing escape. Their mode of procedure is thorough and systematic. The secrecy with which their nets are placed, and usually attended, gives no evidence against them to the majority of the world. Occasionally an early or belated sportsman witnesses the haul they make when the nets are emptied, and sees the wanton and wasteful destruction of small fish, too small for market, left dead to rot and taint both air and water on the beach. They dispose of the selected spoil in supplying the daily wants of the nearer villages and towns, selling to hotels and dealers the less marketable, while thousands of pounds of the largest and finest fish are sent to the greater cities by the daily trains. They often actually depopulate a stream, or come so near to it that an outraged neighborhood drives them off by threats.

The author thought that netting and trapping should be interdicted, and only fishing with hooks and lines permitted; and in case of set lines, only a certain number of hooks to a line, and no one person allowed to set, own or control more than a limited number of lines within a certain limited distance. The streams within the jurisdiction and control of local legislation can be, and usually are, protected by such laws, but the generous laws of the United States allow too much liberty in this matter of fishing in the great highway rivers. One man, if he so determines, may selfishly deprive whole communities of their rights to catch and enjoy fish simply because he can derive profit thereby.

Another good and sufficient reason for prohibiting nets in the Mississippi is that the attempts being made to introduce shad and salmon into the great valley system by both the United States and state commissions should have a fair and unobstructed field for the experiment of the final success of which the author had most sanguine hopes.

He thought that an efficient remedy would be congressional legislation, in effect that all persons who catch fish as a business and to sell from any public waters whatever, should pay a certain sum of money as a license for such privilege, the sum to be regulated in amount according to the mode of catching and appliances used, and quantity of fish captured; the money paid for the said licenses to be expended for the continuous propagation and restocking of such waters; or, in lieu of such money, they might deliver a certain quanity of fertilized spawn to the United States or State Fish Commissioners, as national or State laws would indicate, for the restocking of the same waters. The sum necessary would be but trifling, and the expenditure a good investment, even a benefit, and an increasing income to the fishermen, and not only to them but to the community at large.

He asked the coöperation of every gentleman present in urging firmly and persistently the necessity of systematically stocking the Mississippi and its affluents with shad and salmon. If they united, the United States Commissioners would give a respectful attention to the request.

MORE OYSTER STATISTICS.

THE mathematical man of the Philadelphia *Times* has been computing the magnitude of the American oyster trade. This is what he makes them:—

Oysters are planted and grown in the bays, deltas, and river inlets of more than three thousand miles of our Atlantic coast. Three thousand acres are so occupied in the Chesapeake bay and its tributaries. These Chesapeake beds yield to our commerce over 35,000,000 bushels annually.

In the one city of Philadelphia, I estimate, there are over four thousand places where oysters are sold for consumption on the premises. One Philadelphia oyster cellar, three years ago, sold 7,000 oysters, on the first day of September. Twenty dollars would be a moderate average for the sales of all these 4,000 oyster restaurants, saloons, and cellars. This would bring the total daily sales up to $120,000 a day. Multiply the daily sales by 240 days would swell the yearly aggregate to $30,000,000 a year for oysters in Philadelphia. And yet this estimate is probably considerably below the actual fact.

New York city probably sells twice as many as Philadelphia; and Boston and Baltimore together more than New York again. Aside from the home consumption, the shipments to our inland, Western and even Pacific States are enormous. The appetite of all inland and mountain men for all sorts of shell fish is something huge. Baltimore employs more than $15,000,000 in the canning of oysters. More than 20,000,000 bushels of oysters are canned a year in that city.

On account of their superior excellence American oysters are now exported in vast quantities to England, France, Germany, and other European countries. These exportations are mostly in cans, but immense quantities are now shipped abroad in the shell. After to-morrow you will not see an ocean steamer go out of Philadelphia, Baltimore, or New York which does not contain a hundred barrels or more of American oysters still in the shell. The total of our oyster trade approaches much nearer our annual crop of cotton and wheat than any one who does not make these things a special study would be willing at first to credit. I am satisfied in my own mind that our total oyster trade, domestic and foreign, exceeds $300,000,000 a year, while the total annual consumption in this country, and our shipments abroad would exceed the amazing total of 50,000,000,000 oysters.

Prof. Brooks, of John Hopkins University, has been experimenting upon the artificial propagation of oysters. The process of making embryonic bivalves is as follows:—

Half a dozen served on the half shell served on a plate, a few watch crystals, a small glass jar, a little water, and the microscope constituted the laboratory. The oysters had been taken fresh from their beds and opened carefully. In this way they will live for a day or two if kept in a cool place, and all the while the heart may be seen to pulsate in its cleft next to the muscles. Close to the heart lay what is usually called the "fat," but which is really the reproductive organs. These are wrapped all around the stomach, liver, and digestive organs, the latter being the "belly" or dark parts of the oyster. The flaps extending around the whole of one side of the shell are its gills, through which it breathes and separates its food. The mouth is at the butt end of the shells, where the hinge connects them. Male and female oysters on the half shell cannot be told apart, and indeed one in fifty is believed to be hermaphrodite. It is claimed that oysters are female when young, and males when they become old and larger. But the facts have not been established with certainty, nor is it of importance. To produce free swimming ciliated embryos, the operator pinched away with tweezers a particle of the generative part, put it into a watch crystal, and stirred it until the eggs were well shaken out. The water was now milky from the great number of eggs. The microscope determined the sex, which in the present experiment proved to be male. Under the microscope these male cells appeared to be dots, perpetually in active motion, and each one of them being sufficient for impregnation when properly lodged. The female eggs are 100,000 larger than the male cells, but are invisible to the naked eye. Having been washed out into separate watch crystals, the eggs are mixed with the male cells. Then viewed under the microscope, the male cells are seen to attach themselves vigorously to the egg in eager crowds, but only one of the many is supposed to impregnate. The first change apparent is the disappearance of the germinal vesicle and this is accomplished in a very few minutes. The egg then becomes spherical and remains quiet for one or two hours, when a kneading process becomes visible. A globule appears on the surface, and this is the beginning of segmentation. Then by degrees the egg becomes divided into smaller and smaller granules. This process of subdivision occupies two hours, and at the end of this time a small, transparent swimming embryo is found, which is the oyster in its infantile state. The whole process occupies from four to six hours, according to the temperature, although in the present instance it was brought to a successful issue in four hours. Professor Brooks, in his previous experimenss, had raised oysters till they possessed the cilia, which served to propel the microscopic animal; but they died without further revelation of the mystery of life. In the present experiment he had the satisfaction of developing the embryos until he could clearly trace their digestive organs, and he is inspired with the hope that continued watchfulness will enable him soon to see the infants begin to assume their armor of shells. It is believed that there is no specific time for the spawning season of the oyster, and that it continues throughout the summer months, though this is a point not yet definitely settled.

FISH COMMISSIONERS.—The following list of the Fish Commissioners of the various States will be found useful:—

United States—Prof. Spencer F. Baird, Washington D. C.

Alabama—Charles S. G. Doster, Prattville, Autauga country.

California—S. R. Throckmorton, B. B. Redding, San Francisco; J. D. Farwell, Alameda.

Colorado—W. E. Sisty, Brookvale.

Connecticut—W. M. Hudson, Hartford; Robert G Pike, Middletown; James A. Bill, Lyme.

Georgia—Thomas P. Janes (commissioner of agriculture and ex-officio commissioner of fisheries), Athanta.

Illinois—N. K. Fairbank, Chicago; S. P. Bartlett, Quincy; J. Smith Briggs, Kankakee.

Iowa—B. F. Shaw, Anamosa, Jones county.

Kansas—D. B. Long, Ellsworth.

Kentucky—Wm. Griffith, president, 166 West Main st., Louisville; John B. Walker, Madisonville; Hon. C. J. Walton, Munfordville; Hon. John A. Steele, Versailles; Hon. J. H. Bruce, Lancaster; P. H. Darby, Princeton; Dr. S. W. Coombs, Bowling Green; Hon. James B. Casey, Covington; Gen. T. T. Garrard, Manchester; Hon. W. C. Allen, Owingsville.

Maine—E. M. Stilwell, Bangor; Everett Smith, Portland.

Maryland—T. B. Ferguson, of Baltimore, (Address No. 132 M. street, Washington, D. C.); Thomas Hughlett, Easton.

Massachusetts—Theodore Lyman, Brookline; E. A. Brackett, Winchester; Asa French, Boston.

Michigan—Eli R. Miller, Richland; A. J. Kellogg, Detroit; Dr. J. C. Parker, Grand Rapids.

Minnesota—First district, Daniel Cameron, La Crescent: Second district, Wm. W. Sweney, M. D., Red, Wing; Third district, R. Omsby Sweney, chairman St. Paul.

Missouri—I. G. W. Steedman, chairman, No. 2,803 Pine street, St. Louis; John Reid, Lexington; Silas Woodson, St. Joseph.

Nevada—H. G. Parker, Carson City.

New Hampshire—Samuel Weber, Manchester; Luther Hayes, South Milton; Albina H. Powers, Plymouth.

New Jersey—Dr. B. P. Howell, Woodbury; Col. E. J. Anderson, Trenton; Theodore Morford, Newton.

New York—R. Barnwell Roosevelt, 76 Chambers street, New York; Edward M. Smith, Rochester; Richard U. Sherman, New Hartford, Oneida county; Eugene G. Blackford, 809 Bedford avenue, Brooklyn.

North Carolina—L. L. Polk (commissioner of agriculture), Raleigh; S. W. Worth (superintendent of fisheries), Morgantown, Burke county.

Nebraska—Rt. R. Livingston, Plattsmouth; H. S. Kaley Red Cloud; W. L. May, Fremont.

Ohio—J. C. Fisher, president, Coshocton: R. Cummings, treasurer, Toledo; L. A. Harris, secretary, Cincinnati.

Pennsylvania—H. J. Reeder, Easton; Benjamin L. Hewit, Hollidaysburg; James Duffy, Marietta; John Hummel, Selinsgrove; Robert Dalzel, Pittsburg; G. M. Miller, Wilkesbarre.

Rhode Island—Albert A. Reed, Providence; John H. Barden, Rockland; Newton Dexter, Providence.

South Carolina—A. P. Butler, Hamburg.

Tennessee—W. W. McDowell, Memphis; Geo. F. Akers, Nashville; W. T. Turley, Knoxville.

Utah—A. P. Rockwood, Salt Lake City; (absent; information from Prof. J. L. Barfoot, curator Desert museum).

Vermont—M. Goldsmith, Rutland; Charles Barret, Grafton.

Virginia—Col. Marshall McDonald, Lexington.

West Virginia—Henry B. Miller, Wheeling; Christian S. White, Romney; N. M. Lowry, Hinton.

Wisconsin—Gov. William E. Smith, ex-officio, Madison; Philo Dunning, president, Madison; J. V. Jones, Oshkosh; C. Valentine, secetary and treasurer, Janesville; Mark Douglas, Melrose, Jackson county; John F. Antisdel, Milwaukee: Christopher Hutchison, Beetown, Grant county; H. W. Welsher, superintendent, Madison.

CALIFORNIA TROUT IN NEW YORK STATE—*Wellsville, Oct. 18th.*—Last summer we placed in one of our streams—a tributary of the Genesee—15,000 young California trout given us by Seth Green. Although the water has been and yet is very low, the little fellows are thriving, and are as lively as crickets. They are now about twice as large as the brook trout fry of the same age. I think they will grow up to "manhood" with us. If so, will then write you whether or not "they bite with their tails."

CLARENCE A. FARNUM.

Natural History.

ST. CLAIR ON THE ROBIN.

DURING last May I wrote you a little sketch, a continuation of "Southern Wood Notes," in which I mentioned in rather a playful manner the habits of some birds. No attempt was made at a scientific description, but some notes were inserted concerning the habits of our migratory birds, which I trusted might prove interesting to Northern naturalists. Among other birds mentioned were the crow and robin. About the robin, especially, several of your correspondents have been much exercised in their vast and powerful minds. A storm of righteous indignation is poured upon me for my sins, in that I have made Cock Robin a cool, deliberate, unmitigated inebriate! One gentleman from Texas, whom to know I would ride many miles, does not dispute the truth of my position, but says that he will believe that robins do get drunk, if I (St. Clair), will say that they do. Now this gentleman is of a good mind. He appreciates the difficulties under which any one labors who tries to establish facts of the most trivial character in natural history. Do those other writers who have rushed so madly into print, think of the ceaseless toil and watching that are necessary to find out so very small a matter as robins getting drunk? No; they never think of it. Does any of them think that I would attempt to mislead honest gentlemen? No, they care nothing for the accuracy of my researches. They simply think that they have found me in a literary trap, and that they can gibe at me. They will find that I, too, can give blows. But they shall be struck, as a gentleman strikes, fairly and squarely; so, with the black flag flying on the robin question, have at you, Messieurs!

Years ago, in the time when all men were brave and magnanimous and chivalrous, and all women had beauty, and none were there but were intellectual and strong-minded; in the halcyon days before the "wah," in short, I noticed that robins were in the habit of falling stupefied to the ground, after a long-continued feast upon the berries of the China tree.

Again; some were not stupefied at all, but were as sober as judges—ought to be!—and they looked with ill-concealed contempt upon their more convivially inclined associates. Some, in the frolicsome stage, would buffet their companions with their wings; and, altogether, would present a most rakish and dissipated appearance.

Now here was a seeming contradiction. All ate of the berries. *Ergo*, if one got drunk, all should get drunk; or there must be seasoned "bummers" among them, who, being drunk, carried it off as some men do, with an owl-like gravity, and a wisdom most edifying to behold.

To satisfy myself that those birds were drunk, and, like honest Cassio, had "put an enemy into their mouths to steal away their brains," I took several one evening to my room; which room was the chosen resting place of myself and an incipient sawbones. He knew enough of medicine to know the most powerful antidotes to alcoholic poisoning, and we applied them in a diluted and cautious way to the gay and festive robins, our patients. I am sorry to record that not one thanked us for our efforts, but they flew out of the window, nor paused to pay any medical fee.

Perfectly recovered? Had you seen them, as they went careening over the tree-tops, you would have thought that some fellow had been giving them hock and soda after a night's debauch.

But the most curious part of the whole affair was the comical resemblance each robin bore to somebody of our acquaintance, when in his caps. There was one old robin, a very Falstaff in size and vinous tendencies, who had the same moist eye, the same love of sack, and the rakish air of Sir John.

One when the antidote had its full effect upon him, actually winked at me and the immature sawbones in the most paternal manner. Another, on staggering to his feet, like old Col. L——, tried to get into an affair of honor, for he pecked fiercely at us both.

Having established to my satisfaction that robins did get uproariously drunk, while others eating the same food did not leave the thorny paths of sobriety, I determined to investigate the matter.

Well, I found it just as I stated it to be. Some berries contain the alcohol in solution; others do not. Why, is one of those things that we cannot find out. So, Cock Robin gets hold of one or more of those berries in a morning and gets drunk. "Vell, wot of it!" He gets drunk and he enjoys it; and, he is not ashamed.

One would suppose from the eagerness with which your correspondents seek to vindicate the character of this bird, that they were the lineal descendants—no that couldn't be—the near relatives, of the "Babes of the Wood," whom his ancestors covered long ago, in Merry England, with leaves.

There is an odor of romance hanging about Cock Robin, from which it is hard to dissociate ourselves. From the blood red picture of him, having his breast transfixed by that unerring archer, the sparrow, down to that immortal pair that covered the "Babes in the Wood," we learned in our callow days to take him to our bosoms, as an exceptional bird. Nor have we "gone back on him," in our mature manhood. Witness the gigantic pot pies made of him; fat, tender, and juicy, around which memory fondly lingers.

Apropos des bottes (*Apropos des pates* would be better). One of your correspondents, hailing originally, I presume, from Mississippi, speaks of killing enough robins for a pie; during which sporting episode, he caught one, and then let him go! I have lived in Mississippi, and I have never seen an inhabitant of that State who would voluntarily let a robin go, when visions of pot pie were looming up in his excited imagination. In fact, they say that gentlemen living in that State, can't shoot straight enough to hit a robin; depending for their birds upon the well known convivial habits of Cock Robin.

Be that as it may, slanderous, or true, I know that they (the correspondents aforesaid), ask us to believe a Baron Munchausen story, when we are told that one of them let a robin go!

In concluding this part of my letter, let me say that gentlemen should be chary of disputing facts, or theories, even in natural history, unless they have fully examined their ground. However, that the gayety of nations may not be eclipsed, I hope that they will continue writing.

Another gentleman, who acknowledges that he has never read my article, evolves from his inner consciousness a pet theory of his own anent crows, with which he crowns me.

As to crows. However much advantage there may be in more northern latitudes, in eating up grubs, worms, and insects generally, they are certainly graminivorous in the South.

Ask any old farmer in any southern state, if a crow will pull up young corn, and see what his answer will be. In the most emphatic, in the most unhesitating manner, he will say: "Bless your soul, they don't do anything else." Well, now, I made my statement and I stick to it; that the crow is the brainiest, most rascally, most thievish bird in America. There! ST. CLAIR.

Bartow, Ga., Sept. 24th.

PERDRIX ROUGE.

THE *Perdrix rouge* or red partridge of France, is one of the wariest and hardest dying birds it has ever been my lot to meet with. Were they found in open fields, as are the grey partridges, the shooting would be easier; but living, as they do, on the tops of the most thickly over-grown mountains, and in almost impenetrable thickets, it takes an ardent and persevering sportsman to do any execution among them. As is well known, they will not lie well to a dog, and when once flushed, are apt to make long flights, rendering pursuit practically useless. They have besides a disagreeable little habit of running when frightened, seemingly having more faith in their legs than in their wings, scuttling through the bush ahead of the dogs and never taking wing unless come upon suddenly, and caught unawares. For these reasons the red-legged partridge is very little hunted in France where indeed they are rather scarce, being chiefly found near the Pyrenees Mountains and through the most southerly portion of the country. Market hunters, however, are willing to undergo an immense amount of work to secure this bird, since it is only inferior to the woodcock in the eyes of the French connoisseurs.

I was determined, notwithstanding the remonstrances of my friends, to have a day after the partridges; so one day in September, after much persuasion and no little bribing of Jacques, whom I have mentioned before, he consented to guide us to the haunts of the partridges, inserting the proviso that we were not to blame him if we found more obstacles than birds. It was well that he made this stipulation, for the rough climbing and fatigue of the trip was out of all proportion to the number of birds secured. Indeed, had we known what we were going into, it is very doubtful if we would have started.

The one advantage, and about the only one that the red-legs have over other birds, is that you are not obliged to get up early in the morning to shoot them. Such a preceeding would be entirely unnecessary, since for some hidden and mysterious reason no one was ever known to find one before the sun was up. This may be due to the inherited laziness of French nature, or we might explain it by saying no Frenchman was ever known to arise himself before the sun. Both reasons would be unsatisfactory, but still the fact remains. The birds are not found early in the morning. There is a good deal of romance, perhaps, in arising early in the morning before the sun has driven away the mist, but there is more romance than comfort, and according to Art. Ward, it must be dangerous, since he says, "the only danger of French duelling is the fact that the parties concerned are apt to catch cold by being out so early in the morning;" and this may apply as well to hunting parties.

But to proceed to our sport. At the moderately comfortable hour of 7 o'clock, our guide awakened us from our slumber, and in the course of an hour's time we were *en route* for the mountains which were to be the scene of our introduction to the *perdrix rouge*. After much scrambling and some tumbles we reach what appeared to be a small plateau on the top of the mountain, where Jacques assured us we would find a *compagnie* of birds; and he proved to be right, for scarcely had we traversed half of the open place, when the dogs commenced to work and immediately flushed two birds, which were killed no one knew by whom, as four of us fired at them. They proved to be the old birds which, were led to take wing so soon in hope that they would be followed and the young ones left alone.

Had they not been killed at the first fire, their trick (a very common one with these birds) might have succeeded; but, as it was, we immediately went about hunting the young birds. We found them some hundred yards down the hill, but we could not flush them. The dogs trailed them for some distance, and we did not put them up until we had driven them down the side of the mountain, and into a cornstubble field, when by approaching them from both sides and allowing the dogs to run in we managed to get a shot, killing two more. The rest escaped up the hill again and we deemed it better not to follow, having already hunted two hours after one convey with the poor result of four birds, and being assured by our guide that the chances of again finding the birds would not pay us for climbing the mountain again.

After taking a little *déjeuner* after our work, we proceeded on our expedition, hoping to find another covey of birds. All the rest of the morning and all the afternoon we climbed and re-climed the mountains and not infrequently we found birds, but as for making them take wing, one might just as well have flushed a rabbit and expected it to fly. Time and time again the dogs struck the scent, but no matter how persevering we were, it was quite impossible to get any more shots. There was no help for it. We were obliged to return without seeing another bird. Of course we made it a point to revile our friend and guide in our best French, but that did not bring any birds to bag, so we finally were obliged to stop, as much in want of words as breath.

The conclusion we unanimously came to, as regards red partridge shooting, or rather hunting, was, that it was a fraud and delusion, and that the result did not justify the labor spent. We determined that our first attempt should also be the last, and that we would turn our attention and guns against game not more worthy of them, but less difficult of access.

However, our day spent in the Pyrenees was not thrown away. We had added something to our knowledge of the habits of birds, and enjoyed the opportunity of seeing how the red-legged partridge was pursued in France. W. DE F.

ARE THERE MOSQUITOES IN FLORIDA?

Mr. Editor:—

After a forty days' rain—which flooded the flatwoods between this place and Enterprise, during which time our papers were delayed—we have at last a little sunshine, and with it a portion of our paper mail and several numbers of the FOREST AND STREAM, which is ever welcome and eagerly read by all, from the head of the home to my little six-year-old boy, who delights in the pictures of the guns, boats, fishing-tackle, etc. I read every paper, even to the last "ad;" and judge of my surprise when I read the article of Samuel Fairbanks, dated Oct. 2d, in answer to "Al. I. Gaitor." I first thought I had lost a paper and had not read the paper referred to; but on looking over my file I found it, and see but little to complain of—in fact I consider it is more truthful than that of Mr. Fairbanks, in which he states "that he has ignorantly or wilfully stated what is not true," and quotes "Al Fresco," who says "he has never lost an hour's sleep on account of mosquitoes." Now let us take the FOREST AND STREAM of Sept. 25th, article by J. A. H. on East Florida. He was bound to see this country, and in order to get full information called on "Al Fresco." I now quote: "To my regret he informed me he had never been in Indian River country. He endeavored to dissuade me from my contemplated trip to that region; said we would be devoured by the fleas, sand-flies, mosquitoes, etc." Now, J. A. H. came and spent the winter on Indian River, and lived to return and write a history of his trip to the FOREST AND STREAM, and I will venture to say that, while he found the insects troublesome at times, he enjoyed the trip, and if he ever comes to Florida again will visit this coast. I prefer that the immigrant to Florida should come here believing that the fleas, sand-flies and mosquitoes are as thick as the sand on the seashore, rather than that he should come thinking he will not be troubled with them. I have been in Florida since April, 1864, spring, summer, fall and winter, year in and year out, and during that time I have been located in West, Middle, East, and am now permanently in South Florida, and have yet to see the place that one's rest will not be disturbed by mosquitoes unless protected by netting.

The festive mosquito came in force this year June 1, and has not yet left. There is no use in denying that we have more mosquitoes than we have any use for from June to November, and some few all winter. Nor is it any use to tell people, if they come here to locate or to hunt or fish, that they will be devoured, for this section is fast settling, and when this county is settled by live, energetic farmers and fruit-growers, the lands cleared and drained, this, the only drawback, will soon be a thing of the past. The mosquitoes have been so bad during a portion of August and September that all work was abandoned, save on a windy day, and then it was tough work to do anything.

As to the Indians killing all the game, let me state that all persons desiring to come to this section to fish or hunt can find all they want; and those desiring to come, and wishing to know how to get here with their outfit, and when to come, can get all the information they may need, by writing me, fully stating what they wish to do. Hundreds are deterred from coming here to settle or to spend the winter by stories told them of the insects by men who have never been here. A few years since on my return from Washington I stopped in at the Brock House at Enterprise, and before registering I asked the landlord how I could get over to the coast. He at once told me a fearful tale of the dangers in going over, in consequence of the roads being flooded, and said if I did get over I would be eaten up with fleas, sand-flies and mosquitoes. After he got through I asked him if he would please answer my questions, stating to him that I had lived there nearly five years, and when I left I had a family, and if they were devoured I wanted their remains.

He had never been there, and had been in Florida but a few weeks, but long enough to give the usual reply to all who wish to visit the Halifax, Hillsborough or Indian River country, for it is all one to people in Jacksonville.

Now, I have lived here since July, 1869, and "still live." I like this section, and so do most of those who come here. No better place to hunt or fish in the State. Good boarding-houses and hotels; and most, if not all, who come once come again. But to all tourists who come to the State, let me tell you, among your outfit have a good sand-fly net, even if you come no further than Jacksonville. This is best made with two stout pieces of drilling, six feet long, sewed together, then get coarse, slazy, unbleached muslin, and cut it into six feet lengths. Sew enough of these together, which when done will go around the dwelling. To each corner sew in a thimble or ring by which it can be attached to stakes or the tent while in camp, and you will find it to be one of the indispensable articles in your outfit.

One word, and I am done. To all wish to hunt, fish or settle, or to spend the winter on the coast, come, all stories to the contrary notwithstanding. You will find good hotels and boarding-houses at New Britain, Daytown and Port Orange, on the Halifax, at New Smyrna, on the Hillsborough, and at Titusville, and all the way down to Fort Cypress. I have yet to see the place in Florida where mosquitoes are not troublesome at some time of the year, but I prefer them to the mud and slush of the fall and spring, and the intense cold of the northern winters, and the heat of the summer suns, with the attendant sunstroke—a thing unheard of in South Florida.
GEORGE J. ALDEN.

THE MOUNTAIN CAT.—Our correspondent Mr. Wm. Crapro, who writes from Cerro Gordo, Cal., desires some information as to this animal, which we are happy to be able to give. What we cannot give, but should be most happy to receive, is a full account of its habitat. Of the civet cat's life history but little is known. Cannot some of our readers give us some points about it. Mr. Crapro says:—

Be kind enough to oblige me by giving through your columns the correct name and genus to which belongs the small quadruped known from the Rocky Mountains to the Pacific as a "mountain cat." The animal when full grown weighs from 4 to 5 pounds; is from 10 to 12 inches long, stands 5 to 6 inches high; is a dun or mouse color; has a tail 17 to 18 inches long, bushy like a squirrel, with alternate black and white rings; feet and claws like a cat; with long pointed nose like a fox; teeth and mouth like a cat; large, wide-spreading ears like a cat's ears, only four times as large; large, black, beady eyes; growls, snarls, and barks like a coyote; is carnivorous, living on mice, birds, etc.; is nocturnal in its habits, is easily tamed, and makes a capital mouser.

The name *Bassaris astuta* was given to this little animal by Lichtenstein. Its habitat is given as Texas and Southern Rocky Mountains to the Pacific. We shall hope to hear from some of our friends before long a few facts as to the history of this curious little mammal.

WILD RICE.—*Janesville, Wis., Oct. 18th.*—I have all the wild rice there is in the country. The crop was a failure in many parts of Wisconsin and Minnesota, and but little was gathered. In sowing the rice care must be taken to sow where the roots will at all times have water over them. One foot of water over them is better than less, and four feet of water will do no harm. It grows best on mud bottom, and where there is little or no current, and will spread from the roots as well as from the seed.

At Lake Koshkong I never saw any rice allowed to ripen. The birds pick it while it is in the milk, yet every spring the rice comes up, and in many places has greatly increased. Last February, as an experiment, I planted a handful in a large aquarium that I have in my office. Some of it sprouted at once, while other seeds showed no signs of life until months afterward, a few only sprouting within the past month. I cannot account for this, but it shows that if rice planted last spring has not grown well during the past summer, still it may come on another season and do well. Last fall I sold a quantity of rice to a fish culturist, who planted it in one of his ponds to afford shelter for young trout. He now reports that it answered the purpose admirably. There is no doubt that the stalks are a great protection to young fish of all kinds. I have often noticed that the water in which rice grew swarmed with small fry.
RICHARD VALENTINE.

—The preface to Mark Twain's latest book says: "Written by one loafer for another loafer to read." Fortunately for Mark Twain he has an established reputation as a humorist. The quotation above is full of subtle and keen humor, no doubt, but if it had been Mark Twain's first-born, the world would condemn it as coarse, vulgar, and not at all funny.—*Brooklyn Union.*

—A foreign gentleman said to an employe of one of our railroads: "What is the next train to so-and-so?" "No. 4; but she is late, because No. 15, which is just behind 11, is not going out before 17 backs up before 6. Then 29 will go out before your train gets in, to let 17 come up on the track where 8 is."

—An old lady from New Bedford visited Boston recently for the first time, and while viewing the attractions of the Public Garden, was pointed out the bronze statue of Charles Sumner. "Well, I declare," the old lady remarked, "I never knew Sumner was a colored man before."

The Kennel.

NATIONAL AMERICAN KENNEL CLUB FIELD TRIALS.—Mr. E. C. Sterling, President of the N. A. K. C., writes us that Petoka, Illinois, on the line of Illinois Central Railroad, between Vandalia and Sandoval, has been selected as the spot for holding the Club Field Trials. The date is November 24th *proximo*.

The programme for the approaching Field Trials has been arranged, and is now officially announced:

First Annual Field Trials of the N. A. K. Club, will be held at Potoka, Marion Co., Ills., on the Illinois Central Railroad, between Vandalia and Sandoval, commencing November 24th, 1879.

Puppy stake, $300; to be paid in full. For pointers and setters under eighteen months. First prize, $150; second prize, $100; third prize, $50. Entrance, $15, with $10 forfeit. Free for all stake, $500; to be paid in full. Open to all. First prize, $250; second prize, $150; third prize, $100. Entrance, $25, with $10 forfeit. Brace stake $250; to be paid in full. For braces—first prize, $150; second prize, $75; third, $25. Entrance, $25, with $10 forfeit. All entries close November 24th, at 7 A.M. Trials to be run daily, on quail, commencing at 8 A.M., and continuing till 5 P.M. unless interrupted by rain, and to be run under the National American Kennel Club Field Trial rules. Judges: Theodore Morford, Newton, N. J.; E. F. Stoddard, Dayton, Ohio; Capt. Pat Henry, Clarksville, Tenn.

The ground selected is first class; there are two hotels in Potoka: ample facilities for reaching the trials which will be run very near town; location central and easily reached from all directions. The people are hospitable and will welcome sportsmen, and the trials will be a success. JNO. W. MUNSON, Esq.

MANGE CURE.—A reliable mange cure is what all owners of dogs have been long looking for. We believe it has been found in the article put up by Mr. H. C. Glover, of the Imperial Kennels at Tom's River, N. J., and sold by Messrs. Conroy, Bissett & Malleson of this city. We are familiar with the ingredients composing this remedy, and know them from practical experience to be the most effective for the purpose designed. See the advertisement.

ANOTHER GOOD DOG.—*Editor Forest and Stream*:—I see in your valuable paper so many articles relative to good dogs that I am prompted to send you a few notes of one of our good dogs. His name is Mack, and when the present owner came into possession of him was about two years old. He is very large-boned, heavy, orange and white in color, with a large, intelligent eye, black mouth and nose, pendant lips and finely feathered limbs. I shall never forget the first time I hunted with him. We found a covey of quail in a corn field, and as they would not lie for him he cautiously backed out, made a long circuit and came upon them from another quarter. This turned the birds toward us, and as soon as he scented them he stopped, when we flushed and shot a good number. I have often seen him stand a bird in a bush heap, and if we made no move to flush it he would back out and stand from the opposite side. This he would not do if we were at a distance. We were once shooting quail in a thick woods when one lit in a field near a small gully. When Mack came upon the trail he stopped, and soon making a circuit went out a few yards, stopped again, went through the same performance and passed on. This he did seven times. I suppose the bird had run a few yards, then sat down, ran again a few yards, sat down again, &c.; and there leaving a very much warmer scent. Not once did he stand the second time at the same place until he reached the end of this gully, where after stopping as usual he backed out, came to us from the opposite quarter and stood again. "There's the bird now." Sure enough, out flew the quail, only to return to *terra firma* in a very demolished condition. Is this instinct or reason? I have a pup from this dog, and on several occasions have I seen him do this same act. I do not like it, but admire the old and young dog's actions, and think if the young one inherit one thing from his sire, he surely will others. The old dog has a comical way of turning around—just like a cat trying to catch its tail—whenever he wants anything or is pleased, and this my young dog does whenever I go to feed him or get ready for a day's gunning. These are two traits I think he inherited from his sire.

On one occasion when out hunting Mack strayed from the party and could not be found. They called and whistled and presently heard him bark, only a few rods from them. They soon found him, and he was standing on a flock of quail that had just commenced to run away through the bushes. I suppose the birds remained quiet until they heard the shouting and whistling near them, and when they were moving off the dog barked. I have often seen him do this when the birds were running and we were at a distance. He once stopped, and raising his hindleg beside a bush in a very different position than setters generally do when standing game, stood thus until his owner and companion came from considerable distance and flushed two quail near him. Thus I could relate many curious and actual occurrences, but I do not wish to tax you too much. This dog has no pedigree. Yet I think he would take first in a field trial.

P. HULSIZER.

Bloomsbury, N. J., Oct. 20th.

DOGS ON THE JERSEY MEADOWS.—While paddling down a water course to reach the open water, two snipe, flushed at some distance, were seen approaching, and as they passed the mouth of the creek one fell to Harry's gun and one to mine; the dog jumping from the boat swam toward them to retrieve, and not wishing to make two journeys he just took one bird in his mouth and worked it as far back as possible; then swam toward the other, and catching it tenderly with his front teeth, brought both to the boat without in the least mouthing or injuring them in any way. This wonderful dog was the well-known red Irish setter Bill-E, late Al, sired by Conroy's imported red Irish setter Buck, out of Uncle Tom Jerome, imported red Irish setter bitch Nellie, she by a red Irish setter bred in the County of Meath, Ireland, out of Mr. H. Jaffray's Irish setter bitch Minx. A few days ago this dog was put down after two crack Jersey meadow dogs had hunted the meadows without finding game. When he—the red Irish setter Bill-E—covered the same meadow passed over by the above dog, five snipe were killed to his points. UNCLE TOM.

LOSS OF THE FOX TERRIER YOUNG SPORT.—Will you be kind enough to ask your readers to keep a look out for the above dog? He was lost from the kennels of Mr. Kaye just before the St. Louis Show, and is valued very highly by his owner. All sportsmen will confer a favor on Mr. Fox by keeping a look out for him. CHAS. LINCOLN.

—Mr. W. Fitch's (Kingston) red Irish setter bitch Queen Bess, and Mr. S. L. Pettit's (New York) bitch Beezie, of the same breed, have been bred to Mr. W. N. Collender's (Albany) champion red Irish setter Rory O'Moore..

—The black setter bitch, Flora, owned by Mr. G. Connatos, of, we believe, Detroit, Mich., whelped on the 18th inst. eight puppies, sired by same owners Jet.

—Mr. L. F. Whitman, of Detroit, has bred his setter bitch Fly to his Rattler.

—We shall feel very much obliged if correspondents in sending us breeding items will state the breed of dogs regarding which they are writing. We are obliged to leave several notices of this description unprinted for want of this information.

—Mr. J. Higgins' (Wilmington, Del.) Champion English setter bitch, Petrel, has been bred to Mr. H. W. Ganse's Carlowitz: also Mr. Emlen Hewes' White Rose to Carlwitz.

DOGS IN ENGLAND AND AMERICA.

THERE was at least one feature at the dog shows held in this city that struck the English judges, the Rev. Mr. Macdona and Mr. Wm. Lort, with surprise. We allude to the number of setters and pointers exhibited. And now another English sportsman bears witness to the remarkable number of dogs of the above-mentioned breeds bred and shot over in this country. In writing to the *Pall Mall Gazette* from Virginia, Mr. Bradley says:—

"The United States, if they are not now, must shortly be the headquarters of the pointer and the setter. The number of sportsmen who shoot over dogs, the number of dogs hunted and the extent of ground over which they are annually used in the British islands, even now sink into insignificance when compared with the corresponding figures on this continent. The cause is self-evident. In England the pointer and the setter are necessary only for the first few days or so of grouse-shooting, a useful adjunct for partridge-shooting in certain localities, and valuable on certain kinds of snipe-ground, with the fast-ebbing sentiment of the older portion of the sporting world to retard their total disuse. With the exception of the New England States, New York and Pennsylvania, where neither the quail nor the prairie-hen are found in sufficient numbers to save them from being made exceptions, the "bird-dog" is universally necessary, universally appreciated and unfailingly regarded as the most important element in a sportsman's outfit."

We do not understand why, unless from ignorance, Mr. Bradley should have made the exceptions he has, for certainly in the States he has mentioned pointers and setters are used, relatively, as much as in any other. And it might be not inaptly argued that the scarcer the birds the better the dog required to find them.

Mr. Bradley writes so pleasantly regarding American sport and sportsmen that we cannot refrain from quoting further from him. He says:—

"The *crême de la crême* of American wing-shooting being as a rule very hard work and the severest test of sporting qualities, both in the matter of endurance, straight-holding and the management of dogs, chokes off many a quasi-sportsman who in England would loaf through a day in the turnips or the coverts like a well-drilled private, but without an idea in his head regarding the science of the sport. How many of the rising generation of English sportsmen know anything at all about a setter—their points or their management in the field? I think I am right in saying that a general idea prevails in our tight little island that we are beyond comparison pre-eminent in matters pertaining to guns and dogs. A thorough acquaintance with this country would give the holders of such an opinion a severe shock. I am not speaking now of the manufacturers of the one or the breeders of the other, for in both matters America owes everything to England—but of the men who use them.

"Leaving out of the question the great army of big-game hunters that numbers in its ranks men of every class and every State—from the wealthy sportsmen of the Eastern cities who spend their annual holiday at their hunt-club lodges in the wilds of Maine or the Adirondacks, or light up with their camp-fires the lonely gorges of the Alleghanies, to the half savage rangers of the far West—leaving this, the old traditional sport of the country, out of the question and confining our remarks solely to the two principal branches of wing-shooting—quail and prairie-hen—let us take a cursory glance at the popularity they enjoy. The number of sporting clubs that of late years have sprung into existence—clubs for the purpose of bringing sportsmen together, preserving game, and restocking both fields and streams—is marvelous. There are city clubs, village clubs, and county clubs all through the Eastern and Southern States innumerable, not to speak of State associations and establishments for the breeding and importation of high-bred setters and pointers. A glance at Mr. Hallock's admirable paper, FOREST AND STREAM, would, I think, surprise most Englishmen; though owing to the size and sectional divisions of the country it could give but a faint idea of the growing strength of transatlantic sporting interests. The principal quail-shooting grounds for Eastern sportsmen are Maryland, Virginia and North Carolina; and the 15th of Oct. is a day eagerly looked forward to by all lovers of the gun. The forests are resplendent in all the glory of autumnal tints; the dreamy, sunny haze of the Indian summer hangs over the wide sweeping stubble fields, now knee-deep in weeds and wild grass; the air is crisp, the birds are generally strong and well-grown, and afford, I think, better shooting than an English partridge, whose place they occupy in this country, for several reasons. To begin with, they fly faster, and being smaller, are by universal agreement much harder to stop. Again, the coveys scatter more readily and afford far more single-bird shooting; moreover, they will on being flushed frequently fly to the woods, which latter being usually devoid of underbrush, a continuation of snap shots of every imaginable kind ensues, which puts to the severest test the steadiness of both man and dogs, giving a zest and a variety to the day's sport, which some people think is wanting in England."

OUR LONDON LETTER.

Editor Forest and Stream:—

An American from Philadelphia, who has been doing Europe, did me the honor of calling on me the other day on his way back. I was pleased to see a man from beyond the herring pond, and am proud to say that he, too, was pleased with all my little arrangements. But this American, who looked every inch a gentleman, as well as a republican, told me that when I visited the land of his birth, as I hope to next spring, I should see "a great country." I do not doubt it. I have always been an admirer of your institutions, but still I am not happy; and herein lieth my present grief—namely and to wit: Before me lies a schedule of your St. Louis Dog Show, and woe is me for the meagreness of the prizes offered for the non-sporting classes. Have you no admiration in that happy land of yours for the princely St. Bernard, the kingly mastiff or noble Newfoundland, to say nothing of the grand old English bulldog and the dare devil bull terrier. It would seem not. Is the love of canine flesh becoming extinct in Yankee-land, or is it henceforth to be confined to sporting-dogs and nothing else? I sincerely hope not.

But why not get up an international dog show, which shall be one, not in name only, but in reality? Only offer us the temptation of prizes, which shall go some little way towards reimbursing us for the loss of the time and money spent *en voyage*, and see if we don't bring out a team of the champion dogs of England which shall astonish you. The breeds with which I should propose opening your optics in the non-sporting classes would be mastiffs, St. Bernards, Newfoundlands, Scotch collies, Danish uhners, bulldogs, bull terriers, pugs, Yorkies, maltese, Blenheims and King Charlies. Against these America wouldn't have the ghost of a chance: nor would she against our bloodhounds. I scratch my head, though, when I think of pointers; and as to setters, my friend Mr. Lort tells me, in his earnest, energetic manner, you beat us hollow. Granted as regards many breeds of setters, but I will not give in as regards the Irish setter. The Rev. R. Gallaghan, R. N., has bred these beauties for years. He had a pair at Cirencester Dog Show that would lick all creation. By the way, this gentlemen was the breeder of Plunket and likewise Rover, although the Hon. D. Plunket gets that credit. This is a fact which may not be generally known to your readers. Plunket, as you know, was not only a great breeder, but a celebrated field dog, and as to Rover, he was the dog selected by Stonehenge for his book, as being the typical Irish setter.

I may tell you that Newfoundlands are being much neglected in this country. There are few breeders, and many of the judges do not understand them. Nicholls does, and Lort, and perhaps a few others; but I have seen the Rev. G. Hodson at Portsmouth put a flat-coated retriever over a celebrated champion bitch, while Idstone at Exeter gave first prize to a huge hulking retriever with—just listen—a curly coat! Fact, sir. German dachshunds are one of the rages at present in our tight little island. I must not here begin to speak their praises or I shall occupy more of your valuable space than you could afford. But I really hope they are also becoming fashionable in America. They deserve to be.

Our show season is nearly over, but there are still two or three big ones to come, such as Bristol, the Alexandra and Brighton. This last is to be a very loud affair. All the world will be there and his missus with him.

The cross of the canine Legion of Honor is, I hear, to be presented to Mrs. H., of bloodhound notoriety, and fair owner of Don, for gallantry displayed in front of the enemy. Mrs. H. may be described otherwise than on the police sheets, where she was styled "a fashionably attired lady of prepossessing appearance." She is tall, well furnished, good in forearm and bone, and with a greatly admired—by judges and reporters—*tout ensemble*. A dog show without this lady's bust would be as incomplete as one minus King Don's hat. The tale is this: The lady in question, after waiting for three-quarters of an hour for an exit ticket—a fact which doesn't throw much lustre on the gallantry of Birkenheadites—concluded she would leave without one. Marching onwards—bloodhounds and Dandie in front, lead-laden whip in her right hand—she was opposed by an all-too-warlike bobby. That functionary, about three seconds afterwards, had good reason to wish he hadn't got up at all that morning. So effectually was the whip laid about his shoulders that he was fain to roar for assistance. The plaintive appeal brought bobby No. 2 to the rescue. Bobby N. 2 shared precisely the same fate. Mrs. H. showered her blows like wintry rain; even the sergeant himself came in for his dose. So the three policemen had a hot time of it, for it seems noses were broken, watches smashed, and the sergeant's teeth dashed down his throat like summer hail. And for this little pastime Mrs. H. was mulcted in the sum of eighty shillings; but she seems to have gotten more than four pounds' worth of fun out of the three policemen. Great blame is attached to the crowd of male Birkenheadites who merely stood around and laughed. Had a few more policemen rushed to the scene of action, and two or three dozen of the aboriginees joined them, the probability is that they would have mastered even the fair owner of Don. When the result of the court martial was carried to the mansion house of the Rev. G. H. he is reported to have shed tears, pulled his own hair, and headed a penny subscription with a silver sixpence, and did what he was never known to do in his life before—took a glass of grog. *Et sic transit gloria mundi*—so passed away that gallorious Monday.

Your broad and welcome sheet comes to hand every Wednesday. I greatly enjoy reading some of the sport-

ing articles commencing at the first page, "Three Weeks in the Rocky Mountains" was especially good.

The weather here is terrible. I guess we won't have half an average crop; so we will depend upon you for our "porridge meal." GORDON STABLES, M., D., R. N.

INSTINCT AS ALLIED TO REASON IN DOGS.

(No. 2.)

IN my first contribution upon this subject, I have described more or less fully the qualities of three pointer dogs of those which I have owned and controlled.

This chapter shall tell of her, who to them, was as a giant among pigmies, a whale amongst minnows. I think it quite possible that I may antagonize the advocates of the setter, but I feel quite confident that I can defend and uphold the cause of my favorite, and it is quite time, Mr. Editor, that somebody took up the cudgels for Ponto. "Frank Forester" has done him great injustice, and set a fashion which has been blindly followed by his admirers and partisans. As an entertaining writer upon sporting subjects, a master of idiomatic, vigorous English, a narrator of charming (fictitious though), stirring adventures by flood and field, and as an exquisite word painter of sylvan scenes, I yield to no one in my admiration of Henry W. Herbert: and I frequently take up his books now as amusing and entertaining reading. I know of no one but our own Elliot who equals him in this respect. But surely Herbert is poor authority upon many of the subjects of which he treats. Take almost any chapter, upon any subject, in any of his books, which professes to teach, and you will find plenty of strong and extreme statements, and much of unmeasured denunciation of those who differ with him; but, God bless you, heresies innumerable, heresies that are now known and recognised by all well informed sportsmen. My own opinion is that one chapter of either "Stonehenge" or "Hallock's Gazetteer" upon any subject you please, is as authority worth all that Mr. Herbert ever wrote. His opposition to the pointer is unreasoning and unreasonable. He is especially like two of my friends who used to promulgate extraordinary theories of their own, and shape the facts to suit them. I do not disparage the setter, but simply say that in my experience, a well bred, well trained pointer can, does, and will hold his own against any setter that ever was whelped. In England, "Stoneheuge" has held the scales with just well balanced hands, but in America there seems a disposition to shove the pointer to the wall. Sappho, Jr., was the first puppy I ever attempted to train. She was reared from three weeks old till able to take care of herself, in a box, lined with cotton, which stood in a small room adjoining our ordinary sitting-room, and was nursed assiduously and successfully. All that a puppy could learn she was taught, and an apter scholar I cannot imagine. Her intelligence was seldom at fault, and by the time she was one year old, a tone no louder than ordinarily used to a child or servant, sufficed to insure her obedience. When she was nine months old, a friend and I rode about ten miles from town and spent the day shooting. Two old dogs were along; but the puppy hunted them off their legs. In the dusk, when returning home, at every pause in our canter she would run out on three legs and hunt the hedges alongside the road. I have seen bold swimmers, but never saw her equal. Time and again here, when giving her her daily swim, I made her plunge into a mill race not twenty feet below the wheel; the seething raging water would at first whirl her round like a chip, but ere long she steadied herself, and never failed to bring surely to land the object she was sent for. I have in York Co., carried her out on a cold December morning, and as soon as we reached the banks of the beautiful Catawba, its margins all frozen, she would plunge in and swim for pleasure before her work commenced.

Could the pencil of the artist adequately picture, instead of merely suggesting action, I would give much to have Sappho's likeness retrieving a right and left duck in a reserve, where neither swimming nor wading alone were possible. Her style was unsurpassable. The very poetry of motion. Wonderful strength was suggested without a hint of clumsiness. Courage she had that was dauntless, for of fear she was unconscious. A dog, in short, as nearly ideal as possible.

Doubtless you and many of your readers know well the ugly fences, which so generally mar the landscapes in our Southern lands, and which in the farmer's vernacular are boasted of as "bull strong, horse high, and pig tight;" many of them measuring seven feet. Yet till she was ten years old I never saw Sappho the Second clamber over one: she would take them in her stride, touch the top rail lightly, and alight upon the further side with unbroken speed. One day I took her down town with me for exercise, and stopping in at a friend's who had just imported two dogs, pointer and setter, which were certainly fair to look upon, I said: "Henry, Sappho looks undersized alongside of your beauties, does she not?" "Yes, rather." "Have you a tape line? lend it me," when lo, the undersized bitch outmeasured both dogs around chest and loin.

During our recent civil war my family were refugees in the upper part of the State, and Sappho helped to guard them. Occasionally I, who was serving upon the coast, would get a "leave" and visit them. Sappho was always at night on the back piazza, and, of course, could not know when I would come: the train arrived at the nearest depot about one o'clock A.M., and I would walk home by a short cut through the fields. Always before I reached the back gate, one hundred yards from the house, I could hear her beat a tattoo of welcome, and ere the gate was opened there she was to greet me. This was doubtless only instinct, but it was pleasant to be so loved.

One day, during one of my visits, I took her, walked out into the front field after dinner to kill a few birds; they proved scarce, and making a detour I passed around the house enclosure to try the back fields. Arriving at a gate in the rear, I remembered I had not had my afternoon smoke, and sent a negro laborer who was working near by, to the house for pipe and tobacco bag. He, with the dilatoriousness of his race, tarried very long, and I, leaning my gun against the fence, alongside of the dog, started to hurry him up. Something called my attention back after I had walked perhaps fifty yards on the way home. Sappho had left the gun and started to join me; I had not said a word or made a motion to her, when she suddenly paused, looked back at the gun, and returning laid down by it till I came back. No one could persuade me that this was not the mental process which prompted her action: "He has left his gun and will return; my place is to stay here and guard it."

Two of the following anecdotes were reported to me by my father and my wife, and corroborated by the testimony of two other witnesses who are still alive; the third was vouched for by the whole household of refuges, white and black, I alone being absent.

One night father, who had just retired, was prevented from sleeping by the barking which Sappho continually kept up. The moon was shining brightly, and raising up a window in his bedroom on the second story, he could see her seated upon her haunches, vociferously protesting against something she thought wrong. Reproof availed naught to quiet her, and bark she did till the wrong was redressed. What was it? One of the windows of the dining-room, the sill of which was about eight feet from the ground, had been accidentally left open. The old gentleman came down, candle in hand, discovered the trouble, closed and bolted the window, Sappho was satisfied, and hied her to her rest, doubtless with the sweet consciousness that "she had done her part" to protect the household which ever cared so tenderly for her.

Again, my wife, nurse and child occupied two rooms in one wing of the house upon the first floor. Sappho's night quarter's, as I have said above, were in the back piazza, upon which the hall door opened. One night, while preparing for bed, Mrs. B. was disturbed by persistent loud barking. She opened her chamber door slightly, and called to Sappho, but to no purpose, and then taking a light, went into the entry, and saw the back door open, and the dog sitting in the piazza just in front of it, barking to attract attention. Now, Mr. Editor, if there be a person in this world intensely unromantic, and sometimes provokingly matter-of-fact, it is this same little Mrs. B., who, as I write this, sits within a few feet of my chair. Sixteen years have elapsed since Sappho warned her of the open door, but the fact is fresh in her memory yet, and other witnesses, too, are to the fore to prove that the dog "made night hideous" till that door was locked, and then lay quiet.

The third anecdote is peculiarly characteristic, showing, as it does, not merely the idiosyncracy of the pointer, but the discrimination of the reasoning animal. Since their earliest childhood my sister's children have lived with me and been my wards, and I think my bitterest enemy would hesitate to say that he ever saw me distinguish between them and my own children. They have rode my horses, shot my guns, rowed and sailed my boats, hunted my dogs, and been freely allowed every privilege in my power to accord.

Sappho, though, discovered a difference of some sort—God knows how. My eldest boy was then about four; two of his boy cousins three and two years older respectively; and the girl just about his own age. I played with and petted all alike, and you, I think, could not have told which were mine and which not. The dog evidently knew, for one day during my absence, impatient, I suppose, at her long deprivation of field sports, she went out hunting upon her own account, and after a while was seen leisurely trotting back with a live partridge in her mouth.

The house servants and older children tried to catch her and take the bird away, but were no matches for her cat-like actions; no one could touch her, and she rested not till she had found my own little boy, and into his hand safely delivered *Perdrix* (not "*Ortyx*," may it please your excellency). Yet this dog was never known to "flush" in the field. Perhaps she knew she had been sinning against my rules by hunting alone, and knew, too, I would hear of her fault upon my return home, and thought to propitiate my wrath by the present to my boy. Who can tell?

But all joking apart, her action under the circumstances was remarkable, for all the children played with and petted her, and she was gentle with all.

I have had the strain to which she belonged for nearly twenty-five years, and most of them have been bold and fearless watch-dogs—no respecters of strangers, but very kind at home, in proof of which I can cite the good nature with which they will submit to be harnessed up by the little ones to their toy carts, and the patience with which they will drag them about, and their evident enjoyment of the fun and frolic. To-day I have one of Sappho's descendants of the fifth generation, and in many respects Flirt is almost as remarkable as her ancestor. I have seen her stand close alonside of a garden fence which is three and a half feet high, and jump, like a goat, upon and over it, in the afternoon, and that night give birth to thirteen puppies, only one of which died.

Both she and her son, a puppy of fourteen months old, will hunt any hedge through from end to end. At least I have yet to see the covert which will daunther courage.

Sappho Jr., with all her virtues, however, was not faultless, and were I asked to name her besetting sin, would say a restless, insatiable curiosity, which made her sometimes a very uncomfortable companion in a buggy or small boat. In both she would look out and see what was going on, despite all reproof and even punishment.

In a buggy she would, if allowed, sit up upon her haunches, and resting her paws upon the dashboard, peer in every direction. Pulled down from there, ere long her front feet would be on the side step, not usually more than three to four inches across, as you well know, and her nose in air, sniffing up, down and across the road. More than once a friend with whom I have shot a great deal, and myself have seen her jump from the vehicle while the horse was in full trot, and come to a point on the side of the road, and where she pointed there was—not *had been*—game. No stock that ever I saw more faithfully perpetuated their characteristics from generation to generation.

A puppy of hers, by her grandson, given to the same friend just mentioned, turned out, too, an A1 dog—the best partridge dog, by the way, I ever saw: but his education had been greatly neglected, and he was chiefly what nature made him. Him I have known trotting under the buggy in which his owner and I were trotting under the buggy in which his owner and I were trotting at the rate of eight miles an hour, stop short in driving at the rate of eight miles an hour, stop short in driving at the rate of eight miles an hour, stop short in the road and point. Upon reining up and jumping out a fine covey, to be sure, were not twenty feet from the roadside.

The cleverest dog I ever saw, to whom I have chiefly devoted this paper, lived a useful life till she was thirteen. Then, hunting her one raw, wet day in January, about twelve miles from town, for the first time in her life she commenced to flag, and, stranger still, to shirk the water, of which she usually was so fond. I called her in and took her home, and all of us nursed her tenderly four weeks; but pheumonia had marked her for its own, and after lingering that long, one morning she dragged herself into the breakfast-room, licked my hands, lay down at my feet, and died in a moment afterwards—to me faithful, loving, tender and true to the end. We buried her in the garden, marked her grave, and fear "we ne'er shall look upon the like again." Her value was scarcely to be measured by money. I will close this article with the following anecdotes, written out at my request by a friend, who had related them verbally to me. He was an officer of the United States army, and during the civil war occupied a high position in one of the largest "departments" of the Confederate service. His name is the synonym of lofty integrity and unimpeachable veracity, and his intelligence and culture are unexceptional. To explain the facts he records seems impossible, but they are, nevertheless, true; and surely he is a very unreasonable man who refuses to believe everything he cannot account for.

A widow with two little children had the misfortune to be living at Society Hill, just in the track of Sherman's army in their march from the mountains to the sea. The house contained after their departure nothing but the owners and a few pieces of broken furniture. The lady betook herself, according to her own account, to tears and prayers. Before she and her children realized actual starvation, a pet dog came into the house bringing a rabbit in his mouth, which he laid at her feet. This self-taught hunter repeated this performance for thirteen consecutive days, and furnished, with the scattered corn left by the cavalry, and which was carefully gathered, the only food for the family during this period. When relief came the dog ceased his visits to the woods.

The above occurrence is ascribed by the lady interested to a direct answer to prayer. It was canvassed widely by the religious press of the South, and furnished a text for many a sermon against Mr. Tyndall and his philosophy. Some doubted the truth of the story altogether, but the *Religious Herald* of Richmond, Va., established the fact beyond cavil, and the living testimony remains unassailable to-day.

Again: The writer's family were refugees in Spartanburg during the war, and near its close shared all the privation and discomfort of the times. A little girl, a pet in the family, sickened, and an eruption which made its appearance on her body, was ascribed by the physician to the constant diet of salt meat. How to remedy this was anxiously discussed by the females, who alone composed the family at the time. The neighborhood could not supply even a chicken. "A cur of low degree," between whom and the child there existed a love that was wonderful, "passing the love of women," comprehended the situation. Twice in three days he came to where the child lay, dragging a rabbit to her. A regular supply of kid was obtained at this time, and the dog ceased to do what he had never done before nor ever attempted afterwards.

The child is now a mother, and tells her four-year-old boy of what her dog, Rattler, did when she was a sick little girl.

I have written at greater length than I intended, and very possibly have failed to interest your readers. The trouble, when treating of such subjects, is not poverty, but excess of material, and the art is to know what not to say.

Should my poor contributions have met with any favor, there are many subjects I could suggest for discussion in your enjoyable paper. W. B. B.

Sea and River Fishing.

FISH IN SEASON IN NOVEMBER.

FRESH WATER.	
Black Bass, *Micropterus salmoides*; *M. nigricans*.	Pike or Pickerel, *Esox lucius*.
Muskalonge, *Esox nobilior*.	Yellow Perch, *Perca flavescens*.
SALT WATER.	
Sea Bass, *Seizenops ocellatus*.	Cero, *Cybium regale*.
Striped Bass, *Roccus lineatus*.	Bonito, *Sarda pelamys*.
Weakfish, *Cynoscion regalis*.	Kingfish, *Menticirrus nebulosus*.
Bluefish, *Pomatomus saltatrix*.	

BLUE-BACK TROUT.—We have received from F. W. Messenger, of the Bromfield House, Boston, several dozen fine blue-back trout from the Rangeley Lakes, Me. These fish are peculiar to the Rangeley waters; are caught only in October, and are esteemed a great delicacy.

—The latest advices from Newfoundland report that the fishery may be considered over. The shore catch is better than last year, but not as good as the average. The Labrador catch is large and will fully make up the deficiency.

THE KING OF NIAGARA.—Mr. Geo. Barker, a photographer of Niagara Falls, N. Y., sends us a genuine novelty in the shape of a sun-picture of a black bass, caught by Mr. M. W. Woodbery, near the Cave of the Winds, Niagara Falls, Oct. 15th, 1879. The fish weighed 6 lbs. 1 oz. The impression was taken by laying the bass on a sheet of photograph paper and then exposing to the sunlight. This gives the exact size and shape, and makes a very curious bit of fish painting.

A LARGE TERRAPIN.—We noticed on the stand of Middleton, Carman & Co., at Fulton Market the other day the largest terrapin ever received at New York. It was a Chesapeake diamond back terrapin, and weighed seven and one-half pounds. Whereas terrapin generally weigh but from two to four pounds.

SALMON FISHING ON THE PACIFIC.

THE writer of this has had considerable experience in taking salmon with the fly on many of the streams which enter the Pacific Ocean from the lordly Columbia to the latitude of Point Concepcion in California.

There are very many varieties of salmon which enter the rivers of the Pacific, and they all have different habits in selecting their spawning grounds.

Salmo quinnat.—The salmo quinnat, which is the largest salmon entering these waters, is found in the greatest abundance in the largest rivers, principally the Columbia and the Sacramento. These are the salmon which are canned in such immense quantities on this river, and they are the earliest salmon to seek the fresh water streams for the purpose of spawning. They arrive in the Columbia river in April and ascend that river and its great tributary, the Snake river, to near their sources in British Columbia and the Rocky Mountains. They do not take the fly for the reason that when they enter the Columbia that river has already commenced its annual rise, and its waters are too much discolored for a salmon to see a fly. This immense run of salmon ceases by the middle of August or first of September, b which time the waters have again fallen to an ordinary stage and become comparatively limpid.

Steel Heads.—There are a few salmon accompanying this run of *salmo quinnat* which the fishermen call "steel heads." They are much longer in proportion to their depth than the *salmo quinnat*, and are a blueish green on top with silvery white bellies.

Silver Sides.—This spring run of salmon is almost immediately succeeded in the Columbia by another variety of salmon, called here silver side salmon, which generally weigh from ten to twenty-five pounds. They are a handsome fish, very good on the table, and are caught for smoking, but not extensively for canning purposes. It is this variety of salmon which afford fine sport for the angler—"disciple of Isaac Walton" is a little too old. As I have said they enter the rivers after the freshet has subsided and the waters are comparatively clear.

Dog Salmon.—During the month of September and October still another variety of salmon enter the Columbia and also the small streams entering the ocean and Puget Sound. These salmon do not seek the head waters of the Columbia river to spawn, but ascend all the small rivers and creeks which enter that river. They are a most villainous looking fish and will weigh about twenty or twenty-five pounds each, while the *salmo quinnat* arrive at very heavy weights—one being caught this season which weighed sixty-nine pounds. These salmon are called fall, or dog salmon. I saw a canoe load of them a few days since, in which more than half of them bore the marks of the gill net just forward of the dorsal fin. They had escaped by reason of the meshes of the net being a little too large to hold them. They are generally very dark colored, their backs being nearly brown and their sides and bellies a copper colored red; and as their time approaches in which to deposit their spawn, the males have their snouts greatly elongated like a North Carolina hog, the upper jaw projecting in a curve over the lower one, and actually hooking over it like a parrot's beak. Add to this physiognomy both jaws armed with formidable teeth curved backward, and you have the picture of as repulsive a looking fish as can be.

The salmon which enter the small streams on the lower coast of California are I think a distinct variety of salmon, and I do not know what name has been given to them by Professor Baird, the eminent authority on salmon in the United States.

Those streams having their rise in the lowest range of mountains, are short, and during the dry season are closed at their mouths by the prevailing northwest winds and surf washing up the sands which form a bar across the mouth. These salmon appear to be waiting outside the barred entrance to these streams until such time as the barrier shall break away and give them entrance to the fresh water. This bar of sand is piled higher and higher through the long dry summer, and the fresh water from the stream and the salt water washing over the bar forms a large lagoon of brackish water which backs up the bed of the stream a mile or two. Then comes a winter storm and the overcharged lagoon suddenly cuts a crevasse through the bar and may be nearly emptied of its waters in one tide; when immediately the salmon rush in through the breach and may be found in many deep pools above the mouth. They take the fly very readilyand are gamy and active on the line. These lagoons are seldom surrounded with brush, and generally the casting is easy, though the pools being near shore, the angler should take the precaution of standing far enough away to prevent the fish seeing the motion of the rod, as they are readily alarmed and will make directly for the inlet through which the surf is breaking, and go out to sea. These salmon seldom weigh over eight or ten pounds. The streams to the south of San Francisco Bay closed at their mouth are the Pescadero, San Gregorio, San Lorenzo, San Carpofero, Arrogo La Cruz, Santa Rosa, and many others. The larger streams or rivers above San Francisco Bay are also frequented by the salmon which may be taken by the fly. Some of these rivers are not closed at their mouths, such as Russian river, the Gualala, Navarro, Noyo, and many others.

The silver side and dog salmon which I have mentioned as entering the Columbia river in September and October, are accompanied on their excursions by a fish, which in these waters afford most excellent sport to the angler, and are called salmon trout. They are a beautiful fish, with no color of red, but backs of olive green with black checks and bellies of silvery whiteness. These salmon trout are taken in great numbers by the Indians who come down to the streams to fish for them and send quantities to market, and dry and smoke them for their winter supplies. They catch them with salmon roe for bait. These trout follow the fall salmon up the small streams to prey upon their freshly deposited eggs, and are always found in some deep and favorite pool below a riffle. They seem to know that the salmon are engaged in depositing their spawn from the discolored water coming down the stream, and as soon as the salmon retire to a neighboring eddy to rest, the trout rush in and endeavor to secure a share of their favorite food. They are very uncertain as to their disposition in taking a fly, as on some days the angler can see them lying in large schools of forty or fifty, perfectly quiet, and will suffer the most attractive flies to be drawn over the water without moving a fin. At another time when disposed to rise, when one wants the fly, all want it. They are very game on the hook, leaping high out of the water, and often by vigorous shaking when in mid air do they succeed in freeing themselves from the hook in spite of the best handling. They run in size from one to five pounds in weight.

I caught one day in a pool on a small stream, near Cathlamet, Washington Territory, which enters the Columbia at that place, twenty-seven of these fish on a nine ounce rod and they averaged three pounds to a fish. They all landed themselves on the gravelly shore of the pool with the assistance of a pretty severe strain on the rod.

I was engaged several years since in making a survey of the mouth of the Columbia, and was anchored in the shelter of Baker's Bay, just inside of Cape Disappointment, but a rifle shot from the ocean beach. This is a most picturesque spot. The cape is formed by the northern shore of the river projecting around from seaward in the form of a hook, and is composed of high basaltic rocky hills which are very precipitous on the ocean side, and are clothed to their summits with a heavy forest of Douglas fir or Oregon pine, and a vigorous growth of deciduous bushes of maple, and luxurious ferns.

The water was salt and clear. Well do I remember my first salmon taken in these waters. Equipped with a good two handed English salmon rod of ash with lancewood tips, one hundred yards of braided line, and the best flies, all furnished me by a valued friend, I left the vessel's side, alone in my dingy, to try for silver side salmon.

No salmon had ever been known before to take a fly on the Columbia river, and I had very little hope of success. I had but a few hundred yards to pull from the vessel before arriving near the steep and rocky shores of the bay, and laying in the oars I took my rod and commenced casting. Though an old hand with an eight ounce trout rod, I found a two handed rod an awkward thing; however I soon succeeded in making a cast far enough away from the boat to hook a salmon. What a thrill of excitement accompanied striking the hook into the solid tongue of that first salmon! and how my heart rushed up into my throat as the alarmed fish made his first frantic rush for liberty! There was an old log or spar with a ringbolt in the end, projecting above the water and its bottom fast in the mud, and this spar was not two rods from the rocky bluff. With what agony of apprehension I saw my salmon making for the spar with the line singing through the water! Turn him I could not, though the good rod was nearly bent double, and holding the rod with one hand I seized an oar with the other and tried to scull the boat near enough to pass the rod over the spar as the fish went behind it. Alas! the salmon was too fast for me, and in a desperate moment as the salmon was drawing my tip around the spar, I cast the whole rod as far as I could throw it to the other side of the spar, where it sank in ten fathoms of water. I stood for a moment in despair at what I had done; then took up the oars and pulled for the schooner. After getting my sailing master in the boat and a long pike pole, to which I lashed my salmon gaff, we pulled off again to the scene of disaster, and almost immediately succeeded in fishing up the rod. The line had been run out clear to the barrel of the reel. Of course I had lost my first salmon and probably half my line, and slowly and in sorrow I reeled it in, when whizz! out flew the handle from my fingers, and away went my salmon, fresh for a second heat.

The salmon and I fought it out on "that line" all aorund the harbor, and half the military post was down on the shore to see the fun, and when finally I thrust the gaff into his shining belly and lifted him into the boat, a cheer went up from the shore, which with the salmon thrashing around in the boat made me feel quite proud over the adventure. He weighed twenty-five pounds.

The genial and enthusiastic light-house keeper at the Cape, became much excited and expressed the profoundest regret that he had lived there ten years and never knew that salmon could be caught with the fly. He came on board to examine my tackle, and I supplied him with a few flies.

What was my astonishment to see him out on the bay the very next day, and with the most extraordinary tackle which was ever presented to a salmon. He had sawn a strip from a redwood board and dressed it down to the thickness of an inch, and with a very respectable taper. Pieces of wire driven into the wood at suitable intervals served as guides, or rings, and for a reel, the iron wheels of a child's toy cart were rigged with a crank and securely lashed to the pole. Truly, in his case, necessity was the mother of invention, and with this remarkable outfit he succeeded in catching many a lusty salmon. Not being able to cast with this apparatus, he caught all his salmon by trolling. In a week every rooster on the military post presented a most forlorn appearance; necks and tails had both been plucked to make salmon flies!

Many a salmon I have taken from the sparkling Bay under Cape Disappointment since that day, but the lively adventure with my first salmon remains an episode of supreme pleasure. C. R.

Answers to Correspondents.

No Notice Taken of Anonymous Communications.

☞ *We make no charge for answering inquiries in this column.*

A. W. E., New York.—It is against the law to shoot robins in this State.

H. N. S., Martinsville.—Send us your State and we will send the paper you want. There are a dozen places of the same name.

T. H., Des Moines, Ia.—Bow strings are made of flax. Flemish flax is best. The strings are imported into this country. Wax used is common bees wax.

CHASSEUR, Martinsville.—What is the best weight, calibre, length of barrel, and how should a gun be bored which is to be used for quail shooting? Ans. 7½ lbs., 12 guage, 30 in. barrel, left barrel modified choke.

ANXIOUS SPORTSMAN.—Yes, if the paper publishes a cut purporting to be a likeness of yourself, you may bring action for libel, and any just court will sustain you. Just how much you should claim for damages will depend altogether upon the atrocity of the alleged portrait.

F. H. W., Elmira, N. Y.—We could not determine with regard to your beagle without seeing him. He should not have crooked legs, but have long ears; in fact he should resemble a diminutive hound. Ducks can be killed in New York State from Sept. 1st to May 1st.

R. J. C., Hazleton, Pa.—Will you give me the firm names and addresses of Tolley and Grant, the English gun-makers? Ans. J. & W. Tolley, Pioneer Works, Birmingham, and Stephen Grant, London. We do not know the latter's street, but a letter addressed to him "Gun-maker," will reach him.

M. H., Cambridge.—Can you tell the owner (and his residence) of the Colley dog, Tam O'Shanter, who was at the Boston dog show last year? Ans. Tam O'Shanter belongs to Mr. I. W. Lawson, Box 347, Boston, Mass., but his name does not appear in the list of entries at either of the Boston shows. Tam was at Baltimore in 1878

C. M., Berwick, Pa.—For dog No. 1 we should suggest a course of arsenic. Give five drops of Fowler's solution twice a day, gradually increasing until ten drops are given each day. Decrease again, and stop in two or three weeks, or sooner if the eyes begin to look red. Dog No. 2 we should show to a surgeon and have him remove the excrescences. If you attempt to do anything to it yourself you may ruin the sight.

G. A. B., Philadelphia.—I am told that spayed bitches become very fat if not operated on at the proper age. I am also informed that if spayed after having a litter of pups they will not take on fat. Will you kindly tell me what age is the proper one for the operation? Ans. They should be spayed when from six to twelve weeks old. In any event they are likely to take on fat easily.

A. T. B., Washington, D. C.—I have a Parker 12-gun, weighing 7 lbs. 10 oz., and use 3 dr. of powder and 1-ounce shot. The recoil from this charge is strong enough to hurt the shoulder after a little firing. Can you suggest a remedy? Ans. The difficulty is probably in the fact that your shells do not fit the chamber of the gun. Get shells the same length as the chamber, and, instead of cutting them off, use more wads and turn them. With the charge named there should be no recoil whatever.

J. T. C., New York.—I would like to know how to remove superfluous hair off my face? Ans. Gentlemen usually employ a razor for this purpose. If this method does not work in your case, you might have your wife extract each separate and individual hair with a pair of tweezers. The only difficulty is that you may not have a wife; in that case suppose you try singeing the hair off. There are about six millions of patent remedies for superfluous hair. Suppose, if you are really in earnest, that you try say one-half of them. Then write us again.

E. J. U., Marvo, Ill.—1. Is the pedigree of Gypsey herewith inclosed correct, if not where is the flaw? 2. Is there danger to the bitch in destroying a litter of pups at birth? She was unfortunately lined by a pointer dog. 3. Will this breeding have any influence on future litters when we breed her to a desirable dog? Ans. 1. We have no means of verifying it. Nor do you mention the breed of dog, whether it is pointer or poodle. 2. It is better to keep one puppy to suckle. The teats should be bathed with warm vinegar. 3. Probably the markings will be affected by it.

JOHN DOE, Milwaukee.—1. I have three spaniel pups now nine weeks old, two of them have on their bellies a small bladder-like protrusion (about the size of a small marble) which seems to be filled with wind, and when pressed on or rubbed it goes away, but returns again at once. Be kind enough to inform me what this is and a remedy? 2. Does the length and general appearance of the coat now indicate what it will be at maturity? Ans. The puppies have umbilical hernia. It can be cured by the following treatment: If the puppies are weaned, put them on their backs and apply to the protusion a conical shaped piece of cork with a broad base covered with kid or chamois and secured in position with strips of adhesive plaster. 2. No.

MINERVA.—On the assumption that the judges had authority delegated then to change the course, their withholding the prize from the winner on the grounds that one yacht did not sail over the altered course, cannot be justified. As due notice was given, the yacht *Au Revoir*, in persisting sailing over an abandoned course, has no right to protest, but on the contrary should be ruled out altogether. The prize by all rules of equity should go to *Minerva*. Of what avail are the judges and their rulings, if they first decide upon an altered course, and then accede to the protest of a yacht which, after due notice of the change, failed to comply with the change made by the judges? They have not shown consistency in their action.

C. L. J.—Squalls on the lakes are foretold by appearances of sky and water, same as upon the seaboard, but they arise more suddenly. In sailing free, the boom should be trimmed to an angle intermediate with 90° to the keel and direction of the wind. Remember that the head of the sail sags off more than the boom, and make allowance accordingly; experience is the best teacher. In working to windward, the boom should be trimmed in dead fore and aft, theoretically, but in practice allowance must be made for "bag" in the sail, so as not to produce back sail near the leech. It should be trimmed very nearly fore and aft in practice, or "two blocks" as sailors have it. Boats are kept heeled to leeward a little in preference to bolt upright when off the wind, to keep the boom steadier, and bring a drag on the sheet in light winds.

J. A. H.—To spar 36 ft. schooner, first find "center of lateral resistance" of immersed hull with centerboard down. Fix upon total area of sails, and so shape them that the "centre of effort" will fall about 2½ to 3 per cent. of load waterline forward of the former. The centerboard should be 9 ft. 6 in. long, and its centre a little forward of centre of length, though its position can be regulated within moderate limits so as not to interfere with cabin arrangements, stepping of masts, or an undesirable cut of sail. By keeping it far forward, long head booms would result, and if too far aft, too long a main boom will be the consequence. Its position may be shifted until all conditions are best satisfied. See previous paper, and boat building by Nauticus. Make area of lower sails about 3½ times area of load line for cruising rig, which will be near 1,100 sq. ft. Centerboard trunk should run up to deck level; dept of board, 4½ ft.

—The Moscow papers relate an extraordinary escape of a young Nihilist girl named Gobieslawska from the hands of the police. The latter had discovered the house in which she was concealed, and were about to make the arrest, when to their surprise, they saw a balloon rising from the garden containing the object of their search and two men. They rapidly disappeared for some unknown destination, leaving the gendarmes to gaze disconsolately after them.

—The annual amount of pin money required by married women depends on whether she uses diamond pins or rolling pins.

FOREST AND STREAM
ROD AND GUN

A WEEKLY JOURNAL,

DEVOTED TO FIELD AND AQUATIC SPORTS, PRACTICAL NATURAL HISTORY, FISH CULTURE, THE PROTECTION OF GAME, PRESERVATION OF FORESTS, AND THE INCULCATION IN MEN AND WOMEN OF A HEALTHY INTEREST IN OUT-DOOR RECREATION AND STUDY:

PUBLISHED BY

FOREST AND STREAM PUBLISHING COMPANY.

—AT—

No. 111 FULTON STREET, NEW YORK.

[POST OFFICE BOX 2832.]

TERMS, FOUR DOLLARS A YEAR, STRICTLY IN ADVANCE.

Advertising Rates.

Inside pages, nonpariel type, 25 cents per line; outside page, 40 cents. Special rates for three, six and twelve months. Notices in editorial column, 50 cents per line—eight words to the line, and twelve lines to one inch.

Advertisements should be sent in by Saturday of each week, if possible.

All transient advertisements must be accompanied with the money or they will not be inserted.

No advertisement or business notice of an immoral character will be received on any terms.

***Any publisher inserting our prospectus as above one time, with brief editorial notice calling attention thereto, and sending marked copy to us, will receive the FOREST AND STREAM for one year.

NEW YORK, THURSDAY, OCTOBER 30, 1879.

To Correspondents.

All communications whatever, intended for publication, must be accompanied with real name of the writer as a guaranty of good faith and be addressed to FOREST AND STREAM PUBLISHING COMPANY. Names will not be published if objection be made. Anonymous communications will not be regarded.

We cannot promise to return rejected manuscripts.

Secretaries of Clubs and Associations are urged to favor us with brief notes of their movements and transactions.

Nothing will be admitted to any department of the paper that may not be read with propriety in the home circle.

We cannot be responsible for dereliction of mail service if money remitted to us is lost.

☞ Trade supplied by American News Company.

"SPORTING CLERGYMEN."—From one of many readers who have expressed to us their written approval of our articles which we have published in defence of clergymen who seek recreation in field sports, we have the following parenthesis accompanying a remittance in behalf of one of the cloth, for whom he subscribed:—

This gentleman is one of Nature's noblemen and one of our best shots. In taking fish he has no superior. He walks to most of his "appointments," and where quail, squirrel, pheasant or turkey are in the route he never encroaches upon the "yellow legs" of the barnyard. With his great love for these sports you may know that when he reaches his country church his sermons are as fresh and sweet as the flowers he has enjoyed by the fence rows and through the wildwood. I feel assured that your paper will be read by him—sometimes on Sunday.

FLORIDA.—Two more Florida letters will conclude the admirable series which we have been printing for several weeks past. We have given a good deal of space to this region and subject, to the exclusion of other valuable matter, but no more, perhaps, than our readers will cheerfully permit. When concluded, they will be followed by a series of four letters from the Nepigon and beyond, describing the Hudson's Bay region which lies north of Lake Superior.

By the way, an Indianapolis correspondent, who has spent half his life in Florida, writes to say that Dr. Henshall is mistaken as to the name "English duck" being applied to the mallard by the crackers. It is the "dusky duck," the female of which closely resembles the female mallard.

WHY SALMO QUINNAT DOES NOT TAKE THE FLY.—*Salmo quinnat* is the representative salmon of the Pacific coast. This is the species or variety so extensively canned for export, and whose ova are distributed throughout the States by fish propagators. Those of our readers who have been told that these fish never take the fly of the angler will be able to discover why by reading the very intelligent article of C. R. in our "Sea and River" department. The very sufficient reason he gives is that at the time when the salmon ascend the rivers the water is discolored by the annual rise, which is caused in great part by the melting snow on the mountains. There are fifteen other less known species of salmon on the Pacific, many of which do take the fly and afford abundant sport to the angler.

See advertisement of Diving Decoys.

CARRIER PIGEONS IN INDIAN WARFARE.

THE suggestion of a correspondent, in our last number, that carrier pigeons might be utilized as messengers between the forces of our military on the frontier, is seconded by several of the practical carrier-pigeon flyers of this vicinity. The proposal deserves the consideration of the officers in charge, if not of the War Department itself. With our rapid growth in facility of scientific communication between distant points, it is possible that we have ignored some of the ancient appliances which have in reality lost none of their merits. The telegraph and the railroad train are such mighty agencies that the little bird messenger becomes ridiculous beside them. But an advancing military force cannot construct a telegraph line on its advance. If it did, the Reds would soon take a hand at switching off the wire in the rear. At present (and until the new race of pedomaniacs is more fully developed) commanders are dependent upon mounted couriers. And good work, too, these heroes of the saddle have done! In August, 1868, Buffalo Bill rode, in twelve hours, from Fort Larned to Fort Zarah and back again; and in the next twelve hours he carried despatches from Fort Larned to Fort Hays, sixty-five miles more; in the next twenty-four hours, to Fort Dodge, ninety-five miles; the next night, thirty-five miles on foot, and thirty-five miles more on a mule, to Fort Larned; and the next night again back the sixty-five miles to Fort Hays. And here the other day Rankin, the scout, rode from Payne's lines, carrying the news of Thornburgh's command to Rawlins, one hundred and sixty miles, in twenty-four hours. These are feats of wonderful nerve and endurance well deserving of admiration. But as couriers the bird messengers would prove their utility in just such emergencies as these. A system of communication could be so devised as to do away with at least the return journeys. We should be be pleased to evoke from our frontier readers some response upon this subject.

THE INDIAN QUESTION.

THOSE who are best informed of the social and political economy of the Indian tribes and of their very anomalous relations to the United States Government, will endorse the following resolutions which were recently passed at a meeting of the citizens of Colorado. They express the views of men who are in constant contact with the people to whom they refer; and must be accounted best judges of what is expedient and necessary:—

Resolved, That all efforts to civilize the Indians must prove futile so long as they are permitted to retain their tribal relations, indulge in barbarous practices, and are taught to regard themselves as independent nationalities to be treated on an equal footing like a foreign country and as such pampered with the idea of a sovereign right to make war against the government for any fancied grievance.

Resolved, That the first requirement in the process of civilizing the Indian is to teach him a sense of responsibility to the government which supports and protects him, whereas under the policy which has so long obtained he derives no such lesson, but, on the contrary, is habitually impressed with the idea that the government owes him a living and has no right to his loyalty or obedience in return, he should either be accorded the same right and held to the same accountability as a citizen, or should be recorded as irresponsible and dangerous and rigidly kept in restraint.

Resolved, That while the Indian is allowed to remain in the limits of a State he should be subject to police regulations and governed by its laws and authority.

The above are but reiterations of what has been urged for two centuries. The Indian question is as old as the hills. The French and English, in our early history, took the Indians as allies in their warfare. The Americans adopted a different policy. The far reaching effects of the two systems are now seen in the political and social relations of the red men in Canada and in the United States. Numerically greater in proportion to the population in Canada than here, they make no disturbance; they become good citizens; they inhabit villages and obey the priests; a few till the soil; many locate on the streams, lakes and coast, and fish; many hunt and trap for the Hudson's Bay Company, which has always dealt equitably with them, and not put three fingers into the tin cup when they dealt out whiskey for pliens; and a very large proportion serve as voyageurs and lumbermen. They adopt those labors which are constitutionally most congenial to them, and they find those labors in the forests and uninhabited places.

In the United States the Indian is simply a hunted wild cat, made fierce and relentless by constant pursuit, resisting agriculture for an employment, (as a slave would oppose labor in the swamps,) and accepting the only alternative which an hereditary antagonism and open resistance entail. When they keep the peace and hunt they are swindled out of the proceeds, and when certain designated hunting grounds are conceded to them by treaty, they soon find them overrun and the fur driven out by the miners and ranchmen. They look upon soldiers as the tools of a faithless enemy, while they yet respect their discipline, their hardihood and patience, and the uniform which they wear.

Of Indians there are many tribes, of many dispositions—good, bad, and indifferent. In every tribe there are chiefs and common folks, just as there are in any community. There are statesmen who are intelligent and well informed, and there are ignoramusses who are the workers, if not the drones of the camp. And yet the policy of the Government treats all of them alike; makes no discrimination in rank, condition, intelligence, or disposition; treats sensitive and sensible men as they would dumb brutes, and prods the whole race with the bayonet, just as a ruffian police ply their clubs among a mixed assembly of citizen spectators of a pageant.

There are dozens of great tribes with hundreds of wise chiefs who are as well able as the most astute to see the inevitable doom of the aborigines; but they prefer to keep the inevitable day as far off as possible. They will hold on to their treaty guarantees as long as possible; they will keep intruders off of their lawful reservations as long as possible, that they may hunt and trap while game and fur last, and pursue the hereditary avocations which are congenial to their temperament and open air education; and when the limits of their occupation become gradually circumscribed by the encroachment of settlement which, like a great inevitable wave, sweeps toward them, they will succumb as gracefully, or as sullenly, as any vanquished or disappointed race or person does to the force of circumstances. Meanwhile the good Indians know who the bad ones are. Some of them have been their hereditary enemies from the beginning. These bad Indians are known throughout all the aboriginal nations by disparaging sobriquets, such as "Pillagers," "Cut-throats," "Snakes," etc. They are the Ishmaelites of the scattered tribes, and the mark of outlawry is stamped upon them. To sensitive, good Indians to be classed with such riffraff and ruffians as these, and to be treated all alike by agents and civil officers who cannot tell the individuals of one tribe from another by their dialect and physiognomy, and much less by the make of their moccasins—the disgrace cuts keenly. Native indignation is kindled by such inexcusable lack of discernment, and the effect is to mass all together in one common cause against the white intruder.

Were there to come among the Indians sagacious men bringing such credentials as are recognized and accepted on the frontier, who would find out the best men of the best tribes and of all tribes, and be able to assure them beyond doubt or possibility of failure that treaty rights would be preserved and maintained, it would not take long to collect together a wonderful army of courageous braves who would unite with the troops in driving out and exterminating, if necessary, the bad Indians, who are as obnoxious to the redmen themselves as they are baneful to the immigrants. Most efficient allies would these become. Invaluable would be the standing army thus constituted, and most economical the cost of maintaining it. The constant call for more troops to fight the Indians would be heard no more. Lives of Custers and Thornburghs would be spared. Our whole Western territory would be policed, and the safety of the tourist or emigrant would everywhere be assured so long as they respected the trespass notices which the Government has authorized to be set up on special reservations. Thus, with the air cleansed of the powder of skirmish and carnage, would the Indian hunter and trapper be enabled to pursue his humble vocation undisturbed and with pecuniary profit. The "big" warriors would wear their regimentals and insignia, and patrol their beats with their bands of braves, authorized and enlisted by the Great Father and proud in their position; while the women would dress pelts in camp, and the workingmen and small boys cut wood for the railroads, act as scouts, guides, voyageurs and camp-cooks for sportsmen, prospectors, and reconnoitering parties of troops, serve as interpreters, cultivate a little corn, make a little hay for ranchmen, drive teams, herd cattle, and do a hundred other useful chores which would come within their natural bent and inclination.

Now, as to the tribal relations, which will be nominally maintained until, like the great Shinnecock Chief, Pharaoh, the last man of the last tribe is laid in the dust—diplomacy will have to be exercised for a little while. Chiefs of tribes will have to be treated with separately, in order to enlist their good services, and antagonize them against the bad elements which exist; but when at last that bad element is wiped out and the wolves are separated from the sheep, then the only tribe which Government will be required to recognize will be the tribe of conciliated and reconciled redmen, harmonized and united on the single basis and policy of friendship and peace. Deference will be paid to their traditions and tribal prerogatives, as between tribe and tribe, but the attitude of the Government will be to them all as citizens of one community, subject to the same rules and privileges as citizens of other races and colors. This is the relation which the Indians in Canada hold to the powers that reign; and there all is peace, if not absolute contentment.

Let us consider these things carefully, and prepare to pass the pipe around. "How!" Let us all smoke.

—An accountant who visited Bunker Hill Monument last summer says it is the longest column he ever footed up.

GAME PROTECTION.

WHO KILLED COCK ROBIN?—"I did, sir, may it please your Honor," said Peter Smith, the prisoner at the bar. "Five dollars" was the sentence, and P. Smith is now meditating over it. According to the law of New York State every man who shoots, with gun or bow and arrow, a robin, is liable to the same penalty, no matter in what county he may reside.

MIGRATORY QUAIL ON TOAST—*Grafton, Vt., Oct. 21st.—Editor Forest and Stream:*—The annual meeting of the Vermont Association for the Protection and Preservation of Fish and Game will be held in Rutland the first Tuesday in November. At a recent supper in Rutland, a complimentary toast was tendered to Judge Everts, in which allusion was made to migratory quail. Mr. Everts in reply said that he had spoken to his fellow citizens upon many matters pertaining to the prosperity of Rutland, but had never spoken to them on the subject of migratory quail. He said that he had turned loose the first quails ever turned out in this country, and had great confidence in the success of the experiment. In 1877–78 he in connection with friends here had turned out 200 each year, about one-half females. They had raised broods of from eleven to eighteen, nearly every egg hatched and the birds matured. They keep together in flocks till the time of migration, which is from Sept. 1 to Oct. 1. Upon an estimate that each brood contains three females, and they in turn raise three females each, which escape vermin and pot-hunters, beginning with only sixty females, at the end of twenty years add an equal number of males to the females, set them flying around the earth at one foot apart and they will reach twenty-three hundred and sixty-six times around the world and have 18,818 quails to spare. Then load these birds into freight cars, three birds to the pound and ten tons to the car, each car occupying thirty feet of track, and the loaded cars would occupy thirty-two thousand miles of solid track. A distinguished jurist once asked him "whether the quails were good to eat?" He replied that he could not tell of his own knowledge, but would answer the question by asking another, which was this: "Do you suppose that the Lord would have fed his chosen people upon game that was not fit to eat?" The Judge gave it up. That the quails were to be in the near future the most numerous game bird in America he firmly believed. G. B. P.

MASSACHUSETTS.—Mr. L. W. Atwood, of Portland, Me., sent the other day eight fine partridges to Wellfleet, Mass., to be let loose for breeding purposes. Last year he also sent several. Mr. Atwood is endeavoring to get the partridges to stay there, as they have hitherto been unknown in that section.

ADIRONDACK DEER HOUNDING.—*New York, Oct. 20th.—Editor Forest and Stream:*—"Thomas J. F.," of Jamestown, in your last issue writes that "the law passed last winter in regard to hounding of deer does not suit us out here, and is going to be the means of cleaning them all out, unless we can have it amended. It just suits the Indians on the Cattaraugus reservation, and they are going to annihilate the last deer in this section if it is not stopped, and many of the vagabond whites are lending a helping hand."

It may gratify our legislators to know that this nonsensical enactment suits quite a number of people, and to Cattaraugus Indians and vagabond whites let me add four residents of this city, who, a few weeks ago, with two guides and *nine* dogs, hounded to death thirteen deer (six in one day) in the Beaver river section of our northern wilderness. They threw away the fore-quarters, and were very liberal in proffers of the saddles to everybody within reach—presumably because they knew (if they know anything) that venison taken that way is not fit to eat. I protest against a game protection law that don't protect, and lets loose in August, with their hired hounds, such human wolves—I beg pardon of the wolves, for hunger is at the bottom of their savagery, and not *sport* exclusively. The deer of the North Woods ought not to be hounded at any time of year. The open season should be made short as practicable, and restrictions put upon market hunting even within that period for years to come. We shall never get this important question of game preservation fairly and permanently settled until a commission, representing all sections of the State and every interest involved, shall be empowered by the Legislature to mature a sensible and efficient code. That is my opinion, and you can print it for what it is worth.

H. H. THOMPSON.

FARM FOR SALE.—Capt. John M. Taylor, a gentleman well known to many of our readers, desiring to return to England wishes to sell his fine farm in Nottoway Co., Virginia. Full particulars can be obtained by addressing Capt. Taylor at Bellefonte, Nottoway Co., Va.

TROPHIES.—We have received from the West a collection of elk, moose, and mountain-sheep horns, some of which are unusually fine specimens, and when properly mounted will make very desirable library and drawing-room ornaments. The owner will dispose of these for very reasonable prices. They may be seen at this office, and our friends will find this an admirable opportunity to secure a pair of antlers.

SOLD.—The gentleman who, over the initials J. G. S., advertised a gun for sale in a recent issue of this paper, desires us to announce that the gun is sold. He had received twenty-seven letters, and they were coming by every mail. This is but one of many letters we are constantly receiving bearing witness to the value of our advertising columns.

—On the 17th inst. navigation on the St. Lawrence River between Montreal and Quebec was entirely suspended on account of the dense smoke from forest fires.

A TRIP TO NORTH PARK.

(CONCLUDING PAPER.)

[FROM OUR STAFF CORRESPONDENT.]

THE day had not broken when I crawled out from my warm blankets into the frozen air. The grass and underbrush were white with frost; the gelid water which I dipped from the murmuring stream struck a chill to my very marrow as I quaffed it, and the heap of white ashes before our tents, reminding me of the genial warmth of last night's fire, made me shiver as I looked at it. The stars still shown with undiminished brilliancy, except in the eastern sky, where they were beginning to pale, and the surrounding mountains appeared like black amorphous piles, their outlines being scarcely distinguishable in the gloom.

My preparations occupied but a few moments, and only stopping to light my pipe I trudged off into the darkness. There is a solitude, or perhaps a solemnity, in the few hours that precede the dawn of day which is unlike that of any others in the twenty-four, and which I cannot explain or account for. Thoughts come to me at this time that I never have at any other. Often I have experienced the mental state to which I refer, and the locality or situation has nothing to do with it. It comes when looking for the morning flight of ducks or geese in the populous East, just as it does while waiting for light to see deer in Nebraska, or when on some lofty peak of the Rocky Mountains I await the dawn to discover the whistling elk, or the bighorn cropping the tender grass on the steep hillside. Others, too, are influenced, I think, by some similar sensation, for when I have a companion with me at such a time he is usually subdued and quiet, and when he speaks, does so below his breath, as though afraid of breaking the universal stillness.

As I moved from camp no sound broke the silence of the morning, save the crackling of the sage brush twigs as I brushed through them. Soon, however, it began to grow light, and with the dawn came the general awakening, and the quiet was broken by the voices of many a bird and beast. The coyotes commenced their doleful concert, a prairie dog or two barked, and the little striped *Tami* squeaked in anger or alarm as he scuttled away from my path. The soft twitter of the shorelark fell upon my ear, and from the mountainside I heard the shrill call of a robin. When I had gone half a mile I turned into a little valley between two mountains, where I thought it likely that I might find some antelope, and hoped rather than expected to come across a deer. All my careful hunting, however, availed nothing. I saw a few antelope, but none of them were in situations where they could be approached, and after a three hours' tramp I turned back towards camp without having fired a shot. The only game that I had been in range of was a bear, which I almost walked onto while following a game trail through some willow brush. I heard his astonished "sniff," and could see the tops of the willows shake as he ran off up the stream, but I could not catch a glimpse of the animal himself. Travelling toward camp, somewhat out of humor at my lack of success, I spied on the side of a high bluff a white, moving spot, which I knew must be an antelope, and a look through my glass revealed the fact that the animal had already seen me. The distance between us was so great, however, that I thought it possible that, if I kept on my course, he would not take the alarm, and I might succeed in approaching under cover of the low hills between us. I therefore proceeded, gradually turning away from him, and was gratified after a short time to see him commence to feed again. As soon as I got a bluff between the game and myself I approached as rapidly as possible, and in the course of ten minutes I was within range. I peered cautiously over the top of the last low ridge and saw, through the grass and sage brush that crowned its summit, the noble buck standing with head and ears erect looking directly toward me. Aiming at the point of his breast I pulled the trigger, and he sank down on his side, and turning over on his back, stretched out his slender legs, and with a shudder or two lay still. Slipping another cartridge into my rifle, I hurried towards the spot, and when within ten or fifteen yards of my game I became aware that he was not yet dead. He rose, staggered a few steps, and fell again, regarding me the while with a piteous expression that made me heartily regret having shot him. The ball had bored through his vitals and it seemed as if such a wound must necessarily be fatal at once, but still when I drew near he would rise and stagger on a little further. At length, however, by cautiously approaching him I got my hand on his horn, and in a moment the keen steel had touched his heart, and the black current spouted forth and trickled down the steep hillside. Taking one of the sirloins I hurried toward camp, and found the party about ready to start for Buffalo Creek, and as soon as breakfast was over, in company with W. I returned to the antelope, packed him on my horse, and leading the animal down the road, loaded the meat on the wagon, W. and I then rode back toward the hills to pass behind a low mountain, and reached camp by another trail.

We reached the top of the divide without seeing anything worth noting, but when we peeped over the precipice and looked down into the valley of Buffalo Creek, the sight we beheld was one to do a hunter's heart good. There were probably a thousand antelope in sight, scattered over a broad plain several miles in length and a mile in width, and we, from our vantage ground, could watch them unobserved. The oldest bucks were generally single, lying down by themselves on the bare spots of the prairie, while the younger males were gathered together, three or four to a dozen making little bands which seemed to keep pretty well apart both from the old bucks and the does and kids. These last were in considerable companies, often as many as ten or twelve does and twice that number of kids being grouped together on some spot where the grass grew rich and sweet. We sat and watched them for some time. It was a charming sight; but at length we turned back from the crest of the mountains and started to follow the trail down into the plain. After going a few hundred yards, we found ourselves in a little pass less than one-quarter of a mile in width, through which were a dozen deeply worn antelope trails, and before long I saw a band of antelope come cantering along the path, and in the distance another lot, following in the footsteps of the first. Dismounting behind a low hill, I handed my rifle to W., that bold mountaineer having left his gun in the wagon. He was very anxious, however, to try to kill a big buck which brought up the rear of the first lot of antelope, and fortunately, although the remainder of the band ran swiftly by, this buck stopped when about sixty yards from us, and stood staring at us until the rifle cracked, when he fell and never stirred again. He was an unusually large animal, with very long wide spreading horns. While we were tying this antelope on a horse another still larger buck came up to the spot to investigate matters, and presented so fair a shot at one hundred and fifty yards, that I shot at him, killing him in his tracks. We were now approaching some settlements where we could dispose of meat and so had less scruples about killing game.

Loading the antelope on one of the horses, we proceeded to camp, resisting all temptation to kill further game. Before we reached our tents we were overtaken by a brief but furious snow storm, and after it ceased could see that the summits of the neighboring mountains were white, though on the lower ground the snow melted as it fell. Later in the afternoon, while A. and Fuller were out hunting, another storm of great violence came up, and snow fell to the depth of two inches. The absent hunters got a thorough wetting, although they tried to shelter themselves under the sage brush.

From Buffalo Creek we proceeded toward Laramie, making no lengthened stops by the way. At the crossing of the Michigan we found the willow brush full of sharptailed grouse, which gave us good sport with our shot guns. I felt here, as I have so often in the West, the want of a good dog, for, to my notion, half the pleasure in shooting consists in observing the working of your dogs. I value my dogs so highly, however, that I am always afraid of losing them if I take them with me on such a trip, and so have never done it.

On our return march we camped at Pinkham's, on a small affluent of the Beaver, and near Leroy's; and from this last-named place, as we reached there about one o'clock, W. and I rode in to Laramie in the afternoon, leaving the team to follow next day. We made the eighteen miles in two hours and a quarter. The next day was devoted to packing our collections and preparing for our journey east. I ran up on the evening express to Como, where I saw my good friend, Reed, and after a pleasant chat with him, all too short, took the morning train for the East.

As I look back on the past ten years, and see what changes have taken place in these glorious mountains since I first knew them, I can form some idea of the transformations which time to come will work in the appearance of the country, its fauna, and its flora. The enormous mineral wealth contained in the rock-ribbed hills will be every year more fully developed. Fire, air, and water working upon earth, will reveal more and more of the precious metals, with the baser ores, now neglected here, but not less valuable from an economic point of view. Towns will spring up and flourish, and the pure, thin air of the mountains will be blackened and polluted by the smoke vomited from the chimneys of a thousand smelting furnaces; the game, once so plentiful, will have disappeared with the Indian; railroads will climb the steep sides of the mountains and wind through their narrow passes, carrying huge loads of provisions to the mining towns, and returning trains will be freighted with ore just dug from the bowels of the earth; the valleys will be filled with fattening cattle, as profitable to their owners as the mines to their's; all arable land will be taken up and cultivated, and finally the mountains will be stripped of their timbers and will become simply bald and rocky hills. The day when all this shall have taken place is distant no doubt, and will not be seen by the present generation; but it will come. In the destruction of the noble forests that now clothe these majestic hills lies a great danger. Water is scarce

enough anywhere in the West at present, but in the mountains, at least, there is plenty of it. Should the timber, however, be destroyed with the wantonness that has recently prevailed, the region may become as arid as is Arizona; and in that event the streams which water the great plains would be sadly diminished in volume, if not quite dried up. The rainfall on the Laramie Plains, as appears from the record kept at Fort Sanders for over six years, is 11.46 inches; but in the mountains, less than twenty-five miles distant, it is much greater, while in certain parts of Arizona, especially in the Mojave desert region, it is only about 4 inches, and at Fort Yuma, Cal., only 3.-91. Within a short time the Government has commenced to charge stumpage on timber cut from the public lands, and this action has already done a good deal towards checking the reckless destruction of the forests; but it is essential that, to protect an enormous extent of our Western country from a terrible and permanent drying up, the timber should be cut with judgment, and that plantations of young trees should be set out wherever it is possible. The subject is one that demands, and will receive, I hope, greater attention in the future than it has in the past; and before long I hope to be able to set forth some of its more important features in the columns of FOREST AND STREAM.

My summer's trip is over, and I return to my work freshened and invigorated by my jaunt. If their vacations have proved to the readers of these letters as profitable as mine to me, they are to be warmly congratulated.

New York. Yo.

The Rifle.

VERMONT—*Brattleboro, Oct. 23d*—Last competition in the Sharps rifle match, Fort Dummer Range. A strong wind blew across the range, varying from 7 to 12 o'clock, but it caused no unnecessary trouble. Mr. A. W. Nichols takes the gun on a score of 125 out of a posible 150. Messrs. Daley and Putnam following closely with the same score, but having one more inner. Mr. S. H. Barrett of the Rod and Gun Club, Springfield, Mass., very modestly exhibited their style of doing it with the following result: 44, 45, 46. Total 135:—

Nichols	42	40	43	125	Fairbanks	43	39	41	123
Daley	40	41	43	125	Howe	41	40	41	122
Putnam	41	42	42	125	Amidon	40	40	41	121
Crossy	41	43	40	124	Nesbitt	41	38	40	119
Stearns	39	42	43	124	Wood	40	41	37	118
Hannon	42	39	43	123	Marshall	40	38	37	115
Lamb	42	40	41	123	Wetherhead	36	31	36	103
Hawley	39	45	41	123					

W. H. C.

—A rifle association of about twenty members has been recently organized in Bennington, Vt., with the following officers:—President, Charles F. Sears; Secretary and Treasurer, Charles G. Cole; Executive Officer, Dr. J. N. Scranton. A range of 600 yards in length has been secured, and the association has appointed Monday in each week for practice day. Several of the club have recently purchased Sharps long-range rifles, and although the shooting so far has been at temporary targets, good scores have been made: *e. g.*, 24 out of possible 25. The rules of the N. R. A. have been adopted for the government of the club. A member writes:—"There has been quite a revival of interest in rifle shooting since the formation of our club was contemplated. It is needless to say that as a minister of the Gospel I rejoice in this, knowing how much this admirable sport tends to sobriety of life and also how easily it runs a man away from harmful methods of amusement. With best wishes for the success of your valuable paper, I remain. R. M."

MASSACHUSETTS—*Milford, Oct. 22d.*—The Milford Light Infantry, Company M, Sixth Regiment, Massachusetts Volunteer Militia, held their first annual parade and target shoot to-day, concluding with a supper and dance in the armory in the evening. The following prizes were awarded:—Company—clock, Ethan Kinsman, 19 out of 25; gold pen, Sergeant H. I. Carpenter, 18 out of 25; swab stick, Sergeant T. F. Jacobs; leather medal, A. E. Bagley; team—gold pin, H. Whitney, 21 out of 25. Honorary members—bouquet holder, H. E. Morgan, 11 out of 15; spectacles without glasses, I. R. Spaulding.

Gardner, Oct. 22d.—The Medford team were up here for a contest at the Hackmatack range, a picturesque spot, surrounded by a heavy growth of Hackmatack trees, from which the range derives it name. The day was one of those rare ones for which this month has become noted. The German ring target was used; four men from each team; three rounds, of ten shots each:—

MEDFORD TEAM.

W. Charles	Creedmoor	45	44	45—134
	German	81	51	82—209
J. B. Osborn	Creedmoor	44	42	46—132

Hopkington, Oct. 23th.—The rifle club had a match last week; 200 yards off-hand; 7 rounds:—

C. A. Summer	4	5	4	5	4	4	4	4—30
W. B. Claflin	4	5	4	4	4	4	4	4—29
P. W. Smith	4	4	3	3	4	4	4	4—26
N. Jewell	4	4	4	5	3	4	4	26
Re-entry	4	3	4	4	4	3	4	4—26
Chas. Frost	3	3	3	3	4	4	5	5—25
J. Wadsworth	3	4	3	2	4	3	4	3—26

Boston, Oct. 25th.—The light was good, although the sun was rather bright. The new wind dial, which is now reliable, indicated during the morning shooting 10 o'clock, changing to 12 o'clock in the afternoon, requiring an addition of three points of wind. The late trains brought out a large number of spectators, beside delegations of the Roxbury City Guard, the First Corps Cadets, the Charlestown Cadets, and Company L (colored company), Sixth Regiment, who faced the "butts" for practice, obtaining very creditable results. The 500-yard targets were also in use, and the range presented a very animated appearance. The elevated firing point at 300 yards was too formidable a position for the riflemen, consequently the match at this distance was given up, as was also the amateur series. In the shooting at 200 yards, off hand, Mr. E. F. Richardson carried off the honors with a splendid 33 out of the possible 35, and in re-entering made the same score. Considering the high wind which prevailed during the day, the shooting was exceptionally brilliant.

E. F. Richardson	4 5 5 4 5 5 5—33	J. Nichols	4 5 5 5 4 4 4—31
E. B. Souther	4 4 5 5 4 4 5—31		

Boston Galleries—The attendance at the Magnolia Rifle Gallery has been quite large during the past week, and capital results have been attained. Mr. E. Whittier has gained first position with an elegant 49 out of 50. The best scores made during the week are given in the following summary, ten rounds, 100 feet:—

Name.	*Score.*	*Total.*	*Name.*	*Score.*	*Total.*
C. Pettier	4 5 5 5 5 5 5 5—49		R. F. Schaefer	5 5 5 4 5 4 5 5 4 5—47	
D. F. Littell	4 5 5 4 5 5 5 5 5—48		N. James	5 5 4 4 5 5 5 5 5 4—47	
W. Harrison	5 4 4 4 5 5 5 5 5—47		C. M. Queth	5 5 4 5 5 4 5 5 5 4—47	
A. Sloane	46		F. Dudley	44	
F. Hollis	46		F. Williams	44	
J. R. Schaefer	46		E. P. Emerson	43	
N. A. Polard	45		A. Law	42	
R. Tyler	45		J. C. Barrett	42	
H. Renow	45		J. Bardwell	40	
A. B. Archer	44		L. B. Rich	40	
N. W. Arnold	44				

—At the Mammoth Gallery the regular monthly prize shoot is drawing to a close. Mr. E. Whittier and Mr. E. P. Richardson are tie for the leading places, 8 shots at 150 feet. The summary will explain:—

Name.	*Score.*	*Total.*	*Name.*	*Score.*	*Total.*
E. Whittier	5 4 5 5 5 5 5—39		U. A. Pollard	5 5 5 5 5 5 4—39	
E. F. Richardson	5 4 5 5 5 5 5—39		H. A. Pickering	5 5 5 5 5 5 4—39	
N. W. Arnold	38		E. C. Grover	36	
G. J. Seabury	38		Isaac P. Gragg	36

Laubenstein	8	10	8	8	11	10	8	10	10	6	99	40
Andrews	10	8	3	6	10	11	9	10	5	10	92	38
Fancher	8	9	8	8	7	8	8	5	12	7	80	40
Lewis	8	11	7	8	10	8	8	7	10	3	80	40
Case	7	6	7	10	4	11	8	6	9	8	76	38

Collinsville, Oct. 22d.—Canton Rod and Gun Club, Riverside Range. Practice meeting at 200 yards; off hand; 3-lbs. pull; 10 shots:—

											Mass.	*Cred.*
Hull	10	11	11	10	11	11	12	11	10	10	107	46
Andrews	10	10	9	11	11	9	10	9	8	10	97	42
Lewis	9	11	9	11	10	11	7	11	9	9	93	43
Laubenstein	9	8	7	11	12	11	6	9	8	11	92	43
Bidwell	9	9	8	6	10	11	9	11	9	6	88	40

NEW YORK—*Coxsackie, Oct. 15th.*—The rifle club here held a shoot to-day and representatives were present from Hudson, Poughkeepsie, Catskill, and Troy, with Farrow from New York City. The match was at 200 and 300 yards, 10 shots at each distance. The shooting was good, considering the wind and weather, and at the finish of the 200 yards' score Farrow was top on 45, with Falcon and Newbury 44, Geiger and Gemmill 43, Smith 42, and Cobb 41. The shooting at 300 yards was fair, all things considered, wind and light only medium. Farrow ended with a pair of fine bull's-eyes after 33 in eight shots, thus putting up the best 45 ever made at this distance, and becoming champion at the long-range third-class target. The following is the result of the match:—W. M. Farrow, 43; A. H. Cobb, 39; L. Geiger and S. G. Newbury, 37; C. J. Falcon, 36; D. F. Wilcox and J. A. Smith, 34. A combination of the rifle clubs from the river counties are shortly to meet teams from the New York and Empire in a friendly contest at 200 and 300 yards, off-hand.

Columbia Rifle Range.—The everybody's match at this range will open November 3d, and run through that week for an aggregate of over 100 prizes valued at $750. The match is at 200 yards, 7 shots; military rifles allowed two points. Entrance fee fifty cents; reentries were limited at same rate. In connection with the match and during the week a team contest will be carried on, open to teams of four men from any organization, firing 7 shots each at 200 yards.

EMPIRES VS. ZETTLERS.—A bold challenge has been issued by the Empire Club men, who wish to try their 8-pound pull rifles against the old style hair-trigger rifle, and a message to the Zettler Club brought a ready response for a test at 200 yards.

—The annual invitation ball of the Zettler Rifle Club will be held at Walhalla Hall, 50 and 52 Orchard street, on Thursday evening, Nov. 20th. During the evening the ladies of the club will shoot for several valuable prizes.

Ogdensburg, Oct. 14th and 15th.—A match had been fixed for the 14th on the Oswegatchie range between the teams of the Ogdensburg and Mohawk Valley Clubs. Smoke from forest fires compelled a stoppage of the work on the first day, when one range had been fired over, and the two longer ranges were fired on the last day. The scores stood:—

OGDENSBURGH TEAM.

	800 *Yards.*	900 *Yards.*	1,000 *Yards.*	*Total.*

OHIO—*Jefferson, Oct. 26th.*—The Ashtabula County Rifle Club have just leased a tract of land here, and have erected a club house, sixty-five feet front. The ranges at present are only 100 and 200 yards. A tournament will tade place sometime in December.

Game Bag and Gun.

GAME IN SEASON FOR NOVEMBER.

Moose, *Alce Americana.*
Caribou, *Rangifer caribou.*
Elk or wapiti, *Cervus canadensis.*
Red or Va. deer, *C. virginianus.*
Squirrels, red, black and gray.
Hares, brown and gray.
Reed or rice bird, *Dolichonyx oryzivorous.*
Wild turkey, *Meleagris gallopavo.*
Pinnated grouse or prairie chickens, *Cupidonia cupido.*
Ruffed grouse or pheasant, *Bonasa umbellus.*
Quail or partridge, *Ortyx virginianus.*
Swans, Brant, Wild Ducks, Geese, &c.

☞This table does not apply to all the States. It is meant to represent the game which is generally in season at this time. State regulations may prohibit the killing of some species of game here mentioned.

THE DUCKS ARE FLYING NOW.—The ducks are now flying in vast numbers at Pon Quogue, L. I., and the sportsmen who are so fortunate as to be on the ground are having glorious sport. Our friends will find good accommodations at the Bay View House, Mr. M. Williams, proprietor. Post-office address, Good Ground, L. I. Mr. Wm. N. Lane, writing from Good Ground, says:—

Duck shooting is the best I have seen in years. Last week Mr. Harris, of Belvidere, N. J., had fine sport. Mr. Waters, of New York; Mr. Vanderbilt, of Flushing, L. I., also had fine sport, and to-day the shooting commenced in good earnest at sunrise, and it was a steady roar. I expect a big report when the gunners come in.

VIRGINIA QUAIL SEASON.—The open season for quail in the Virginia Upper counties begins October 15th; in the Tide-water counties, November 18th.

—Wild ducks and geese are now floating on the Atlantic, off shore. The *Seth Low* passed several flocks on her last week's fishing trip.

—Mr. C. P. S. Barritt, No. 230 Market street, Philadelphia, Pa., who is a gentleman sportsman, desires to join some other gentleman on a Southern or Western hunting trip. No doubt this will meet the eye of the right party.

MAINE — *Weld, Oct.* 21st.—The protracted warm weather will make the trapping season late. This is a rough, hilly country, just suited for foxes; but a thorough inspection shows little sign. I am told that flockmasters have put out poison of late years, the foxes were so destructive of lambs. If so, it will account for the scarcity. Minks and rats are fairly plenty, but the ground for them is thoroughly worked by local trappers. Gunning is poor—partridges, the principal game, being unusually scarce this year. The streams are now full of trout going up to spawn, showing the effects of total prohibition of fishing the past five years—the same expiring, if not renewed, Jan. 1st, 1890. WARFIELD.

NEW HAMPSHIRE—*Peterboro', Oct.* 25th.—Game, I should think, was quite plenty here, including partridges and woodcock. The latter, of course, are not very abundant. A party arrived here on Thursday with thirty-six partridges, nine woodcock and a hare. I drove twenty-two miles into the country, and saw nine partridges on the road. Squirrels are very scarce now. B. V. H.

DUCK-SHOOTING.—*New Haven, Conn., Oct.* 20th—The Branford and New Haven Glass-Ball teams have twice during the summer shot matches at glass balls. The New Haven team scored more broken balls at both matches than the Branford team did. Oct. 11th the New Haven Club received a challenge from the Branford Club to shoot a match at wild ducks in Branford waters on Oct. 18th. The New Haven Club accepted. There were to be ten men on a side—one New Haven boat and one Branford boat, and so on through the line, and only one line. They were to have met on Clam Island at 5.30 A.M. next morning, but the New Haven team was not able to get there until 6 A.M., owing to a late breakfast at the hotel. The boats did not all get into line until about 8.30 o'clock.

There was a very heavy sea running, owing to a southeast wind, all night, and the sea increased until about 1 P.M., when the boats one by one commenced to pull up anchor and come in. At about 2 all the boats had left the line, several boats had shipped a large quantity of water, and preferred the land. Several old seamen were seasick, owing to the rough water. Taking into account that three or four men were not let loose to pick up their dead birds in the last part of the shoot, there were 219 ducks brought into the dock by the New Haven men as follows:—

C. E. Langden, 17; Wm. Hansem, 21; T. J. Beers, 17; R. Walker, 8; Waterhouse and Folsom, 29; Howard and Merwin, 27; J. F. Jorey, 11; A. J. Thompson, 25; Henry Thompson, 25; R. Armstrong, 18; W. Fulton, 21. Total, 219. The New Haven team was very much pleased with their trip, and feel under many obligations to the Secretary and Captain of the Branford team. C.

As we have no account of the Branford team's score, we presume our New Haven friends would have us give their competitors the benefit of the doubt, and so we presume the Branford men came in ahead.

MASSACHUSETTS — *Spencer, Oct.* 15th. — The annual hunt and supper of the Sportsmen's Club occurred here to-day. At a very early hour in the morning the two parties, chosen respectively by Frank N. Prouty and E. M. Bliss, started for the woods and fields, and "the slaughter of the innocents" was kept up till the hour of rendezvous at G. A. R. Hall in the evening. The following was the result: 11 partridges, 1 snipe, 6 bluejays, 12 blackbirds, 1 coon, 2 rabbits, 19 grey squirrels and 9 red squirrels. A. Putnam bagged four partridges, F. N. Prouty a crow, and L. M. French a snipe. The following is the score of counts as made by either side:

F. N. PROUTY'S SIDE.		E. M. BLISS' SIDE.	
F. N. Prouty	105	H. Brewer	110
A. Putnam	200	D. C. Luther	105
L. M. French	115	E. P. Cutler	30
E. O. Snow	75	H. B. Clark	83
E. Wood	180	Geo. P. Clark	55

Total	785	Total	530

After the count had been made and the result announced the members of the club with their families, in all about 100 persons, sat down to one of the finest suppers it has been our good fortune to see spread in Spencer.

Spencer, Oct. 24th.—The following officers have been chosen by the Sportsman's Club for the ensuing year:—President, John Boyden; Vice-President, E. P. Cutler; Secretary and Treasurer, A. W. Curtis; Executive Committee, James Holmes, H. Brewer, and L. M. French. Ten new members have been added to the club.

NEW YORK—*Eldred, Oct.* 2d.—Deer-hunting commenced here last week; three were killed in this town and one large bear. Deer are in fair numbers. Partridges are in the thickets and swamps, and appear to be hard to get at. Some woodcock have appeared within the last few days, and rabbits are plenty. BRADLEY.

Hornellsville, Oct. 20th.—For two months hardly any shooting done. The best bag lately was Burt Elliott's—seven woodcock and two ruffed grouse in one afternoon. JOHN.

RAILROAD MEN ON A VACATION.—*Editor Forest and Stream:*—A party of twelve, composed principally of high officials of the popular Lehigh Valley Railroad, during the recent warm weather spent a week among the Thousand Islands of the St. Lawrence for rest and recreation. A large and comfortable establishment on one of the islands, belonging to two or three of the party, furnished a place for rest; a large steam yacht and numerous rowboats of the most improved model, piloted and propelled by the best fishermen on the river, gave every opportunity to be desired in the way of locomotion. Every boat was fully equipped with improved fishing tackle, and each sportsman was provided with a good double-barrelled shot gun or Winchester rifle. The table was kept well supplied with the best fish in which the river abounds, and wild duck, of which there were a few flocks feeding in the bays and inlets. Although the ducks were in considerable numbers they were very shy, and it was with great difficulty that they could be approached. Owing to the very smoky condition of the atmosphere decoys seemed to fail to draw as well as usual, and the sportsmen depended mostly on long and difficult shots to bring down their game. It was here that the long-range shot cartridges recently invented and manufactured by Messrs. H, Schleber & Co., of Rochester, N. Y., were almost indispensable, as more than half the birds shot were brought down by those cartridges, and at over fifty yards range some very remarkable shots having been made, bringing down birds at a distance of from seventy-five to one hundren yards when they were flying at a high rate of speed, and many birds were secured that it would be hopeless to try for with the ordinary charge. The weather during the whole week was almost perfect, only one windy day occurring to interfere with the fishing and shooting. The party returned to their labors much invigorated and pleased with their sojourn among the "Thousand Isles." SPORTSMAN.

NOTES FROM VIRGINIA.—This year has more fully demonstrated even than usual the futility of counting on much sport with the quail before Nov. 1st. The forests still wear their summer dress. Scarcely a leaf has begun to change color, and the thermometer has been hovering between 85 and 90 degrees in the shade for a month. Your correspondent, a victim to the force of habit, sallied forth on the morning of the 15th, with three other guns and four dogs, who were capable of doing all that dogs could do; but after trying for six well-known coveys, etc., and finding none of them at home, we slunk back, with a strong suspicion that we had made fools of ourselves. My old pointer was the only one of the party who showed any judgment, absolutely refusing to move from heel, and gazing on the exertions of his kennel companions with the most sublime contempt. All parties that I heard of attempting to shoot on that day met with the same luck. We have had two glass-ball contests that have occasioned some excitement in the sporting circle of the county, between teams of six English gentlemen and six Virginian ditto. In the first match the latter were the victors; in the second the Britishers turned the tables on their opponents, winning after an exciting finish by three balls. The matches were shot in the presence of large numbers of invited guests, and were a great success in every way, being the first contests of the kind ever held here. RINGWOOD.

Charlemont, Oct. 21st.

OHIO—*Youngstown, Oct.* 18th.—Quail were never more plentiful here than they are at present; yet, owing to a law passed at the last session of the Legislature, all lawabiding sportsmen are debarred from shooting quail until after November 15th, 1880. In the meantime the pothunters and market shooters will rejoice at the prospect of having such an abundant harvest of birds all to themselves. R. Burnett, B. Miller and J. Miller bagged twelve ruffed grouse and one woodcock in two days' shooting, October 14th and 15th. D. Stambaugh and B. Miller succeeded in bagging eighteen woodcock, one ruffed grouse, and six pigeons on October 11th. Rabbits and grey squirrels are very scarce. Wild pigeons can be found in corn fields in the morning when they come to feed; they are very wild and difficult to approach. A few ducks made their appearance on the river the other day, and were so warmly received by the sportsmen along the banks, that they concluded their summer quarters were good enough for them and returned to them with all the speed possible. BUCKEYE BOY.

INDIANA—*Indianapolis, Oct.* 22d.—The promise is good for quail shooting. The law has been well observed. Squirrels are abundant in the beech and hickory flats. J. H.

Jefferson, Oct. 25th.—Hunting has been very poor. A few partridge bagged. The law on quail has stopped the shooting of them, but we expect to have enough better a year from this time to pay us for our present loss. Shack of all kinds are plenty, and it may call in the squirrels.

ILLINOIS—*Maroa, Oct.* 20th.—On Sept. 29th was organized the Maroa Shooting Club for the purpose of protecting game and the encouragement of legitimate shooting. Officers: E. J. Underhill, Pres.; J. H. Roberts, Sec.

MICHIGAN—*Detroit, Oct.* 18th.—A. C. Hobbs, of Bridgeport, Conn., passed through this city yesterday on his return home from a week's shoot at St. Clair Flats. He had very good success, averaging about twenty-five ducks per day. Some were very fine—more than fine, as your correspondent can certify to, as the kind old soul sent him a trio of fine ones. A. H. Moore and George Fox, of Philadelphia, Penn., and that prince of good fellows, Ed. Gillman, of this city, were out for a hunt Oct. 16th, bagging twenty-seven quail, five woodcock and one snipe.

TENNESSEE—*Savannah, Oct.* 16th.—Our shooting season has opened with plenty of quail; but, owing to the unusually hot weather, few have been bagged. The birds feed only in the early morning and late afternoon, passing the rest of the day in the cane and the briar thickets, from which it is impossible to shoot them. After the frost has killed the weeds, fine sport may be had. WILL.

THE DANGER OF PICKING A CARTRIDGE—*Port Jervis, Oct.* 25th.—The infant child of Mrs. N. P. Cady, of this village, took to its mother on Sunday morning a cartridge and asked to have the copper cap taken off for a top to her lead pencil. The mother, taking the child in her lap, began picking out the fulminating powder with a pin. An explosion followed, and the mother's fingers were blown off, and the three children who stood by her were more or less injured, including the one in her lap. All are doing well. The fingers of Mrs. Cady's right hand had to be amputated, and pieces of copper were taken from the arms and neck of the little ones.

[*From the Kansas City Daily Times, Oct.* 24th.]

"A noticeable feature of this tournament and of other State tournaments held in late years, is the unfailing regularity with which the Parker Gun bears away the emblems of success and other prizes. It is known as a hard shooting and effective gun. The judgment and private opinion of gentlemen shooting to win is surely entitled to some consideration, and is pronounced by them in the use of the Parker Gun. In the inaugural shoot this gun won the entire four prizes, and has gained a place in every match thus far shot. When such is the case the entire credit cannot and should not be given to the shooter, and some quality must be ascribed to the gun itself that renders its execution more perfect and more deadly."
—[*Adv.*

THE NEW JERSEY TOURNAMENT.

The New Jersey State Sportsmen's Association's first annual meeting opened on Monday evening at the rooms of the Jersey City Heights Gun Club. The attendance was good, and in fact more than could be expected for a first meeting. The clubs represented were active and in every respect anxious to secure a favorable termination of the meeting and tournament. Mr. George B. Eaton, the President, and the Secretary did all in their power for harmony, and the meeting passed off most pleasantly. The amount of business transacted was purely in relation to the necessities of State game protection, and otherwise relating to the State shoot. The shooting began on Tuesday morning with contest No. 1, which was open to all amateurs—$5 and the birds; first prize, $100; second, $75; third, $50; fourth, $25. Following is the score—

FIRST SQUAD.

Broadway	1 1 1 1 1 0 1 1 1— 9	Hawes	0 0 1 0 0 1 1 1 1— 6
Martin	1 1 0 1 1 1 0 1 1— 8	Townsend	1 1 1 1 1 1 1 1 1—10
